

DESERET EVENING NEWS.

PUBLISHED DAILY SUNDAY EVENING
AT 1000 HOURS.

THE DESERET NEWS CO.

CHARLES W. STODDARD, EDITOR.

TUESDAY, AUGUST 18, 1891.

LET THE FACTS BE KNOWN.

A large number of eastern and western papers offer comments on the recent Utah election and its results. Many of these are very favorable towards the people who elected this Territory, and their division on national party. "Boise" is generally heralded as the beginning of the end of Utah's troubles. The spirit manifested on this question is very different to that bitter hostility in which the "Mormon" question used invariably to be approached.

However, there are some politicians that cannot treat the "Mormons" in any other way than as a different race of beings to the rest of mankind, and they, of course, are full of decide and indomitable and foolish pride showing that they are ignorant of the situation and their recognition that that professes organ of the "Liberals" which reveals in incoherence and seems based on marking the prosperity of this growing community.

In reviewing the changes that have come over the City and Territory, we notice that quite a number of both friends and foes fall into a column of error. They speak of the "Liberals" capturing the city at the last municipal election, and talk as though it was a fact that the whole city ticket was elected by the "Liberals" faction. They ought to know that six members of the City Council were elected by the People's Party and now hold their seats, out of which they were kept by "Liberal" fraud and robbery for about a year and a half.

The capture of Salt Lake City by the "Liberals" faction was only a partial victory. Three out of five City Councilmen were elected by the "Liberals" faction. They ought to know that six members of the City Council were elected by the People's Party and now hold their seats, out of which they were kept by "Liberal" fraud and robbery for about a year and a half.

The capture of Salt Lake City by the "Liberals" faction was only a partial victory. Three out of five City Councilmen were elected by the People's Party and now hold their seats, out of which they were kept by "Liberal" fraud and robbery for about a year and a half.

It will be found, on examination, that most of the "Liberals" meetings of success need qualifying. Absolute truth is not congenial to "Liberals" methods, and they do not harmonize with "Liberals" professions and pretensions. Salt Lake City is not wholly "Liberal" in its government, thank heaven, and the progress that it will never be so. The end of "Liberalism" is drawing under every day, and that means the end of extravagance, high taxes, sinecure offices, a centralization of vice and a period of terror from the unchecked borgia, bally and bosh.

"White Liberalism" has been grandly defeated in the Territory as a whole, it has not succeeded as supposed even in Salt Lake City. And when it is utterly demolished, as it will be, and the only political division here will be the same as elsewhere, Utah will be freed from its foibles that has weighed her down for years, and will move forward into the position which is her right and become as honest and a strength to this great nation.

COURSED AGAIN.

We did not expect that the present course of events in small and large reports of Tabernacle church services in Salt Lake Tabernacle would give any sign of a grave mistake or report of a willful lie. One of these was his statement that President George Q. Cannon, in his address on Sunday, speaking of retribution to Joseph Smith said:

"According to that revelation the most wicked murderer who ever stood upon the gallows would be immediately ushered into the realm of God if he only confessed, before the fatal drop, his remorse, and expressed a belief in the divine mercy of the Lord."

Of course the speaker did not teach any such doctrine, but, on the contrary, showed that it was a false notion entertained by sectarian preachers. We showed that he had been misinterpreted, after the common style of Tabernacle reports. Now comes the reporter with a quotation from the epistles of the discipline given by the Tabernacle Name, and dares to draw from it this inference that his statement was true.

President Cannon stated that "all men except the sons of perdition, will be brought forth after having received their punishment, and partly because the punishment of the world is eternal because God is eternal, but that those who suffice the worth of that will be finally redeemed" after they have had "to pay the penalty of breaking the commandments of God."

The Tabernacle attempts to draw the inference that his report was correct because of these admitted remarks of the speaker, but with its accustomed recklessness, that paper thus furnishes a refutation of its own statement. If even numbers are at some time to "partake of the work of re-

demption," it is to be after they have "rended their punishment," after they have "suffered the wrath of God," after they have had to "pay the penalty of breaking the commandments of God." How this justifies the statement that the speaker said, "the most wicked murderer who ever stood upon the gallows would be immediately ushered into the realm of God, if he only confessed, etc., etc., will require Tabernacle logic to explain.

But the reporter continues with a deliberate fabrication of the speaker's remarks. In common Tabernacle style, however, however, removed from the speaker's position, President Cannon showed the fallacy of the common section, noting that there are but two places for departed souls—heaven and hell, and the inconsistency of the idea that a murderer could go straight to heaven from the scaffold, while a moral and upright man who failed to believe in the Christian religion was condemned to an eternal hell. And he explained the doctrine revealed through Joseph Smith, of the intermediate state, the system of sinners after just punishment, and the various degrees of glory to be enjoyed in the hereafter according to the works of the soul and daughters of that.

If the reporter unintentionally misleads what he heard because of his inclination and amiable conversation at the reporter's table, where he made a public reference of himself, he should have had the manhood to confess and apologize. But whoever knew a Tabernacle scribe to frankly acknowledge an error, or fail to falsehood to falsehood in order to dodge a square issue?

THE NEWS FROM THE "HOBEN ZOLLERN."

Accustomed to report the Emperor's case, is showing symptoms of something more serious than alleged ill health or an injured leg. There seems to be a "mystery" in the plot which neither "Hoben Zollern" nor the know-all a disturbed liver would account for even upon the certificate of the royal physician.

If the Paris paper can be relied upon there has been a royal excommunication of the "Hoben Zollern" in which a highly decorated hero figure was conspicuously less like a lion or bears, and much more like Justice's major's mysterious allusion for the "Hoben Zollern" as a rating during his spell of ill health.

As the reports go, his growing desire to impress somebody with the divinity of his occupation, a few days ago overcomes him that with the news of the royal craft for an experimental kingdom he temporarily endowed himself with the emanations of an imaginary divinity. Ordering a throne to be erected on the shipdeck he mounted it in his assumed glorification and commanded the captain and crew to go below, while for the time being the craft was to be known as the "Emperor's boat."

The Greek Orthodox church in the United States has a total of twelve organizations. Twenty-three, addition of property \$25,000 and a membership of 12,000. The chief governing body of the church is the Holy Synod of St. Petersburg. The difference between this and the Roman Catholic is very slight. The Russian maintains that the Holy Ghost spring from the Father alone, while the Western or Roman believes he spring from Father and Son both.

The Greek orthodox church has in this country six organizations and not communions. It has no officers of its own, but needs for worship in the chapels of the Protestant Episcopal Church. This is separate from Latin and Greek churches, and conducts its services in Armenian.

The Old Catholic Church has in this country four organizations, three editors, value of property \$15,000 and a membership of 800. The chief governing body of the church is the Holy Ghost spring from the Father alone, while the Western or Roman believes he spring from Father and Son both.

The Armenian church in this country has six organizations and not communions. It has no officers of its own, but needs for worship in the chapels of the Protestant Episcopal Church. This is separate from Latin and Greek churches, and conducts its services in Armenian.
