ROUND TRIP \$2.00

Bring your lunch and enjoy an all day trip on the Great Salt Lake.

INDICTMENTS  
AT SPRINGFIELD

Special Grand Jury Returned  
Hundred and Seventeen in  
Connection With Riots.

## SOME POLICEMEN CONDEMNED

For Cowardice and Failure to Perform  
Duty—Recommend Investigation  
Of "Sweating" Process.

Springfield, Ill., Sept. 3.—The special grand jury called to probe the recent race war adjourned tonight after returning 17 more indictments. This makes a total of 117 during the session. Among the indictments returned this afternoon four were against Springfield policemen. They are indicted for alleged failure to suppress the riot when detailed for that duty. Sheriff Warner, chief of police Wilbur Morris, Capt. Charles H. Walsh, of troop D, Springfield, and others are commended by the grand jury. The report condemns alleged "cowards" among the officials and says: "After the most diligent inquiry we condemn in unmeasured terms the cowardly contemptuous action of those members of the police who have taken the oath of office, failed to do their duty; men who were paid from money obtained from the pockets of the people of this city to protect life and property; men who were ordered by the heads of the department of the police to go out and disperse the mob, and not only failed to use a club, handle a pistol or raise a voice against the mob and on the side of law and order, but some of them are shown to have assisted in doing the work that has brought destruction to thousands of dollars' worth of property and has brought the blush of shame to every law-abiding citizen of this city; men who under oath were bound and who, had they acted promptly, could have driven back to obscurity from whence it came the mob that for a time assumed to hold Springfield in its bloody grasp."

"We recommend that the civil service commission of the city of Springfield without fear or favor and while evidence can easily be obtained, determine by fair trial who failed to prove himself a worthy member of the force and deal with him accordingly."

"We further recommend that the civil service commission inquire diligently into the so-called 'third degree' or 'sweating process,' said to be carried on in various cases at the city prison and if it is found that after an arrest a prisoner is struck by hand or club or otherwise mistreated that the same be stopped."

## PROFESSORS IN RUSSIA.

Must Leave Constitutional Democrats  
Or Quit Their Chairs.

St. Petersburg, Sept. 3.—The professors and instructors of the imperial universities and schools of Russia have received a circular from the minister of education ordering those who are members of the Constitutional Democratic or other illegal political parties either to withdraw from those parties or resign their positions. This is a severe blow to the Constitutional Democrats whose membership is most popular among the professors and instructors.

## CUBAN LIBERALS.

Two Factions Will Unite and Push  
Gomez for President.

Havana, Sept. 3.—The Zayista and Miguelista factions of the Liberal party have been in convention here and today it was decided to form an alliance and nominate Jose Miguel Gomez for the presidency of the republic. Al-

fredo Zayas gets the vice presidential nomination and the other electoral offices are divided between the two factions.

It was also agreed to support Senator Yaza for the presidency in 1913. The news of this alliance has been greeted with enthusiasm.

## ROBBED PAYMASTER.

Karkhou, Russia, Sept. 3.—A band of highwaymen today attacked and robbed a railroad paymaster of the amount of the monthly payroll with which he was proceeding from the bank to the railroad station. Police and soldiers overtook the highwaymen and opened fire on them. Three men, including one of the robbers, were killed. The others got away.

WATKINS NOTIFIED  
OF HIS NOMINATION

Ada, Ohio, Sept. 3.—Before a large audience in Brown auditorium of the Ohio Northern university tonight, Prof. Aaron S. Watkins was officially notified of his nomination as the candidate for vice president by the national prohibition party. The citizens crowded the streets and university campus. Political partisanship temporarily was laid aside in the honoring of an esteemed townsman.

Felix T. McWhirther, of Indianapolis, treasurer of the national prohibition organization, was the chief speaker. He spoke at considerable length and then introduced National Chairman Charles R. Jones of Chicago. Mr. Jones made only brief remarks and then Robert Patton of Springfield, Ill., who was temporary chairman of the national prohibition convention, delivered the formal notification address.

EXCAVATION ON PANAMA  
CANAL FOR AUGUST

Washington, Sept. 3.—Efficient work is being done on the Panama canal as evidenced by the report cable to the Washington offices of the Isthmian canal commission from Col. George W. Goethals.

The total excavation for the month of August was 3,252,566 cubic yards, place measurement against 3,168,840 cubic yards in the previous month and 1,288,692 cubic yards in August last year, or an increase of 1,968,814 cubic yards over the corresponding month in 1907.

The cubic daily output for August, 1908, was 125,096 cubic yards against 121,494 cubic yards in the previous month and only 47,729 cubic yards in August, 1907.

There were the same number of working days in August as in the previous month of July while the rainfall for August was 11.93 inches against 11.14 inches in July.

Of the August excavation 3,152,471 cubic yards were removed from the canal prism against 3,040,956 in July and 1,247,708 cubic yards in August, 1907.

Of the August excavation 1,875,126 cubic yards were by steam shovel against 1,847,173 in July and 1,875,591 cubic yards were by dredging against 1,321,667 cubic yards in July.

## TORTURED PRISONERS.

Dorpat, Russia, Sept. 3.—A sergeant of police and six wardens of the local prison were today charged with the torturing of prisoners with the idea of extorting confessions and each sentenced to one year imprisonment.

GEN. JAMES ALLEN TO  
STUDY BALLOON EXPERIMENT

New York, Sept. 4.—Brig. Gen. James Allen, chief of the United States army signal corps, will leave on the St. Paul tomorrow to attend the International Electrical congress at Marseilles, France, Sept. 14 to 19. He goes as a representative of the United States army and incidentally will make a general investigation of what is being done in the development of war balloons and aeroplanes on the other side.

He will attend the international balloon races in Berlin Oct. 31 and expects to that will probably call upon Wilbur Wright, M. Bleriot and others who are making important progress with heavier-than-air machines in France and Germany.

At the head of the signal corps, General Allen has taken the lead in the movement to have the United States government provide an aeronautical department for the army and expects to get a large appropriation from Congress for that purpose at the coming session. During his absence abroad the government aeroplane tests now going on at Fort Myer will be looked after by Lieut. Frank P. Lahm, Capt. Charles D. Forest Chandler and other officers of the signal corps of the army.

SCIENTISTS SMILE AT  
PROF. FRANCIS DARWIN

New York, Sept. 4.—Scientists here smiled a little as they read the report of the presidential address which Prof. Francis Darwin, the son of the great naturalist, delivered at the opening meeting of the British association in Dublin Wednesday.

He declared that plants might be classed as animals in the way they responded to touch and that plants have memory and can develop habits. The opinion here is that the speaker has dealt in a sensational manner with certain phenomena which should probably be explained in a totally different way.

Dr. Walphonso Murrill, assistant director of the botanical gardens, said that when Francis Darwin declared himself a champion of a lost cause—the doctrine of the inheritance of acquired characteristics—he was taking a stand on a question which still divides scientists, although most of them do not agree with the Englishman. It is possible, said Dr. Murrill, to quote instances in which apparently entirely accidental abnormalities are handed down to descendants.

## HARRIMAN IN HARNESS.

Klamath Falls, Or., Sept. 4.—President E. H. Harriman, of the Harriman lines who has been sojourning at his summer home here in Pelican bay with his family, will get into harness once more today. Mr. Harriman will leave this afternoon for the east via Portland.

Mr. Harriman will be detained in Oregon for at least a week unless the present program is abandoned, having accepted invitations to address commercial bodies at several Willamette valley towns. A number of conferences with various officials of the O. R. & N. have been planned to occur in Portland.

It is expected that Mr. Harriman will meet with the transportation company chamber of commerce of Portland to talk over railroad development in eastern and central Oregon and the transportation situation generally.

SUCCESSFUL TRIAL OF  
MAXIM NOISELESS GUN

Springfield, Mass., Sept. 3.—Hiram Percy Maxim's gun silencing device received its final test today at the hands of a board of officers attached to the United States army. The test was to determine whether it would afford protection to soldiers taking cover from snipers advancing on an enemy. The test is said to have been entirely satisfactory.

The board went to the rifle butts and

Mr. Maxim took the gun firer in his automobile to points at different directions from the butts. Shots were fired at varying distances and in no case was the board able to determine with unanimity the direction of the shots. The discharge was inaudible, even at the shortest distance, 250 yards, and the officers were compelled to judge the direction from the whirr of the bullet.

## O. R. &amp; N. MEETING ADJOURNED.

Portland, Sept. 4.—The Oregon Railroad & Navigation company directors met in annual session yesterday for the purpose of electing a new set of directors for the coming year, but adjourned for one week. This was done primarily to give Mr. Harriman an opportunity to be present. The members of the board also thought it was only common courtesy to Mr. Harriman to defer action, inasmuch as he owns all but about 15 shares of the stock and has been so busy that he has not been able to attend a meeting in the entire history of the road. In fact, since its organization in 1896, it is hinted that Mr. Harriman may preside at the meeting.

## CHURCH REGALIA.

Board of Appraisers Refused to Let  
Silk Banner Come in as Such.

New York, Sept. 4.—The board of United States general appraisers refused yesterday to admit free of duty a silk banner imported from the Deutscher Kriegerbund of New York. The collector of the port assessed the banner as a manufacture of silk with the duty at the rate of 50 per cent, whereas the bund claimed that the banner came within the provision for "church regalia" of the free list.

General Appraiser Hay, who wrote the decision for the board, said that the protest must be overruled because there is nothing in the evidence submitted to the tribunal to show that the bund is a religious or established solely for religious purposes.

Under these circumstances, the board is constrained to affirm the collector's classification.

## A BRIDE OF TWO WEEKS.

Mrs. Claude Moser's Husband and Her  
Money Both Gone.

Chicago, Sept. 4.—Mrs. Claude Moser, a bride of two weeks, told the police yesterday that her husband and \$600 of her money were missing. She formerly was a clerk in a department store at Seattle, where her husband was employed as a bookkeeper. They were married in Seattle and started east on their honeymoon.

After spending 11 days in Denver, they arrived in Chicago Wednesday. They went to a hotel and a few hours later while his wife was sleeping, Moser is said to have departed, taking with him \$600 which belonged to the bride.

The police persuaded Mrs. Moser to wait 24 hours for her husband to return before obtaining a warrant.

## GRAND BALL

At Odeon, Saturday, Sept. 5.

Lamoureux Tunes Piano.  
23 West 1st South, Ind. 3231.

## BIG NECK OR GOITRE.

I have the exclusive sale of Dr. Blevin's Goitre Remedy, which has been meeting with marked success. For price and particulars address Chas. S. Watson, Druggist, St. Anthony, Idaho.

CONSTRUCTION  
ON THE ERIE.

New York, Aug. 30.—Despite business conditions the past year, the Erie Railroad has been busy with the construction of important low-grade lines, which when completed, will show great economies in operation aside from a very noticeable increase in facilities.

A low-grade road, about 40 miles long, is being built from Highland Mills, N. Y., on the Newburgh Branch, through Canaan, Italy and Ouisville to Guyard, a short distance east of Port Jervis, where it joins the main line. The construction, which is quite expensive, cost about \$8,000,000, includes a double-track tunnel a trifle over a mile long, and a viaduct over Moodna creek, 3,200 feet long and 193 feet high. The purpose of this low-grade line is to avoid the present heavy grades over the Shawangunk Mountains east of Port Jervis. It is expected that it will be available for use within the next six months.

A new line is also being built west of Jamestown, N. Y., known as the Columbus & Erie, at a cost of \$900,000, the purpose being to reduce the 35-foot grade to two-tenths per cent eastbound and three-tenths per cent westbound, and cutting out a large number of curves. The distance is about 24 miles. The work is almost completed and a portion of the line is already being used for freight service.

The Genesee River Railroad is a line starting from Portage on the Buffalo Division to Cuba on the main line, a distance of 34 miles. Between those points on the main line are some heavy grade and bad curvatures, but the new line will reduce the gradients to two-tenths per cent eastbound and three-tenths per cent westbound, being almost water level. It will cost about \$4,000,000, and will be complete by spring of next year. Some of the construction is very heavy, including a viaduct over the Genesee River near Belfast, 3,120 feet in length and 145 feet high. At Rush Creek is another viaduct, 1,820 feet long and 150 feet high.

In order to facilitate the handling of suburban business, the Erie is at present at work on a four track cut through eastern Albany City at a cost of about \$1,500,000. By an ingenious rearrangement of all the tracks, incoming and outgoing trains will be run entirely separate at rush hours, there being three tracks to be used inbound in the morning and three outbound in the evening. By a clever arrangement of over and under crossings, there will be no chance for collisions or side-wipes through mistakes of switchmen. This improvement is going along slowly, but should be finished within a year.

Carey Act Land  
Opening and drawing, Oasis, Utah,  
September 28th.

Chair, Labor Day, \$500 prizes.

EXCURSION TO DOWNEY, IDA.

September 4, 5 and 6, for opening  
12,000 acres of land under Carey Act.
