

tor, to address a public meeting there.

BERNE, 29.—The President of the Swiss Confederation, on receiving Minister Cramer, expressed the sorrow and anger of Switzerland at the act which brought President Garfield to the brink of death, and his earnest hope for his recovery.

GENEVA, 20.—A huge mass of rock and earth has fallen from the mountain side of Louvex, canton of Quinze, and blocked up the course of the river Jobel, an affluent of the Rhine, converting the valley into a lake.

PARIS, 29.—A number of fires are reported in Algeria. All the country around Philippoville, to the extent of 60 square kilometers, is one vast conflagration. Slora, the port of Philippoville, is destroyed. The forest of Caoul is ablaze, and the flames, fanned by a violent sirocco, are carrying all before them. It is hardly possible for the garrison and population to effect anything in the way of subduing the fires, on account of the heat. It is feared the fires originated with the Arabs.

ATHENS, 29.—The Turkish Governor of Amyros, Thessaly, is notified that occupation of that place will begin on Monday.

The heat in Athens for the past five days has been excessive. Hot wind continued to blow day and night—as it blowing from the Lybian Desert. Deaths from typhoid fever are at the rate of 15 a day. There is an exodus of families to the country or adjacent islands.

LONDON, 29.—The destruction of crops by rain in various parts of Ireland is very great.

PARIS, 29.—The *Soir* says: A great sensation was created on the Bourse by the sudden disappearance of Felix, chief of the Union Finance Bank. It is stated that he took the contents of the strong box estimated at £100,000 that was to have paid the creditors of the bank today; but the latter on going to the institution found it closed.

CORK, 30.—While the tenants on Sir George Colthurst's property, near Mill Street, were rejoicing on Sunday over the marriage of their landlord, an armed and disguised party, nearly 100 strong, surrounded the tenants and fired into them, wounding ten. Two are in a precarious condition. No arrests.

#### How Boilers May Explode.

The success which attended the recent western experiments in boiler explosion, undoubtedly entitled the experimenter's theory to respectful consideration. It is claimed that the explosion alluded to, which attained results that government officials have vainly labored after for years, was due to superheated water, and Mr. D. T. Lawson, who conducted the experiment to its successful termination, believes that many other explosions are due to the same cause. The theory is that when over-heated water is relieved for an instant from the pressure of steam upon its surface it bursts into steam and exerts an irresistible pressure upon all portions of the boiler shell. It is a well-known fact that water is seldom seen in the vicinity of an explosion, and this is supposed to indicate that there was none in the boiler; but although the same lack of water was noticeable after the Western explosion, the boiler was known to be three quarters full a moment or two before it burst; so the theory of sudden dissipation into steam seemed to be confirmed. Success is a powerful argument, but aside from the particular success alluded to the explanation is logical enough to demand consideration, and to warn engineers against "firing" so hastily and fiercely that the ports cannot carry off steam as rapidly as it is generated. Safety valves are supposed to relieve boilers of superfluous steam, but they have failed too often to be trusted unless they are watched as closely as any other portion of the machinery, as they seldom are.—*N. ## AYER'S CHERRY PECTORAL,

For Diseases of the Throat and Lungs, such as Coughs, Colds, Whooping Cough, Bronchitis, Asthma and Consumption.

The few compositions which have won the confidence of mankind and become household words, among not only one but many nations, must have extraordinary virtues. Perhaps no one ever secured so wide a reputation, or maintained it so long, as AYER'S CHERRY PECTORAL.

It has been known to the public about forty years, by a long continued series of marvelous cures, that have won for it a confidence in its virtues, never equaled by any other medicine. It still makes the most effectual cures of Coughs, Colds, Consumption, that can be made by medical skill. Indeed, the CHERRY PECTORAL has really robbed these dangerous diseases of their terrors to a great extent, and given a feeling of immunity from their painful effects, that is well founded, if the remedy be taken in season. Every family should have it in their closet for the ready and prompt relief of its members. Sickness, suffering, and even life is saved, by this timely defence. The prudent should not neglect it, and the wise will not. Keep it by you for the protection it affords by its early use in sudden attacks.
