The feature of the call on the exchange today was the phenomenal drop in Dalsy. Beginning at 9% this stock fell back to 7 before the call closed. Altogether 32,000 shares changed hands.

The report that Mammoth is in a position to market its ores caused quite a flutter on the curb yesterday afternoon, but the call ended today with \$2,50 bld, \$2,25 asked.

Daly-West was stronger, selling up to \$12.00. Eagle and Blue Bell "took a tumble" to 1.45 and Geyser-Marion participated at 29%.

Sacramento sold at 31%, while Petro went up to 33. Northern Light responded at 181% and Joe Bowers showed signs of recovery, selling for 14%. Sunbeam was stationary at 661/2 but Hercules was heavily traded in down to

ACTIVITY IN WASHINGTON. A Mine at the Cascades Sells for a Hun-

Mammoth in Position to Get Its Ore The Sacramento will most probably pass this month's dividend. Such was

the statement made today by one of the officers of the company. Some additional claims have been recently bought by the company but it is thought that this fact of itself would not prevent the mine from handing out this month's dividend if the mine were in as good shape as ever. A statement was recently made by a man connected with the mine that the company has lots of ore to draw on, but that the cave-in which occurred some time ago had proved very disastrous in that it buried up a large body of excellent ore. This cave in, it is stated can not be worked during the winter and it is therefore thought by some that this gold producer will not again step into

in Copper. The reported Tesora strike is fully up o epacetations. Such was the infor-nation received today from one who has just returned from the mine. is stated that there is nothing better in the district than the body of ore that has been encountered in a drift off the 200 foot level. The assay values on the samples shown could not be learned but they are said to run high, much higher in copper than any sam-ples before tested. The ore is clean and seems to indicate the truth of the above remark. Besides carrying phenomenal values in copper, the values in gold and silver are also a very encouraging feature.

It is the purpose of the management to continue developing and opening up the property and no attempt will be made to get out the ore until the mine is in first class shape.

NEW MAMMOTH TROUBLE. An Application for a Receiver Was to be Made This Afternoon.

The conference between the New Mammoth miners and the management took place yesterday afternoon according to agreement but no conclusion was reached that was satisfactory to the men. They have, accordingly, filed liens against the property. Superintendent J. E. Beveridge has set up a claim for over \$800 and Harry M. Shields, foreman of the mine, claims \$118.55 due him as wages. Additional liens have been filed by the men amounting in all o about \$3,060. It was stated today by former manager E. G. Rognon that ap-plication would be made by the big creditors to have a receiver appointed an assessment, it was said, would likely be made with which to pay off the miners, and then the work of completing the tunnel would be finished under a receiver's management.

HERO WILL INCORPORATE. Has Three Claims Adjoining the Lilly, in Tintie.

Articles of incorporation of the Hero Mining Company are to be filed in a day or two. The incorporators are H. day or two. The incorporators are H. B. Cole, W. C. Orem, W. H. Child, formerly of Boston, and Chas. H. Knex, of Chester, Miss.

The claims of the company consists of the Dewey Nos. 1, 2 and 3, located north of the Uncle Sam and Humbug cleims in Tintic district. About 250 (set of work has been done on the claims, which includes a shaft 65 feet deep, from which a drift has been run to a 5 foot vein of tale, which it is belleved, will lead to values similar to those found in the Lilly mine adjoining. With the proceeds to be realized from the sale of 200,000 shares of treasury stock the company proposes to begin work on what is considered a very

promising prospect. Silver Shield Shipments.

The drift from the 65-foot winze off the tunnel level of the Silver Shield has opened up a body of ore which, it is believed, will afford eight month's stoping. The mine is said to be look-ing better today than ever before. Two cars of ore are reported to be loading and another two cars are promised on the 1st of the month.

THE "ALICE" READY FOR WORK. During the Time Repairs Were Being Made Much Ore Accumulated.

Special Correspondence. Mammoth, Nov. 23.—The little engine of the New East Tintic Rallway, which was broken down some time ago is again in running order. During the period that the "Alice" has been laid up for repairs considerable ore has accumulated in the ore houses of the Mammoth Mining company and it was only through the use of wagons and a similar eagine belonging to the Salt Lake and Mercur Railway company that a shut down of both the Mammoth mine and mill was awaited. A new en-gine has been ordered to take the place of the "Alice" but it will be some time before it will arrive. This railroad runs from the Mammoth mill to the Mammoth mine over a very steep grade and besides transferring all the ore taken from the mine to the mill and railroad below, furnishes the mine with timbers and coal.

BUSY DAY WITH POLICE

Probate and Other Cases in District Court-Marriage Licenses-Local News Notes.

For some time the police department has had very little to do, but yesterday was a busy day. At 10 a. m., Mr. Peterson, owner of the blacksmith shop just across Weber river bridge, came to the department and reported that his shop had been robbed of about \$20 worth of tools sometime during the night previous. The police immediately started out on the hunt and at noon they had recovered all the stolen articles, which had been sold to a secondhand store. Detective James Pender, obtained a

description of the party who had sold the articles stolen, and started out to find the perpetrator. At about 12:30 p. m., he observed two young, welldressed fellows on Washington avenue, who looked suspicious, and promptly placed them under arrest. When placed them under arrest. When searched at the station they had two pairs of new pants and several new handkerchiefs in their possession, and court. They tried to lose the locks on the way over to the station, but the detective heard them drop on the pavement, and reminded them that they had lost their "cuff-buttons." Later in the day it was found the pants were stolen from Nye's clothing store, and the handkerchiefs from Burt Bros'. The young men who are about 24 years of age, when confronted with the facts, confessed to the crime, and gave their names as J. H. Lynch and Thos. Moore. INVESTIGATING UTAH IRRIGA-Arthur P. Stover, of the irrigation pureau of the United States department of agriculture, with headquarters at Cheyenne, Wyo., is in Provo studying the Utah system of irrigation, and especially the tributary streams of Utah lake and Jordan river which is taken as a fair sample of Utah irrigation. At present he is now copying all the decrees of the court in irrigation matters. It is the purpose to report the method of diversion, capitalization and management of canal companies and the expense of maintaining. In the pring and summer the streams will all be measured and a map made showing the locations of the same. In fact everything pertaining to irrigation will be reported and in the near future issued in bulletin form by the department for distribution among those in-
