

TWELVE UTAH SHOTS MAY GO.

That Number of Marksmen May Be Sent From Militia to New Jersey.

REGULARS VS. GUARDSMEN.

Believed that Home Men Will Go—General Geoghegan Interested—The Situation Reviewed in Detail.

Unless financial reasons make it impossible, and this is not regarded as likely, Utah will send the 12 best shots in her organized militia to New Jersey the coming August, to compete in the national rifle match. Adj. Gen. Joseph Geoghegan has just begun to prepare a team for the match, and while there has been a scarcity of previous practice and organized tryouts for place on the team, it is expected that a good showing can be made. The team will return to the militia training over with ideas gained in contact with the best shooting men of all branches of the army and navy service, both regular and reserve, will do much to putting spirit into the troops. For this reason extraordinary effort will now be made to get the team off.

PURPOSE OF MEET.
The purpose of these annual meets is one that is dear to Utah men these years. Last season every effort was made by the department to have Utah represented, but the exhausted condition of the guard finances, and the fact that the date was exactly at the time of the encampment here, when all in the guard were necessary to a favorable showing, prevented favorable action.

This year, however, the date precedes the usual time for holding an encampment, and this objection will not be met with. August 24, the match will begin, and Aug. 21, 22 and 23 will be devoted to practice at New City, so that all competing teams can become acquainted to the attitude and the range and perfect themselves on the grounds where the shooting will be done.

FROM WAR DEPARTMENT.
The letter from W. P. Hall, military secretary of the war department, to the Utah adjutant general, inviting the state to participate in the match says:

"Ample accommodations in the shape of tentage, bedding, and necessary facilities will be provided for all competing teams, and the expense of the teams for allowable items of pay, subsistence, and transportation, at regular army rates, can be paid under Section 14 from the state, subject to the annual appropriation provided by section 1461, Revised Statutes.

"It needs no argument to prove that accurate rifle shooting is a point out of it, when we figure the efficiency of a soldier for the line of battle, and while your team might not win prize it will be brought in contact with the finest shots in the world.

REGULARS FINE SHOTS.
"At the breaking out of the Spanish war our small regular army was as a class the finest body of military rifle men in the world, and this enabled them to charge over open ground in the Spanish rifle pits with comparatively few casualties, because the Spaniards could not shoot and had never been taught our men were such fine shots that when an enemy showed his head or body at a distance of 500 yards, and often much farther, he was generally put out of action.

"This fine shooting on the part of the regular army was due to the conditions which the officers and men had attended. Generally one man from each company would attend each competition; he might not win a medal, but he would learn a great deal and this information was carried back to the company."

PAYS TO HAVE GOOD SHOTS.
"I believe the information gained at the competition is worth to the army many times over the amount of the money it will cost to send a team."

SHOOTING STRAINS MUSCLES.
The active attention of the war department was turned to making shooters out of American citizens and citizen soldiers, by the Spanish war emergency, and the subsequent determination to make the militia organizations a first reserve army. It is found that the three positions, kneeling, standing and lying down, in which a rifle must be fired, are unnatural ones for the body muscles, and that to the inexperienced soldier, the result of throwing the gun off the sight, however carefully the shooter might be object. For that reason a great deal of practice with dummy cartridges in simulating these positions is recommended.

The Utah team will commence work at Fort Douglas range in the near future.

COLORADO'S NERVE.

Attempting to Gobble Places of Registration for Opening.

Dealing with Colorado's attempt to have the places of registration for the opening of the Utah reservation located at Grand Junction, the Eastern Utah Advocate, published at Price, pointedly remarks:

An effort is being made by Colorado senators, congressmen, chambers of commerce and influential citizens generally to have the places of registration and drawing for the opening of the Utah Indian reservation changed from Vernal, Price and other points in Utah to Grand Junction, Colo. The argument is advanced that Vernal, Price and Heber City. It is also pointed out that Grand Junction is on a railroad line and is admirably adapted for the place of registration and the subsequent drawing.

As it is necessary for everyone to register in person, and there will be fully 50,000 registrations, it is held that there are not suitable and ample accommodations at the places mentioned for all these or even a small part of them. On the other hand the crowds can be easily cared for at Grand Junction.

The Grand Junction chamber of commerce has been making extra effort to have the change made, and has offered special inducements. This body has prevailed upon the Colorado representatives in the United States senate

TEA

"Fresh" eggs are good in the city till one has eaten eggs in the country.
