WOULD DRAG IN SCHOOLS.

Kearns Machine Needs the Board of Education in Its Politics and Plans to Capture It.

The preliminary movement towards dragging the schools of Salt Lake City into a straight political fight, and making them part of the Kearns Machine, was effected last night. Of course it had its battle cry; and "principles which are so good that no good citizen could reject them," if he was not further informed on the motives behind the polished front of 'spiendid American principles," were

The cry is that the schools need to be made "American" and to be freed from the grasp of the imaginary hierarch. Hence with the call for a primary, there comes assault after as-sault on the Mormon Church which has nothing more to do with the schools than to furnish a portion of the children who attend them.

There was a reason for primaries, instead of mass conventions. Leaders were afraid to trust the people in a were affaid to trust the people in a mass convention, and there was con-sequently a fear to put anybody into an "American" party convention, to shout for principles sacred to every good citizen, except those who could be guaranteed to need a diet of fried Mormon, for every breakfast.

Hence the process of primary elec-tion to the conventions. There was lit tle interest. It was not anticipated that there should be, and the less the public interest, the more easy it was to put through the prepared slate of to put through the prepared slate of people who can be guaranteed to con-strue service to their country, into an attack on everybody and everything that can be painted as having any in-A. The fact that the great percentage of the teachers are not of the dominant faith, that the board has nearly always been composed of men with a special and intelligent interest in education for its own sake, is not counted, and such men, even if they have lived their whole life out it social circles in which members of the dominant Church seldom visit, are branded "jack-Mormons" and subjected to more vicious assault than ever Hearst heaped with his yellow news-papers on the heads of thoses he has papers on the heads been unable to use.

Women regard themselves as sacred custodians of the home and the children, and at the same time often have less opportunity to see deeply into sit-uations, and to learn the hypocrisy of the call to principles which to them are most sacred.

"American" party primaries, such as those of last night, and they are not those who later learn that the city police department was mustered commercial street to herd out the vote or an "American" victory, while an or an "American" city councilman furnished ball for those women who were chal-lenged: that behind the call for closed gambling was the herd of gamblers willing to pay, who have operated ever since, while the police department has been exposed in graft after graft, the brazenness of it all culminating in the McWhirter robbery of \$10,000,the money being taken by the gaug of which Jim Denaldeen was a movies with the Donaldson was a member, with Jim announcing an intention to open a pro-tected gambling house with the money, These facts are not manufactured election cat-cails. They are items that show that the "American" party has many elements in it besides its highown principles, which need to be con dered. The principles sound splendid-from the rostrum and platform, but sidered. so far, the experiment of trusting the party in office, has developed many in-gredients in it besides its principles, which were rapidly lost in the shuffle of getting money by the misuse of pub-Naturalists know that sparrow hawks get most of their feasts on spar. row meat, by imitating the call the mother sparrow uses to her young. A truce between the sparrow pursued by the hawk, and a truce between good citizenship, and the vultures in the "American" party leadership are equally practicable. Therefore the battle at the polls on Dec. 5, and the issue of it, which is whether or not the "American" party shall drag the schools into the Kearns political machine to become cogs in a system born with a lust for office, and a handy method of calling on sacred principles, The delegates "elected" by the primaries last night, and in the most part slated through by the district chair-men, to attend ward conventions to-morrow night, to nominate men for the school hourd one follows morrow night, to nominate mer the school board, are as follows;

He said the Sunday school should be vitally devotional among the boys, for 65 to 75 per cent of Sunday school children are from the homes of non-Christians. The services should be along doctrinal lines, and attention was called to the fact that Sunday school pupils knew too little of the Bible. The lessons should come from the Bible. Atty. Lyon Injured-Job P. Lyon,

Common sense is just as necessary (even more so) in medicine as in business or the affairs of every day life. People are get-ting to know more than they used to. Not so long ago, it was the fashion to make all sorts of claims for a medicine, and wind up by asking the reader to go to a drug store and buy a bottle. People won't stand for that kind of thing now. They want proof-tangible proof. They want to try the remedy first and if they find it to be what is claimed they will be glad enough to go and buy it.
