

ALL BOOSTING FOR BASEBALL

indications Point to a Large At-tendance at Meeting Thursday Night.

AS TO SUNDAY BALL GAMES.

Salt Lake and Ogden Will Probably Be the Only Towns to Tolerate Them.

The baseball fever certainly seems to have struck this town with considerable force and has fastened itself firmly upon the festive fan. Everybody seems to be talking baseball and anxious to get out and boost for the proposed professional league. There is hardly a man, woman or child unwilling to help the good cause along and from present indications it is safe to predict that within a short time the same old bunch of roisterous used to attend the Pacific National League games at Walker's Field will be on hand to root for Salt Lake, back at the umpire and do their best in the peculiar way of the fan to see that Ogden is defeated by the likes.

What is not true will be a league, and how many there will be in the same, will probably be settled tomorrow evening when a meeting will be held at the Commercial club. The meeting is set for 8 o'clock, and it is expected there will be a big turnout of fans. Every man interested in the great national pastime is invited to attend the meeting and voice his suggestion and support. Those behind the movement want to see the right kind of a league, the season, and one that will endure throughout the year. Teams that can put up the right kind of baseball. This will be accomplished if every fan of the city will come forward with practical as well as moral support.

At the meeting tomorrow evening it will be up to the fan to say who will be up to them to say how many games will be taken in. Logan wants to be represented. So does Ogden and Provo. Then there is Eagle Park, City and River Murray. Of course Salt Lake will be there with both feet, so to speak. It has been suggested that games be played only on Saturdays and Sundays. If this is adopted upon the last day of the month, the fans will find themselves confronted with the promotion of Sunday baseball. While Sunday games may be tolerated in Salt Lake and Ogden, Logan and Provo will hardly be in favor of them. Just the matter is more speculation at present. The fans will have to settle the question when they get together.

ERNE PYE COMING.

Bike Rider Accompanied by Harry Thomas Leave Australia.

Two more bike riders are on their way to Salt Lake this week during the summer vacation. Ernie Pye and Harry Thomas Pye wrote that he was on his way from Australia and that Thomas was one of the fastest riders in the country. The kangaroos and pyramids will hardly be in favor of them. Just June. The news of his coming will please cyclo fans as Pye was a popular rider here.

PREPARING FOR MEET.

Details for Athletic Contest Saturday Arranged by Coaches.

There was a meeting last night at the Hotel Gold of representatives from the various intercollegiate conferences for the purpose of arranging the details of the big meet scheduled for Saturday next. Those present were: Coaches Badenock of the B. Y. C., Teeter of the E. U., Walker of the L. C., Managers Mulligan of the L. D. U. and Moore of the U. of U.

The state track and field meet promises to be a big one, and the kind of race held in Utah and towns outside of Salt Lake promise to give the U. of U. a hard fight for first honors. The entry list was passed upon last evening and order of events agreed upon. If the weather is favorable there will probably be record times smashed.

DESERET EVENING NEWS WEDNESDAY MAY 13 1908

Why Not Bread?

"If wheat is the perfect food," you ask, "why not eat more bread?"

But white flour isn't the whole wheat, you know. The outer part and the germ are omitted. The laxative elements, the oil, and much of the protein, are missing.

But the vital fact is that the starch in bread is insufficiently cooked.

Wheat is largely starch. And starch, to be digestible, must be made soluble. The particles must be separated, so the digestive juices can get to them. That requires long cooking and a terrific heat.

The inside of a loaf never gets half enough heat to break up those granules of starch.

That is why bread—save when well toasted—is never advised for dyspeptics. And that is why much of the bread that you eat never digests and is wasted.

And that is the reason for **Mapl-Flake**.

In that, the whole wheat is steam-cooked for six hours. Then flaked so thin that the heat can reach every atom. Then toasted, for 30 minutes, at 400 degrees.

The result is a food that's all food—all nourishment—because it all digests.

Mapl-Flake is the world's best food, because it puts the whole wheat into digestible form. No other process does that. It is also the most delicious food, because we cook the wheat with pure Maple Syrup.

The price is 15 cents, because of our process, which requires 96 hours. Other flaked foods are made in one-fourth the time. But remember that the cream cost is the same on poor food as on good food. And, remember, too, that food should be measured by food value.
