CORRESPONDENCE.

Sunday School Jubilee.

LOGAN, Sept. 7, 1878.

Editors Deseret News:

The Cache Valley Stake of Zion Sunday school jubilee took place to-day in the upper room of the Tabernacle. The recent rains rendered the weather and roads excellent, in consequence a large concourse of children and adults were present, from all parts of the valley. All the Sunday schools being present but Mound Valley and Mink Creek, they being the most remote from this point, it could hardly be expected that they could attend. All the sitting room being filled to the utmost capacity of the building presented a beautiful sight, 22 Sunday Schools congregated together, and that too under circumstances the most propitious, each supervised by their respective superintendent, and teacher, evincing an order and discipline greatly to be commended.

The exercises began by singing "Gather Round the Standard Bearer" in grand style. The pieces sang were well executed, rendering it unnecessary to make particular mention of any.

The questions upon the restoration of the gospel were excellently answered, showing that much pains and care had been taken by the several schools.

The articles of faith were recited in a creditable manner, the number of the article being given, the answer to which was promptly made.

President J. H. Hart, of Bear Lake Stake of Zion, being present made a few congratulatory and appropriate remarks, comparing the present condition of the Saints with the past.

President M. Thatcher admonished the saints and especially the young to live pure and Godly lives. Counselors W. B. Preston and M. D. Hammond, Bishops W. H. Maughan and Jardine, and Elder E. D. Carpenter made timely and encouraging remarks.

President M. Thatcher was sustained superintendent of the Sunday schools of this stake, and Elders C. O. Card and O. C. Ormsby assistants.

John N. Price was sustained secretary of Sunday schools, and Joel Ricks, Jun., treasurer.

William Knowles was sustained as musical conductor of the Sunday schools of the stake.

A vote of thanks was tendered the superintendents, teachers, and musical instructors, for their indefatigable labors in getting up and bringing together such a large number of children, estimated at 2,000, forming the best entertainment of the kind ever held in this place.

Great credit is due the Stake superintendents for the able manner in which they conducted the arrangements necessary to the bringing about of the jubilee, at the close of which all seemed to be well satisfied with the services of the day, and returned home without the occurrence of any accident to mar the peace and enjoyment of the occasion, during which an orderly and God-like spirit prevailed.

Respectfully,

JAMES A. LEISHMAN.

Sericulture—Reunion at Provo.

PROVO CITY, Sep. 5th, 1878.

Editors Deseret News:

On Friday last, the members of the Silk Association of Utah County, met by previous arrangement at Father Graves's Gardens, situated east of this city. The day was delightful. The members from the north, on their arrival by train, were met by the Provo City Brass Band, who accompanied them to the gardens, and were there cordially welcomed by Father Graves. A fair representation of the county was present. American Fork did honor to the occasion by the presence of some thirty of the sisters from that little burgh.

After discussing the picnic under the cool and shady arbors, meeting was called at the bowery; after music from the band, Father Graves spoke of the business of the association, its present prospects were bright, but somewhat retarded by the lack of funds, entertained the idea that some project would be developed that would meet the emergency.

Sister Hindley, president of the association for Utah County, spoke encouragingly of the attempts made by the sisters, which in her mind undoubtedly would yet result in success; advised the members to still continue their efforts, and was in hopes of a good market being obtained for their cocoons.

On motion of Mrs. Durrant, it was unanimously agreed that committees of the Relief Societies and Y. L. M. I. A. be appointed to visit each family of the county and solicit funds for the purpose of buying machinery and purchasing the present crop of cocoons.

President Paxman encouraged the sisters in their laudable undertaking, and hoped the measures adopted for the means of raising the necessary sum for further advancement would be successful.

The reports from the wards of the county showed that 150 pounds of cocoons had been raised in Utah County, and over 3,000 mulberry trees planted.

Brother Graves exhibited a sample of skein silk, of which he has sufficient to make filling for 25 yards of cloth.

Meeting then adjourned until October. After the adjournment, the members enjoyed themselves in dancing, swinging and other amusements agreeable to their inclination. The day passed off very pleasantly, and we trust not without awakening an increased interest in the cause of sericulture.

RUS IN URBE.

Bread-Making—The New Method.

CITY BAKERY, Springville.

Sept. 7th, 1878.

Editors Deseret News:

The basis of the new process of bread-making, a sample of which I sent you last week, thanks for your favorable report thereon, is, hops and their proper use, the stock yeast does not differ materially in its nature from the stock in common use with American bakers generally, but in the making and management of it after it is made. It is plain, simple, uncomplicated, and economical, it can be made, cooled, stored, and set aside within an hour after making, and can be kept from four to six days according to heat of climate and temperature of the room, it can be made every day or once a week to suit, summer or winter; it can also be so prepared in its maiden state as to be made into a quarter sponge direct from the raw flour, and the quarter sponge thus prepared will answer in lieu of a potatoe ferment in a full sponge, but the potatoe ferment under all circumstances is preferable in bringing the fermentation more speedily to maturity, and in addition forms a double action in combination with the stock in expanding the air cells of the dough as the head of the oven approaches the centre of the loaf.

The science of fermentation in bread making, though simple as A B C when thoroughly understood, yet presents a wide field for the novice to study, and not a few who have followed the business for the best part of a lifetime have failed to strike the key note of the science. As I stated in my first letter, the bread made by this new process required but half the labor of that prepared in the usual way, I explain in this way, whereas the bread made on the old system passes through four different stages before it is ready for the oven and requires twice mixing, the new method requires but one mixing, and is finished in three stages with a saving of from three to four hours time, and in cases where the flour is under fermentation for a period of nine hours, by the new method the bread can be finished in six hours, including an hour and a half for baking in two pound pieces; one pound loaves require but half that time in the oven.

In regard to the amount of labor, I may say useless labor, expended by the average commercial baker in pounding, sifting, and in some places in Scotland and Ireland of dancing on the dough with their feet, I have long since looked upon as a sheer piece of tomfoolery—where the fermentation is fresh and vigorous. Properly ripened and matured in the first and second stages, there is no necessity, beyond proper mixing, of putting a fist in it.

There are a few more items in connection with this subject that might be of interest for bakers to know, were it not trespassing on your space, which I will leave for a future occasion.

Respectfully,

A. CROLL.

P. S.—I observe in the agricultural list of the Territorial Fair, to be held in Salt Lake City, on the 2nd of Oct., a bronze medal for the best four loaves of bread. As Mr. A. P. Rockwood is supervisor, I would like to know from that gentleman on what conditions I can convey a few specimens of that article by railroad from here, for competition at the fair.

A. C.

There was only one man not spoiled by being lionized. His name was Daniel.

"What good is they, anyhow?" scornfully remarked a bootblack, referring to the fair sex. "Did you ever know one on'em to stop and give a feller a job? Not much? They ain't got no shoes on fit to blacken, anyways."

A woman will face a frowning world and cling to the man she loves through the most bitter adversity, but she wouldn't wear a hat three weeks behind the style to save the Government.

SANFORD'S RADICAL CURE For CATARRH

INSTANTLY relieves and permanently cures this loathsome disease in all its varying stages. It possesses the soothing and healing properties of plants, herbs and barks in their essential form, free from every obnoxious contamination, and in this respect differs from every other known remedy. In one short year it has found its way from the Atlantic to the Pacific coast, and wherever known has become the standard remedy for the treatment of Catarrh. The proprietors have been waited upon by gentlemen of unusual reputation who have been cured by this remedy, and who have, at considerable expense and personal trouble, spread the good news throughout the circles in which they move. When you hear a wealthy gentleman of intelligence and refinement say, "I owe my life to Sanford's Radical Cure," you may feel assured that it is an article of great value, and worthy to be classed among the standard medical specifics of the day.

THE benefit I derive from its daily use is to me invaluable.
HENRY WELLS, OF WELLS, FARGO & CO.

IT has cured me after twelve years of uninterrupted suffering.
GEO. W. HOUGHTON, WALTHAM, MASS.

I FOLLOWED the directions to the letter and am happy to say I have had a permanent cure.
D. W. GRAY, M. D., MUSCATINE, IOWA.

I HAVE recommended it to quite a number of my friends, all of whom have expressed to me their high estimate of its value and good effects with their thanks.
WM. BOWEN, 25 FINE ST., ST. LOUIS.

AFTER using two bottles I find myself permanently cured. I have since recommended over one hundred bottles with the greatest success.
WM. W. ARMSTRONG, 139 HARRISON AVE., BOSTON.

WE have sold SANFORD'S RADICAL CURE for nearly one year and can say candidly that we never sold a similar preparation that gave such universal satisfaction. We have yet to learn of the first complaint.
S. D. BALDWIN & CO., WASHINGTON, IND.

THE cure effected in my case by SANFORD'S RADICAL CURE was so remarkable that it seemed to those who had suffered without relief from any of the usual remedies that it could not be true. I therefore made affidavit to it before Seth J. Thomas, Esq., Justice of the Peace, Boston.
GEORGE F. DINSMORE, Davenport, Boston.

Each package of SANFORD'S RADICAL CURE contains Dr. Sanford's Improved Inhalant Tube, and full directions for its use in all cases. Price, \$1.00. For sale by all wholesale and retail druggists and dealers throughout the United States and Canada. WEEKS & POTTER, General Agents and Wholesale Druggists, Boston, Mass.

COLLINS' VOLTAIC PLASTER

An Electro-Galvanic Battery combined with a highly Medicated Strengthening Plaster, forming the best Plaster for pains and aches in the World of Medicine.

A MORBID SWELLING.

Gentlemen.—I sent for one of COLLINS' VOLTAIC PLASTERS, and it has been of great benefit in reducing a swelling in my left side that two physicians pronounced enlargement of the Spleen, and one pronounced it an Ovarian Tumor.
L. A. RISTER.

CYRILLIANA, IND., March 20, 1877.

THEY ARE THE BEST.

Gentlemen.—Enclosed you will find \$2.25, and I wish you would send me another dozen of your COLLINS' VOLTAIC PLASTERS. By the way, I hope you will see that I can do something to help others in some way even if I am not able to be up and around. There are a number who have tried your plaster for nothing and now feel that they are the best they have ever tried. I have got along this winter better than I have before in three years. Wish I could have heard of your plaster before.
Yours, etc.

LORETTA M. CROSS.

BALLSTON SPA, N. Y., March 27, 1877.

Price, 25 Cents.

Be careful to call for COLLINS' VOLTAIC PLASTER, lest you get some worthless imitation. Sold by all Wholesale and Retail Druggists throughout the United States and Canada, and by WEEKS & POTTER, Proprietors, Boston, Mass.
