STREET CAR SERVICE.

The street-car question is one of the local issues of the present. 'A better system than that now in use is a public demand. We do not think any one disputes this. It is very easy to find fault. No doubt there are reasons for complaint against the street railroad, its limited extent, the indifference of some of its drivers, the lack of elegance arrived here recently from Denver en

the supply is sure to come to meet the demand. But this is not a great matropolis. Acity of thirty thousand ishabitants, even with as good a prospect for steady increase as this cared for. The gentleman had letters prospect for steady increase as this will not yield a very satisfactory rev-enue from a street-car service unless city. They rendered him some assistit is conducted on economical princi-ples. We do not wish the term econ-of Utah. omy to be confounded with parsimony. A stingy policy is a very poor policy, whether in private or public affirs, in an individual or in a corporation. But there is no vast fortune to be made out of street-railroading here, just new, and those who imagine there is will find out their mistake, if they have all the opportunity they want for invest ment and take advantage of it.

Several systems have been talked of in place of the bob-tailed mule car now in vogue. Among them is the electric car. It has been stated that this has proved a failure wherever it has been tried. We think that is a mistake. It is giving satisfaction in several places. Sacramento is about to give it a trial, and a company is laying tracks there and rushing the work as fast as the warm weather will permit. A large company is about to extinguished, but not before a large build works in San Francisco for the manufacture of electric cars, which, it is believed, will be adopted in all the another alarm. The fire broke out in principal places on the Pacific Coas . In Philadelphia the electric system has been introduced, apparently with entire satisfaction. Here is an account

of a trial trip which appeared in the Philadelphia Enquirer of the 13th inst: A trial trip of car No.3, of the Electric Car Company of America, was made yesterday over the Lombard and South Street Railway, leaving the depet at 1:15 p. m., and consuming thirty-seven minutes in making the trip from the depot at Twenty-fifth and South Streets back to the point of Stand, insured.

"The car is twenty-two feet long, elegantly upholstered, and lighted with incandescent lamps. It is propelled by two Reckenzaun electric motors of eight-horse power each, capable if need be to work at fifteenhorse power. The car can be run a distance of sixty three miles with but one change of the storage cells, one handred of which are placed under the seats of the cars, but in daily service it better not to exact more than forty alles, while the best way is to make a change of cells, which can be done in

'The motor is what is known as a screw motion, working into cog-wheels, which turns the wheels and moves the car. The weight of all the electrical apparatus and machinery is 5,800 pounds and that of the car 9,200 pounds, a total of 15,000 pounds. A speed out the car will give the most hour. A fifty-candle-power incan-descent light, the rays of which are intensified by a reflector, is in position as a headlight. The brake, which is a powerful and efficient one, operates on all eight wheels of the car, at once checking its motion. In the event of an accident to the brake, there is an electrical arrangement by which the car can be brought to an almost mutant at and at it. The electrical gong which tandstill. The electrical gong, which sounds a warning, the throwing off of the brake and the manipulation of the sand-box, are all worked by the pres-aure of the foot of the driver upon different levers, which are within easy reach on the platform, thus doing away with the sece-sity of his taking his eyes from off the road in front of him. The cells is which the electric current is stored are of the type known as "2 3 C," of the Electrical Accumu-

lator Company's make." The Philadelphia Press of the same date gives a long account of the same system as applied to the northern part of the town, and says it has been in successful operation for some time in the southern part. As to the cost the Press 88.78:

"It is said it costs \$14 to run a street car eighteen hours, the motive nower-the horse, costing hearly \$3. The elec-tric car will only cost a little over \$3 it is claimed by its advocates, and will hus be cheaper. The car is of the same type run some time ago on the Spruce and Pine-streets railway, but On the first trip yesterday the car

made the trip in thirty-seven minutes to Front Street and back. It runs very smoothly and easily and starts without the slightest jerk. As it bowled along, sounding its musical gong, it was a source of much wonderment to the natives of Lombard street. As it passed Ninth Street the engineer sounded a derisive rat-a-tat at the

remarked an enthusiastic this begins where the cable You can run either forward or backward, and collisions are easily avoided. The car obeys the slightest wish of its engineer and there is no joiting or jarring. The gong is rung by an electrical knob managed by

We believe that the cost has been the chief impediment in the way of the electric car system until quite recently. That this objection will be if it has not already been overcome, we are fully persuaded. And we have no doubt, as was expressed frequently in these columns ten years ago, that electricity is not only the light but the motive pewer of the future.

HINES TO YOUNG LADIES

SACRAMENTO has a smart little weekly paper published by two young ladies It contains frequently some sharp and timely hints to young folks. They are not new but they are good and practical. We clip the following from its columns; it is called The Duo:

"Some girls think that if they get a beau they're all right, no matter what kind of a fellow he may be. Better have no beau at all than an unworthy one. In the first place see that his babits are good; e.g., do not let him come the second time when fumes of whisky are upon his breath. Then you want a young man who will introduce you to his mother and sisters.

Above all see that your beau respects his mother and father and is kind to them as well as his sisters. Do not allow your best young man to speak of his father as 'the governor' or his mother as 'the old woman.' If he respects his mother he'll be more likely to respect you. Again, 'sit down on' a young man if he urges you to discovey your mother's commands.

Let society ladies be more careful whom they entertain, and society will be purer. The ladies govern society, and when they determine that no man of profligate habits shall cross their threshold, the men will see that their lives hear investigation."

OGDEN NEWS.

Attempted Sulcide - Fires -- Burglars-Celebration, etc. Our Ogden correspondent "O" writes

s follows, July 24th:

Editor Descret News: A report obtained circulation last evening that a married woman, living in the south west part of this city, had committed suicide. The following facts were elicited by inquiry into the mat-ter: It appears that her husband had recently received a letter from some nesia, s young woman. He tormented his wife 19: 28. about the affair, and it is alleged, wished she were dead, These expres-sions worked upon her mind to such a degree that she became slmost wild with grief. In this state of mind she procurred a bottle of lan lanum, a arge quantity of which she swallowed

with suicidal intent. Medical aid was called, remedies were applied and the life of the woman was saved. A gentleman named Sterns,

A HEBREW, in its rolling stock, etc. But that a great deal of unnecessary growling is indulged in, is evident to every impartial observer, and it is further apparent that much of the grumbling is worked up by certain parties for an interested purpose.

However, this city needs an improved and more extended service, and the supply is sure to come to meet the demand. But this is not a great interested. When he recovered and more extended service and interested with an attack of hydrophobia. He was conveyed to drug store and restoratives administrated. of recommendation to the members of

BURGLARS ABOUND they meet with individuals whom they think are unprotected. Last night some of them attempted to break into the house of Mr. John Homer on the bench. He heard them, routed them and they fied, but they did not at once give up their purpose. They watched still for another opportunity to break into the house, but were again foiled. Mr. Homer watched the burglars Mr. Homer watched the burglars with a weapon in his hand. They discovered that he was waiting for them so they became discouraged and went

On Monday a large quantity of ties were discovered to be

ON FIRE, a little west of the depot, near the Utah Central track. The watchman gave the alarm, the fire brigade were soon on the spot and the flames were speedily number of ties were consumed. This evening at half past five o'clock the roof of the house of Mr. F. H. Reeder, on Fifth street. In a few moments the firemen were on the spot, the water was turned on and in a short time what would have been a terrible confligration was stayed. As it was the building which is one of a row of fire, as by the water which it was necessary to throw upon it. Two other were also damaged. likewise some of the goods, by the water. The injured parties cannot tell how much they are damaged. None of them are, I under-stand, insured.

origin of the fire was some sparks from some time past.

SOME GENTLEMEN who were in town from Pleasant View report that the apprehensions of the people in that place have recently been excited by the appearance there of another mountain lion. It is supposed to be the mate of the one which was killed at Pleasant View a short time since. Hunting parties have been organized and hopes are entertained that they will be successful in capturing and destroying the dangerous ani-

IU CELEBRATE the 41st anniversary of the entrance of the Pioneers into the vales of Utah. At 10 o'clock the members of the Second and Fifth Ward Sabbath schools assembled with their superintendents and teachers, at the Pavillon n Lester Park for a day of recreation. The programme consisted of songs, speeches, recitations, athletic sports, games, etc. At 3 p.m. there was a dance for the juveniles. A game of base ball was played between the Athletics and Willards, which resulted to 2 in favor of the Athletics. lo to 3 in favor of the Athletics.
During the day hundreds of our cities

tens went to Syracuse and other Tonight the Second Ward Dramatic Association will present the "Green Lanes of England," in the Opera House, doubtless to a large and appreciative audience.

Peace, quiet and good order pre vailed throughout the city, and up to evening, when I enquired of the city marshal for police intelligence, he answer.d-"Not a drunk, no arrests." So may it ever be here on each re-

curring anniversary of the entrance of the Pioneers into the peaceful valleys of Utah. WEBER STAKE CONFERENCE

OGDEN, July 24, 1888. The two days' quarterly conference which closed last evening, was among the most interesting of similar gatherings which have ever been held in this the present generation. Religiously, it Wellsville, was arrested by Deputy city. The change of holding such is drifting on the tides of error. Po- Marshals Steele and Whetstone. He meetings from Saturday and Sunday, to Sunday and Monday has thus far been successful. Saturday is always a busy day, and the people from the settlemen's who invariably throng Ogden on the last day of the week, consume most of the time while here in transacting business and visiting friends; so that while we are sure of a large congregation at the Tabernacle on the Sabbath day, but few compara-tively attended meetings on Saturday, There was excellent attendance dur-

AMONG THE VISITORS

the foot, leaving the hands of the engineer free."

We do not pretend to say that this is the best system for the needs of this city. But if a radical change is to be effected, it is surely worth while for those who are specially interested to thoroughly investigate the electric system before the change takes place.

AMONG THE VISITORS

Were Apostles F. D. Richards and John W. Taylor; Dr. Edward Isaacson, of Salt Lake, and President Geo. O. Pitkin, of the Cach: Valley Stake.

The opening remarks of President Shurtliff were seasonable and appropriate. The reports of the Bishops showed the people throughout the Stake to be alive and generally up with the spirit of the times, in the discharge of their duties, although there were, of course, some exceptions. of their duties, although there were, of course, some exceptions.

The people in this Stake are living in peace—there are but very few difficulties reported, and still awer of a serious nature. The scarcity of water for irrigating purposes caused much anxiety and some unfriendly feeling, but these have subsided, and all now appear to do their best to assist each other. There are a number of poor reported in nearly all the wards, but these are all provided for, so that none of them sither need to nor do suffer for the necessaries of life.

The health of the people, in general, is good and not much sickness nor many deaths were reported. The Relief Societies were said to be unceasing in their labors to sesist the needy, to administer to the afflicted and com

ing in their labors to assist the needy, to administer to the sill cted and comfort those in dist ess.

The Young Men's and Young Ladies' Improvement Associations are doing an excellent work among the youth; they are increasing their enrollment and are advancing in the acquirement of knowledge which will fit them for positions of usefulness, of honor and trust in the community in a time to come. They are sustained and encouraged by leading citizens of all the wards.

SPECIAL MENTION

SPECIAL MENTION

was made in the reports, of the Sabbath schools in the Weber Stake. The general report of the stake superintendent showed the enrellment of the children of the Latter day Saints in the county. Between 4000 and 5000 are enrolled, and special visits are being made by the teachers to procure not only the enrollment, but the attendance of all who are elegible.

The remarks of the Apostles were replete with sound advice, warning the Saints against indulgence in the evils of the limes. They exhorted the Saints to observe the Sabbath day and not descerate it by excursions and

not descerate it by excursions and leasure seeking. Instructive remarks were also made by Presidents C. E. Middleton and Geo. O. Pitkins, and Bishop E. D. Wade and others.

THE LATTER-DAY SAINTS.

Their Work

BY J. M. S. The Latter-day Saints have been called upon to accomplish a work, the magnitude of which is not easily comprehended, but which we ought to with with man, and are filled with the always keep before our minds. This work is nothing less than the regeneration of the human race, the palingenesia, spoken of by our Lord, Mathew

9: 28.

The work is somewhat similar to imagination? Is it probable or even that of Noah and his family, for they, possible that a people so small, so detoo, were called out from a wicked and spixed as the Latter-day Saints, can corrupted world in order to a nucleus for a new form a nucleus for a new contended that the majority of the and righteons generation. But "Mormons" consist of the "lowest our work is even greater than that of classes" of men gathered from all Noah, since it has been commenced never to be overthrown, until the pur-poses of God with the human race have been all accomplished and the Lord reigns supreme upon the earth. Ours world?
is a work in which are employed the It we same divine agencies that once were all these questions to say, that such working to bring chaos to order in the have always been the workings of

morning of creation.

Anyone who reviews the world as it Egypt, but God made him the savior is today must, if his mind is open to of that country. Daniel was a captive truth, admit that a regeneration—a in Babylonia, but through his instru-total renewal, is what is needed. Par-tial referms are insufficient. They were totally changed. Jesus of Nazanave been attempted rejeatedly with-out success. The reformers have changed the whole world. Irequently found, themselves in There is superhuman wisdom disfrequency found themselves in There is superhuman wisdom dis-the same predicament, as certain played in the choosing of "the foolish, engineers who were constructing a the weak and the base things of the vault. They made their calculations world," as instrumentalities of the with the greatest precision and with divine purposes. the arches according to established Were the "Mormons" ignorant when the arches according to established rules. But to no purpose. As seen as the support was pulled down, down came the whole building with a crash.
The builders tried again and curved the archestil more. But the result was the same. None of those engineers passable to find out where the fault was. Finally, a practical mason came along, and told them that the fault was not in their calculations, but fault was not in their calculations, but upper classes than lower down. Were in the material. Picking up a brick, he crushed it between his tingers, remarking: "It is now material you want." And this is exactly the case wealthier classes. So that in choosing

with the world at the present time. "You want new material." We have Let us, for instance, look at the sciences a moment. We are told that the progress made in every direction is wonderful. But is it not humiliating to find that all this boasted progress seems to have a tendency to lead mankind not towards light but towards spiritual darkness. Scepticism and in-fidelity in its various forms are islaimed to be the unavoidable results of scientific researches. It will soon be a curiosity to find an astronomer, a geologist, a physician, a philosopher, that is not a more or less openly pro-fessed atheist. The time is past, when splendor has come, when our mission you find a Pascal, a Sir Isaac Newton, a John Locke, humbly worshiping at the altar of God. How is this? What is the matter with modern science and scientists? Only one answer is possible. Paul gives it, Romans i, 21, 22: "Because when they knew God, they dorified Him not as God, neither were thankful, but because vain in their imaginations, and their foolish hearts were darkened. Professing themselves to be wise, they became fools."

Next, think of the social difficulties pants of the buggy were thrown out and the child had a less broken. Mrs. fire traps—is ruined; not so much by that disturb every civilized nation, and the child had a leg broken. Mrs. more or less. Capital and labor Williamson received a number of combat. Some individuals accumulate wealth at an incredulous rate, adding millions to millions, white others grow poorer every day. The result is violent outbreaks wheels. The injured persons received left this morning for Adams Express in the form of many horrible

crimes. Nihilism, socialism, anarcha neighboring chimney, which fell the soil of corrupted society, like upon his roof and ignited a bed and bedding, which had been there for their growth appears to be as natural their growth appears to be as natural ism and kindred "isms" brow out of as was the French revolution after centuries of corruption and tyranny The very existence of many of the com-b nations, before which the wealthler classes tremble, is a clear proof that something is fundamentally wrong in modern society. When no man can lawfully rob mis fellow-man of the ecessaries of lite, the working classes have no longer any cause for complaint, and unscrupulous demagogues will have no material to work with. But as long as any so liety tolerates corruption in any form, it bears in its own bosom the germ of death and dissolution. And this is the case clear, and the citizens soon began in with modern society to a very alarm-

the world is no better than its social condition. The leading powers seem to thirst for spoil and stand ready to throw themselves over their weaker neighbors, checked only by the fear of being in their turn devoured by stronger nations. The policy of many powers is the policy of wild beasts, resting on the maxim: "Might his right." And there is not a crime in the whole catalogue of sin, that has not been defended by politiciaus. Wholesale murder wholesale robbery, with all accom-panying evils, have been advocated as meritorious works, under the name of war. Hence the nations have been and Items Gathered in and Around are still compelled to spend millions of dollars and a vast amount of energy and precious time in learning how destroy lives and property on scientific

Is it not heart sickening to see this condition of affairs in a world which professes to believe in Him, who was Love personified and whose whole life was devoted to save (not to destroy) the lost human race. But the true cause of all this is to be found in the lact that man has voluntarily deviated from the truth. Without correct knowledge of a Creator, a Redeemer and a "Rewarder of those that seek Him." everything connected with human life must be wrong. Man without this knowledge is on the ocean of time as badly off as a ship of a Comm ssioner Goodwin, at Loran, without a compass. He will lose his a jain last week on a charge of unlawway; the currents will carry him off, ful cohabitation, and this time he and he will finally be crushed upon the was bount over to await the action

This is the lamentable condition of itically it is broken up into factions, breathing comity against each other. Socially it is at the point of destruction by lawlessness. Scientifically, it against him on the charge of unlawful is groping in darkness. Morally (it may be added), it is corrupt.

The work that lies before the Latterday Saints is to renew the world in every respect. We do not propose to

do this by putting a patch here and there on the old cloth, nor to pour the new wine into the old bottles. We are not allowed to attempt this old experiment. The remember have tried it and failed The hole became greater; the bottles bursted. We have been commanded to effect a total removal. ommanded to effect a total removal.

First of all, our mission is to proclaim the truth to the world, concerning God and the way of salvation, thereby laying a firm and solid basis for all knowledge. As Parley P. Pratt

"Theology is the science of all other sclences and useful arts, being, in fact, the very foundation from whence they emanate. It includes philosophy, astronomy, history, mathematics, geography, languages, the science of letters, and blends the knowledge of all matters of fact, in every branch of art or of research. It includes also all the scientific discoveries and inventions, agriculture, the mechanical arts, shipbuilding, the properties and application of the marmer's compass, navigation and music. All that is usefu', great and good. All that is calculated to sustain, comfort, instruct, edify, purify, refine or exalt intelligences originated by this science, and this science alone, all other sciences being but branches growing out of this, the root."

Without this science, "the root of all sciences," our work would clearly be in vain. We have a theology, the doctrines of which are in many respects as different from those of the world as light is from darkness, truth from er-

as different from those of the world as light is from darkness, truth from error, or heaven from hell. But this theology is a necessary factor in the regeneration of the world and can neither be dispensed with non-smodified. It must be given as it has been eccived:

Secouply, we have been called upon the second and the second in the sec

Secondly, we have been called upon to introduce another social condition Secondly, we have been called upon to introduce another social condition of than that which exists is a the world. We are taught that all men are brethten in more than a figurative sense of the swall cracked. The name in more than a figurative sense of that word. When this fact shall be realized among men, then the rich can no longer oppress the poor; women will no longer be regarded as inferior beings, the tools of brutes; one man will no longer inflict sufferings or information of the sufficient of any kind upon another. All will love each other as they are all loved by our common Father. And when this is no longer merely a happy dream but an accomplished fact, our mission is ended. For no social question will then ever arise but can be solved in perfect unity and peace.

Thirdly. We must teach the nations of the earth that there is a "better way," a policy of peace and happiness, it be followed by all men, that wars and bloodshed are the inventions of the devil, and must be abolished daring the reign of the Son of God.

Finally, we are called upon to lead every science into purer channel; than the fith of infidelity, and purify them, we mission is more than all the fith of infidelity, and purify them, we mission is the microsciousness.—Medical Journal, had been allowed by all men, that wars and bloodshed are the inventions of the devil, and must be abolished daring the reign of the Son of God.

Finally, we are called upon to lead every science into purer channel; than the prone to litor, while resonatives and local manns are adopted to enable them if possible, to regain consciousness.—Medical Journal.

until the power and wisdom and love of God are clearly seen reflected on all the works of His hands. TO-DAY'S TELEGRAMS

This, then, is the great work of the Latter-day Saints, a work in which every individual should be concerned

The nature of this great work, here very feebly outlined, suggests what we as a people need, and what God will give us,if we keep His commandments. We need theologians who, like Paul of old, are familiar with God's dealings

Reputed Idaho Millionaire Nearly Smothered by Gas in Chicago.

President Cleveland Goes on Brief Vachting Voyage.

By Telegraph to the News 1 n Idaho Millionaire Nearly Smoth

CHICAGO, July 26 .- Robert Henderson, of Silver City, Idaho, said to be a millionaire, was found this morning 'n a room at a little hotel called the Uzden House, unconscious and barely alive. The gas in the room had been blown out instead of being turned off. It was at first thought that Henderson nad climbed on a chair and extinnished the light in a primitive way, absent mindedly, or because he was intoxicated. The fact, however, that a man of so much wealth as Henderson was represented to be worth should put up at a comparatively inferior, out of the way place, created suspicion. Then it was stated that Henderson was himself the proprietor of a large, well appointed hotel, and would be extremely unlikely to unningingly blow out the gas. Theories of foul play and attempted suicide were evolved. Henderson remained in comatose state for hours, notwithstanding the efforts of physicians, and nothing could be learned from him. The doctors were unable to say whether or not be would recover.

Evictions. DUBLIN, July 26 .- A number of tenints have been evicted from their boldings on the Lewis estate at Woodford, County Galway. The evicting party met with desperate resistance. One of the policemen was injured and cleven of their opponents were taken

SPECIAL NOTICES.

DR. PRENTICE.

Dr. Prentice came to Salt Lake City Dr. Prentice came to Salt Lake City several months ago a total stranger to most of the inhabitants of Utah, but his remarkable success in curing whatever he undertakes has made his name familiar in almost every household. At first he was to stop in Salt Lake City one menth, but at the expiration of that time his business was so large that he prolonged his stay. When the time of his pestponement expired his business had grown to such mammoth proportions that he was obliged to again extend his stay. Dr. Prentice is a surprise to a great many people, as a surprise to a great many people, as be tells his patients truth. All cases hat he thinks he can not cure he tells them so and daily turns many away with the assurance that their cases are hopeless, and in those cases in which he promises a cure he always succeeds.

So again Dr. Prentice has extended his stay until August 10th. desit The state of the s THE SANDBERG FURNITURE CO. Manufacturers and dealers in all kinds of Furniture. School Furniture

MATTERS OF INTEREST

DUY NORTHERN-GROWN SEEDS. WE ARE THE PRODUCERS OF D seed sold by us. They are the best in the world. They are the best for all climates. They are earlier, more hardy, vigorous and productive than those grown in lower altitudes. We keep a large stock of fresh seed and believe that we can give you satisfaction. We unhesitatingly affirm that no better seeds than those we deal in CAN BE PROCURED. Bestowing such assiduous care upon them, we feel justified in saying our seeds are UNSURPASSED in purity and quality. We do not pretend 'o be the "only house in the west selling NORTHERN-GROWN SEEDS," but we do claim that we have the very best seed to be had anywhere; and that has not been all over the country, for several years, in commission boxes, as we do not send out any commission boxes at all, as so many do. Ask your HOME MERCHANT for our Northern-grown Seeds.

OUR PRICES are as low as reliable stocks can be sold at and afford a fair rebusiness. We ask a trial order from all who have not used our seeds. Write for circulars. Address all correspondence to the UTAH NURSERY CO., General Western Agency, Salt Lake City, Utah.

NORTHRUP, BRASLAN & GOODWINS CO., Mineapolis Minn.
