A WARNING TO BATHERS. - It has long been known that it is injudicious for anyone to go into water to bathe just after eating a full meal, but it is not so well known that the practice may result in death. This latter fact seems to have been demonstrated by the recent death in a bath in Bristol, England, of a boy thirteen years old. He had never had a fit, and oyalists intended to be faithless is believed to have been in perfect health. When found in the water, the crown of his head was just above the surface, and he was standing in a stooping position, with his face just under water. At the place where he was, the water was only three feet four inches aich furnished a humiliating illus- deep, while the boy's height was tion of the low grade of moral- four feet nine inches. The tempe-, which prevails to an alarming rature of the water was 79 deg. tent at the present day. Two The medical testimony disclosed n were conversing together the fact that the deceased had but a little matter of business, eaten heartily just before entering or them entreating the other the water, or at least he had not pay him a small sum of money given his food time to digest. He n past due. His necessities be- had vomited a large quantity of pressing, he urged the payment food, and when found his mouth he money with a good deal of and throat were full. # SCHUTTLER WAGONS

Still the favorite Wagon in the market, by reason of their strength, durability, lightness of draft and ments near Settiar, and the Ser- the west was actually benefitted at general finish. The improvements which have been made on the Schuttler Wagon have caused the demand for them to increase greatly, and to anyone wishing a wagon I extend the request to call and examine the Schuttler before purchasing, and feel satisfied that the Schuttler will suit you better, and last you longer, without repairing, than any other wagon manufactured.

> I carry at all times a full and complete stock, embracing all sizes and styles of Farm, Spring, Freight and Ore Wagons.

## Improved Buckeye Mowers & Reapers.

Improvements have been made on the Buckeye for this season, which place them far in the lead of all comp titors. All the gearing is now completely covered, rendering it impossible for dirt and grit to get into the cegs. No wood is used in the cons ruction of the Improved Mower, and all machines are built with a simple arrangement for raising or lowering the guards. As Mower, Dropper or Self-Rake, I assert that the Buckeye is the best machine in the market. It is the simplest in construction and the strongest built, the efore the most durable and easiest managed. The Improved Buckeye is the lightest draft machine in the market, and for doing good work ia grass and grain has no superior. Every machine fully warranted as represented.

cape, when he learned that the id had posted their troops to capre him.

#### Counterfeit Morality.

We overheard a conversation beteen two persons a few days ago, ting his money, said to the de- hearty meal. - Ex. uent debtor, "If that man had led to me in the way he talked ou, I would let him whistle for money;"-meaning, as he himexpressed it, that he would not his indebtedness at all. And not? Simply because the man hom the money was due, unthe pressure of extreme necesbegged and entreated in the suplicating sterms for the nent of his just dues.

cording to this man's business

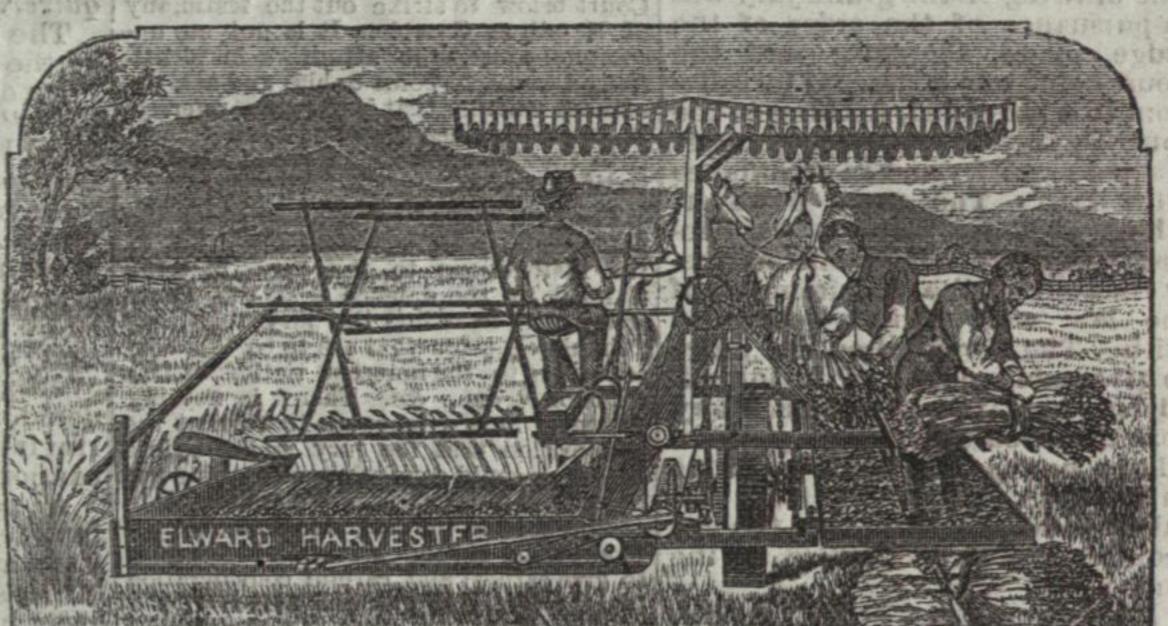

EFFECTS OF BUSINESS DEPRES-SION .- One of New York's eminent | Elward Harvesters, to which attenphysicians said to a friend of the Express that the very worst cases among his male patients were men the construction of the Elward but of business with no other physical illness than mental suffering. The past was full of losses, the present It is strongly and well built, and I not encouraging, the future all uncertain, and the effect had so preyed upon them that they could not find best Harvester offered for sile in rest of body or peace of mind. Many have lost all their earnings for ten or twenty years in the shrinkage of values and the expenses of business. The labors and accumulations of years had all gone together, and resulted either in real or threatened bankruptcy, and with only the most gloomy forebodings for the time to come. While the general increase of wealth from 1850 to 1870 was very great, and the latter year was more by 233 per cent. than twenty years before, no man can begin to realize what the depreciations have been since 1872. But it is the effect upon peculiar persons, especially upon those of a sensitive nature, whose credits have been impaired, and who can neither hope nor rally, which is so alarming. When physicians report so many of their cases to be the result of nervous depression, occasioned by business, the record is a sad one both for the country and mankind.-Ex.

The only Harvester in the market headed grain, and the only one upon which three binders can bind at the same time. Many valuable improvements have been made in the tion is called. No timber is used in

ESTRAY NOTICE.

SWEEPSTAKES THRESHERS!

Pronouncel by practical Threshmen to be the best Thresher, to give entire satisfaction to customers, and the only Thresher which has successfully stood the test

of properly and thorough'y threshing Utah grain. It is simple in construction, built of the choicest material throughout, and all the wood used in them is thoroughly

seasoned. The Sweepstakes Separators this season will be built with enlarged Ridd'es and wider Elevator Cups, besides many other improvements, and I am posi-

tive that anyone who purchases a Sweepstakes Thresher this season will get the best

which is manufactured. They are easily managed, less liable to get cut of order,

and lighter draft than any other Thresher sold. I will warrant them to thresh and

clean the grain thoroughly as fast as it can be fed to the machine.

## THE FURST & BRADLEY SULKY HAY RAKE

Has never failed to give perfect satisfaction to the purchaser. I have sold hundreds of these Rakes in Utab, and in every case the verdict has been "the best Rake I ever had in my field." All materials used in the construction of these Hakes are of the very best quality. The Rakes have high wheels, broad tire, finely tempered spring steel teeth, are easily managed and will leave a clean field every time.

#### of three sup install the second to I SHALL INTROLUCE THIS SEASON THE ARCHER SELF-DUMPING RAKE

The latest designed, very simple in construction, having none of that intricate mechanism which has heretofore always been the objection to Self-Dumping Rakes, especially for raking on rough ground. The Archer Rake is strong and durable, and as an evidence of their superiority over all other Self-Dumping Rakes I will present the fact that it took the First Premium for Self-Dumping Rakes by a unanimous vote of the Committee at the last "St. Louis Fair," when were entered in competition all other Self-Dumping Rakes manufactured in the United States.

NOTICE. --- I make it a strict rule in my business to always have on hand a full and complete line of Repairs for all machines I sell. For Circulars, Price Lists and all desired imformation call on or address
