body. In the course of time they com-mitted several manslaughters and mur-ders, and were always successful in making a safe retreat, or getting off on the plea of self-defense. They were unconquerable, and it seemed probable that they would be permitted to die natural deaths. Having subjugated New Orleans, and there appearing to be nothing left in their line to do, they removed their base of operations to the plains, and

base of operations to the plains, and finally to California. They ran the gauntlet of Vigilance Committees, and in time returned to New Or in time returned to New Or-leans, apparently to enjoy the memory of their conquest in peace. A few days ago they sat down at a table in a lager beer saloon, to all appearance good friends, talking over old and more prosperous times. It had been long since they had been able to get up a cutting or shooting match with anybody, and life was a burden. At length one of them handling a

At length one of them handling a match-box pressed the lid down. It snapped. The other said: "Don't snap your pistol at me." The noise seemed to fire them both with an eager desire to be at work, and at it they went. large consumers of marketaole commo-dities, our grocers, druggists, leather men, clothiers, and so on, advertise their wares on painted-sign boards perched among the clouds. All this would be an innocent folly if it were not a dangerous one. These lofty and They sprang to their feet simultaneous-ly, and one operated with a pistol, while the other plied a long bowie-knife. It was their most successful job. They very handsomely laid each other out, to the great joy of all their acquaintances and the whole com-munity. By their deaths these things showed what they were made for, and demonstrated that they were of some are the inevitable fire-traps of a new use in the world.

Nothing became them better than

Just now the architectural scape goat Set a rogue to catch a rogue, and let the is the Mansard roof, and we notice that it is recommended no more Mansard roofs villain slay the villian are analagous and equally correct doctrines. Thus can even the vicious accomplish some purpose of utility to society, and it being done at

their own expense is all the better. There are a few persons hereabout who evidently could not do more ser-vice to the community than by prompt-ly following the example of their New Orleans compeers in crime. Let them go ahead and bless the world by speed-

roof than from any other roof. The trouble in American architecture is that we do not stop building when we have got all the needed stories on, but we must put on top of all a Mansard roof, or a cupols, or a pilot house, so as to look down on our neighbors. would be a very good thing, but why not elect all honest men, and let the dishonest pay taxes instead of live and fatten on them?

THE COST OF BAD TASTE.—If a Chi-cago man who is kuilding a cosily bus adjoining, he would undoubtedly make a fuss about it. He would hasten to the mayor's office, probably, and enter complaint that some dangerous eitisen was building a fire-trap at the side of his new stone-front, not only endam-gering that structure, but preparing the conditions for a new configration of Chicago. He would most likely de-mand that the reckless fire-trap build-er be stopped in his incendiary pro-ceedings; that his wooden row be torn adore to the common safety, probably he would adopt a more summary course to remove and restrain such threaten-ed danger to his property as the build ing of a wooden row alongside of it would create. And probably the ster-rage public opinion would say: "This man's demand was just; wooden teac-ingerous, and should be removed or pulsed down, and their section should be prevented." And yet this same enemy of fire-

Van Nort, commissioner of public works, says it will take three and a half millions to give this city an adequate supply of water, and he recommends the immediate appropriation of that

LOOK Qut

be prevented." And yet this same enemy of fire-trape and conflagrations is himself building a structure of wood that threatens conflagration to his costly business block, and to all the surround-ing blocks, ten-fold more than the wooden row which his neighbor pro-poeed to build would have done. He is not building a wooden row at the side of his stone front, but in a ten fold more dangerous place, namely, on the top of it. He is surmounting his edi-fice of brick and stone with that cursed abomination of architectural barbarism, the "Mansard" roof, built of wood. In posed to build would have done. He is that building a wooden row at the side of his stone front, but in a ten fold the more dangerous place, namely, on the top of it. He is surmounting his edifice of brick and stone with that cursed the abomination of architectural barbariam, if the "Maneard" roof, built of wood. In that most numlightly and purposeless architectural device which a corrupt taste ever commended to the favor of a corrupt people, he is putting twice the architectural device which which is architectural device which is possible to the favor of a corrupt people, he is putting twice the amount of kindling wood that his neighbor would have used in the erection of his wooden row on terra-firms. And he is piling that vast lumber yard on the top of walls four or five stories high; he is putting the kindling wood for a configuration in the very spot where the fismes of some fire in the vicinity will be most sure to seize it, and where it will be most difficult for a configuration in the very spot where the fismes of some fire in the vicinity will be most sure to seize it, and where it will be most difficult for a configuration in the very spot where it will be most difficult for an where it will be most difficult for a configuration of man to stay their course. vicinity will be most sure to selse and where it will be most difficult is any effort of man to stay their count This is what people are new with ing in Chicago. The destruction of t city by fire induced the enactmen il, and that would ensure the prohibiting the erection of wooden ten-
