PEFFET FVFNING NEWS: SA UR AY, DECEMBER 17, 1904.

Point Out Some of the Pressing Needs of the City at This Time.

NATURAL ADVANTAGES HERE.

Only Our Own Faith and Works Necessary to Emphasize Our Superior Municipal Conditions.

As we go through the year, a day at a time, how many of us realize the grand total of Salt Lake's improvements and large real estate transactions for 1904?

We have all heard of people who are so cool blooded that butter won't melt in their mouths, but it is safe to say none of us have heard of another city of our size which would take so coolly the building of a half a million dollar U. S. building; the putting of a quarter of a million dollars in improvements at Fort Douglas; of one-third of a million dollars in the Holmes apartments; a quarter of a million dollars in the Atlas block; another quarter of a million dollars put into yardage, trackage, and improvements by the O. S. L. Railroad , while more than that sum has been put into the smelting plants in our southern suburbs.

These large enterprises alone are enough to stimulate real estate activity in any city of this size, unless its citi-zens are of the Rip Van Winkle sort. But that doesn't begin to enumerate and that are trying to awaken us to a realization of the great future in store for us. During this same period many thousands of dollars have been put into the University building on the east bench; the Presbyterian church; the Catholfe cathedral; Lafayette school; Independent Telephone build-ing and underground cables; the beautiful Latter-day Saints' hospital on the north bench, and Labor hall; about one mile of asphalt street paving; to one mile of asphalt street paving; to say nothing of miles of sidewalk, water and sewer extensions. Then we have the new \$140,000 fire proof Y. M. C. A. building and plant, worthy of a city of half, a million people, and nearly ready to do its share in fitting our young men for thely inheritance of Greater Salt Lake, which we can plainly see loom-ing up ahead of us. And joining hands Lake, which we can plainly see found-ing up ahead of us. And joining hands with the Y. M. C. A. in the work of uplift for our community is that grand gift to our city of the Packard library, just up and under cover. And all the improvements mentioned of the platter of the pacture.

so far for 1904 are of a public nature. Then a day's ride around Salt Lake will

our people. Many small and some large manufacery Co. cold storage plant: the Den-halter bottling plant; the Cement Building Block Co.; the Utab Fire Clay Co., manufacturing pottery, etc., etc. And many blocks have built their way into the business of the city and yet there is scarcely a vacant store room in the business district. Then after nature has done her best for us by planting Salt Lake in exactly the right place geographically for a large city, centrally between Denver and San Francisco, and has thrown her sheltering hills up all around us and sprinkled those hills with all known minerals; and tempered our climate by the moisture from our great inland salt sea and the chinook breezes from

prove. Our answer is that we have heard tell of cities with parks. The FLESH BUILDER streets can spare some space for parks, and so be beautiful. Or they can be The liver of the cod fish produces oil that is a wonderful flesh builder. No fat or oil can compare with it in that respect. To get the best out of it, it must be emulsified and made like cream. In Scott's Emulsion it is prepared in the best possible form to produce the best possible results. Thirty years have proven this.

We'll send you a sample free. COTT & BOWNE, 409 Pearl Street. New York.

the balmy Pacific; after we have built the baimy Pacific; after we have built homes, manufactories, stores, schools, halls and libraries; after we have wat-ered, sewered, sidewalked, paved, sprin-kled, lighted and carred our streets, after the Latter-day Saints have given us more advertising as the Zion of those of their faith than any city has peopled show Leurestaw was in its received since Jerusalem was in prime, will some one please rise to the occasion, and tell us why we, as a people, sit here and more and walt for some wideawake, pushing, energetic friend to come along, some wise man from the east, and mentally call us as many kinds of fools as he can lay his tongue to, and physically prove that we are just what he calls us, because we have not realized all these things our-selves and risen to the mark of our-high calling and made our city to be just what all the laws of nature and man intended it to be-what you and all of us must work to make it-Greater Sult Lake.

One man will tell you that what we need is manufacturing. That is good. It will come. But we venture to say that any of you will have hard work to name a manufacturing city of our size that any divergence of the same size. that produces more wealth or employ-ment than do our smelters. We need faith in Greater Salt Lake,

Another will tell you our tax rate is too high and scares away immigration: that assessed values should be raised and rates reduced-and yet they must know that just so much has to be raised in either case-and, that faulty equalization is the only thing in taxation that needs attention, either be-tween like properties or between city to make Salt Lake City and Salt Lake county identical in boundary, one and the same. We need faith in Greater Salt Lake.

Another will say we need mor railroads -just so they are coming—The Los An-geles—Moffat—Western Pacific and Northwestern, all headed direct for Salt Lake. We need faith in Greater Salt Lake.

Anot.er will remark that we need new blood, new life and energy and push. We answer by asking, why not stir ourselves, wake up to our oppor-tunities and advantages and start a convince anyone that a half million dollars or more has gone into homes for our people. It is a shared of ourselves for Many small and some large manufac-tories have started, among them the Silver Bros.' foundry; the Faust Cream-in ourselves and we need faith in Greater Salt Lake. Another wall that we cannot expect ity capital to come here as long as we tax mortgages running to our home people and do not tax mortgages running to non-residents. We trust that the wall will be loud and long enough to reach the ears of every member of our next Legislature and strong enough to induce the passage of a law correcting that most unjust hind-rance to our growth. For you know a just law giver does not require the impossible of any man, but that law weakens our faith in Greater Sait Lake Another may feel that our streets are too wide and too expensive to im-

and so be beautiful. Of they can be narrowed outright by deed to abbutting property owners. We have the choice to exercise or not as we please. If parked along the center of streets hav-ing car lines, no doubt arrangements could be made with the street rallway company to sup a sprinkling car daily npany to run a sprinkling car daily I thus reduce the cost of caring for the parks. But many think our wide streets are the pride of the city, or were before our city engineer con-ceived the idea of a railroad grade for city streets and commenced the wholesale slaughter of our beautiful shade trees. It would seem the sensible way trees. It would seem the sensible way to save the trees, even if the walks had to be left a few feet above the grade of the roadway. Before now hills have been made to add beauty to park in prairie countries, a touch of nature, showing a stretch of rolling walk nice-ly shaded would be charming rather than otherwise. The importance of the grade should be minimized, not nature and the shade trees. It wouldn't seen just the proper thing to make the bed the item of importance and to cut off the children's limbs to make them fit the humble beds of their childhood. Don't make the grade the important item. The beauty of a city is one of lits best assets. The shade is one of lits beautify and build up Greater Salt beautify and build up Greater Salt

Lake Some people have faith in Greater Some people have faith in Greater Sait Lake as evidenced by the purchase of the Hawkin's block at about \$90,000, the Hill block at about \$40,000, and the Scott-Strevell block at about \$75,000. These we believe were among the largest deals in 1904 and all were on Main street, Maoy large and heating bounds were built large and beautiful homes were built during 1904. Among them⁵ M. H. Walker's elegant Brigham street residence, costing in the neighborhood of \$100,000. Has it ever occurred to you that our home people who have made money in the mines or in other ways are doing the handsome thing in buildare doing the handsome thing in build-ing their fine homes right here in Salt Lake rather than in some large east-ern city. This fact can't long escape the notice of eastern people, and is the best recommendation of Salt Lake that could be given. Our climate for the year averages up with any climate on earth. We don't need to go south to avoid the cold of winter nor to the mountains to get away from summer's heat. We are on the mountain slope. Many of our wealthy people have their summer homes only an hour's drive from their city home. Col. E. F. Holmes bought a fine country home of E. H. Airis out at Mill Creek just late.

ly. And thus they are showing their faith in Greater Salt Lake. What have we to suggest for the future? Well We are doing pretty well, not much. thank you, as it is. We would urge the cultivation of faith in our city, its numerous advan-tages and consequent necessary advancement. We would urge the re-peal of the morigage tax, or its modi-fication, so that the charge against us of double taxation could not be made. Then, last, we would urge every able bodied citizen to join the Real Estate association in an effort to cor-rect the unjust ratiroad discrimination that we are enduring. Do you realize that many tourists can only get stop over privileges in Salt Lake of

from three to six hours—barely time to hear the pin drop in the Tabernaele, to register there, to see Brigham Young's grave, and to grab a sandwich at a lunch counter and run for the train. They learn nothing of our smelter industry, and other manufac-turing interests, our magnificent school system, our fine churches and public ings, and parks and Fort Douglas

1904 A RECORD BREAKER

DRS. SHORES & SHORES, SALT LAKE'S POPULAR EXPERT SPECIALISTS-HAVE BROKEN ALL PAST BRILLIANT RECORDS IN THE YEAR ABOUT TO CLOSE.

50 Per Cent More Applications For Treatment.

WERE MADE DURING 1904—THA" ANY YEAR SINCE DRS. SHORES FIRST OPENED THEIR OFFICES IN SALT LAKE CITY—NEARLY 15 YEARS AGO.— ABSOLUTE PROOF THAT SICK PEOPLE BELIEVE IN THESE MASTER SPEC-IALISTS AND HAVE APPRO VED OF THEIR SPLENDID WORK AND HUNDREDS OF CURES.

90 Per Cent More Cures Than Ever Before.

Owing to the fact that during the early part of 1904-Drs. Shores & Shores made several Important discoveries which fairly REVOLUTIONIZED the Modern practice of medicines-the Doctors have been able to cure 90 per cent more cases this year than was ever possible before-SIMPLY BECAUSE THEY NOW CURE HUNDREDS OF CASES THAT UNTIL THIS LATEST DISCOVERY WAS MADE-WERE INCURABLE.

Drs. Shores have made an enviable record in Utah-but they are not satisfied with the work of "YESTERDAY"-they are progressive, and up to date-and constantly keep in touch with the World's best and brightest thoughts on Modern Medicine, and as soon as a New theory has been PROVEN OF VALUE-Drs. Shores are the first to adopt and perfect it.

Drs. Shores' rates are low and uniform-\$5 a month-medicines FREE for all Catarrhal Chronic ailments, makes it possible for the poor as well as the rich to be cured. Consultation and Advice is always free and Confidential by mail or at the Office. Call or Write,

A GRATEFUL LADY.

Mr. Wilson writes: "Dear Doctors-Here is my photo, taken last Mr. Wilson writes: "Dear Doctors-Here is my photo, taken last spring, and is so good that anyone who knows me will quickly recog-nize it. I just want to say to you, that I have not had a sign of my trou-ble for two months, no cough, no hawking and splitting, no more stomach trouble, and I sleep like a baby-in fact I feel like a new man, and you would hardly recognize me as the invalid who wrote you a few months ago. I am glad to testify in public as I do in private, that Drs. Shores cure Catarrh in all forms. You may use this as you see fit. Sincerely, J. W. WILSON. Thankfully,

MRS. MARY SWAN, Ogden, Utah.

Mrs. Swan says: "I deem it a Christian duty to tell the world what Drs. Shores have done for me. For ten years I have been an invalid-suf-fering from catarrh, kidney and livertrouble, and a weakness that all wo-men will understand. Doctor after doctor failed to help me-patent medicines and electricity was useless, and when I heard of Drs. Shores curing my cousin (Mr. Peters), I went to them as a last resort. Two weeks later I began to feel like a live woman; six weeks later I was almost well. Today I am entirely cured, free from aches and pains, and so happy I can not say enough in praise of these wonderful doctors. My advice to all who are

It is a burning shame to allow travlers to get such a meager idea of our ity. We want not only the man with the hoe, but also the man with the dough, and they should be able to stop over as many days at least as they are allowed hours now. And every jobber, shipper, and business man should register a vow that they would never rest in their efforts until this discriminaon against us is corrected

In this same effort should be included the adjustment of freight rates, so that our manufactories may not be wipe out of existence by freight rates which favor their eastern competitors. Le these matters be properly adjusted and it would be impossible to stem the tide of immigration and capital that would

set in towards our fair city. With that growth the city and county of Salt ake could be made one, and then our expenses of administration would be lessened and we could regulate our tax areassment and levy to suit ourselves and without favoring the county as against our own interests, and Greater Salt Lake will then have gotten beyond the faith stage and be an accomplished

INCREASE IN POLICE REVENUE HE year of 1904, up to Nov. 30.has been the most "strenuous" in the history of the Salt Lake police department, and the criminal division of the city court which has been presided over by Judge C. B, Diehl for the past three years, and over which he will hold sway for the next four years. There has been a wonderful increase in fines and forfeitures this year over 1903. The total receipts for 11 months in 1903 was \$17,816.50. For the same period in 1904 the receipts were \$34,-414.55, almost enough to support the en-

tire police department. There is an in-crease this year of \$16,585.05. This is almost entirely due to the fact that the police department has made a better record and has accomplished more than ever this year. In fact, Chief of Police William J. Lynch and his men have made a splendid record, particularly in recent cases of burglary and robbery. The receipts of the department by months, from January 1st to November 30, 1904, as compiled especially for the "News" by clerk of the court W. H. Leary, were as follows: January *cebruary* March

4,519,503,364.10September October ... November 3.312.05 3.540.00 Total .. 34.414.52 The following cases were disposed of in the criminal division of the city court during the above mentioned 11 months: JANUARY. Forfeitures Fine and Imprisonment Discharged lentence suspended

A business of which not only Logan but Utah may be proud is the Cache Knitting works. It had its commencement about 20 years ago, when J. A. Bendrickson invented the union suits and knitted garments. These inventions eached their full development after a corporation was formed by Hendrickson, the Lloyd brothers and Oscar Borkman. The buildings for manufacturing demands. For a number of years if was thought advisable to run a retail store in connection with the manufacturing, but since their product has become so well established it was found necessary to place all their best efforts on manufacturing. In the length of time they have been in operation they have opened up many new fields to focurse, has cost them great effort and expense until is now well known that they are the leading underwear house in this section. It is no more a humble little concern with a knitter, a foot-power swing machine and a yars reel turned by hand, but a modern growing in-FEBRUARY. Forfeitures Fines and imprisonments Discharged suspended Held to Reform School

Dismissed

The Cache Knitting works is the most thoroughly equipped knitting works in the state, not only for the manufacturing of the best goods, but for fluding markets for same. The entire management, outside and in, is under the direction of Ezra T. Lloyd, Oscar Borkman and George F. Lloyd. All customers are courteously and kindly treated and mail orders are promptly executed and filled. MARCH. sick is, Go to Drs. Shores at once-if you are not too far gone, they will cure you as they did me. MRS. MARY SWAN."
