

England, France, etc., and this naturally makes a harbor much cheaper and good harbors much more frequent than in those countries, where high tides wash the shores. Only in comparatively few places special moles like those in England have been built to protect the harbors.

NORWAY.

The first people's high college in Norway was founded in 1866.

In Nordland the radicals have elected 72 representatives, the conservatives 11, and the moderates 3.

King Oscar was received with great enthusiasm when he arrived at Christiania the other day.

General P'Orange will probably be elected chief of the staff of generals vice general Nyquist, deceased.

A seventeen-year-old boy in Eidsvold killed the other day one of about the same age. The young murderer has been arrested.

Dr. O. Knudsen Bjorlykke has been given the prize medal of the crown prince by the board of directors of the Christiania university.

The annual festival of the Christiania university took place a few days ago, and was a grander success than last year. The speech of the day was made by Prof. Schonberg.

DENMARK.

Erik Skram, the author, has been appointed recording secretary in the Folketing.

The cost of the forts around Copenhagen is estimated at eighteen million kroner.

Peter Ole Larsen, of Orla Lehmann's Vej, who last May murdered his wife, has been sentenced to suffer the death penalty.

Two new big elephants arrived the other day at the zoological garden of Copenhagen.

The actors of the L'Oeuvre theater in Paris will make a tour through Denmark this winter.

The Prince of Wales is expected to Copenhagen to conduct home his wife and children.

Princess Louise of Denmark, whose betrothal to Prince Fredrik of Schaumburg-Lippe was announced a few days ago, is said to have been in love with the prince for at least two years, during which time the high parties have frequently exchanged letters.

AMONG SUNDAY SCHOOLS.

SALT LAKE CITY,
Monday, Oct. 1, 1894.

On Monday, October 1st, we left Coalville at 9 a. m. in the midst of a snowstorm, over three inches having fallen during the night. The object of our visit was to hold a two days' annual Sunday school conference in Summit Stake of Zion. Elder Levi W. Richards and I having been appointed to that duty by the Deseret Sunday School Union board, we left Salt Lake City on Friday, Sept. 28, by U. P. R. R. at 6:15 p. m., arriving at Echo station at 9:15. Here we were met by Superintendent Branch, who drove us to Coalville, and between 10 and 11 o'clock we found ourselves com-

fortably housed at the Cluff hotel; it was a cold night, and in the morning (Saturday) water in the streets was frozen.

During the two days we held four conference meetings and one evening meeting (Sunday). We were blest with a host of good singers, some three or four choirs being present for the occasion, who sang alternately, and in concert. President Cluff attended all our meetings and spoke encouragingly on Sunday school matters, and felt assured that these annual conferences would result in great benefit to those engaged in Sunday school work. Some ten or twelve superintendents reported the condition of their schools, most of them spoke highly of the graded system which they had adopted, and all were trying to carry out the instructions they had received from the general board. Some of them spoke in the highest terms of the help they had received from those students who had taken a twenty weeks' course at the B. Y. Academy at Provo.

A number of class exercises by the children were very creditable. The remaining time was occupied at each meeting by the visiting Brethren who dwelt on the various points of Sunday school work which guarantees the best results, also the object and aim of the institution itself. Several questions were also propounded and answered.

Stake Supt. John Boyden gave an interesting account of his labors in the Stake. With a view of checking a growing evil of cigarette smoking by the young boys and a tendency among the larger ones of smoking, drinking, and loafing around saloons, a strong appeal was made to superintendents, teachers, parents and all in authority to set an example by the strict observance of the Word of Wisdom. About four-fifths of the entire congregation arose to their feet as a token that they would do so from that day forward. If ever the youth of Zion are rescued from those habits and indulgences, that are so displeasing to our heavenly Father, their parents who indulge in the same must certainly repent and reform, or face the fearful responsibility that attaches to their children's waywardness.

One very pleasing feature noticeable in our visits to twenty of the Stakes of Zion was the fact that nearly all the superintendents and teachers are teaching by example as well as precept, abstinence from the use of those pernicious articles. We were pleased to notice Elder Chas. D. Evans from Springville in our afternoon meeting; he also attended the evening meeting, occupied a portion of the time, on the Holy Spirit, and the importance of living under its divine influence. Thus ended an enjoyable visit to Coalville, Summit Stake. May the good seed sown broadcast by two humble servants of God bring forth good fruit to His praise and glory. We arrived home between 1 and 2 p. m. all safe.

GEORGE GODDARD.

TERRITORIAL PARAGRAPHS.

Millard Progress: A few days since, Willie, a 10-year-old son of Owen Crane, of Kanosh, went into the field on a pony to drive stray horses off his

father's land, when a large stallion, the property of William Cummings, made an attack on the boy, kicking him on the thigh and leaving the print of the foot as an ugly mark on the child. The horse is known to be an ugly brute when on the range, and should be taken care of if he is worth having.

An effort is being made by the Fillmore choir to secure a fine organ for use in the meeting house. The instrument, which is catalogued at \$400, can be obtained for less than half that amount, and it is understood that liberal donations have been made to obtain this amount.

Tooele Transcript: Thousands of bushels of apples and peaches are being cut and dried by the busy housewife this season, and a good many are asking what will be the price paid this year.

Park City Record: The employees of the Kimball estate have received notice of a ten per cent reduction in wages to go into effect on October 1st. They are willing to accept the reduction provided they are also given a corresponding reduction in the matter of fuel and board.

James Muldoon has received a genuine Korean sword all the way from Korea. The weapon was sent him by Charley Gee, who recently left Park City on a visit to China, and came through Quong Yick, Gee's partner. The blade is of remarkably fine steel and very heavy and is a wicked looking instrument. The sword is said to have been taken from a Japanese officer in one of the early engagements between Japanese and Chinese troops.

The Summit County Ice company has quite a force of men at work constructing their reservoirs and getting out timbers preparatory to erecting storage houses of liberal capacity. The company has a most convenient site and evidently propose to be in the swim next summer.

The fumes from the sulphuric acid gas used at the Marsac mill has been something terrible several days this week. Not only does it make everybody cough, but it burns the face and hands and creates a very disagreeable sensation.

Payson Globe: Mr. John Francem is undoubtedly the champion farmer in the vicinity of Payson. He has sent two watermelons to the Fair, the largest weighing 47 pounds. The other day he brought into the Globe office six peaches, the largest measuring ten inches in circumference, in fact they were all about the same size. Mr. Francem also holds the record for raising wheat. He had an acre this year that yielded 84½ bushels.

Bingham Bulletin: Will Bingham ever have a depot, or will our citizens have to continue to transact business with the R. G. W. Co. in that disgraceful little narrow-gauge box-car concern. We call on Supt. Welby for an answer.

Work is progressing rapidly on the rolling mill plant at Lakeview, Wash. The foundations for the plant are nearly completed, and plenty of water has been found at a depth of twenty feet. The company is capitalized at \$100,000, and will employ about 300 men.
