The Big Dividend Payer Seems to Have Lost Favor.

GRAND CENTRAL TRADED IN

Northern Light Moves Forward Bunker Hill Stronger - Slight Decline in Yankee Con-

TODAY'S METALS:

SILVER 59 LEAD, \$4.40 CASTING COPPER 15%

A fair days business was done on 'change today and with t few exceptions, prices were slightly better. Among the exceptions was Mammoth, which was "shorted" at 2.18, which indicated that the seller, at, least, believes there will be a further drop in price. Yankee Consolidated was also weaker, seling down to 18%. Sacramento declined to 29 and May Day made future transfers at 56.

Grand Central sold at 5.65 and Sunbeam dropped 100 at 66%. Dexter was in demand around 2.22, while Northern Light made sales around 19.

South Swansea sold at 1.27%, Dalsy responded at 11 and Daly West at 12.04. Joe Bowers participated at 14% while reg., 1.11; do coupon, 1.41. Star Consolidated brought as high as

Slight Awakening in the Wall Street Market Today.

Then Comes a Lapse Into Dullness-Live Stock Steady-Produce Murket Quiet.

New York, Nov. 22.—Prices of most stocks were higher at the opening, the widest changes being found among the industrials. But no change exceedthe isdustrials. Business was fairly large but the activity and strength centered in special stocks. Calus of 1 to 2 points occurred in the coalers, the New York public utilities, general electric, sugar and steel hoop. Evidence of support in leather induced heavy covering, which lifted it 27k to 23. A large number of the usually dormant stocks showed some improvement, but there was little of interest in the leading railroads. There was a general decline after in lock. The specialties bore the brunt of the selling, sugar and Teanessee coal losing 2 points and many others a point. Towards midday the general tone was better, but the duliness was pronounced. Realizations continued on large scale in Wabash debentures. The bond market otherwise was ir-

regular in tone.
Prices hardened after 2 o'clock, but the market continued narrow. Sugar, after falling below 1.56, rose to above 1.57. Prices eased off in the late dealings and the close was rather unsettled and irregular with small net gains the

BOSTON WOOL MARKET Boston, Nov. 21 .- The future of the ituation in the wool market here is unertain as regards where the present boom in prices is going to end. Buyers are plentiful, and there is an active demand for all kinds of wool, but holders are uncertain as to whether they shall hold or sell. The week's business shows that over 15,000,000 pounds changed hands, against 12,000,000 last week, and

15,000,000 two weeks ago. It has been several years since the market has been so strong. Territory wool continued in the lead, with prices \$50.57 cents for fine medium and fine sourced, while fine strictly staple calls for 65 cents. Medium wools are feeling the effect of the advanced prices, and are being taken more freely. The Australian market is very active, with stocks light and prices tending upward.

## BUSINESS FAIRLY LARGE. SAMPLES FROM ORIZABA CLAIMS.

Ore that Will Assay is Found All Along the Big Vein.

ORE FROM THE ALAIX MINE

Shipment Will be Made from the Rabbit's Foot - Gold Values in Oregon-General News,

Samples of what appears to be gold bearing rock from the serpenting stratum have reached the office of the Orizaba Mining company from its cialms in the Antelope Mountains, about ten miles southeast of Black Rock. The specimens have been taken from a vein recently discovered in the white serpentine rock, and while assay returns are not yet obtainable it is confidently believed that the much desired gold vein is now in sight, connected, as It was felt it would be, with the serpentine rock recently discovered.

The company's property consists of nineteen claims, thirteen of which are owned outright by the company, the others being secured under a bond which calls for the payment of \$6,000 on or before next August.

The surface, it is said, shows the vein pliching into the bill under blue lime pitching into the bill under blue lime stone for over a mile within the lines of the company's claims. The blue lime appears to be the hanging wall and the footwall seems to be a brown lime stone. All the assays obtained along the outcropping vein shows val-ues in gold, silver, copper and lead. Work that has been done in a big iron blow out on the claims shows the sow out on the claims shows the presence there of galena and copper ore. Some nice looking galena is also coming into the shaft of 72 feet, which was sunk in the vein all the way. It is expected that a depth of about 250 feet will have to be reached before the ore deposits will be reached. But the Serpentine rock which in other places is found with big gold deposits, and the found with big gold deposits, and the jasper quartz found in the claims and which is a peculiarity of the Cripple Creek district lead the own ers to believe that they possess the making of a bonanza.

FROM THE ALAIX MINE.

A Stringer of Ore Develops into a Two Foot Vein.

W. H. Evans came to town this mornples from the Alaix property in Cot-tonwood district. As is known the comdrift was run in very hard rock. The face of the drift now shows a dark and extremely hard rock, in its nature closely resembling dark serpentine rock. This contains some values in gold, be-sides pyrites of iron, and to say the least looks quite promising. When running this drift a small stringer of of ore was cut quite close to the shaft and in following this up a few days ago Mr. Evans opened out a two-foot vein of conglomerate rock which appears to contain good gold and copper values Assay returns will be secured from some of the samples during the next few days, at which time the value of the discovery can be determines.

FROM WILLARD HILL.

Louise Mine to Ship During the Next few Weeks.

Special Correspondence. Ogden, Nov. 22.—Yesterday morning J. W. F. Volker, E. E. Stevans, Geo. W. Larkin, Jr., and Chas. Mateer, went w. Larkin, Jr., and Chas, Mateer, went up to the Louise Mining property on Willard Hill for the purpose of inspect-ing the bonanza strike they have made. The gentlemen returned last evening greatly elated over the prospects of the mine. The samples of the copper ore mine. The samples of the copper ore they brought down with them last evening are very fine. A mining expert, who was at the mine with the gentlemen yesterday, said it is one of the finest propositions he has ever seen. The owners of the Louise property expect to have a carload of the ore ready for shipment by December 10th. They feel that everything is very encouraging for the Louise property.

RABBIT'S FOOT SHIPMENT. few Days.

Two Cars Will be Sent in During the Next

Silver City, Nov. 20 .- Supt. J. H. Mc-Ghan, of the Rabbit's Foot mine, has been engaged for the past few days in completing the installation of a pump to handle the water which now appears in the bettom of the main working shaft and also in the drift from the 250 level of that mine. The recent ex-plosion, which did considerable dam-

Mrs. Thomas Aldridge, Villa Ridge, Ill., writes under date of Aug. oth, '99:

"I began taking Warner's Safe Cure last Spring, and have now taken three bottles; it has done me a wonderful lot of good, and I am satisfied it is a grand medicine. I know it would help many a suffering woman, if she would only use Warner's Safe Cure."

age to the underground workings of the mine, caused some delay in the ex-traction of ore and development work, but the debris has been entirely cleared away and enough ore taken out to make a shipment, which will be sent out in a few days. This shipment will be two carloads of very nice ore, the returns of a similar consignment having netted the company about \$100 to the ton. The ore body from which this shipment is below words in form. shipment is being made is from an upraise from the 350 level and shows metallic values of 30 per cent copper and as high as 76 ounces in silver to the ton. The vein carrying this value is about 26 inches, with a much larger vein of a lower grade.

THE ORE IS HIGH GRADE. Malheur District is Being Energetically

The Baker City correspondent of the American Mining News has the following to say of the present status of the mining industry in the Maheur dis-

The Malheur region, one of Oregon's oldest placer disticts, bids fair within a short time to take rank among the promising quartz properties, develop-ment work being pushed energotically with satisfactory results. A 3-stamp mill has been installed at the Red. White and Blue, near Malheur City and is now at work on ore, which has shown values as high as \$50 a ton. The Golden Eagle is to replace its old 3-stamp mill with a 10-stamp. The ore it produces is very rich, some of it yielding from \$200 to \$200 per ton. On Quartz Guich much prospecting has been done, as nearly all the ground has been done, as nearly all the ground has been taken up. There is a mountain of porphyry there that only needs development to become valuable. A good deal of placer work has been done in this district, where thousands of minera operated in the early 60's.

In the Elk creek district, one small property owned by Sloan & Haskett of this city has yielded \$0,000 during the past summer, the old time drifting procera being employed. Some of the ground paid as much as \$250 to a set of timbers. Some chanks of gold from this raine are on exhibition here. The rgest range from \$5 to \$26 each in live. W. A. Parker has returned from the Klondike, Cornneopia, in which reproduced ore that yielded \$15,000 in gold in three-quarters of a ton of ore. A force has been set to work on

#### Riches Found in Dixle.

"Utah's Dixiet The land of sunshine. and flowers, and fruits; of gold and silver, of lead and copper, and of one thousand and one other valuable and interesting things." Thus begins an essay on Southern Utah just published in the Washington County News. And offer referring to the fact that hallow after referring to the fact that balmy skies prevail during the greater part of the year and mentioning the many products that thrive there the writer concludes as follows:

Last, but not least of the sources of promised wealth in Washington county are its mineral deposits. Of the metal known to exist, gold, silver, lead and copper are most important. The mountains to the west and south are laden with these precious treasures, awaiting the magic hand of capital to convert them into the almighty and desirable dollar. Within the last year development work has been going on quite extensively. Old claims are being looked after, new ones are being rapidly recorded, and property has changed hands considerably. Prospects are bright for a boom in mining circles. This has been made resistly. ircles. This has been made possib by the comparatively near approach of the reliroad within the last few months, making transportation easier

and less expensive.

Gypsum of a high grade exists in large quanties, also lime-stone from which a fine quality of lime is made.

Building stone of many varieties exists in great abundance, as well as clay and sand suitable for building purposes and in the mountainous districts trees suitable for good lumber are found. Special Correspondence.

MINING NOTES.

Steady work is being done at the Malvern of Mercur.

Two cars were on the market today from the South Swansea. Five care of ore from the Horn Sil-

ver were at the sampler today. The Hercules of Stockton reported on the market today with two cars of ore. The Taylor-Brunton Sampler reported

five cars from Frisco, two from Tintic, and two from Stockton today. H. A. Cohen has gone to Mercur, where he will spend the next few days in looking over the Golden Gate.

The Chinaman of Eureka, Nev., re

ported at the local refinery today with fifty pounds of gold cyanides.

It will be several days before the Sir Victor is opened up and the work of estimating the extent of the damages

is commenced. It is reported that some very high grade ore is being extracted from the workings of the Ophir mine at State

Mr. Chamberlin of Ogden and Col. Page of Sait Lake made an inspection of the Highland Chief mine on Willard Hill a few days ago. It is reported that a bond and lease

has been secured for one year on the New York group at the Park by Messrs. Sherman and Wilson of Colorado, for As soon as the Union Pacific spur to

the Onlario 600 drain tunnel is com-pleted, says Manager J. J. Daly the present cutrust of 70 tons a day from the Daly West is to be greatly increased.

Word comes from the Altna mine near Hadley, Idaho, that 150 sacks of ore are ready for shipment. The winze from the 150-most level is now down 75

feet, at in orc.

W. H. Child has returned from his trip to the Deer Valley group, Park City, where preparations for the winter's campain have been completed.

The management of the Lion Con-solidated at Stockton contemplate the erection of ore bins and other buildings for winter. The body of first-class ore has widened to 5 feet with a nice lot of milling ore on each side.

The Blamego mine at Park Valley will shortly be equipped with a 3-drill compressor. Washington County News: The St.

George Copper company's smelter closed down on the 14th Inst., and will closed down on the 14th Inst., and will not resume operation at the old stand. The plant is being moved in to the "Point" in this city, where smeiting operations will be carried on in future. Mr. Walker, the superintendent, reports everything running smeothly at the mine, and believes the smelter will resume running in about three wocks. Grand Valley Times: John and Robert Skews came in yesterday from Salt Lake City and have gone out to Big Indian. Wm. Hayes came down yesterday and from Mill Creek and will go to Mancos. He expects to return to Mill to Mancos. He expects to return to Mill. Creek in January. He reports about 10 inches of snow fell on the mountains in the storm this week.

### Catarrh is Not Incurable

But it can not be cured by sprays. washes and inhaling mixtures which reach only the surface. The disease is in the blood, and can only be reached through the blood. S. S. S. is the only remedy which can have any effect upon Catarrh; it cures the disease permanently and forever rids the system of every trace of the vile complaint. Miss Josie Owen, of Montpeller, Ohio,

preseribed by tors relieved me only to me por arily, and though I used them assantly for tea years, the disease had a number of firmer hold than ever. I tried a number of blood remedies, but their mineral ingredients settled in my bones and gave me rheumatism. I was in a lamentable condition, and after exhausting all treatment, was declared incurable. Seeing S. S. S. advertised as a cure for blood diseases, I decided to try it. As soon as my system was under the effect of the medicine, I began to improve, and after taking it for two months I was cured completely, the dreadful disease was eradiented from my system, and I have had no return of it."

Many have been taking local treat-ment for years, and find themselves worse now than ever. A trial of

# will prove it to be the right remedy

for Catarrh. It will cure the most ob-• Rooks meiled free to any address by Swift Specific Co., Atlanta, Ga.
