

NEWS OF THE MINES.

President Donnellan resigns, and is succeeded by E. H. Ains.

NEW GOVERNING BOARD SELECTED.

Big Opera has in Park City, Utah, and Idaho-Utah and Spur.

As stated in Saturday evening's news would be the case, President Donnellan of the exchange submitted a communication to the members in meeting, according to which the alterations, in which we stated in plain and particular terms, that he could not possibly act as president longer, and thanked the members for the confidence and respect in which they held him.

Mr. H. E. Ains, of the Mercer company, was declared the successor to Mr. Donnellan by acclamation, the gentleman himself casting the only opposing vote.

The following resignations were made and accepted:

J. L. Anderson and Frank Harris resigned as members of the exchange.

Frank Koen, W. V. Rice, J. H. Bevan, G. H. Holmes, E. A. Watt, W. M. Miller, J. L. May, George W. E. Dryer, C. E. Staats, Jim Dorn and E. H. Ains, resigned their offices on all committees.

W. E. Vining, acting secretary and editor, was elected permanent secretary, and it was voted that his duties and salary be regulated by the governing board.

First Vice president the name of G. H. Holmes, and Second Vice president G. P. Donnellan were chosen to nominate the first ballot resulting in seven votes for Pendleton, seven votes for Oakes and four for Holmes. The second ballot resulted in the election of Pendleton, seven for Crapo and two for Holmes. Mr. Crapo was declared second vice president.

Moses D. H. Avery and K. L. Davis were selected as committee to work with Mr. Ains in the work of consulting with him as to the funds of the exchange in the beginning, after which members in the governing board were filled by the appointment of Moses, E. H. Weather, G. F. Downey, Frank Koen and G. H. Holmes to serve in full capacity.

The exchange room will be formally opened for business on Saturday next, August 1.

OPERATIONS IN TINTIC.

The Friends' Democratic Report of Operations in the District.

The deepest shaft in the State, the Centennial shaft in this district, is now more than 1,000 feet deep.

The work of driving the tunnel upon the Union Mine property has been pushed rapidly ahead, and the first of the many shafts in the area has now been reached. There is no doubt a mine of wonderful richness and extent will be opened there before the snows of winter within the Gossips.

The General Mining company are now sinking the old Diamond shaft, which is about 200 feet southwest from the new shafts they began last February. They have a body of ore in the old shaft, and are pushing it out to the new shafts. Mr. Elwood Lane of Provo is the manager, and he is confident of striking a rich body of mineral when they have a shaft to the old mine.

The Mountain Mining company will not ship any ore this week, but will resume heavy shipments in a few days. The Mountain ore was very much damaged during the recent storm, but is now being repaired and is expected to be ready by the end of next week.

The Utah Mining company paid their employees last night.

Very encouraging reports come from the Southern Extract property to the effect that they have struck a good body of ore, and are pushing the work at a rate of thirty-five feet per month. The company are in acquisition of the property that they have placed an order for a 50-horse power hoisting plant, a duplicate of the shafting plant, and are preparing to place the same as early as possible.

At the Gilman a series of shooting accidents is noticeable. The work of excavation for the new hotel is commenced, building materials for foundation and superstructure are being delivered, open the ground and the shafts are being driven. The engine and boiler are expected to be ready by the middle of the coming month. No part of the distillery property is under water, but there will be difficulty in moving the machinery to the new shafts.

The company are in acquisition of the property that they have placed an order for a 50-horse power hoisting plant, a duplicate of the shafting plant, and are preparing to place the same as early as possible.

The Southern Extract company has commenced to build a windlass, and the work of fixing it up is commenced this morning. It is expected to be finished in a few days.

The Mountain Mining company are to excavate hundred feet, and the work of making the old tunnel wider is still going on. At least nothing in the way of good ore has been uncovered.

Mr. W. C. Clegg, manager of the Clegg mine, reports that everything up the mine is in very good condition, and that they still have lots of good pay ore in sight. The Clegg will also continue to fit class until the fall.

Mr. W. C. Clegg, manager of the Clegg mine, reports that everything up the mine is in very good condition, and that they still have lots of good pay ore in sight. The Clegg will also continue to fit class until the fall.

PARK CITY: MINES.

Work in the mines is Polished Out by the Board.

Manager Harry is pushing work on the White Rose and California group of claims in Tintic canyon, and is giving up considerable low grade ore, which will be marketed as soon as the rock mill is ready to begin operations.

The White Rose and California group of claims in Tintic canyon, and is giving up considerable low grade ore, which will be marketed as soon as the rock mill is ready to begin operations.

This week the West Ontario was leased, and within the next few days arrangements will be made to commence making the great property a success. The lease was granted to Messrs. George H. Cook and W. W. Dutton, and containing six of the mining companies that group, there be-

ing twenty-two in all. The terms of the lease are private, but are understood to be very advantageous to both sides of the transaction.

Manager and Directors to begin work in the big shaft, which is the ground they have rented, and the first work will be to clean it out, and get it fit through to the bottom, and they will decide on future developments.

The West End Mining company is making a good showing in its tunnel and expects to have a large percentage of low grade ore put on the market as soon as the new Rock mill is ready to begin operations.

James M. Kennedy, who is a famous figure in the most solvent mining circles of the state, and who is among the first to come to the rescue of the miners, has a large group of claims owned by him in Scott Hill, and he has been doing extensive work examining the ground within the past week.

The manager of the Tintic-Diamond-Mine Mining company, who has just entered Park City since his employees this week. The property of the company is located in Diamond, the Tintic Mining district, and comprises a large number of claims owned by him in Scott Hill, and he has been doing extensive work examining the ground within the past week.

John H. Clark, who has just completed a contract on the Green River in Price city, a promising property, and has made a large amount of money on it, has been doing some work on the same, and has shown thirty-five feet width and hanging wall, not to mention other features.

About the 1st of May Superintendent Hall began a census in the Nevada camp to find the main location for the camp, and has made a large amount of money on it, has been doing some work on the same, and has shown thirty-five feet width and hanging wall, not to mention other features.

The machinery for the Day West Mining camp has all arrived and is in operation, which is expected to begin tomorrow. With it came Mr. J. T. Tait, an employee of the Butte Mining company, from whom the company has been doing some work on the same, and has shown thirty-five feet width and hanging wall, not to mention other features.
