> GENTILISM, NOT "MOR-MONISM."

THE revolting crime which has made Woe be unto them who dabble in these pools of pollution! Their unsuch a sensation in this neighborhood during the past few days is something seen sins cannot remain concealed. of a novelty in Utah. Seduction and That which has been done in secret abortion are foreign to the sentiments and practices of the great body of the people of this Territory. The report of such a case as that which has come kuell in the day of eternal justice. The to light is horrifying to this commucurse of God will blight the hands that nity. The "Mormons" are vehemently practice this infernal infamy, and every opposed to any sexual intercourse outside of the marriage relation, and kingdom of glory will close its gates against the souls that are dyed with to the destruction of human life, foetal this crimson shame, while outer darkor matured. Sexual sins they look ness, will be their doom and misery be upon with the utmost aversion and their portion. Let the Latter-day count them as capital crimes. The Saints beware of the insidious and count them as capital crimes. The Church of Jesus Christ of Latter-day Saints has always inculcated chastity Satanic influences of civilized Gentilism, and shun even the appearance and classed it among the essential virof evil. They have come out from tues. And its written standards as among them, now let them be entirely well as its living oracles have ever deseparate and touch not the unclean nounced, in the most positive language, any departure from the law which for-In star in the

bids illicit sexual relations. Latterly President John Taylor has been more than usually outspoken

against licentiousness, lasciviousness, and all those offenses against God and His Church which tend to pollute the bodyand poison the fountains of life. He has proclaimed the rule that the adulterer and the seducer shall not be permitted to enter the Temples of the Lord nor have a standing in the Church of Christ. He has repeatedly warned the Bishops and others in charge of the Saints in an organized capacity, against permitting persons guilty of unchaste conduct to partake of the blessings of the House of the Lord, and made them responsible for the rooting out of iniquity in their several fields of labor. The leading Elders of the Church have supported the President in "the stand he has taken on this question, and the rule has been established and enforced that no person who has committed adultery after receiving the covenants.

to remain in or re-enter the Church. Fosticide and infanticide are regard-

the registration act at Eagle Rock, Camas, Beaver Cañon and Pocatello, at which points the frands were perpe-trated by Singiser's supporters. Proof nalties for their diabolism. No man or woman can retain the spirit of God or a real standing in His Church who revels in these iniquities. The child-murderer is guilty of innocent blood. Infanticide is murder. Fosticide is a is said to be abundant regarding the stuffing of the boxes by the judges of election and clerks of Eagle Bock and crime in the same category. Death produced by drugs is just the same in effect and intent as death by blood-

They are fit to be-come angels to the devil for their crime is devilish.

mon" crusade. Mr. Halley is a gentieman of liberal ylews, has the reputation of being thoroughly consistent, and will doubtless capably represent his constituents in Congress.

A Tie in Illinois.

CHICAGO, 10.—The present estimate as to the complexion of the Illinois State legislature, is that it will be a tie on joint ballot, the Senate having a majority of one republican. and the House a majority of one democrat. Con-tests are likely to ensue in three dis-tricts which will reverse this condition of affairs. The situation is made more interesting from the fact that a succes-sor to General Logan is to be selected.

A SERIOUS SITUATION.

THE jubliant demonstrations throughout the country have been none the less prononneed because the election is still claimed by both parties. Each, taking expressions as the guide, is as confident of vistory as the other. While it is tolerably clear that the De mocracy is victorious, there is a bare possibility that an official count may turn the tide in the other direction. such a result would cause a degree of cheapness to be felt by the jubliators that would be wonderful to behold. The Cleveland ratification meeting in this city on Saturday night was comparatively large, considering the extent of the town. It was also exceed-ingly demonstrative. In fact we might be allowed to state that the enthusiasm was so extreme us to border on the boisterous.

Speaking from the standpoint of a Latter-day Saint, we should say that of the Lord's House shall be permitted the character of the times is scarcely fitting for extravagant coullitions of feeling. If by the shape matters are ed by this Church as murderous and taking a change for the better has ed by this Church as murderous and inexcusable. Those who are guilty of such crimes cannot have place among the Latter-day Saints. This has been announced by the highest authority in the Church, and it is well understood as the word of the Lord. Those who assist in or help to cover up such ini-quities become parties to the sin and will share in its responsibilities and consequences. Such offences arainst God and society

of camels with Soudanese attends and a drove of elephants. There is also many spiendid cars bearing hi-rical tableaux of the most elabor descriptions. No attention whatever was paid to

"Down Relow Zero."

ICE MADE WITHOUS CHEMICALS. "How would you like to freeze to death to-day?" inquired a longshore-man in Hamilton avenue, Brooklyn, of a perspiring reporter. The latter ex-pressed a willingness to try the experi-ment up to a certain point. "Come along thea," was the reply. The re-porter soon found himself on the ground floor of Pinto's big grain ware-bouse. In an apartment which stretch-ed from the avenue to the water front was another containing 3,500 cubic feet of space. This room was care-fully boarded. The entrance to it was by a door about six inches thick. Through this door, at short intervals, several mon darted suddenly. Their exit. Before they disappeared they perspired, as the temperature of the engine room, from which the corpulent door led, was 90 degrees. On their,re-turn they were shivering. "No they haven't got ague," replied the 'longshoreman, in answer to a question he saw concealed in the re-porter's eye. "I've been there myself, and before I was in five minutes I won-dured why I'd forgotten to bring an overcost along."

Fatal Collision at Nea.

and held his hand against the mouth of a six inch sheetiron pipe. "It's just 4 degrees below zero where your hand is now," said the man with the lantern. The reporter did not consider it necessary to ask for an affidavition this effect, as in less than two minutes his fingers felt as if they were frozen, and he longed for the balmy breezes of spring or even the scorching heat of summer. "How is it accomplished?" he asked a knot of men who gathered about him on seeing a gilt-edged note-book ap-pear. ST. JOHNS, N. F., 10.-In the gale on Saturday night, the British schooners Northern Light and Elsie collided off North Head, Catalena; both sank im-mediately. Two of the Elsie's crew named Carpenter and Ford were

this?" "The atmosphere." The inventor said that he had spent seven years and \$30,000 in perfecting his plan, and had at last succeeded. The room had been built for the ex-periment. The machinery used was an eight horse-power engine. Con-nected with the engine is a series of three-inch iron pipes. The atmos-phere is sucked into one of these pipes, and carried through some hundred of feet. Thence it passes through a coll of copper pipe which is immersed in water into a water trap, where the condensation is drawn off. Then it is carried, cool tand dry, into an expand-er from which it is forced into the re-quired p ace at its normal temperature. 15 degrees, but dry. No chemicals are used in the process, according to the inventor, and several ice-freezing ma-chine makers who were present seem-id satisfied that, such was the case. "It means coolness whenever you want it and are willing to pay for it," said the inventor. JOHN M. LARSEN,

Such offences against God and society. cannot be viewed with the least degree of allowance. They are to be shunned and conteinned by all right-thinking people, and must be looked upon with abhorrence and abiding disgust by every one professing to be a Latter-day many ways has shown an appalling un-

Saint.

The necessity for the positive and outspoken teachings which have been delivered at the General Conferences during the past year or two, has arisen from the introduction into this Terribrought with them usages and customs which prevail among professedly re-spectable people in the United States and in Europe, and which are winked

at if not encouraged by so-called ministers of religion as well as by many medical practitioners. The greatest opponents of the system of marriage which God has revealed to the Latter-day Saints are many of them, advocates of very limited family responsibilities. This is quite natural. It is the legiti-This is quite natural. It is the legiti-mate outcome of their theories. They are opposed to family increase, and therefore seek to check it in their own experiences. They array themselves against God's law for the mul-tiplication of His children on earth, and become subject to that influence which leads to destruction. The work of Deity is to develop life: the work of the Evil One is to destroy and bring down to death. That the men and women who adopt the suggestions of Satan and destroy human life in embryo or prevent its in-ception, should make war upon the God-given system of present and eternal increase, is not to be wondered

at, it is as consistent as it is deviliah. The case which has caused such "Mormonism," as some disingenuous persons wish to make appear. It is antagonistic to "Mormonism" in every sense of the word. It is one of a kind common in the "civilized" world. There such things are also condoned. Seduction is among the practices called "sowing wild oats." The seducer, unless his vile acts produce a "scandal" that cannot be winked at, is not shunned in high society, but the "fast young man" is often Honized and admired. Abortion has an ugly sound admired. Abortion has an ugly sound and when it is exposed is openly coa-demned. And yot reputable physicians admit that it is widely practised, and that they are frequently beset by ladies of standing in church and society, for aid in the accomplishment of the hell-ish purpose of destroying their own imperfectly developed offspring. These are "Gentile," not "Mormon" sins. "Mormon" women are "vulgar" "Mormon" women are "vulgar" enough to have large fami-lies. They are "simple" enough to think that bearing children is a duty and a privilege. They are so old-fashioned and unsophis to believe that children are a blessing, and the more children the more blessings. "Mormonism" teaches that good men, under certain regulations may have more wives than one, but that intercourse with the opposite sex outside of the marriage relation is a outside of the marriage relation is a deadly sin, and that the practices of Gentilism in seducing women and de-stroying the consequences of such in-famy are damnable and hell-deserving and not to be condoned, or excused, or

palliated.

accordance with the true spirit of Democracy. We are inclined to the belief that he will, in the event of his inauguration and installment. Let it be remembered, however, that the roots of the Republican party, which in

scrupulousness in conducting the affairs of State, have shot deep down

into the political sofl, until it become a herculean task to tear them out without a rupture. It is an easy matter for men to shout themselves hoarse tory of persons from abroad, who have and proclaim that Grover Cleveland has been elected and to swear by sacred things that he shall be inaugurated. It is not difficult to assert a programme in speech, but same times it becomes impossible to

earry it into effect. Grantedithst Cleveland is elected. The democrats are determined that he shall be inaugurated and installed at all hazards. No man is surely blind enough not to perceive a determina-tion on the Republican side to retain the firm hold it has upon the political power. If neither side relinguishes such a determination the result will be a conflict, the end of which no man

knoweth. 5. 61 10 10 Whether the point of conflict has been almost reached or not we are not prepared to say. Events of the next six months will, however, probably devide that matter. But one thing is certain-the conditions are conducive to one of the bloodiest and most destraptive conflicts that ever reddened the

pages of history. The political divi-sions are ripe for it. No longer are they defined by geographical lines, as the solid South and the comparatively united North. One city is democratic and its neighboring town republican; painful interest is not an outgrowth of so with counties and States; and fam-"Mormonism," as some disingenuous gies are divided in sentiment and principle on political issues.

> gling in the midst of political movemovements and situations of great moment, the Latter-day Saints can look on from a double standpoint. They have their political preferences and can rejoice when they behold the priuciples of human liberty vindicuted and sustained. And it is their part to uphold those who stand boldly up for the Constitution and the rights of man. They can behold a bright, a glorious future for the country, but before that is reached, the nation will

despair. Joseph Smith the great prophet, pre-dicted with unerring certainty, twen-ty-nine years before its occurrence, the great war of the rebellion. He alse depicted by the Divine gift, a far more bloody condition beyond; a flerce and horrible conflict in which city

olic and five Protestant

olic and five Protestant churches were destroyed. One hundred and twenty houses of resident Christians were looked and the companies driven away. In Mimhol three Catholic chapels and convert's houses were pillaged, the pilests and occupants beaten and the women outraged. At Shi Hung the Church of England chapel was destroy-id. They tore the clothes from the preacher's wife and shamefully treat-ed her. At Chantsum the Wesleyan chapel was destroyed and Christians are facing from the province to Hong Kong. The Chinese gave them the al-ternative of sacrifice to their Idols or leaving home. They preferred the latter. Many of the women were caught by the mob and outraged.

\$100.000 Fire. LOUISVILLE, Ky., 10. - The delivery lieight depot of the Louisville and Nashville road was burned this morn-

ing. Seventy-five carloads of general neight was destroyed. The loss is fully \$100,000. Origin of the fire un-

Browned. Boston, 10.-Advices from Turk's Island, under date of Nov. 2nd, state that the brig Julia E. Haskell, Captain Paine, sailed from Warassa October 11th for Baltimore, with guano. She encountered a hurricane October 14th and sprung a leak, which rapidly in-creased, and the brig was abandoned on the 16th and the crew, eight in number, took to the boats and made for Cayeos Island. In stlempting to land the boat capsized and all on board except the captain and one sailor named Henry Grant, were drowned.

San FRANCISCO, 10.—Chinese advices say the steamer Miramer, running be-tween Japanese ports and Hong Kong, foundered in a storm off the Chinese const on Sept. 21st. All aboard were lost except two of the crew, who were picked up several days after. Restoring Old Rates.

BUYFALO, 10.—A meeting was held this morning by the representatives of the Michigan Central, Lake Shore, Grand Trunk, Nickel Plate, New York, Pennsylvania & Ohio, and the rate of fare between Buffalo and Chicago restored to the old rates.

While the country at large is strug-

have to pass through the dark abyss of

and horrible condict in wates city would be arrayed against city, county against county, State against State, and what would be far more appalling, a sanguinary division in families, until the country would be in the most frightful condition, being a scene of carnage and violence from one and to the other, and the more peacefully disposed would seek safety and refuge in the midet of the Satute.

uestion of time when steamers, destron of the when steamers, no-tels, theatres, concert halls, etc., will be cooled in this way. It will make ice that can be sold with a profit at a dollar a ton. It will save brewers hun-dreds of dollars, and will never srun short of fuel as long as the world lasts. It feeds on the atmosphere and

sets. It reeds on the atmosphere and gets its meals for nothing." The machine took an hour and fifteen minutes to reduce the temperature of a room from 78 degrees to 40 degrees, and two hours to reduce it to 16 de-grees.-N. Y. Tribune.
