Mining congress from Utah.

Salt Lakers Will Make a Determined Fight for Permanent Headquarters.

THE AMERICAN

6

THE ACTIVITY AT COLDFIELD.

Secure a Bond on the Imperial-Mineral Patents Received at the Laud Offiice.

As the time of the Mining Congress nt Portland draws near considerable interest is awakened. Salt Lakers are especially concerned in the outcome, and if the permanent home of the Congress is established here, they will be amply repaid for their trouble. That such a move would be of inestimable value to Salt Lake no one can doubt and the business and mining men are sparing neither trouble nor expense to capture the prize.

William H. Tibbals, secretary of the William H. Tibbals, secretary of the Commercial club committee, reports a promisin goutlook for success. On Sat-urday, J. M. Burnell of Denver visited Prof. Tibbals in Salt Lake. Although a staunch Denverite, Mr. Burnell rec-ognized the more suitable location here and assured Prof. Tibbals that his vote would be cast with the Salt Lake dele-gates. Prof. Tibbals also received a let-ter from J. H. Weber of Portland, who is heart and soul for Zion, and is using his influence in the good cause. From the secretary's office several hundred membership applications were sent yesterday. The membership is al-ready up to the hundreds and is rapid-ly increasing every day. The member-ter for in the several membership is al-

ready up to the hundreds and is rapid-ly increasing every day. The member-ship fee is \$5, and annual dues \$2. Every member is entitled to the pub-lished proceedings of the congress. This contains most valuable articles and in-formation contributed by prominent men from all over the country, and is in itself worth the membership cost. Utab is endonyering up have the large Utah is endeavoring to have the larg-est representation at the congress. At est representation at the congress. At least 35 delegates will go from here, and many more who are interested in min-ing. Denver, El Paso and Omaha are Eait Lake's most dangerous rivals, but with such a suitable location and prom-ising conditions, and the energetic manner with which the campaign is being waged, we should certainly pick the

ACTIVITY AT GOLDFIELD.

The Injunction Against Curtis and Ridge Lease Has Been Dissolved.

The new camp of Goldfield, Nev., is rapidly becoming an active center of interest and excitoment. The growth of this mushroom town has been some-thing marvelous and if the indications pan out, it will soon make other larger pan out, it will soon make other larger and older camps look to their laurels. Only last winter was work begun and

agement of the Dos Cabezas Consolidated Gold Mining company, now op-erating in Dos Cabezas. These mines are financed by Los Angeles capital. Another property that is attracting considerable attention is what is known as the Casey gold mines now bonded by T. J. Roberts for eastern capital. An offer of \$80,000 cash for his property was once refused by Mr. Casey, the former owner. If these two propositions prove to be what is claimed of them, the thittle town of Descriptions of the statement of the statement. Dos Cabezas will not be long in attaining a reputation greater than it once

The most prominent producers, to date, are the January, Combination, Florence and Jumbo, which have so far produced \$700,000.

SECURE BOND ON IMPERIAL.

Eastern Company Will Build a Testing Plant on an Oregon Preperty.

Word comes from Sumpter. Oregon, that McEwan, Arthur & McEwan, of that place, in behalf of the Imperial Mining & Development company, an eastern corporation, composed princi-pally of Detroit, Michigan, capitalists, has secured a bond and lease on the Imperial mine in Cable Cove district, contern Oregon and while the consid-

has secured a bond and lease on the Imperial mine in Cable Cove district, eastern Oregon, and, while the consid-eration has not been announced, it is the impression that the deal is largely upon a royalty basis, as the new people expect, at an early day, to put in a small concentration plant, besides which crude ore will be shipped to the smelter. The Imperial has been quite exten-sively developed in the past, and has the reputation of being one of the most valuable properties in that locality, hav-ing made an eighty-ton shipment last year that netted the owners in the neighborhood of \$5,000. So far about 4.006 feet of work has been done in the development of the mile, the most im-portant of which consists of a 1,200 foot tunnel on the vein, and a 400-foot shalt that was sunk on the ore body. In the resumption of operations by the new people the sinking of the shaft will be continued, and a new tunnel is to be driven in on the vein at a point 400 feet further down the mountain side. The driven in on the vein at a point 400 feet further down the mountain side. The richest of the galena ore will be sacked for shipment, while the second class will be piled on the dump to be treated by the new mill as soon as it is ready to be put in commission. If the enterprise proves to be as successful as present appearances would indicate, and the milling process is fully adapted to the ore, it is quite probable that the capaci-ty of the plant will be increased in due

ty of the plant will be increased in due

It is given out that the company has in contemplation other ventures of a himiar nature in that locality.

MILL FOR THE TIGRE.

Arizona Mining Company Will Soon Have New One in Operation.

Four months from today, according to the terms of a contract signed last night, says the American, of Douglas, Ariz., the Tigre Mining company will Ariz, the Tigre Mining company will have in operation a concentrating plant. The plant contracted for is of 50-ton capacity. There will be six concentrating tables, two slimers, and four stamps. An 80-horse power boll-cr will furnish the power required. The cost of the outfit will be \$55,000 created and eraming on the strand

Mr.

mild and healthful.

John A. Kirby, general superinten-tent of the Daly-West mine, at Park City, came down to the city last night,

rected and running on the ground. In the light of previous performances it is safe to say that if the mill oper-ates steadily for one month it will turn out concentrates sufficient to

and is in consultation with the of-ficials of the company. When seen by a "News" reporter this morning, Mr. Kirby stated that the mine was look-ing fine, but that he did not care to ore than pay for itself. The Dos Cabezas mining district in this county never looked better ac-cording to Hon. J. J. Riggs, who is in the city today from his ranch in the Chirleuahua mountains. Considerable activity is being shown by the mansay much about its physical condition, as so much "hot air" had been in cir-culation about this splendid property of late.

THE MOUNTAIN CITY BOOM.

Slowly Recovering from Effects of the Closing of the Nelson Mine.

William Willis, writing from Moun-Ajax, 1,00 at 3½. Daly-West, 30 at 13.00, seller 10; 50 at tain City, Nev., states that the camp is Daly-West, 30 at 13,00, seller 10; 50 at 13.00, seller 15. Goldfield, 1.000 at 5. May Day, 300 at 1%. Martha Washington, 1.000 at %. New York, 2.000 at 3½; New York, 1.509 at 3%; 1.000 at 3½; seller 60; 100 at 3%, seller 60; 500 at 3%; 500 at 3%; 500 at 4. slowly recovering from the blow given it by the closing down of the Nelson mine, after the company had proven that it had an ore shoot that had been traced for a distance of 125 feet in length with every indication present that the ore body goes to the deep. In commenting on the work now in progress in mine development in that Tetro, 500 at 311/2.

section, Mr. Willis says: "M. M. Johnson, for Samuel New-house of Sait Lake City, has begun work on the Kunz group. There is a large vein on this group, which, tak-en as a whole, makes a very fine con-centrating proposition, as the ore ranges from 20 to 40 ounces in silver and from \$2 to \$6 in gold to the ton. The Kunz group joins the Nelson mine, TWELVE FEET OF \$60.ORE. A Nevada Mine That is Responding Noband is looked upon as being very val-uable property. Mr. Johnson has also secured a bond and option on the old Mountain City mine, and has begun its development with a force of 16 men. ly to Intelligent Exploitation, The Searchlight, of Searchlight, Ne-vada, in its last issue, tells of the splendid achievements that have been "Work is progressing in the develop-ment of the Greenback mine and a crosscut has been started from the bot-tom of the incline shaft at a vertical depth of about 100 feet. When the vein

made of late, in the Pompeli mine in this great gold camp, the disclosure, made at shallow depth, giving to the world another "breadwinner." In commenting on the strike, the is cut in the crosscut, at this depth, it is believed that a body of sensationally rich ore will be uncovered. This is the property in which almost pure gold and

district

In commenting on the strike, the Searchlight says: Twelve feet of ore, that averages bet-ter than \$60, is what the Pompeli Min-ing company now has exposed in the cross-cut on the 262 ft, level. Manager Spare's persistent efforts have been crowned with success. The property can now be safely classed as a mine and only requires a mill to be-come one of the large producers of the silver ore has been found in the past. 'R. R. Ives of Ogden has broken ground for the new shaft for the old Resurrection mine, and the shaft will be sunk to the 200-foot level without ome one of the large producers of the

be sunk to the 200-fooi level without delay. This mine, In the early history of this camp, produced some of the richest ore ever found here, and much is expected of it when development has reached a more advanced stage. "On the Kanakha, three miles from town, Davidson & Ryan are opening up a fine body of high grade ore that runs from 80 to 900 conces in silver to the ton, accompanied by encouraging val-ues in gold. The outlook for this pro-perty is excellent." Mr. Willis says that fully 100 pros-On the lower level it was necessary to cross-cut south a distance of forty feet before the ore was struck. Then two feet was struck which ran \$8.28 Yesterday the cross-cut was into the ore twelve feet, and no hanging wall yet in sight. Four average samples of the (welve feet have been taken and

of the twelve feet have been taken and in each case the assay returns were better than \$40. When the hanging is reached the vein will be drifted on for 100 feet to the west, in which direction the ore shoot pitches. When this work has been completed, Manager Spare says that the company will install a hoisting plant and resume sinking. The beauty of the proposition lies in the fact that there has been a marked improvement with depth. The shoot has been opened on all three lev-els, and on each successive one it has Willis says that fully 100 prospoctors are scattered about in the hills around Mountain City, and that they are all enthusiastic over the surface showings in that district. Mountain City is an ideal camp, as timber and water are plentiful, and the climate is
