with the thought that he was thus saved from one infinitely more terrible—a fate which, by an inevitable necessity, would have culminated in murder and death upon the scaffold.

It is to be hoped, at all events, that the moral lesson so plainly enforced by this terrible occurrence will have a lasting effect in checking the growing prevalence of adultery—a crime justly classed among the most enormous and worthy of the severest penalties of the law.

—THE WASHINGTON UNION—the late organ of the Administration, has passed into the hands of the Superintendent of Public Printing, who has changed the name; it is now called the Washington Constitution; and Mr. Wm. M. Browne, for two or three years past connected with the editorial department of the N. Y. Journal of Commerce, has been called to the position of chief editor. The Journal of Commerce congratulates the readers of the Constitution and all concerned and connected with the establishment—"that they are to have the benefit of his valuable services" and continues:

Mr. Browne, although a foreigner by birth, is a great admirer of American institutions, and by diligent study during the eight years of his residence in this country, has made himself better acquainted with them, and with the principles on which they are founded, than are most native born Americans of equally fine talents and education, and of mature age. He is also a Democrat of the first water, although belonging to a noble family in Ireland, and liable at a future day to inherit its distinctions. He however regards these things at a very low rate, and only desires to act well his part as an American citizen, to which honor he attained some two years ago.

With such high encomiums on the chief editor of the mouth-piece of the Administration, the leading organ of one of the great political branches of the Government and as a journal emanating from the seat of government of a powerful republic, we may reasonably expect that the Constitution will furnish a true index to the magnanimity of unprejudiced and high-minded conduct on the part of the Administration, of an unwavering adherence by the party represented, to the well-defined doctrines of the Constitution; and that the course of Mr. Browne will be marked with moderation; that a high-minded effort to defend and preserve unsullied the liberties of his adopted country will eminently distinguish his editorial career; that he will never stoop to sectarian feud or make of the Constitution a libeller of the inherent and inalienable rights of American citizens.

—THE N. YORK HERALD, which, since the inauguration of President Buchanan, has been a leading supporter of the Administration, has been finally dismissed from that post and sent adrift to take its own course. This probably will somewhat diminish the income of the Herald establishment, as government patronage is said to be somewhat *phat*, especially at Washington.

In Utah, however, we have the privilege of announcing that government patronage, so far as relates to public printing, &c., as extended to us—particularly of late—has been exceedingly *lean*. If the News was dependent, in the least degree, upon such patronage as we have received here during the past six months for work performed, our readers would soon have an opportunity of reading our valedictory; but such, thank our good stars, is not the case. There was a time, however, when government printing in this Territory would pay. There may be such a time again.

In an article published in the Washington Constitution, said to have been either written or dictated by the President himself, the Herald is charged with demoralizing, dividing, corrupting and driving out of power, the Democratic party, "on which alone Mr. Buchanan can depend for support," while, at the same time, professing to sustain Mr. Buchanan. Of the Herald's conduct toward Mr. Buchanan's Cabinet, the article says:

It dismisses his Cabinet, Mr. Buchanan's chosen and trusted helpmates in administering the Government, at least once every month, giving them name and characters which the vilest old scold of a cook or a scullion would hardly apply to a dog.

After exposing the Herald's duplicity in misrepresenting the condition of the Democratic party, the Buchanan and Douglas disaffection, &c., &c., it charges the Herald with refusing to believe that the Administration has the cordial support of the Democracy, or that the latter won't be whipped out of their boots, and closes as follows, giving several others of the New York papers a severe back-handed blow:

And this it calls 'backing' the President. It 'backs' him by representing him as deserted by his supporters, and these as divided, demoralized, and repudiated by the

country, utterly overthrown at the North, and in a fair way of annihilation at the South! Even if the Herald is sincere in its zeal for the personal success of Mr. Buchanan, does it suppose that it would be of service and pleasure to any man to be thus supported and flattered at the expense of the party to whom he owes his position, or of colleagues willing to sink or swim with his fortunes?

But at last the Herald is its own worst enemy in this double dealing, whatever course it may take in the sequel. If it should wheel into the line of the Opposition, as it did in going over, horse, foot and dragoons to Fremont in 1856, it will be sneered at as an eleventh-hour laborer in the Black Republican vineyard; and will take rank in the rear of the supercilious, pedantic, erratic 'Tribune'; the conceited, scurrilous, juggling 'Times'; the mendacious, flippant, blackguard 'Evening Post'; and the passe corrupt and aristocratic 'Courier and Enquirer.' If, on the contrary, it should cease its defamation, and declare openly for, instead of covertly against the Democracy, then its enemies in the Opposition will fling into its teeth its present stereotyped tirades upon the Democracy, and ridicule the Democracy themselves for accepting a support which it must regard as a degradation.

The rain water measured 1.847—which is 13 1/4 inches and 97 thousandths. The melting snow from the mountains and canyons produces a surplus of water for irrigation, and in some instances, is destructive.

A LONG COURTSHIP.—A young lady said to her beau, after fifteen years' courtship, "Charles, I am going out of town to-morrow." "Where?" "I don't know." "When are you coming back?" "Never." "What are you going for?" "I am going to look for something which I have not, never had, and yet you can give me without loss to yourself?" "You are very welcome to it, I am sure; but what is it?" "A husband?" "Why, you might have had that fifteen years ago, if you had only said the word; but I was afraid to ask the question."

Cheap Edition of the Literary Gazette and Family Pictorial.

PUBLISHED MONTHLY BY MARIE LOUISE HANKINS & FANNIE LUCELE, under the immediate superintendence, of Col. C. Ashton Hankins, and sent by mail for

ONLY FIFTY CENTS A YEAR!

Postage only six cents a year, when paid quarterly in advance. The cheapest Family Paper in the world.

The latest reliable Fashion Plates, Dress Patterns, useful and ornamental Needle Work, Diagrams, and Embroidery Designs in every number.

The best Writers, the best Stories, and most Engravings.

Specimen copies sent free of postage, on receipt of a stamp; but stamps will not be received for subscriptions. Subscribers and Agents must inclose the money—CASH; and write names, postoffice, counties and States, plain and distinct.

Canvassing agents (particularly Females) wanted everywhere. Agents are allowed to retain 20 cents out of each 50 cent subscription they obtain, and some are now clearing as high as \$25 a week profit for themselves. Post Masters and Teachers can act as agents, on the same terms.

Persons receiving specimen copies of the Literary Gazette are requested to act as agents, or to show it to those who will, and they shall be sent a copy of the paper one year gratis, as compensation for their trouble. This is an easy way to pay for a year's subscription, and the effort will put money in the pockets of those who need it, and extend our circulation. Instead of earning 50 to 75 cents a day with her needle, or by teaching school, a smart woman can procure from 10 to 20 subscriptions every fair day in the week, and clear for herself \$2 to \$4, while she would have made only 75 cents at her old occupation.

All persons extending the circulation of the paper continually get a copy gratis.

Applicants for Agencies are requested to send us the names and post-office addresses of all the leading people they know of, who would be likely to subscribe, and a specimen copy for inspection, will be mailed to each of them free of postage. Agents find this plan very profitable to them, as they obtain subscriptions much easier.

Incuse an extra three cent stamp when a written answer is wanted.

Answer to 'Question for Arithmeticians.'

ERRATUM.—On reading the "Question for Arithmeticians" since the publication of my answer to the same, it was found to read 80 yards and not 80 rods (440 yds) as was my impression when I wrote the solution. Consequently, thus much of the solution is wrong—it should read—80 yds. plus 153 yds. equals 278 yds., &c., and finally the distance the hound had to run to overtake the fox will be 556 yds. W.M.C.
