Price from \$12 to \$18 per box, of twelve or twenty-four bottles, and from 75c to \$2 per bottle, according to the size of the bottles, and for sale at the Co-operative Drug Store and at the Co-operative Retail Grocery Department. d112

Twenty Thousand Dollars' WORTH of Staple and Fancy Dry Goods, to be closed out by auction regardless of cost, at H. E. Phelps, No. 29, Main Street. Commencing Wednesday morning, at 10 a. m., and at 2 and 7:30 o'clock p. m., and continue from day to day, until the stock is disposed of. This stock must and shall be sold positively without a limit. Mr. C. P. Troy officiates. d112

DURYEAS' "Improved Corn Starch" is the title the Messrs. Duryeas give to this famous article of food. This article is made from the choicest corn, which is selected with great care. Its great delicacy and purity make it an article of food much sought after by those who appreciate a good thing. Enquire for Duryeas' "Improved Corn Starch," "Duryeas'" on every package. d112

LOCAL AND OTHER MATTERS.

Thermometer 70 degrees F. in the shade, at 1 p. m. to-day. Dull.

Home Soap.—Mr. John B. Malven wants tallow and soap grease, to supply his soap factory in the 19th Ward. He is making a splendid article, according to the universal testimony of those now using it. d135 1t

Want to Hear from Him.—The friends of Josiah Nichols, who left Leamington, England, about twenty-four years ago, are very anxious to hear from or about him. There is a note for him at this office. d135 1t

Will Bear Watching.—Just about daylight, this morning, a fellow entered a room in the house of Mrs. Brown, near the Theatre, and walked off with a silver watch. That thief will bear watching. He has not been caught yet. d135 1t

Sunday School Notice.—There will be a meeting to-night, in the Old Tabernacle, at 7 o'clock p. m., for the superintendents and teachers of Sunday schools, Bishops, their counselors, and all interested in the welfare of the rising generation. GEORGE GODDARD. d135 1t

Drippings.—There is a plentiful supply of water running down the ditches to-day, but that is not all—a little fellow going with the throng to the "Tabernacle" this afternoon, fell into the stream; "neck and crop." This warm weather, water is a refreshing draught, but the quantity supplied must be moderate. d135 1t

Accident.—The following is from the Prove Times of May 5: "There was quite a lively time at the depot yesterday owing to the arrival of a number of teams from Shastie Springs laden with bullion, and while the men were engaged unloading, at the warehouse of Durant & Puttling, the platform gave way precipitating two men some eight feet; one named Jerry Lewis, at present a resident of this city, and the other named James Miner, of Nephi city, are badly bruised, but we are glad to learn that no bones were broken." d135 1t

Grass Plate.—In answer to the question as to the best method of obtaining a good grass plate, a gentleman describes to us what he calls the German plan, which is to properly prepare the ground by removing the rocks and making it nice and level, etc. Then take some good soil and a quantity of good, well rotted manure and mix the two together with sufficient water to make a kind of paste. Into this put the grass seed and stir till it is equally scattered throughout the compound. Spread an equal coating of this over the ground and keep it properly moistened. If this be done our informant assures us that a good grass plate will be obtained in an incredibly short time. d135 1t

Glass.—The following about glass was handed in yesterday: "Editor Desert News: I have a great deal about home manufacture, and I understand that extensive preparations are making for the production of glass in this territory—a step in the right direction, as this industry forms the basis of nearly all other manufactures; but there is still another enterprise which might prosper in this territory—the manufacture of glass. Its uses are multifarious and it has become an almost indispensable article in all civilized communities, and the manufacturer would have the benefit of a high freight tariff in his favor. Now, for one, would like to see some of our capitalists enter into this business, and feel satisfied that, if practicable, it could not fail to prove profitable. Can this be done, and if not, why not? Respectfully, ENQUIRER." d135 1t

In answer to the question of "Enquirer" as to the feasibility of manufacturing glass in this Territory, we do not see anything that could be considered a hindrance against the establishment of such an enterprise. The constituents of glass are simple and we believe can be obtained here in any quantities. Glass is a product derived from the fusion of silica with an alkali to which lime or a metallic oxide is added. The uses to which glass is put by man are so numerous as to be beyond mention. The manufacture of the article is very ancient. Bands of that material, of great beauty, have frequently been found with Egyptian mummies over three thousand years old. The manufacture of glass here would be an inestimable saving to the Territory. It is an article which is in universal use in innumerable forms. Perhaps somebody would like to throw some light on the subject, and the practicability of the successful establishment of this manufacture in Utah. d135 1t

Nottingham Conference.—A conference was held in the Assembly Rooms, Nottingham, England, on Sunday, April 5, as reported in the *Millennial Star*, F. M. Lyman presiding, and J. F. Wells acting as clerk. Elders present from Utah—Jos. F. Smith, Pres. of the European Mission; F. M. Lyman, Pres. of the Nottingham Conference; R. T. Burton, Pres. of the London Conference; Jos. Birch, Pres. of the Manchester Conference; Henry Leigh, Pres. of the Liverpool Conference; and Traveling Elders Lafayette Holbrook, of the Manchester Conference; John Mendenhall, of the Birmingham; A. B. Taylor, of the Nottingham Conference. Meetings were held morning, afternoon and evening. The Conference was addressed by the Elders above-named. F. M. Lyman said the Conference contained an aggregate of 600 officers and members, that for the half year ending Dec. 31, 1873, 102 had emigrated, and 20 had been baptized. Since Jan. 1 last, about 30 persons had been baptized. Elder Taylor related a case where a woman, at Leeds, who had been paralyzed, and whom the doctors had pronounced to be beyond recovery, called upon the Elders and was restored to good health. A uniform spirit of peacefulness prevailed, and a most enjoyable time was passed by all present. On Monday, the Saints had a picnic tea party in the Arboretum, and repaired, in the evening, to the regular meeting-room, where songs and recitations were given and duly appreciated. d135 1t

Theater.—An audience fair in point of numbers assembled at the Theatre last night to witness the musical burlesque extravaganza of the "Nymph of the Lurleyberg," revived, when that popular spectacle was produced with the same completeness and effect as characterized it during the Christmas holidays. This evening Amy Stone appears as "Cigarette," "Captain De Baure," "Abdalla," "Firefly," and "Fau-fan." Mr. H. F. Stone as "Chaffa Iderhien" and "Ibrahim." Mr. Sawtelle as "Berlie Ceell." Mr. Crook as "Rake." Mr. Lindsay as "Col. Chateauray." Mr. Thorne as "Ben Hamel." Miss Adams as "Lady Guenivere." On Saturday a grand matinee. d135 1t

United.—We had an agreeable visit this morning from Bro. George Halliday, of Pleasant Grove, from whom we learn that the people in that part of the country have generally entered into an organization of the United Order. The local board consists of the following brethren—Thos. Woolley, President; John Brown and George Halliday, Vice-Presidents; Jas. Armstrong, Secretary; Alex. Bullock, Treasurer; David West, Henson Walker, Senr., and Rasmus Peterson, directors. They have divided the farming into three districts, twenty persons to each, who have elected their own foreman and two assistants. They intend to classify the mechanics at as early a date as convenient after Conference. Success attend them. d135 1t

of silica with an alkali to which lime or a metallic oxide is added. The uses to which glass is put by man are so numerous as to be beyond mention. The manufacture of the article is very ancient. Bands of that material, of great beauty, have frequently been found with Egyptian mummies over three thousand years old. The manufacture of glass here would be an inestimable saving to the Territory. It is an article which is in universal use in innumerable forms. Perhaps somebody would like to throw some light on the subject, and the practicability of the successful establishment of this manufacture in Utah. d135 1t

Medical.—Bro. E. W. Phillips, of Morgan Co., North Weber, called in this morning, for the purpose of conveying to alling humanity some knowledge he possesses in the cure of various ills. His cure for diphtheria, croup, and sore throat in general, is an ounce of tincture of myrrh, made into a syrup with brown sugar; the patient should lie on his, or her, back, and use it as a gargle three or four times, until the skin cuts or becomes raw. This is a perfect cure. For fevers, get herb turmantil, make tea of it, drink all you can; cure certain in twenty-four hours. For spasms and inflammation, take groundsell, simmer it over fire, then use; if the stomach is full it will cause sickness; if not, purging will be the result; use starch and Turkey hubarb to stop purging and sickness; cure in twenty minutes. For piles take balsam gum pills, or tea, made from the Jeser sellendine, or plawort. These various remedies are said to be certain cures, known to be such from personal experience. They are safe. Groundsell is a monthly herb, and is not surpassed for keeping the body in order. For inward wounds and bruises, turmantil and groundsell taken together are beyond price. d135 1t

SPRING RACES, AGRICULTURAL FAIR.—The first race, under auspices of Agricultural Association. The Agricultural Association's first race of the season will be run on the half-mile track to-morrow (Friday), at 2 p. m. Trotting race, three in five to harness. Wm. Benham, Little Sorrel, "Tyler." T. Maloy, Lobsberry's "Parepare." Haines, Carter's bay mare, "Molly." E. Brown, Brown's horse, "Doc." Horses will be called punctually at 2 p. m. Admittance 50 cents. d135 1t

False Alarm.—About half-past nine o'clock last night, a cry of fire was raised on East Temple Street, and, in a few seconds, the fire-bell was pealing. Scarcely had the first notes of the warning died on the breeze, ere the engine and hose were making their way to the scene of action, but luckily their services were not required. A quantity of smoke had settled over the New York House, occasioned by the replenishing of the stove with fresh fuel. It looked suspicious at the moment, but the first breath of wind carried it off; hence the alarm. The Wasatch company's bell was also rung, and the engine was sent out. d135 1t

Ball Practice.—Now that the streets are crowded with vehicles of every sort, look out for runaways, that is, if ball-throwing is persisted in on the most public thoroughfares. This sort of sport seems to be in favor with some of the youths in this city, who have nothing else to do, but it is not pleasant to have a ball fall upon a "scarey" team. Boys, stop it. d135 1t

Parties having teams standing around town should also be careful to have them well secured to the best available hitching places. d135 1t

Land Office Removed.—The U. S. land office in this city has been removed to No. 5, Kimball Block; First South Street, formerly occupied by Judge Hemingway. d135 1t

Petty Theft.—Night before last a sneak thief stole several articles of clothing, a table cloth, towels, &c., from a clothes line, at the rear of the residence of Brother Charles Denny, 11th Ward, to whom the articles belonged. d135 1t

WEATHER REPORT.

War Department, Signal Service of United States Army. Division of Telegrams and Reports for the Benefit of Commerce and Agriculture. Meteorological service, Thursday, May 7, 1874.

reasurer; David West, Henson Walker, Senr., and Rasmus Peterson, directors. They have divided the farming into three districts, twenty persons to each, who have selected their own foreman and two assistants. They intend to classify the mechanics at as early a date as convenient after Conference. Such persons attend them.
