

## PACKINGHOUSE PRODUCTS HEALTHY

Chicago Joint Committee Appointed to Investigate Stockyards Makes Report.

### EXPERTS WERE EMPLOYED.

Plants Generally Up-to-Date But Some Things Not Improved On.

Chicago, July 6.—The report of the joint commission of the Chicago Commercial association and the Illinois Manufacturers' association, appointed to investigate the packing industries of Chicago, together with the report of the experts who accompanied them, was made public today.

### THE REPORT.

The committee says: "That a board of experts of the character employed, with professional assistance and influenced by an 'aesthetic sense,' which embodies something of necessity and something more of 'luxury,' should find the product 'wholesome,' the yards 'generally clean,' and the inspection 'efficient,' seems to your committee to cover the situation.

"As a result of this investigation we ourselves have no hesitancy in stating that the products at the yards are wholesome and of proper food."

### THE EXPERTS EMPLOYED.

The experts who accompanied the committee were, Dr. W. A. Evans, professor of pathology, University of Illinois; Dr. Macmillan Heron, late pathologist, bureau of science, Manila, P. I.; Dr. M. L. Proctor, pathologist to the Philadelphia, Philadelphia; Prof. T. A. Peters, V. S. University of Nebraska; and Prof. M. H. Reynolds, V. S. University of Minnesota—all eminent specialists. Their investigation occupied two weeks, during which they made as thorough a study of the conditions in the stockyards and packing-houses as they could possibly make within that time.

### IMPROVING CONDITIONS.

The committee can cite no better evidence of the truth of this statement than the very improvements that are under way everywhere. These betterments relate in some places to minor things, and in others they mean a complete rebuilding of old plants. Generally speaking, the more recently built plants are the best, and most of the adverse criticism has had its origin in conditions at old buildings which have been added to and adapted to expanding business. Yet when the committee comes to analyze this criticism they find that part of it is based upon principles that are known, and part of it upon an aesthetic sense and popular demand that food products shall be produced in places conforming to certain somewhat vague ideals. The aesthetic sense embodies nothing of necessity and something more of luxury; in regard to the latter there may be a good deal of misinformation.

### AS TO PRESERVATIVES.

"Nowhere is there greater vagueness and less definite information than in regard to the preservatives. Even scientists differ on this subject. Your committee has investigated by inquiry, by search and by analysis to determine where preservatives were used."

### Get What You Ask For!

HERE is a Reason—Why the Good People of America buy Cascarets as Fast as the Clock Ticks. Every second some one, somewhere, is buying a little Ten-Cent Box of Cascarets. 1, 2, 3, 4, 5, 6—60 times to the Minute, 60 Minutes to the Hour, 3600 Boxes an Hour, 36,000 Boxes a Day of Ten Hours, 1,080,000 Boxes a Month, and then some. Think of it—220,000 People take a Cascaret tablet each day. Millions use Cascarets when necessary. The Judgment of Millions of Bright Americans is Infallible. They have been buying and taking Cascarets at that rate for over Six Years.

It is not an Experiment, not an Accident or Incident, but a sound, Honest Business, based on Time-Tried-and-Tested Merit, never found wanting. There is a Reason. Cascarets are the inimitable foe of All Disease Germs; the incomparable cleanser, purifier and strengthener of the entire Digestive Canal. They Act like Exercise on the Bowels—Muscles, snake them strong and active—able to Help Themselves do their work—keep themselves clean. Cascarets are the safe-guard of Innocent Childhood against the Dreadful Death-dealing Dangers that threaten the Lives of the Little Ones. They are Purely Vegetable, absolutely Harmless, always Reliable and Efficient.

## SICK ALL THE TIME

UNTIL SHE TOOK DR. WILLIAMS' PINK PILLS.

Then She Ceased to be an Invalid and Has Been a Well Woman Ever Since.

"I suffered all the time, practically, from sickness of the stomach, dizziness or swimming in my head and pain in my back. Now I am entirely free from discomfort of that sort. I am not only able to keep on my feet, but to do my work as a teacher, and to enjoy the pleasures that come through the possession of good health."

That is the statement of Mrs. B. E. Ford, of Rushville, Miss., who confides, as follows: "I am glad to tell others that my troubles were all remedied by Dr. Williams' Pink Pills, which are indeed a woman's friend. I heard of them first from an acquaintance in Arkansas who had found out their merits by actual use. When she called on me to try them in September of 1904, and within three weeks I experienced such relief that I knew that they must be adapted to the needs of my case. After using them for a short while longer I was thoroughly convinced of their helpfulness. I ceased to be an invalid, I became and have since remained a well woman, and the reason why is simply that I took Dr. Williams' Pink Pills."

The pills which Mrs. Ford so justly praises cure the chief ailments of women by thoroughly renovating the blood. They make functional action regular and painless, banish headache, dizziness, nervousness, create appetite, promote digestion, put color in the complexion, build up strength and in a word enable women to reach and maintain full physical perfection.

Dr. Williams' Pink Pills actually make the blood and give such strength and tone to every part of the body. In this way they have cured serious disorders of the blood and nerves, such as rheumatism, sciatica, anæmia, nervousness, headache, palpitation, neuralgia, hysteria, St. Vitus' dance, and many forms of weakness in either sex.

Every woman should send to the Dr. Williams Medicine Co., Schenectady, N. Y., for a valuable booklet, "Plain Talk to Women." It will be mailed free in sealed envelope to the address of any applicant. Dr. Williams' Pink Pills are sold by all druggists or sent, postpaid, on receipt of price, 50 cents a box, six boxes \$2.50, by the Dr. Williams Medicine Co., Schenectady, N. Y.

### LIMPY JAW CATTLE O. K.

In view of the absence of any possible danger to health arising from the use of the meat of cattle affected with only localized tuberculosis, or actinomycosis (lumpy jaw), of slight or moderate extent, it would, in my opinion, be extravagant and indeed absurd to condemn the carcasses of such cattle, provided the animals are well nourished and otherwise in good condition.

### INSPECTION OF CARCASSES.

The inspection of carcasses has been observed in operation in all of the houses and a very considerable amount of time has been spent, in some cases for hours in succession, at the same place studying the department of the work. There are, unquestionably, certain features regarding which some minor suggestions and criticisms might fairly be made, but in general it was found that the inspection of the dead animal, up to the time the carcass and separated organs passed from the killing room was reasonably careful, thorough and generally efficient.

### DISEASED ANIMALS.

"It is the opinion of the committee that diseased animals reaching the yards do not get into the stockyards slaughtering houses."

### METHODS OF PRESERVING.

"The methods employed in preserv-

ing meats are for the most part clean; nothing seriously objectionable being observed in any of the houses visited. The pickling of meats has not presented any very objectionable features. It is suggested that the skewer used in inspecting hams be immersed in boiling water between tests, and that great care should be exercised in selecting healthy operatives, especially the tester.

Your committee is of the opinion that the canning departments visited are in general, in a clean condition, and that the handling of the material is done in a clean manner by properly dressed, healthy persons, and that the finished canned meats offered for sale constitute a wholesome and in varying degrees, nutritious article of diet.

### SAUSAGE SUGGESTIONS.

"The use of any spoiled meat unfit for food was nowhere noticed, though it must be conceded that some of the canned goods contained material which is of low nutritive value, such as pig's snouts, tripe, etc. It is therefore recommended that the cans be labeled as to their contents, so that the purchaser may be able to form a correct estimate as to their nutritive value. It is believed that the government inspection should be extended to a supervision of all the materials used for canned goods, since they are finally distributed in packages bearing the declaration that they contain government inspected material. As it is at present, there is no disinterested supervision which guarantees the fact that nothing other than proper material is placed in the cans."

### HYGIENE AND SANITATION.

Regarding hygiene and sanitation, the committee say some of the water closets are not of modern or proper construction, and well located, and deficient, and often ventilated into the workrooms. This they regard as dangerous and unhygienic. In a few houses they found satisfactory modern water closets entirely new and in most of them were signs requesting the operatives to wash their hands before returning to work. Some supervision is advised. The medical members of the committee paid special attention to the health of the operatives, particularly in regard to tuberculosis. They were not able to detect in the examination any evidence of disease.

### MITCHELL MURDER TRIAL.

Defense Makes Great Effort to Prove Insanity.

logotensuc-wocount-asistatodyoca Seattle, July 6.—Atty. Silas M. Shipley, one of the lawyers defending George Mitchell in the murder trial, which has occupied Judge Frazer's court for almost two weeks, announced tonight that the greater part of the evidence which the defense wished to get before the jury was in, and that it was quite possible that the defense would rest its case before court adjourned tomorrow evening.

The two chief points which the defense had been laboring for some time to introduce in evidence were allowed today. One was expert testimony as to Mitchell's insanity about the time of the alleged murder. The other was that there was an hereditary tendency to insanity in the family, particularly in Mitchell's father. The first came in the evidence of Dr. F. W. Brooks, who attended Mitchell during an attack of the measles in a Portland hospital last April. Dr. Brooks thought the young man was insane at that time.

### WOOLMAN GUILTY.

Fined and Imprisoned for Feeding in Public Land.

Helena, Mont., July 6.—In the United States court today Joseph P. Woolman pleaded guilty to illegally feeding the public domain and was fined \$500 and sentenced to 24 hours in jail.

### A NOVEL MARINE MONSTER.

A native carnival was held recently at Rotoma, New Zealand, and the striking object depicted herewith was one of the features of the water display. The motor boat Togo was painted to represent a fabulous ocean monster and was entered in the races. She is very speedy and succeeded in capturing three prizes. As she glided rapidly through the water her unique appearance attracted much attention.

### A COMBINATION MOTOR BOAT AND MOTOR CAR.

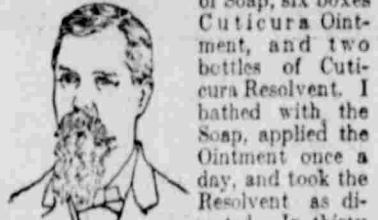

The ingenious contrivance shown in the cut is a motor boat which may be transformed at will into a motor car. It was launched recently in the river Seine at Paris and attracted a good deal of attention. It possesses all of the qualities of the ordinary motor boat and in addition the craft can be mounted on four wheels and used on land, the same motor power being available. Several of these boats are being built in Paris.

## AWFUL PSORIASIS 35 YEARS

Terrible Scaly Humor in Patches All Over the Body—Skin Cracked and Bleeding—Itching Unbearable—Cured by Cuticura in Thirty Days at Cost of \$4.75.

### ANOTHER WONDERFUL CURE BY CUTICURA

"I was afflicted with psoriasis for thirty-five years. It was in patches all over my body. I used three cakes of Soap, six boxes Cuticura Ointment, and two bottles of Cuticura Resolvent. I bathed with the Soap, applied the Ointment once a day, and took the Resolvent as directed. In thirty days I was completely cured, and I think permanently, as it was about five years ago."

"The psoriasis first made its appearance in red spots, generally forming a circle, leaving in the center a spot about the size of a silver dollar of sound flesh. In a short time the affected circle would form a heavy dry scale of a white silvery appearance and would gradually drop off. To remove the entire scales by bathing or using oil to soften them the flesh would be perfectly raw, and a light discharge of bloody substance would ooze out. That scaly crust would form again in twenty-four hours. It was worse on my arms and limbs, although it was in spots all over my body, also on my scalp. If I let the scales remain too long without removing by bath or otherwise, the skin would crack and bleed. I suffered intense itching, worse at nights after getting warm in bed, or blood warm by exercise, when it would be almost unbearable."

"To sum it all up, I would not go through such another ordeal of affliction for thirty-five years for the State of Kansas. (Signed) W. M. Childress, Hutchinson, Kan., April 20, 1905."

Cuticura Soap, Ointment and Resolvent are sold throughout the world. Put on Togo's Cream, Soap, and Resolvent. Cuticura Soap, Ointment and Resolvent are sold throughout the world. Put on Togo's Cream, Soap, and Resolvent.

It is about fourteen feet in height, its body alone being seven feet. How much larger this giant double bass is than the ordinary instrument of its kind is shown in the picture.

### JOSEPH SMITH Monument

An interesting book containing a full account of the trip of the Centennial Memorial Party to Vermont and the dedication of the Monument.

### What it Contains.

Descriptions and fine illustrations of the old Smith farm in Sharon, Vermont, the Monument and the Memorial Cottage, with a history of the farm, its purchase and vivid account of the building of the Monument, the difficulties overcome, and other points of interest. Also an account of the visit of the Memorial Party to the Hill Cumorah, the Sacred Grove, Palmyra and other places of interest to the Latter-day Saints. Illustrated with a number of valuable cuts taken from original and valuable photographs.

Price, paper, 25c; cloth, 60c. Postpaid to any address. For sale at

### TWO BURNED TO DEATH.

Libby, Mont., July 6.—Fire here today destroyed the Bellevue, the principal hotel in the city.

### PUBLIC BUILDING BIDS.

Washington, D. C., July 6.—Proposals for bids for the new public buildings at the places named below, which were authorized by the last session of Congress will be opened at the treasury department on the following dates:

Utah—Provo and Logan, August 8.

Idaho—Moscow and Lewiston, August 7.

Wyoming—Lander, Sheridan and Rawlins, August 5.

### ENGLISHMAN CUTS HIS THROAT.

Riverside, Cal., July 6.—E. Spencer Stanhope, son of a wealthy English family, committed suicide last night by cutting his throat. The body was discovered at noon today at the Holy Road hotel. It is said here that Stanhope's father is a member of the British parliament.

### SHOT BY FARM HAND.

Walla Walla, Wash., July 6.—Fred Hopkins was brought here today from his ranch near Clyde with two bullet wounds in his head as the result of an altercation yesterday with Sol McGriff, a farmhand in his employ.

Hopkins is unable to talk. It is alleged the quarrel arose over the manner in which a team of horses should be harnessed. McGriff has surrendered to the authorities.

### MONTANA SCHOOL OF MINES.

Iowa City, Ia., July 6.—Charles Bowman of Clinton, Ia., a graduate of the Iowa university, class of 1895, has been elected president of the Montana state school of mines.

### LARGEST DOUBLE BASS.

The immense double bass here illustrated has recently been completed at Markneukirchen, Germany, and is intended for use in a Chicago orchestra.

It is about fourteen feet in height, its body alone being seven feet. How much larger this giant double bass is than the ordinary instrument of its kind is shown in the picture.

### School of Ladies' Tailoring.

The Keister Ladies' Tailoring college will re-open in this city about July 16, under the management of Joseph E. Wilson of Logan. A very commodious and pleasant room is being fitted up for the purpose on the second floor of the building opposite police headquarters on East First South.

### THE BEGINNING.

The Keister Ladies' Tailoring school is the product of the mind of one J. A. Keister, now operating a large school in St. Louis. Mr. Keister is the originator of a perfected system of ladies' tailoring, largely mechanical, and certainly simple enough to enable even the average student to grasp all the essential details of the art in a very short time. Mr. Keister sells the graduates of his school county rights for the opening of schools to be conducted in strict conformity with the system taught in his central school. Joseph E. Wilson purchased the right for a portion of the State of Utah and the school at Logan is the result.

### THE LOGAN SCHOOL.

A visit to the school here reveals many interesting things to even the casual observer. The large room now used is exceptionally well lighted and ventilated and down the center extends a row of tables. At the front and on the side are a number of machines. The pupils are busily engaged at work either in learning the system of drafting, the method of taking measures, cutting, or in doing actual tailor work. They are at work upon their own apparel or in making dresses for their neighbors, thus earning their tuition as they get the instruction. The success of the work is said to be phenomenal, many fathers, exacting ladies of this city having expressed greatest satisfaction with work done for themselves.

### FURTHER INFORMATION.

The Keister system was founded in St. Louis in 1883. Now there are over twenty schools and 16,000 students have received instruction. It teaches everything in ladies' tailoring and dressmaking. The time required depends upon application and previous knowledge of sewing, ordinarily about 60 days. Those who become proficient are constantly in demand at good salaries.

The school is open all the year. Students may enter any time. Individual instruction is given. It is of advantage to teachers—a good place to spend vacation. Machines, tables, pressing apparatus, etc., furnished.

The hours are 9 to 12 and 1 to 4 for drafting and for sewing extend to 5 when instruction ceases. All work is to be done in school and not taken away till completed.

We bespeak for this technical school the patronage it deserves.

Miss Freda Smith, who has taken some work at the school in Logan permits us to say for her: "I have not the least doubt of the success of the school when the people come to know what it is." Another lady who knows whereof she speaks says the work is a little in advance of anything before taught in Utah."

Terms—Drafting and pattern making, \$15.00. Forty days' practice in tailoring and dressmaking, \$15.00. When taken as a short course of 10 days in sewing will be given for \$3.99. All fees in advance.

The U. S. Marines from Mare Island saved us from the fire. God bless them.
