

MINING, BUSINESS AND STOCKS.

ON THE STOCK EXCHANGE TODAY

Sales of the Forenoon Aggregated
The Sum of \$4,933.

NEW YORK WAS STRONGER.

Contrary to Expectations, California
Was Also—Wabash Appeared in
Better Tone—Quotations.

The week opened with the sale of 5,100 shares of stocks on the mining exchange this forenoon, the same bringing the sum of \$4,933.

Rather unexpectedly, California pulled through the call stronger. Brokers anticipated differently, as it was expected as a result of the order to shut down, it would continue to weaken. There was no change in Daily-West, the stock was in little demand; a sale of 100 shares was made at \$38.50. New York Bonanza appeared in the pit exhibiting more strength than it did towards the close of last week. The belief prevails that the drift headed towards the vein will disclose something of an encouraging nature. For that reason very little stock is offered.

Wabash was in a little better tone this forenoon, closing about two cents higher than it did on Saturday.

The closing quotations and sales were reported as follows:

Forenoon totals	\$5,029.00

Utah Mine Ores.

Shipments Enroute—Assayers Fail to Agree on Lot at Sampler.

Word was received at the Utah mine offices this forenoon that a car of ore had left for Fish Springs property on the 5th inst. According to the report of the mine assayer, the lot will average 48 per cent lead, and 116 ounces silver. The lot consists of 24,000 pounds. The carload which arrived at the samples about the middle of last week is still unsold. The assayer employed by the company and the one drawing pay from the smelter bidding on it made two tests, both times failing to agree. Now an unripe will be called in to check up the others and to decide the difficulty.

To-day's Metals:

SILVER, Bar, 54 7/8 cents
LEAD, \$3.50
CASTING COPPER, 12 1/4 cents a lb.

STARTING OF MAJESTIC PLANT

Manager Alexander Expects it to
Occur by Sept. 1.

COLORADO METALLURGIST.

Builders of Plant Will Operate it
Three Months—If Satisfactory,
Company Will Accept It.

Preparations for the "blowing in" of the Majestic smelter at Milford are being pushed with dispatch. The metallurgist sent to Beaver county by the builders of the plant, the Colorado Iron Works Co., has been on the ground a week; he came to superintend putting on the finishing touches and to arrange for a proper mingling of the ores. The gentleman is rapidly rounding out things for business and it is reported that he is eminently pleased with the character and quality of the ores from the several mines of the Majestic company, and that everything will be running in full blast before the snow flies again.

This bit of information is very encouraging to the managers of the company's affairs, who have been working so persistently and with firm faith through the most trying circumstances.

When the Colorado company contracted to equip the Majestic plant, it was also stipulated that the former was to operate it for a period of three months, at the expiration of which time the company will accept it, provided it performs its functions successfully.

Manager Alexander said this morning that while no definite date had been decided upon, he believed that the load turning out would be running not later than Sept. 1.

OLD MARSAE MILL.

Smoke Issuing from Its Big Stacks—Only temporary, however.

It looks like old times to see smoke issuing from the stacks of the old Marsae mill, and our only wish is that it might be permanent, says the Park City Record. It will only be a few days until some of the big contracts will be awarded.

Not a word has come from the management of the Salt Lake Route concerning the extension of the line from Frisco to the site of the proposed new works.

MINING CONCENTRATES.

Cel. W. A. Parish arrived in the city this forenoon.

State Senator A. B. Lewis is scheduled to arrive from Chicago this afternoon.

M. J. O'Meara and T. J. Lynch, the Tencopa Mining Kings, are in Philadelphia, today.

The assessment on the stock of the Galena Mining company becomes delinquent next Wednesday.

Samuel Newhouse has gone east. He departed on Saturday afternoon and will be absent several weeks.

Manager G. H. Robinson of the Tintic company, went to Eureka yesterday, making the trip in his automobile.

The concrete work at the Utah Copper company's new concentrator at Bingham will be started this week.

W. A. Rhodes, the well known "bull broker" and wife, leave for California tomorrow on a three weeks' pleasure trip.

The Fast Ontario mine of Park City has resumed operations. A party of eastern shareholders visited the property last week.

J. M. Boutwell, of the United States Geological survey, has returned to the state to examine further into the mining regions of this section.

Wallace W. Wait, treasurer of the Blue Acre Copper company, has returned from an inspection of that Beaver county property well pleased.

Development work in the La Plata property, La Plata district, are being pushed vigorously. The tunnel is completed to the length of nearly 300 feet.

A vein of manganese ore has been opened in the Goodwill mine in Aspeton Canyon east of Henderson. It is about 12 feet in width.

Manager R. G. Wilson of the New York Bonanza mine of Park City, departed for the coast last Saturday afternoon. He expects to be absent for two or three weeks.

The California mine at Park City has been closed down and advice from Park City state that the mortgage against the property is to be foreclosed. The present indebtedness is about \$20,000.

Manager G. H. Robinson of the Tintic company states that there are 2,000 tons of ore blocked out in the Yampa mine at Bingham; that on the level above the Craig tunnel is an 8 foot vein of ore that will average 10 per cent copper.

MAMMOTH AND A. S. & R.

Manager McIntyre May Ignore the Existing Contract.

According to the latest reports, says the Tintic Miner, Manager McIntyre of the American smelter has not yet given the Mammoth company an answer concerning his request for a rate on low grade ore, and the matter may be held in abeyance, unless Manager McIntyre takes the bit in his teeth and ignores the contract that, until Jan. 1 next, binds him to ship the output of the mine to the A. S. & R. Co.'s plant. It is said that the Bingham Copper and Gold Mining company would "lady ship" McIntyre the rate he asks, the ore, which runs high in silica, being a very desirable product for the smelter. It would not surprise those best acquainted with McIntyre, either, if they get a crack at it irrespective of the present contract, unless the A. S. & R. Co. acts with discretion. A conservative estimate of the low grade in the mine and the mill bins and on the dumps at 50,000 tons, which would be the company's average at \$2.50 if the treatment charge asked for is granted. That means a net revenue of \$175,000, a sum not to be despised, they say.

NEW YORK METAL PRICES	
Lead, quiet, 5 1/2.	
Copper dull, 13.00-13.12 1/2.	

SHIPMENT FROM B. W. & H. MINE

Last Eighty Sacks Averaged \$104
Gold and Silver to Ton.

FIFTEEN TONS AT SMELTERS

Was Settled for Today—Brought
\$765.04—Ore Taken From Winze—
Increase in Values Noted.

The well known B. W. & H. mine, situated near Marysville was in the market today with a 15-ton shipment of ore, making the tenth car forwarded to the valley smelters from that very promising property.

The ore was taken from the winze in the lower tunnel, which is now down 70 feet, and was settled for on the basis of 1.45 ounces gold, 62.5 ounces silver, bringing gross returns of \$59.91 per ton, or \$765.04 for the 15 tons.

The last 80 sacks shipped from the mine averaged \$104 gold and silver to the ton, which, compared to previous shipments indicates that with depth an increase in values is noticeable.

ORDERS TO RUSH WORK.

Newhouse, Beaver County, Will Soon
Be an Active Place.

When Samuel Newhouse pulled out for the east last Saturday he left orders with his managers to push work at the expiration of the mammoth enterprise undertaken by the Newhouse Mines & Smelters Co. in Beaver county.

Chief Metallurgist A. J. Bettles is already receiving estimates for the building and equipment of the great concentrator and smelter as well as for other structures which will occupy space in the new town of Newhouse. Mr. Bettles and Consulting Engineer Fischer were in consultation today. It is expected it will be only a matter of a few days until some of the big contracts will be awarded.

Not a word has come from the management of the Salt Lake Route concerning the extension of the line from Frisco to the site of the proposed new works.

LIVE STOCK.

Chicago, Aug. 10.—Cattle—Receipts, 21,000. Steers, good to prime, 2.00-2.50; poor to medium, 1.50-2.00; hogs, 2.00-2.50; calves, 1.50-2.00; sheep, 1.00-1.50; pigs, 1.00-1.50; chickens, 1.00-1.50; turkeys, 1.00-1.50; ducks, 1.00-1.50; geese, 1.00-1.50;
