MESA, ARIZONA.

GIGANTIC ENTERPRISES

In Irrigation and Reclamation—Greatly Favored Land for Homeowners.

Special Correspondence.

Mesa, Maricopa Co., Ariz., Feb. 22.—The purchase of the Arizona canal and the Mesa project has great significance to the people of the Salt River valley, and for Mesa in particular, for it means the construction of a diversion dam by the general government, and the building of two great feet canals, one on the north side of the river and one on the south side of the river to conduct the water from the dam to the present canals, and will when completed simplify and cheapen the cost of maintaining the canal heads as to reduce it to a minimum. It will give to the Salt River valley, with its 300,000 acres of the finest soil in existence, the most perfect water system in the world. It is not known definitely the exact point where the diversion dam will be constructed, as the reclamation service has not yet made it public, if it has decided the question. But it has been taking the soundings for bedrock from the Mesa dam as far east as the mouth of Box canyon. It is known, however, from recent soundings that bedrock is nearer the Salt River than was supposed. The dam will be about 11 miles up the river from Mesa. Here a masonry overflow dam would have to be constructed about 28 feet high and about 4,000 feet long, and would cost in total \$10,000,000. As Mesa is the nearest railroad point it would be the supply station for everything. This, together with being the supply point for the Great Tonto river, will raise Mesa to the first importance and be a great thing for the surrounding country. The prophecy of B. A. Fowler, the president of the Salt River Water Users' association, uttered some time ago, is being fulfilled. "Within 10 years Mesa would be a city of 10,000 inhabitants" will be put in the way of speedier fulfillment.

Property already is beginning to feed the impulse of the future, but is still within the reach of prospective purchasers, and now is the time for one to get a foothold in this city and the surrounding country. For with the completion of the Tonto dam and the diversion dams and canals, with a climate and soil that will produce profitably most any crop from wheat to cotton, and apples to oranges and lemons—strawberries, grapes, peaches, and sugar beets; located on the transcontinental lines, the connections now building—namely the Santa Fe, and the Southern Pacific, this land is destined to become one of the most favored spots on earth.

And Frankie Neil Successfully

Defends Bantamweight

Title.

CHAMPION NEVER IN DANGER.

Got His Man Groggy in Fourth Round

And Kept Him Out to the

Flush of the Fight.

San Francisco, Feb. 28.—Frankie Neil, the American bantamweight champion, successfully defended his title by knocking out Harry Tenny in the fourth round tonight at Mechanics' pavilion. At no time was Neil in danger of losing. He outboxed his man from start to finish. Neil played havoc with Tenny's face early in the contest and in the fourth round almost closed Tenny's right eye with a terrific left hook. Neil's main reliance was his left, which he placed with wonderful accuracy and seldom failed to connect with either Tenny's jaw or body when he cut loose. He seldom used his right.

ADVANTAGE IN THE FOURTH.

As early as the fourth round Neil had his man groggy. He played for Tenny's face and when the bell rang, Tenny went woozily to his corner. It was the same story all through the fight. Neil continued to batter Tenny about at will with his body blows being especially powerful. Once Neil did a smart uppercut to Tenny's jaw, and in the fourth round Neil caught Neil on the jaw with a right swing that sent him almost to the ropes. He took the count, but Tenny refused to rest his head against the ropes and succeeded in evening up matters.

The eleventh round saw the beginning of Neil's real work. He kept constantly after his man, planting his left to the body and jaw with merciless precision.

PUNISHMENT IS SEVERE.

In the fourteenth and last round Tenny was given such punishment that he was unable to continue. Neil started the round with a terrific left body smash that sent Tenny reeling back to the ropes. Another blow, similarly applied, sent Tenny to the floor for the count of nine.

Neil was not content with this, but after blow upon his helpless antagonist, Frankie Tenny went to the floor from a succession of blows.

Heart Weakness

The action of the heart depends upon the heart nerves and muscles. When from any cause they become weak or exhausted, and fail to furnish sufficient power, the heart flutters, palpitates, skips beats; and in its effort to keep up its work, causes pain and distress, such as smothering spells, short breath, fainting, pain around heart, arm and shoulders. The circulation is impeded, and the entire system suffers from lack of nourishment.

Dr. Miles' Heart Cure makes a heart strong and vigorous by strengthening these nerves and muscles.

"I had palpitation and pain around my heart, and the doctors said it was incurable. I don't believe it now, for I feel better than I have for five years. I had taken six bottles of Dr. Miles' Heart Cure, three bottles of the Nerve and Liver Pills, and am entirely cured, and feel better than I have for five years. It is all due to these remedies. I want you to know that your medicine cured me. It relieved me from my first dose, and I kept right on till the pain in my chest was gone, and I kept on feeling better even after I quit taking it." JOHN H. SHEPHERD, Belding, Mich.

Dr. Miles' Heart Cure is sold by your druggist, who will guarantee that the first bottle will benefit. If it fails he will refund the money.
