

# MINING, BUSINESS AND STOCKS.

## DULL DAY ON SECOND SOUTH

Mining Stock Market in a Sluggish Condition.

## GRAND CENTRAL HIGHER.

Daily-Judge Holds Firm—Wabash Remains Strong, but Many Other Traders Showed Declines.

The mining stock market was characterized by its dullness today. The sales were light; on the open board 17,385 shares were transferred, bringing \$5,554; on the open board, while the bidding was quite animated, only four sales were recorded, amounting to 2,250 shares, for which was paid the sum of \$1,910.50.

The first sale of the day was 300 shares of Carisa at 15 cents; the assessment levied yesterday caused the stock to drop, closing with a bid of 12 1/2 cents. Daily-Judge remained stationary; Wabash was quoted some lower with no transfers registered. Grand Central kept in good trim, closing higher; Lower Mammoth seems to be on the down grade, and ended with 50 cents bid; South Swansea got into the swim, a 900 lot going at 24 cents, while someone wanted Durham and it was furnished to the extent of 4,000 shares at the price quoted in the list of sales. New York Bonanza was transferred, altogether 44 shares, at 24 cents, prices ranging from 23 1/2 cents down to 27 1/2. Wabash appeared in the pit strong, but no one wanted Yankee Con. at the offering made.

The closing quotations and the sales posted were:

### N. A. Page, Stock Broker.

Leans money on stocks at bank rates. Room 24, Walker Bank building.

### Oil News.

At a meeting of the Utah Oil company held last evening, Mr. Jos. G. Morgan was elected a director of the company.

### New Officers Elected.

Provo, March 2.—At the annual meeting of the stockholders of the Mammoth Hill Mining company held yesterday afternoon the following officers were elected: C. E. Looze, J. C. Graham, W. E. Freshwater, Willis K. Spafford and E. E. Corfman. The property of the company is in the Tintic district, joins the Mammoth mine, and is considered very favorably located. It is expected that it will prove a paying proposition as soon as the development reaches a sufficient depth.

### The Kidneys and the Skin.

In the spring, the kidneys have much to do. If they are weak or torpid, they will not do well, and the skin will be simply on blotchy. That is telling the story in a few words.

Hood's Sarsaparilla strengthens and stimulates the kidneys, cures and prevents pimples, blotches and all cutaneous eruptions.

Don't fail to take it.

Buy a bottle today.

## HORSESHOE MINE CHANGES OWNERS

Information to That Effect Comes From Fay, Nev.

## SINKING IS TO COMMENCE

In a New Double Compartment Shaft—To Be Put Down on the Buck Vein—Outlook Bright.

Special Correspondence.  
Fay, Nev., Feb. 27.—News was given out here today that a deal had been made by which the Horseshoe mine and mill changed hands.

The purchasers are the owners of the Charly Ross and Buck mines, and with the Horseshoe mine and mill added, they have a very promising future.

A part of their first visit made was to sink a double compartment shaft to a good depth on the Buck vein, and indications are that things will be moving at a lively rate in the future.

### DAILY-WEST FIGURES.

Released Yesterday Afternoon by The Management.

The annual report of the Daily-West Mining company has been mailed to shareholders in pamphlet form, and contains much information of interest concerning the condition of the property.

In his statement, President Bamberger, mentioned the fact that the company has been successful in obtaining a lease on the lead output of the mine. He states that an arrangement "no less favorable" than last year has been made, when the sale price was quoted at \$5.50 per 100 pounds. He did not disclose the amount of the "rebate" which the company gets in return.

Reference is also made to the settlement of the Quincy difficulty in which he says:

"As you are well aware we settled our dispute with the Quincy company by the purchase of its properties for 30 cents per share of the stock of this company, providing these shares by increasing our capitalization from 150,000 to 180,000 shares, and in making this settlement, I beg to express my appreciation and deep obligation, and also the obligation of the board of directors, to our former manager, W. H. Dickson, who I believe, are largely indebted for the satisfactory settlement made, and whose efforts in that direction were indefatigable and untiring."

The expenses incident to this litigation were, however, heavy, and including, as they did, the expenses of reorganization, state fees, stamp duties, etc., etc., amounted to \$12,500. The Quincy company, which was greatly deplored, he said that settlements had been made except in three or four cases, the adjustment being on the basis of \$2.00 for each widow and \$500 for each minor child, and for the dependents upon those who died unmarried the sum of \$1,000.

The receipts of the year, as stated the day after the meeting was held in Denver, amounted to \$2,100, of which sum \$1,250 was obtained from the sale of the mine. During the same period \$104,600 was disbursed for dividends while there was paid out \$39,202 for legal and other expenses, and \$75,354 for transportation, sampling, etc. In addition to this, \$57,175 was expended on exploratory work, while \$64,163 was used in the operation and maintenance of the concentrator, with \$23,083 applied to general expenses, including taxes, legal expense, etc. In addition to these disbursements, the management added to the total \$75,000 to the payment of claims growing out of the explosion of the powder magazine and \$134,562 to the acquisition of additional territory. Of this latter amount \$100,000, upon the advice of the company's attorneys, was paid for an interest in the Little Bell mines. The Dulberg group was purchased for \$14,562.

### ACTIVITY AT THE VIRTUE.

Manager Arthur Buckbee is Making Things Hum There.

Arthur Buckbee is making things hum at the Virtue mine in Baker City, Ore., according to reports received in Salt Lake. The mine is owned by a syndicate of Canadian capitalists. Recently the Consolidated Virtue mine, an adjoining property, which covers a parallel vein, was purchased for \$40,000, and one day last week the deeds were passed.

Upon this acquisition a new double compartment shaft is being sunk, which later on will become the main workings of the consolidated properties.

Mr. Buckbee took from this parallel vein, since acquiring the property, from a small quantity of ore and from one pocket encountered realized \$40,000.

### UNITED STATES EARNINGS.

From Boston Comes a Budget of Information.

A bulletin from Boston states that since the United States smelter was started up last November, a sum exceeding \$100,000 gross has been remitted from the local offices to the treasurer of the company. It is also stated that the management has already begun to pay off the floating debt. A report from the trustees is expected in a few days.

### PARAFFINE OIL ELECTION.

Local Company Selects Its Officers For the Ensuing Year.

At a meeting of the shareholders of the Paraffine Oil company of Utah, held at the offices of Dr. C. Barrett, secretary in the Constitution building yesterday afternoon the following officers were chosen: President, Robert Sherwood; vice president, Mrs. Nettie H. Barrett; secretary, Dr. Clarence H. Barrett; treasurer, Leydard M. Dalberg; and directors, W. H. Dickson, C. E. Looze, J. C. Graham, W. E. Freshwater, Willis K. Spafford and E. E. Corfman.

### Carisa Stock Assessed.

At a meeting of the directors of the Carisa Mining company, held yesterday afternoon, an assessment of 5 cents per share, of \$150,000 was levied, which becomes delinquent on April 2. This action was taken to discharge an overdraft of \$14,000 on the first of the month.

### A Forty Stamp Mill.

Supt. James McGowan of the Alamo mine, near Sumpter, Ore., has announced that a 40 stamp mill is to be ordered soon for that property.

## CONCENTRATOR AT DALY-JUDGE

The 300-Ton Plant Ready to Go Into Commission.

## WILL BE STARTED TODAY

Or Tomorrow—This Information Was Imparted by One of the Company's Officers This Forenoon.

It was stated by one of the officials of the Daly-Judge Mining company today that the direction of Supt. J. J. Broughall, who, for a long period, before coming to the Daly-Judge was connected with the Amalgamated Copper company of Montana. The big concentrator at the Wabash docks at Anaconda, was under his supervision during its construction.

The Daly-Judge mill has been made one of the most complete plants in the world of the kind, and is thoroughly modern in all its appointments and will handle an output of 300 tons per day. A satisfactory trial run was made one day last week.

### GEMINI OPERATIONS.

This Tintic Mine is Producing 1400 Tons of Ore Monthly.

Supt. Jackson McChrystal of the Gemini mine of Tintic is in the city on a brief business trip. This old time producer is one of the most active mines in the camp at the present time, the output being about 1,400 tons per month. This ore is all of a good grade, and it must be to withstand the transportation and smelting charges. The Gemini being a close corporation little is known by the general public as to what kind of a record the mine is making in the way of production; but last year the property paid \$300,000 in dividends.

### BEFORE JUDGE MARSHALL.

The Mammoth-Grand Central Case Argued Today.

The case of the Mammoth Mining Co. vs. the Grand Central Mining Co. in which the former asks for a temporary injunction restraining the latter from extracting ore from certain claims in dispute, pending a hearing of the issues in the damage suit now before the court, was argued today in Judge Marshall's court.

The Mammoth Mining Co. is the plaintiff, and the Grand Central Mining Co. is the defendant. The case was argued by Messrs. Dickson, Ellis & Ellis, for the plaintiff, and by Messrs. Brown & Henderson and Ellis & C. C. Kane for the defendant. Judge C. S. Kane is guarding the interests of the plaintiff.

### Ferris-Haggerty Payment.

The second payment of \$250,000 on the purchase price of the Ferris-Haggerty copper mine, sold last fall to the North American Copper Co., was made today.

Rawlins, Wyo., last week. One half of the purchase price has now been paid. The mine was sold for \$1,000,000.

### New York City a Mining Camp.

Though the vicinity of New York City can hardly be regarded as an important mining district, its mineral resources are a source of considerable wealth. It is true that with the exception of one small iron mine no metals are mined within or adjoining the city limits, but the non-metallic products amount in the aggregate to an imposing total of value. These quarry, clay pits, and other sources of mineral wealth are described in the New York City Geographic, No. 83, about to be issued by the U. S. Geological Survey.

Aside from the building stones mineral products of less importance are found near the city. Of these may be mentioned the brick and pottery clays of Staten and Long Islands, the iron ore of Staten Island, and the sands and gravels, found at many points in the vicinity, which are much used for structural purposes.

### MINING CONCENTRATES.

A new sampling mill is being built at Sumpter, Ore.

Fred Leonard has gone to Kansas City on mining business.

Manager H. S. Joseph of the Galeana mine, Fish Springs, departed for that property today.

President John Dorn of the Con. Merc. is home from California.

W. J. Lawrence, manager of the Scottish Chief mine of Park City, is in New York upon a business errand.

Manager G. B. D. Turner departed this morning on an inspection trip to the J. I. C. mine, near Park City.

Springfield, Mass., capitalists have bought the Montezuma group of mining claims, located in the Steamboat Springs district, Nev.

The Taylor & Brunton sampler reported the arrival today of 10 cars of ore: one from Milford, six from Tintic and three from Frisco.

Manager Tony Jacobson and Secretary Arthur E. Snow of the Columbus mine, mine of Alta, left for that property this morning to inspect the new strike.

The famous old Cable mine, situated in the Georgetown district, west of Anaconda, Mont., is in operation again; it has a battery of 20 stamps dropping. Years ago the Cable was considered to be one of the richest gold mines in the west.

J. E. Mosher of San Francisco has bought the Hammer group of claims, located on Florida Mountain, near Silver City, Ida. The property recently underwent examination by H. W. Rees, a consulting engineer of the Pacific coast, says the Silver City Nugget.

## MARKET OPENED WITH SELLING

Caused by Apparent Abandonment of Aldrich Bill.

### LEADERS SHOWED LOSSES.

Supporting Orders Soon Appeared Making Shorts Nervous Who Immediately Covered All Around.

New York, March 3.—Selling orders were executed throughout the list at the opening, prompted by the apparent abandonment of the Aldrich financial bill. The Pacifics, Grangers, Southwesterns, Metropolitan Street railway, United States Steel preferred and other leading specialties showed losses ranging up to near a point. Supporting orders appeared in all the leading stocks after the opening decline and their execution combined with the resumption of yesterday's rise in Manhattan created some uneasiness among the shorts who covered quite heavily all around. Most of the opening losses were cancelled and some leaders, such as Missouri Pacific, Southern Pacific and Metropolitan Street railway, rallied to above last night. Free offerings of Rock Island and underwritten the market later and there was fresh selling of the Pacific and Southwestern stocks. Colorado Fuel stocks showed exceptional weakness, dropping three points. Sugar on the other hand, advanced about a point. The downward tendency was accentuated by the firmness of call money at 4 per cent. Traders offered down special stocks in large blocks for effect on the market. Railroad preferreds showed considerable stock. Losses at a point or over were well scattered throughout the list and included St. Paul, Atchison, Rock Island, New York Central, Union Pacific, preferreds and a number of other important stocks. Manhattan and Sugar both lost their early gains and the market touched the lowest all around.

The bond market yielded slightly with special weakness in Wabash debentures. Further inroads on prices were made all through the list, especially in the standard railroad stocks. In forcing out the market, the absence of support made the bears very aggressive and stop-loss orders were reached in some stocks. The market received occasional checks on the part of Anaconda, St. Louis & San Francisco, St. Paul, Atchison, Rock Island, New York Central, Union Pacific, preferreds and a number of other important stocks. Manhattan and Sugar both lost their early gains and the market touched the lowest all around.
