

FRAGMENTS.

S. E. BAXTER and wife returned from Bear Lake valley last evening.

A girl named Annie Wright was arrested by the police on a charge of vagrancy.

The funeral of Mr. Adam S. Patterson will take place at 4:30 this afternoon.

It is now promised that the foundation of the new union railroad depot in Ogden will be put in this fall.

JOHN HICKY was lodged in jail last night, to answer to a charge of drunkenness. He had \$30.00 in his possession.

JUDAS HENDERSON, the newly appointed Associate Justice for Utah, is expected to arrive in Ogden tomorrow evening.

D. J. WILLIAMS, Esq., of Price, Emery County, came to this city last evening. He reports matters there in a prosperous condition.

Fifty dollars reward is offered for the recovery of two watches which were lost or stolen at Lake Park resort on Wednesday. See advt.

Last evening's Utah and Nevada train brought in from Ogden to this city the body of a child of Mr. Brim's, for interment in the city cemetery.

JOSEPH YOUNG, Esq., who has represented the Union Pacific interests in Ogden for some time past, has accepted the position of traveling agent of the Chicago & Northwestern Railway.

At a meeting of the Salt Lake Bar Association, held this afternoon, Messrs. C. W. Bennett, Wm. H. Dickson and W. W. Woods were appointed a committee to draft resolutions of respect to the late Adam S. Patterson.

JOHN C. CUTLER & Brother, in a new advertisement, direct attention to their immense stock of woolen goods from Provo mills, for which they are agents. Take a glimpse down the list and see what you want. The suits made to order, from Provo cloth, are becoming very popular.

Two other day two men undertook to clean out a well in the Fifteenth Ward. In order to get the water out, each worked with a bucket and rope as fast as he could for several hours. The well was about 15 feet deep and contained about three feet of water. About 1,000 gallons of water were drawn rapidly without perceptibly reducing the quantity in the well.

Work on the new waterworks is progressing rapidly. The 3,000 feet of wooden pipe above the reservoirs in the brick building is laid. A tunnel is being cut 100 feet through a hill back of the building. The tunnel is to be made of concrete, and it will require about 30 days to complete it. Meantime the water further down is being vigorously worked.

LOCAL NEWS.

Killed by a Cave.—A gentleman just down from Soda Springs informs us that on Monday last a young German, whose parents reside in this city, was engaged on the bank near that place. He was gravely and killed by the cave.

A coroner's inquest was held, and found that the deceased was killed by the accidental caving of the bank.

A Fair Observer.—We are in receipt of a communication from a gentleman who writes from Paragonah, Iron County, in a manner which shows him capable of forming fair and just conclusions from what he has seen during a stay of some sixteen months in Utah. Though not a "Mormon" in belief, he says a good word in their behalf, especially in reply to some of the gross slanders upon them uttered at the G. A. H. campfire recently held in this city. He refers especially to the remarks of Corporal Tanner, denouncing them as false. He states that he has traveled in 24 States of the Union, and in Africa and the West Indies, and that he has seen the "Mormons" among so-called Christians, but that the "Mormons" people are the purest he has ever seen.

An Interesting Foot-race.—This morning a mile foot-race, which had been arranged by the friends of the competitors, was run on Washington Square by Henry J. Walk, an employee of Z. C. M. I. and Alexander Brown, employed at the store of Auerbach & Brothers. The course is seven laps to the mile. At the end of the sixth lap, Brown, who was about fifteen yards behind Walk, gave out. The latter ran the whole distance and was, of course, the winner. He made what is considered good time for this section, where the rarefied condition of the atmosphere, is not favorable for long distance foot-races. He made the mile in five minutes and 30 seconds. Brown is a neat runner on short distances, but has not the necessary endurance for a long race.

Partially Explained.—The autopsy held over the remains of William Hardy, as related in our issue of yesterday, did not make very clear the immediate cause of death, though it demonstrated a badly diseased condition of vital organs. Neither was it shown what had become of the laudanum that had been contained in the two vials found in the room of the deceased.

A probable explanation of at least the latter question has been made by Mr. E. T. Taylor, who took charge of the remains to prepare them for interment. He discovered strong fumes as of some preparation of opium, in the underclothing of the deceased, and on further investigation became convinced that the latter had bled portions of his body with laudanum, probably for the purpose of relieving pain.

What became of the laudanum is thus made reasonably clear.

Tampering With Mail Matter.—A correspondent writing from Farmington, relates two or three instances in which his mail matter has been tampered with before being delivered to him, and he asks if postmasters have the right to remove wrappers from packages passing through their hands?

Certainly not, unless such packages are addressed to the postmaster who opens them. It is a serious offense for a postmaster to open mail matter passing through his office and not addressed to him, and a well established case would be ample cause for removal and punishment. The government severe penalties for such an offense, and it is a serious offense for a postmaster to open mail matter entrusted to his care.

It is a serious offense for a postmaster to open mail matter entrusted to his care, and it is a serious offense for a postmaster to open mail matter entrusted to his care.

RAID OVER JORDAN.

THE WEST SIDE OF THE RIVER VISITED BY MARSHALS—ONE ARREST.

In the "wee sma' hours" of this morning Marshal Dyer with a force of his assistants, among whom were Deputies Greenman, Smith, McPherson, Steele, Rush, Rensch, Eekson and Hamilton, headed for the "other side of Jordan," presumably with the intention of making a number of arrests of persons charged with having disregarded the Edmunds law. At the houses visited and searched by them it was stated that "certain parties" were wanted, but who were the objects of official solicitude was not divulged. The house on what is commonly known as "the Rockholt property," now owned by Mr. Bennion, was thoroughly searched, as was also Mr. Bennion's residence in North Jordan, but none of the "wanted" were found. Other places were next visited, and at Pleasant Green Marshal Dyer and Captain Greenman served a warrant of arrest on

RANSOM NIELSEN, of that place, on a charge of unlawful cohabitation. The marshals returned to the city this afternoon, covered with dust and bristling Mr. Nielsen, who was ushered into the presence of Commissioner McKay, to answer to a complaint made by Daniel W. Rensch, and charging him with unlawfully cohabiting with Betta Nielsen and Anna C. Larson as his wives, from September 1st, 1893, to August 1st, 1894. The defendant waived examination, and his bonds were fixed at \$4,000. The witnesses were required to give bail in the sum of \$200 each.

SHOT BY A CONSTABLE.

We are in receipt of the following communication, dated Rock Springs, Aug. 25th:

Yesterday afternoon, Aug. 24th, Thomas Hassey, while under the influence of liquor, creating a disturbance, and the Constable, George Pickering, was sent for to arrest him. He refused to obey, and drew a knife on him, and also attacked him with a club. The result was the constable drew his pistol and fired two shots at Hassey, one glancing off his head, the other taking effect in the left arm. The ball went clear through him. Internal hemorrhage set in, and he died about a quarter to six last night.

Returned.—We were pleased to meet Dr. J. R. Park, to-day, who returned last evening from a pleasure trip to the Coast. He left this city on July 12th, accompanied by Professor Toronto, and visited several of the principal towns of California, thoroughly "doing" San Francisco. From this point he went by water to Portland, Oregon, and while on the Columbia river he saw caught the largest fish or salmon which he ever beheld. The Doctor looks well, and we trust feels invigorated preparatory to the commencement of his labors in the University of Deseret—which is shortly to open. Professor Toronto will return in a few days.

Burglary.—Last Saturday evening the house of Martin Lenz, in the 12th Ward, was burglarized by some unknown parties. Brother Lenz was absent from the city, and the people who occupied the house were all at work in one room at the time of the occurrence. The thieves entered the house by a back window and thoroughly ransacked the rooms, opening boxes, drawers, trunks, and searching in every nook and corner. The burglars succeeded in obtaining \$9.45, all the money there was. The matter was kept quiet until to-day, but up to the present no clue had been found to the thieves.

Opening of the Academic Year.—As will be seen by a notice elsewhere in this issue, the opening term of the academic year 1894-'95 of the University of Deseret will commence on Monday, September 6th. Persons who contemplate attending can obtain students' half-fare permits over the railroad by applying to Dr. J. R. Park, president, this city. We look to see a numerous attendance at this excellent educational institution during the academic year now dawning.

Pardoned.—Acting-Governor A. L. Thomas, yesterday, pardoned Robert H. McConnell, who has been in the penitentiary about three months. The pardon was recommended by Marshal Dyer, A. G. Campbell, Jas. McGarry and others. McConnell was undergoing a two years' sentence for stealing ore at Frisco.

Deputy Registrars.—The following deputy registrars have been appointed: James Bolton, East Bountiful, Davis County, vice Stephen Hale, resigned; C. H. Moore, Fountain Green, Seapate County, vice H. M. Lister; P. H. Hewson, Mayfield, Sanpete County, vice Joseph Christensen.

Scarlet Fever.—We learn by letter from Joseph W. Smith, that nine children have died at Snowflake, Apache County, Arizona, a small settlement, nearly all from scarlet fever, during the last two months.

OUR OGDEN LETTER.

OGDEN CITY, Utah, August 25th, 1894.

Edison Deseret News:

This has been indeed a remarkable year thus far for casualties, untimely deaths and

TERMINABLE ACCIDENTS.

And this part of the country has been no exception to the rule for Weber County has had her share of them.

Your numerous readers will remember that a short time since I sent you the full particulars of the sudden death of a young man, who was a member of the famous West. Weber county, which deprived an excellent family of a husband and father. To-day his daughter, a young woman about seventeen years of age, met with a terrible accident while she was washing for a family who reside on Young Street in this city. Just as she was about to enter the water, she fell from the stove and caused her clothes to catch fire, while others think it was caused by the

EXPLOSION.

of a can of coal oil which had been standing near the stove. Whether it was, she was soon enveloped in flames, and at once commenced to throw her clothing. But this did not avail much for she was severely burned about her arms and various parts of her body. Her screams soon brought her father, who was called in, and he did all he could for the comfort of the sufferer. Shortly after she was removed to the residence of

MR. ANDREW GREENWELL, SR., (who is now incarcerated in the Penitentiary for violating the Edmunds law). There the unfortunate young lady will receive all the attention and assistance that the kindness for which Mrs. Greenwell is renowned, can suggest. Now matter what terrible we cannot say at present, but it is hoped and believed she will recover, although it may be some considerable time first. She is as anxious as we can be expected under the circumstances.

THE BURGARS.

are not all caught yet. This light-disposed, shop-lifting, house-breaking fraternity make their nocturnal rounds for the purpose of robbing the pockets of our citizens while the latter are sleeping soundly.

COAL! COAL! COAL!

Weber, Rock Spring, Pleasant Valley and Red Canyon—all the Coals sold in the Salt Lake market are now being mined from the celebrated Grass Creek mines and we are mining better coal than ever before. No other Weber brought to this market can compare with it. All our coals are nicely screened and cleaned.

SORENSEN & CARLQUIST'S, 116 Main Street.

Remember Her Youth.

Mrs. Frances Chesley, Clay Co., Iowa, tells the following remarkable story, the truth of which is vouchsafed for by the residence of her son, now 73 years old, who has been troubled with kidney complaint and lameness for many years. "I am free from all pain and soreness, and am able to do all my own housework. I owe my recovery to the Electric Balm for Rheumatism, which I used for a long time. It cured me of my lameness, and I am now as well as ever."

Try a bottle, only 50c. at G. C. M. Drug Store.

during the heated term their slumbers have been light, and they were easily awakened, and the midnight marauders have frequently been disturbed in their operations and fled, some followed by leaden missiles, which unfortunately did not overtake them. But it scared some of them badly.

No serious robberies have occurred lately, but the thorough fear of the law, the thieves' rascals who infest our city. Although some of them thus far have escaped the vigilance of our peace officers, it is only a matter of time when they will gather them in.

Nearly everybody of a dozen years residence in Ogden remembers Colonel Peter Saxe, who lately visited this place very frequently, and he did considerable business with some of the citizens of Ogden. He is here now with his excellent wife. The Col. has purchased several car loads of

PURE BLOODED CATTLE.

From Holstein. They are en route and will arrive here in a day or two, when he will accompany them to the Ogden State. He is surprised to see the wonderful growth of the Ogden city. But he does not see why the Colonel should be so surprised, knowing as he does the Ogden people's determination to build the Ogden State. He is here now with his excellent wife. The Col. has purchased several car loads of

THE EXPERIMENT WAS MADE AT WASHINGTON, D. C. last Monday of running a locomotive engine with oil for fuel instead of coal. The engine, with a passenger car attached, left the Alexandria depot of the Washington, Ohio & Western railroad about noon and ran up the Potomac to a point near Vienna, Va., a distance of fifteen miles. It was a speed of forty miles an hour was attained and no difficulty was experienced in raising a steam pressure of 140 pounds. The inventor, Capt. W. H. Brooks, an old locomotive engineer, accompanied the party. The oil is used on the same principle as in vapor stoves, the crude petroleum being vaporized by a blast of superheated steam. The heat generated is intense and continuous. About thirty gallons are used each hour, and a tank on the tender of the engine Monday carried six barrels. Quite a large number of Washingtonians are interested in the invention which, it is claimed, will revolutionize the use of coal as well as doing away with chimneys, for the burning of the oil creates no smoke.

BUY Home-made Woolen Goods this Fall from the Provo Mills Agency, John C. Cutler & Bro., No. 36 Old Constitution Building.

5,000 pcs. Flannels.

10,000 lbs. Woolen Yarns.

1,000 doz. Mens' Woolen Socks.

The Studebaker's Branch.

Have just received a car load of The Morrison Steel, Hand and Sulky Plows, also Wier Steel, Hand and Sulky Plows, also South Bend Chilled Plows, Harrows, Hay Rakes. We have also secured the agency for the celebrated "Assault Standard" Wagon and Carriage Grease. This condensed and strictly Pure Petroleum Jelly possesses all the lubricating, softening, preservative and healing properties of the other well known and familiar grades, differing from them only in melting point, as it is many degrees higher.

For Carriage and Light Wagon Grease, the melting point guarantees clean hubs in any climate and prevents waste from dripping by the action of heat, and will not travel like Castor or other liquid oils, thus preventing injury to the underside of the axle as from dust or grit.

For all kinds of Agricultural Implements it is the most practical and satisfactory lubricant known.

For Leather and Enamelled goods, it is softening and preservative, resisting the effects of rain, cold, or animal salts when applied upon a clean and dry surface.

For Sore, Burns, Scalds and Chapped Hands it is cooling and curative.

As a Hoof Ointment it has a widely established reputation.

For Caked bags, sores, abrasures of the skin, or cracks in cows, there is no better application.

It is a valuable and indispensable in every household.
