

STATISTICS BILL PASSES HOUSE.

A Measure That Will Be of Vast Benefit to Utah.

NO PUBLIC WORKS BOARD.

A Night Session Held and Twenty-One Sections of the Holmgren Irrigation Bill Disposed Of.

Mr. Wells' bill to establish a bureau of statistics came in for the lion's share of debate at the afternoon session as his school tax levy bill had in the morning. It also weathered the storm, passing with only three dissenting votes after \$1,000 had been knocked off the salary of the commissioner of the bureau, reducing it to \$2,000. The statistics bill provides for the establishment of a bureau whose office it shall be to gather statistics of the agricultural, mineral, manufacturing and other resources of the State. Mr. Wells fully explained the scope of his bill, its aims and objects and said that such a measure would fill a long felt want. "The bill met with favor generally except in so far as it granted the commissioner of the bureau autocratic power of appointing and making those who refused to appear before him in compliance therewith liable in a fine of \$50 or thirty days in the county jail. Page, Cutler and Hewlett were the chief opponents against this feature of the measure.

BOARD OF PUBLIC WORKS.
In vindication of his bill, No. 87, to abolish the board of public works, Mr. Wells read an editorial from the "News" of February 21, advocating the dispensing with all city boards. It was hard, he said, to tell where the authority of the board ended and the council began. Members of the board against them is merely in their collective capacity, and that personally he considers them good fellows. There was only one friend left for the board as indicated by the vote, and that was Benjamin S. Smith.

GLASSMANN'S POLYGAMY BILL.
Glassmann's polygamy bill created quite a sensation. There were many visitors in the House who came to watch the progress of this bill. The speaker explained that the bill was for the purpose of protecting those who had rightly refused to give up the wives they had married prior to 1891. He said that the bill was not a measure to legalize their children. Something must be done to settle the question and give the lie to the impression that "Mormon" bishops were still taking young girls to wife. Page admitted that he was not a member in the bill after all. McMillan moved that it be put to death. It was finally recommitted to the committee on judiciary.

The following synopsis shows what was accomplished in the House yesterday, ten bills passed and four killed:

BILLS PASSED.

Senate bill No. 109, by Tanner, a codification of the railroad laws.
House bill No. 10, by Wells, allowing an increase of the tax levy for school purposes in cities of the first and second class, from 5% to 6% for maintenance of schools to 10% for district and building purposes to 12%.

House bill No. 186, by Stuart, allowing locators of mining claims to make proof of work any time within the year, instead of within thirty days, as now.
House bill No. 187, by Wells, making liens from taxes attach to the property as of the first Monday in September, instead of the first Monday in February.

House bill No. 145, by Smith, providing that when special assessments are made by cities the city council shall have the power of a board of equalization. Notice of meetings for this purpose must be published in a daily paper if there is one in the city; if not, in a weekly paper. If there is no newspaper in the city the notice must be given by posting in at least three public places, for at least fifteen days.

House bill No. 50, by Smith, providing for the payment by the State of fees to attorneys who are appointed by courts to defend pauper criminals. The amount range from \$25 for the first day and \$10 for each succeeding day in murder trials (not to exceed ten days) to \$10 for the first day and \$5 for each succeeding day (not to exceed five days) for misdemeanors.

House bill No. 123, by Smith, providing that the state board of equalization shall keep two record books, one for personal property and the other for railroad and real estate assessments.

House bill No. 124, by Smith, providing a bureau of statistics, the commissioner of the same to be appointed by the Governor by and with the consent of the Senate. The commissioner will receive a salary of \$2,000 per year, and \$5,000 is appropriated for the purposes of the act.

House bill No. 57, by Axton, abolishing the board of public works.

House bill No. 100, by Smith, by request, fixing the time for the publication of the financial condition of the State on the first Monday in February, instead of the first Monday in July.

BILLS REJECTED.

House bill No. 51, by Smith, by request, providing for a lien on the get or offspring of any standard-bred or imported stallion.

House bill No. 82, by Axton, providing that members of the state board of equalization should be ineligible for reappointment.

House bill No. 17, relating to location of mines, a substitute, No. 186, having been passed.

House bill No. 104, by Harmon, duplicated by No. 181, relating to teachers' examinations.

NIGHT'S SESSION.

Twenty-one sections of the famous Holmgren bill were swallowed at the night session of the House last night. This took about an hour and a half, and as most of the members considered they had absorbed as much as they could digest Barrett's motion to adjourn met with general approval. Before adjournment was taken Mr. Holmgren moved that the bill be made a special order for 2:30 o'clock this afternoon, but it was found that there was already a special order for that hour. Mr. Glassmann then moved that a vote be taken at 2 o'clock this afternoon on the question of boards of control for irrigation purposes, that is whether the House favored a state board of control.

Section 4 provides for the inspection of wells once a week. On motion of Mr. Harmon this was changed to once a month. Mr. Holmgren then entertained the members by drawing diagrams of every kind of weir that was ever used by mankind, explaining as he went

SYRUP OF FIGS

NEVER IMITATED QUALITY.

An Excellent Combination.

The pleasant method and beneficial effects of the well known remedy, SYRUP OF FIGS, manufactured by the CALIFORNIA FIG SYRUP CO., illustrate the value of obtaining the liquid laxative principles of plants known to be medicinally laxative and presenting them in the form most refreshing to the taste and acceptable to the system. It is the one perfect strengthening laxative, cleansing the system effectually, dispelling colds, headaches and fevers gently yet promptly and enabling one to overcome habit constipation permanently. Its perfect freedom from every objectionable quality and substance, and its acting on the kidneys, liver and bowels, without weakening or irritating them, make it the ideal laxative.

In the process of manufacturing figs are used, as they are pleasant to the taste, but the medicinal qualities of the remedy are obtained from senna and other aromatic plants, by a method known to the CALIFORNIA FIG SYRUP CO. only. In order to get its beneficial effects and to avoid imitations, please remember the full name of the Company printed on the front of every package.

CALIFORNIA FIG SYRUP CO.

Beware of all imitations—Price 50c per bottle.

along, "this is a block of wood," and then, as the matter became as clear as water to the members.

He showed how some gates would admit of a greater flow than others, and exposed the crooked device by which some will farmers reap the benefit of the water that they supposed was coming to them. These tricks would be defeated by the adoption of a uniform system of measuring the water flow. Mr. Williams was so carried away by his enthusiasm that he was interrupted on the first three days of each month, and Mr. Christiansen amended the amendment by making it every two weeks. Both amendments lost.

Sections 4, 5 and 6 were passed like the previous railroad bill, and section 7 was about to join them when Langton balked and sprang the first sensation of the evening.

"Why waste through all this bill?" he asked, "when half the time there is not a quorum in the House. This was a prod at some of the members who kept coming and going. Then he sprang his mine. "The man who made the biggest talk for the bill this afternoon said afterward that he regretted that he was not in favor of its passage. I move that the enacting clause be stricken out. (This was seconded by Maughan). I am in favor of having a commission take the matter up, after thoroughly soundly the farmers of the State, draft a bill for presentation to the next Legislature, and I would favor an appropriation for this purpose."

Kelly thought that they would be no closer to the matter two years hence than now. Harmon said that he had not seen one farmer in Emery county but was suspicious of the bill. They were afraid that they would have more to do with it than they bargained for. He thought the commission idea a good one and thought there was neither rhyme nor reason in creating another board of arbitration at large expense to the State, and one which would be final and that.

Kelly said that he had heard that lawyers were fighting the bill because its passage would leave many of them without occupation and Van Horn smiled at the credulity of the youthful member from Millard. Williams challenged any one on the floor to point out any section or clause in the bill which was litigious. No one had time. He continued that the litigation of the last eighteen months had cost more than it would take to launch the Holmgren bill.

Sharp, who knew all about it asked where Holmgren got his bill. The answer was that two years ago he copied it from the Wyoming act and the State engineer had carefully gone over it with him. By way of a bouquet Sharp replied that no commissioners could draft a better fitting bill.

Van Horn had been riding his time to go to the Legislature and the State engineer had carefully gone over it with him. By way of a bouquet Sharp replied that no commissioners could draft a better fitting bill.

Van Horn had been riding his time to go to the Legislature and the State engineer had carefully gone over it with him. By way of a bouquet Sharp replied that no commissioners could draft a better fitting bill.

SMALLPOX REPORTS.

The city health board were, yesterday afternoon, notified of fourteen cases of smallpox, which are as follows: Thurza Wheeler, Sr., aged 45; Josephine Wheeler, aged 10; Ivy Wheeler, aged 15; months; Charles Wheeler, aged 15; David Wheeler, aged 3; 943 West Fifth South street; Alta Sprague, aged 11; Evelyn N. Sprague, aged 4; 832 South Eighth East street; Henry Buckholt, aged 20; 356 West Fifth South street; Sarah E. Watkins, aged 48; 780 South Sixth West street; Sabra Giles, aged 2; 833 South Eighth East street; Caroline A. Bates, aged 24; Eighth North and Thirteenth West streets; Mary Kahn, aged 19; John Butler, aged 23; Ralph Butler, aged 9, lately from Hooper precinct.

The following cases of the disease were reported to the State board of health yesterday: Spanish Fork, 1; Gravelle, 1; Draper, 5; Orangeville, 1; Salt Lake County, 47 cases heretofore unreported.

Good Advice.

The most miserable beings in the world are those suffering from Dyspepsia and Liver Complaint. More than seventy-five per cent of the people in the United States are afflicted with these two diseases and their effects, such as Sour Stomach, Sick Headache, Indigestion, Costiveness, Painfulness of the Heart, Heartburn, Waterbrash, Gnawing and Burning Pains at the Pit of the Stomach, Yellow Skin, Coated Tongue and Disagreeable Taste in the Mouth. Coming up of Food after Eating, Low Spirits, Etc. Go to your Druggist and get a bottle of AUGUST FLOWER'S FRUIT SALT. Two doses will relieve you. T. C. Get Green's Price. Abundant. For sale at A. C. Smith's Drug Store.

STATE SALARIES CHANGED.

The Senate Riddles Up The House Bill.

Supreme Court Will Have Stenographer at a Salary of \$12,000—Will Import the German Bird.

The work in the Senate has so piled up that it has become necessary to hold night sessions, beginning tonight. No doubt morning sessions would have been held had not the judiciary committee been engaged in investigating the Barnes-Ellison contest.

The Senate, yesterday afternoon, passed Senate bill 99, creating the office of Supreme court stenographer, which was reported on adversely by the committee. The bill originally provided a salary of \$12,000. The action of Senator Snoot it was reduced to \$1,200.

Senate bill 65, by Kiesel, providing for an appropriation of \$500 for the importation of a German bird called the "Kohl Mieser," the destroyer of orchard pests, was passed unanimously. The Senate was disposed to look askance at the bill until Senator Kiesel overwhelmed them with testimonials of the bird's worth from several authorities who had been to Germany.

Senate bill 45 was reported on favorably by the committee on education, but after some discussion the bill was sent back to the same committee. It is the measure providing for an appropriation of \$4,000 for the establishing of a domestic science course in the University of Utah.

The committee on salaries reported amendments to House bill No. 7, increasing the salaries of State officers. The governor's salary is reduced from \$4,000 to \$3,000; the secretary of state's remains at \$3,000; the auditor's at \$2,000 to \$1,500; the state superintendent's from \$2,000 to \$1,500.

The following favorable reports from the various committees were read and adopted:

By the committee on judiciary, House bill No. 92, relating to publication of notices for sale of property for taxation; House bill 23, relating to property exempt from execution; House bill 144, relating to contents of notices by mail relating to the probate court; House bill 105, relating to the powers and duties of district attorneys; and Senate bill 101, relating to fraud and misconduct of agent or corporations. By the committee on agriculture and mining, House bill 36, relating to municipal elections; House bill 115, relating to the manner of annexation of counties; and House bill 116, providing for the annexation of San Juan to Grand county. By the committee on education, House bill 25, to prevent the compelling of employees to trade at certain stores or board at certain boarding-houses. By the committee on finance, House bill 15, relating to new registration. By the committee on agriculture and mining, House bill 45, relating to the holding of State fairs by the D. A. & M. society.

The committee on private corporations and insurance recommended the passage of Senate bill 42, relating to the transaction of insurance business other than life, and the same committee recommended the rejection of House bill 41, relating to certificates of authority to agents of insurance companies.

A communication was received from the Governor enclosing a deed from R. J. Burroston of Mona, Junb county, to the State for a consideration of \$1 of what is known as Two-Mile Spring. The condition being that the State shall release a fish hatchery in the spring. The governor suggested that the deed be accepted and that an appropriation of \$500 be made for the purpose named. The matter was referred to the committee on finance and irrigation.

The judiciary committee is engaged in scrutinizing the ballots from the Third district.

"FARMER" ON WATER RIGHTS

What is Needed and What is Not—Water Measurements a Necessity.

To the Editor:

Cedar City, Iron Co., Utah, March 3.
—I can endorse much that you say in two brief editorials in the March 1st issue of the "News" entitled "Don't Muddle or Meddle" and "Let Well Enough Alone." Your first article is directed to Senate bill No. 16, by Senator Tanner. An act providing for the proper measurement and division of water in the State, and the establishment of a board of control, etc., and defining the duties of the State engineer. The bill should be trimmed and boiled down. The duties of the State engineer, and his associates should be limited to the measurement of and recording of the waters in the State for a period of years. Here is where the bill undertakes too much. The matter of adjudicating the various and often conflicting interests should be left to the courts.

I hold that the Legislature cannot possibly pass any bill that would be of more vital importance than the measuring and the recording of the various streams in our State. First, the water in every county varies in accordance with the amount of snow that is deposited in the mountains. We have been suffering for several years of late from the lack of water, and it is during this period that the courts have been crowded with litigants clamoring for a settlement of their various interests.

In your editorial you say "The titles have been established, and affairs concerning them will probably follow on." Yes, they will follow on until we have a change. And a heavier supply of snow is laid in our mountains, and then the rights of subsequent appropriators against those whose claims have been partially passed upon.

When we allow our minds to revert back to a past time, when the bridges over our main streams were in danger of being swept away with spring floods, and think of the millions of acres of land in our State that could be reclaimed by the proper application and reservoiring of these waters, and homes made on the land for our ever increasing population, I am led to the conclusion that some measure should be adopted to ascertain the amount of water that is available as well as to define the duties of water. What number of acres a cubic foot per second will irrigate? It is of utmost importance that some uniform method be adopted. I know from past observation that it is a question of how much of a crop can be produced with a given amount of water, but how much can the land endure without ruining it entirely, are the means adopted by a great many people.

Now, Mr. Editor, fully recognizing the power of the press and believing that the "News" aims to be on the right side of all questions, the farmers would like to enlist your support in a trying to evolve something out of the measure under consideration. And the measuring and recording of all our larger streams, by some competent person during the irrigation season would do much towards demonstrating what there is available and what use is made of the same.

The trouble in most of our settlements is, that there are about four acres of land purchased and patented for each supposed acre of what constitutes an acre water right.

While lawsuits are something to be avoided, they are often indispensable in order to correct some very erroneous ideas that some people have. I know of nothing that develops upon our judiciary of more importance than the enforcement of laws to prevent the wilful waste of that essential and indispensable element, our water supply.

I do not wish to trespass upon your valuable space, and knowing that the Legislature is limited as to time, I sincerely hope that something will be done to place this matter in a little better shape. Wishing you success. I remain, a subscriber and admirer of the "News" A FARMER.

It is not so much what the newspapers say, as what neighbor says to neighbor, or friend to friend, that has brought Chamberlain's Colic, Cholera and Diarrhoea Remedy into such general use. It is as natural for people to express their gratitude after using this remedy as it is for water to flow down hill. It is the one remedy that can always be depended upon, whether a baby be sick with cholera infantum or a man with cholera morbus. It is pleasant, safe and reliable. Have you a bottle of it in your home?

LIFE OF A PIONEER.

WALKER'S STORE.

Up to \$32.50 Women's Jackets—\$4.48.

Newmarkets Up to \$50.00—\$13.98.

FRIDAY AND SATURDAY.

Eight only of the jackets—the last of the winter stock. There's positive economy in buying these. There's not an unworthy coat in the lot, one thing only the matter, and that is our concern—winter weights. Several weeks' wearing of them and being in the tight fitting, double-breasted styles, that do not chafe with the season, will start the early fall with practically a new wrap. Colors gray, navy blue, tan, black and Oxford gray, one 4, four in size 42, one 40, two 38; prices were \$35.00, \$42.00, \$45.00, \$50.00, \$55.00, \$60.00; choose any \$13.98

Here's a rare chance for lovers of newmarkets—the ultra fashionable wrap of the year. Three only. One handsome black, richly silk lined, one Oxford gray and one tan, partly satin lined, each one beautifully tailored stitched; sizes, 34, 36, 38; prices, \$40.00, \$45.00 and \$50.00; choose any \$13.98

40c and 50c Men's Ties—25c.

FRIDAY AND SATURDAY.

They are made of handsome quality silks, in broad assortment of patterns and colors, and many in the very desirable reversible Four-in-hand style; also Tecks and string ties. Its a lot of 25 dozens our buyers happened upon while in the East that were made to sell for 40c and 50c each; he bought them, though, to sell for less... 25c

Women's 25c Handkerchiefs—19c.

FRIDAY AND SATURDAY.

Embroidered swiss handkerchiefs in just a splendid variety to choose from; dozens of different pretty patterns, daintily embroidered borders—the best offering there's been here for many a day, and the best value you'll find, while they last. Regularly for 25c each, two days... 19c

In Needle Work Store.

FRIDAY AND SATURDAY.

A lot of 26 stamped table covers, in different materials and of course various designs, elaborate to simple, given two days to leave, so those that were \$3.50 each for \$1.25, and some \$1.00 and \$1.25... 43c

Six pieces of drapery silks, really remnants for there's but one pattern of each kind and only 3 to 10 yards in a piece; sold for \$1.10, \$1.25 and \$2.00 a yard, two days... HALF PRICE.

White embroidered doilies instead of 10 cents... 5c

Some odd lots of workbaskets and a few fancy kinds reduced from 15c and 25c each... 10c

\$1.25 Women's Kid Gloves—95c.

FRIDAY AND SATURDAY.

Made of fine suede kidskin, plique seau and fancy stitched back (two styles) in all sizes but these colors only—reindeer, mode and a few gray; broken color or line so instead of \$1.25 a pair... 95c

Bargain Table Shoes.

FRIDAY AND SATURDAY.

Still a few pairs here of the Wright & Peters shoes for women we told of at beginning of the week. Made of finest leathers, hand turned and welt soles, but in narrow widths only; were \$5.00, chance... \$1.75
