

MINING, BUSINESS AND STOCKS.

BUSINESS ON THE EXCHANGE.

Shrinkage Shown in the Price of Several Stocks.

YANKEE CON. WEAKENED.

May Day Declined—Bullion-Beck Records an Advance—Joe Bowers at Red Rock.

TODAY'S METALS:
SILVER 61 1/2
LEAD \$4.00
CASTING COPPER 15 1/2

Business on the whole has been a little quieter than usual on the Exchange during the past week. The sales amounted to 66,600 shares, which brought \$22,095.83. The majority of the stocks listed show little or no change. Among these which show advances may be mentioned Bullion-Beck which has been weak for some time past. The bidding on this stock has closely approached the \$4.00 mark during the week, caused by the increased shipments from the mine and generally improved condition.

Centennial-Eureka does not move in spite of good reports from the mine and the magnificent showing presented in a semi-annual statement recently issued, which by the way, is looked upon with suspicion among some mining men.

Daily-West shows some gains. Sales were made today as high as \$18.25 but before the close of call it was offered as low as \$18.12 1/2. Dexter continues weak. One hundred shares changed hands today at 65. Grand Central has not been active during the week but it has not been sufficiently developed to warrant the price at which it was formerly held. It is expected to go a little lower by a number of mining men. Northern Light has been active at lower figures. Nevada is weaker than last Monday when it sold as high as 61 cents per share. After fluctuating between 43 and 53 it closes the week at a little better than 49. The property has much merit but it is generally believed that it has not been sufficiently developed to warrant the price at which it was formerly held. It is expected to go a little lower by a number of mining men. Northern Light has been active at lower figures. Nevada is weaker than last Monday when it sold as high as 61 cents per share. After fluctuating between 43 and 53 it closes the week at a little better than 49. The property has much merit but it is generally believed that it has not been sufficiently developed to warrant the price at which it was formerly held. It is expected to go a little lower by a number of mining men.
