

## MINING, BUSINESS AND STOCKS

BRISK TRADING  
ON THE EXCHANGE

Crown Point and Mountain Lake  
Made Heavy Gains During  
Today's Early Calls.

OHIO COPPER ON OPEN BOARD.

Bingham Stock Bought Up to \$6.60  
—Lower Mammoth Higher—  
Closing Quotations.

The market for mining stocks was in fine form again this morning and the total sales of the two early sessions of the day came very close to the \$50,000 mark. The heaviest trading was done in Crown Point, Mountain Lake and Beck Tunnel Consolidated. The former opened with a long list of buying orders in the possession of brokers with the result that the stock sold from \$1.05 up to \$1.20 a share. Mountain Lake began business at 90 cents and climbed up to \$1 a share without the slightest difficulty and was still in demand at the latter price when business ceased. Beck Tunnel closed at 19 cents a share higher than at the opening.

On the open board, Lower Mammoth did some springing, closing with a sale at \$2.75—a gain of 20 cents a share during the call. May Day held its own. While Uncle Sam ended a shade higher. Among the unlisted stocks, Ohio Copper figured conspicuously, selling at \$6.50, \$6.55 and then at \$6.60. The stock closed on a bid of \$6.55, with an offering at \$6.55. Emma Copper sold at \$6.50 and Signal Peak at the same price.

The closing quotations and sales were:

## MINING IN MEXICO

## Col Greene Tells About His Interests

## In Southern Republic.

New York, July 22.—Col. William C. Greene now in Mexico making an inspection of the mines of the Greene-Gold-Silver company in a late letter to New York stated that he has just made a trip down into Sonora over the extension of the Southern Pacific railroad southward from Guaymas, and that great progress was being made on the construction work. He said about four kilometers of track have been being laid on the three fronts; on the main line toward Guadalajara, south of Navajoa, Sonora; on the beach line from Navajoa to Alamos; and the third up the Yaqui valley toward Tonichic where Col. Greene's Sierra Madre & Pacific from Juarez, in the state of Sonora, and now being extended southward to the Mexican coast at Guaymas, Chihuahua, will connect with the Cananea, Yaqui river and Pacific road when extended through the Sierra Madre. The most important works now under way on the Greene-Gold-Silver properties is the harnessing of the Falls of Basaschic which are 570 feet high in one sheer fall. These falls are the property of the Greene-Gold-Silver company, which is building three dams above the falls to impound water and develop power for the operation of the Concho mines. The falls are among the highest in the world and are one of the most beautiful scenic features of all Mexico.

## RETURNED ENTHUSIASTIC.

## Shareholders of Con. Flagstaff Well

## Pleased With Mine Conditions.

An enthusiastic lot of easterners came down from Alta last evening after a day's stay in that camp. The party consisted of Thomas J. Pringle of Milwaukee, Dr. W. P. Harlow of Boulder, Colo.; L. P. Gorton of Milwaukee and several other gentlemen. The stockholders in the Consolidated Flagstaff, Emma Copper and other mines in the Little Cottonwood district. Mr. Pringle is president of the Consolidated Flagstaff company and he expressed himself today as being very well pleased with conditions at the mine and entertains the utmost confidence that the next few months' work will bring about a decided change for the better. "It is going to take a little time," said President Pringle, "to get the mine in shape, but we feel we have a good property and that it will again become one of Alta's principal producers. We have the mine well equipped and ought to make good headway with development from now on."

## The main tunnel is in about 2,800 feet

## and President Pringle incidentally

## threw a bouquet at the management by

## saying that the work has been done

## cheaply and well. The directors of the

## company are holding a meeting this

## afternoon and the matter of providing

## additional power facilities will receive

## consideration.

## It is the intention to begin driving

## two cross cuts, which will mean the

## installation of some additional machine

## drills.

## PREFERRED STOCK

## IN UTAH-IDAHO SUGAR COMPANY

## Is of the par value of ten (\$10) dollars

## per share. To those who wish a safe

## investment paying 7 per cent, cumu-

## lative dividends per annum, we can

## recommend this stock. Besides this 7

## per cent dividend thus provided for the

## preferred stock also shares in additional

## earnings of the company; a provision

## not often found under like favorable

## conditions of preference. It is only a

## question of time, too, until the market

## value of this stock will be \$11 or more

## per share. Send us your orders. Orders

## for this stock will be filled in turn as

PRODUCTION OF  
COPPER, NEW.

Col. G. W. E. Dorsey Says Output  
Of Mines is Six Hundred  
Thousand Weekly.

## DISTRICT LOOKS BETTER.

Mineralized Area of Camp Greater  
Than Has Been Supposed—  
Recent Strikes.

Col. G. W. E. Dorsey, formerly of this city, but now prominently identified with mining affairs in Goldfield, Nev., was in the city for a few hours en route to his home in Fremont, Neb. The colonel is an optimist of the pronounced type, especially when the mining camps of Nevada are concerned.

In speaking of Goldfield, which he regards as being the premier of all Nevada gold camps, he stated that the weekly production of the district now amounts to about \$300,000, but believes within 60 days the record will show larger figures.

"Recent strikes," he said, "in the western and southeastern portions of the district, have thoroughly demonstrated that the mineralized area is much larger than has been supposed. This means more money, consequently more dollars."

"I have been asked by several of my friends 'why the mines of Goldfield are saying no dividends, notwithstanding the production is heavier than it ever has been at any time in the history of the camp.' I have explained the matter in this way: The five mines that were a dividend basis last year are included in the merger which formed the basis for the Goldfield Consolidated Mines company several months ago. It has taken the management of the Consolidated company a little time to round out its plans for the future and a majority of the directors have favored conservatism. Goldfield Consolidated will be a permanent dividend basis. The treasury of the organization contains a balance of something like \$2,500,000."

"Another reason why Goldfield has not been heard from in a dividend way lies in the fact that 90 per cent of the camp's production has been from leases not incorporated in the Consolidated. About the only exception to this is the Francis Mohawk Leasing company, which has paid three dividends of 6 per cent on the capital stock and has money enough on hand to pay six more, and which will be paid out to shareholders quarterly."

Col. Dorsey spoke of the strike made in the Mohawk mine, where a body of ore has been opened showing a width of 15 feet and assaying from \$100 to \$250 a ton. This he considers to be the greatest strike ever made in any mining camp.

## "Yes, Goldfield is a wonderful camp,"

## said Col. Dorsey. "It is steadily for-

## ward and there are no labor troubles

## to handicap producers and everybody is

at work."

PUMPING AT ONTARIO.

Good Headway Being Made With

Work at Park City Mine.

The work of unwatering the Ontario has been going along nicely this week, without the least interruption. The hampered operations at the beginning of the week, which the Record of Park City, the water is still going down at the rate of two feet a day, and when the tanks are filled to the top, the pump will be installed still greater headway in the work will of course be made. The tanks are at present being raised and dumped at the 1,500-foot level at the rate of one foot a day. It is readily understood that at present the operations are rather strenuous. The management is unable to state when the shaft will be sunk, but it will be water to allow workmen in the tunnel from the mine end, but if work goes successfully without further mishap, it will be within a reasonably short time.

The zinc plant for the Daly Judge

company is a sure go. Officials of the

eastern company which is to erect the

plant, are now in the city signing up

the situation and plans and speci-

fications will soon be forthcoming. The

plant will be put up near the site of

the former one and will be modern and

up-to-date in every respect. In fact, the

latest and most complete of its kind.

The value of such a plant to the Judge

company can well be imagined, for it

will be in commission by Janu-

ary, and work is to be commenced in

60 days.

Supt. McGill of the New York Be-

nana mine is being well com-

mended by competent authorities on the

perfection of a working model of a

car trolley made by him. The trolley

is being placed on the Belcher track at

S. Hansen and Alfred Hays of Con-

solidated, and is said to be far

superior to anything of its kind

now on.

Mr. McGill's model of the

type is being used in a most excellent

piece of mechanism.
