THE EVENING NEWS.

Friday, - - - August 25, 1871.

PRICE OF GOLD,

Corrected Daily by HOOPER, ELDRIDGE & Co., *Bankers.*

SALT LAKE CITY, August 25, 1871.
Buying at $1.10; Selling at $1.12

WEATHER ITEM.—The highest point reached by the thermometer to-day was 88.

THEATRE.—There was a very good house last night to witness the fourth and final presentation of "Help." The performance was everything that could be desired,—being excellent throughout. To-night the very beautiful play of "The Tomb, the Throne and the Scaffold" will be presented by the full strength of the company.

MRS. CUTLER'S LECTURE.—Mrs. Cutler delivered her first lecture on physiology, to ladies only, this afternoon in the west room of the City Hall. Not being one of the privileged, we are not able to say anything in relation to the lecture; but can inform our lady readers that the second of the course will be delivered at the same time and place to-morrow afternoon.

FUNERAL SERVICES.—The funeral services of the little son of Brother John and Sister Susan S. Nicholson, who died on the 22nd inst, took place on the 23rd at 3 p.m., at the parents' residence, 20th Ward, where a number of the friends of the bereaved assembled and addresses, appropriate to the occasion, were delivered by Elders George Q. and Angus M. Cannon.

THANKS.—We tender our acknowledgements to our City Fathers and Messrs. Taylor & Co. for that excellent Portable Gas light put up at the street corner in front of our office a night or two since. Go on, gentlemen with your improvements. With such a light as this liberally distributed through the city, our street lights will compare favorably with those of other cities of the Union.

RAILROAD EARNINGS.—The passenger earnings of the Union Pacific road for the week ending August 20, are said to have been $50,647,98.

POLICE.—Yesterday Dr Speed and Al Cliff were fined, the former $10, and the latter $5, for drunkenness.

ST. GEORGE.—"Athole," writing from St. George, on the 15th inst., says:

"Since my last there have been no beneficial changes in the weather. The drought and heat still continue. The health of the people is still, however, very good, considering the extreme heat in the daytime. Our nights are now getting quite cool and pleasant.

It is reported that there has been discovered a very fine tract of timber, with a good supply of water, and excellent feed, situated about forty-five miles southeast from St. George. If correct, it will be a great benefit to this southern county.

Our factory continues to produce a good article of home manufactured cloth, &c., and with the increased machinery, soon expected to arrive, will add greatly to the comfort of the people in supplying their necessities in that line, which they appreciate as a great blessing."

VALUE OF VACCINATION.—At a time like this when rumors of that filthy scourge—small-pox, are occasionally heard, the value or worthlessness of Dr. Jenner's discovery—vaccination is a subject worth discussing. The system was first tried in England, and the authorities of that country seem to have taken more interest in it than in any other. Vaccination has multitudes of opponents there,—probably more than anywhere else, but still the popular feeling guided by experience has pronounced so decidedly in its favor, that vaccination was long since rendered compulsory by law. The matter has recently been the subject of further investigation and inquiry by a royal commission, and after carefully weighing the objections urged by popular prejudice, the unanimous opinion arrived at is "that vaccination affords a sufficient protection against small-pox in its most virulent form, and an almost absolute guarantee against death from this cause. Without vaccination, the epidemic now prevailing in England would have become a regular pestilence, and perhaps proved as fatal as in the Middle Ages. The dimensions which the small-pox has at present assumed in the country is mainly due to neglect. Nor need any injurious consequences be apprehended to the human system from the introduction of vaccinating matter, providing it is done with ordinary care and skill. The conclusion is, therefore, in favor of compulsory legislation on the subject."

This opinion, and these observations are well worthy of consideration by all classes of the people, for scarcely any disease is more fatal, or loathsome. The prompt measures of the quarantine authorities here have again been successful in checking its progress; but if a means so simple as vaccination will render immunity from the attacks of the disease almost sure, and experience seems to have demonstrated this fact, surely it is worth while for everybody to attend to it!

PHOTOGRAPHY.—C. R. Savage, Esq., of the Pioneer Art Gallery, East Temple St. handed us a neat little eight paged pamphlet, containing valuable hints to people desirous of having their photographs taken. The nature of the little work will be judged from the heads of the contents which are: "Photography—When to come—How to come—How to dress—How to behave—The children—Business, &c. Persons about to have their portraits taken should apply to Mr. Savage for a copy, as it would, doubtless, be an assistant to such in securing a good picture.

TELEGRAPH LINE TO TINTIC.—From A. Milton Musser Esq., Superintendent of Territorial telegraph line, we learn that the wire and material necessary for the construction of a branch line of telegraph from some convenient point on the main line to the Tintic mines, are all ready, and the construction will be immediately commenced and prosecuted vigorously to its completion.

IMPROVED TACTICS IN BEAR FIGHTING.—A novel method of vanquishing a bear was resorted to recently by a resident of Colorado, an account of which we publish below, as it furnishes the latest and most improved tactics in this branch of mountain warfare. Two men residing in Georgetown left, a few days since, on a hunting excursion and on the second morning out one of them left the camping place to prepare a "deer lick," taking with him an augur and a yeast powder can filled with salt. While pushing his way through the bushes he suddenly found himself confronting a large black bear. The bear showed fight, and the man was too close to retreat, and having no weapon, he dashed the pan of salt into bruin's eyes, and while the latter was trying to clear his optics the hunter pounded away at his head with the augur. This was more than bruin could endure, and he very quickly gave up the contest and fled.

FREIGHTING BY THE UTAH SOUTHERN.—The day before yesterday a load of wheat from Springville was freighted to the city by the Utah Southern, from a point about fifteen or eighteen miles distant.

NEW MAP.—Mr John Burns called upon us yesterday and showed us a map, which he has been getting up, of the city and a portion of the county of Salt Lake. This map is copied from the city and county plats, which have been drawn under the direction of Surveyor-General Fox, and contain the numbers of the blocks and lots in the city and in the five acre lots. It is Mr. Burns' intention, he informs us, to have this map lithographed, and for this purpose he is engaged in soliciting subscriptions.

A CHOICE FARM FOR SALE!

d231 tf

NOTICE OF REMOVAL!—On August 31st I will have removed to Commercial St, West side, right opposite German Bakery and Coffee Rooms, where I will be pleased to wait upon my many friends and patrons, until the New "Lions Den" on East Temple Street will be completed.
DANIEL GRENIG,
d231 1w Baker and Grocer.

NEW REFORM.—The introduction of Soda Water and Sarsaparilla, by Day & Co., has done more in the way of a Temperance Reform than all the lectures that have been delivered in the country. The natural condition of man is a thirsty one, and it has long been an established fact that water will not quench thirst. The question then arises, can we find a substitute as harmless in its effects, and more delicious in taste than anything yet discovered? We find it in Day & Co.'s Soda and Sarsparilla. If every one would sign the Pledge and drink nothing but this Celebrated Beverage, much degradation, misery, shame and crime would be prevented in the world. If any one doubts the truth of our remarks let them step into the first place they come to and try it. It will vouch for itself. en(170)tf

EDUCATIONAL.

MOTHERS, READ THIS!

THE
EUREKA DIAPER!

IS JUST THE ARTICLE NEEDED BY EVERY MOTHER WHO CONSULTS THE HEALTH and Comfort of Her Child!

THE EUREKA DIAPER Is designed as a shield to protect from moisture the clothing and bedding of children, and also the clothing of those who have the care of them. It is made *thoroughly water-proof*, there being no *sewed seams*, the threads of which rot when exposed to moisture.

THE EUREKA DIAPER Is so constructed as to fasten below the stomach, and to conform to the shape of the child's body; therefore it is not liable to fall off, and consequently securely retains the linen diaper in its place, at the same time giving perfect ease and comfort to the child. One of the many advantages of the EUREKA DIAPER is, that the danger and trouble of using pins is avoided; another is, that it permits a free circulation of air. They are manufactured in four different sizes, so as to suit the age and growth of the child, No. 1 being the smallest, and No. 4 the largest.

We call the attention of our Lady Friends to the Newest, Rarest and Most Exquisite
Hamburgh Edgings and Insertions.
