REPORT OF SPECIAL COMMITTEET.

The report of the special committee, Hartenstein, chairman; Rob-

Contagious Blood Poison is the most degrading and destructive of all diseases, as it vitiates and corrupts the entire system. The first sore or ulcer is followed by little red pimples on the body, mouth and throat become sore, the glands enlarge and inflame, copper colored splotches appear, and hair and eyebrows fall out. These are some of the milder symptoms ; they increase in severity, finally attacking the vital organs ; the body is tortured with rheumatic pains and covered with offensive esting sores.

It is a peculiar poison, and so highly contagious that an innocent person handling the same articles

used by one infected with this loathsome disease, may be inocalated with the virus. It can be transmitted from parent to child, appearing as the same disease or in a modified form — like Eczenia or Scrofula. Many an old sore or stubborn skin trouble appearing in middle life, is due and traceable to blood poison contracted in early life. You may have taken potash and mercury faithfully for two or three years and thought you were cured, but you were not, for these poisonous minerals never cure this disease ; they does it from the autistic but you were not, for these poisonous minerals never cure this disease ; they drive it from the outside, but it is doing its work on the inside, and will show up again sooner or later. You may not recognize it as the same old taint, but it is. S. S. S. has cured thousands of cases of Contagious Blood Poison, and it will cure you. It is the only purely vegetable blood purifier known, and the only antidote for this poison. S. S. S. cleanses the blood thoroughly of every particle of the poison -- there is never any return of the disease.

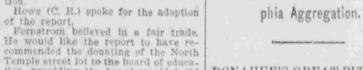

Mrs.T.W. Lee, Mont gomery, Ala, writes : Several years ago I w as inocolated with poison by a diseased nurse, who infected my baby, and for six lang years I suffered multil misery. My body was covered with sores and ulcers. Sev-eral physicises treated mie, but all to no pur-pose. The mercury and potash they gave me seemed to add fuel to the awful flame which was devouring me. Unchristian Christianity.

New York, April 25 .- Rev. Jacob Chamberlain, a missionary to Hindostan, said in an address in the Carnegle hall meeting of the ecumenical conference last night:

"There is a trend in India today toward the acceptance of our Christianward the acceptance of our Christian-ity but without our Christ: that is, merely accepting the morality taught in the Bible. This is accounted for by the fact that many today reject the re-incarnation of Brahma and as a natural sequence it is difficult to get them to accept the re-incarnation of Christ. A few years ago, a prominent Hindoo suid in my presence: Hindoo said in my presence: "'I have read the Bible myself, have

Wichlta, Kan., April 24 .- William Jennings Bryan arrived here today at 11:05 a. m., on his way from Texas to Washington, April 24 .-- It can be stathis home in Lincoln, Neb. His visit was under the auspices of the Sunflower league, a Democratic organization embracing the State. Mr. Bryan attended a meeting of the club this afternoon, making a short address, and later delivered an open-air speech to 2,000 people. Tonight he was the guest of honor at the annual banquet of the Sunflower league. Mr. Bryan in the course of his banquet speech said: "The public wonders why I have dropped the silver question, New measures are resting upon us, but I shall never drop the eilver question until the little coteries of English financiers cease to meet in secret and plan the laws of this country. The difference between this campaign and that of 1896 is that the maiters of trusts and imperialism have been injected and that the East has become educated on the silver question. The East no longer re-gards Populists as anarchists but has come to respect them." Referring to the Boar war, he said: "I'm sure of men's opinions by their sympathies. The sympathies of all our people are with republics, and in the investigation of the two of the two of the sympathies. great contests that are fought between kingdoms and republics we know where to place the heart of Americans. It is today with the Boers, and I do not say that because I am against Eng-land. I have some regard for England, because I am part English myself. I am also part Irish and part Scotch, but above all I am an American." In an interview today Mr.Bryan sald: in an interview today Mr.Bryan Said: "The outlook for the Democratic party is improving every day. The Republi-can party will be on the defensive on every question and its position on any one of several questions is bad enough to defeat it." He does not think Dewey's name will come before the Kansas City convention.

In many places there are camps of Chinese drilling with more or less publicity, with the firm expectation that is the not bong discost forms, there is publicity, with the firm expectation that in the not long distant future there is to be a general uprising. The rebellion in Shantung is growing to an alarming extent. The message, which was written on the back of this chair by Dr. Ruiz, who dipped his nails in his own blood, reads: "Mercedes, Mine, Evangeline, Ricard-ito, good bye. No Conspiracy Against Canada,

New York, April 25 .- A special to the

Herald from Washington says: An investigation extending over the last two months into the reports that a conspiracy had been planned in the United States against Canada on ac-count of the Hoer war has brought out nothing to substantiate them.

This investigation was conducted as a result of representations made to the state department by the British gov-ernment. It is certainly a fact, according to state department officials, that no evidence has been obtained show-ing that persons in this country con-spired to destroy the Welland canal.
