

# CHEMIST ENTERS THE VANCE TRIAL

Herman Harms Says No Poison Except Morphine Found In the Stomach.

## TWO WITNESSES RECALLED.

Mrs. Ward and Mrs. Wunderlich Again Appear for the State.

That there was no poison, except a slight trace of morphine, shown in the analysis of portions of the stomach, liver and kidneys of Mrs. Mary Vance, was the testimony of Chemist Herman Harms at the Vance murder trial today. Mr. Harms was on the stand but a few minutes, immediately preceding the noon recess.

Two of the state's witnesses who had previously testified were recalled this morning. They were Mrs. Amanda Ward and Mrs. Wunderlich. The first named brought into the case the name of Mrs. A. B. Vance of Ogden and the witness was asked by Judge Maginnis, attorney for the defense, whether she also wanted Mrs. A. B. Vance hanged. Mrs. Ward said no. Witness admitted that her sister had used drugs for a purpose not printable.

A seeming contradiction was the feature of the testimony given today by Mrs. Wunderlich. She first testified that she had noticed no unusual odor while in the presence of Mrs. Vance, but upon being handed a bottle containing oil of camphor declared that the same smell was noticeable during the time that Mrs. Vance was vomiting on Nov. 27, the day she is alleged to have been poisoned. So soon as the bottle was uncorked the odor of the drug spread throughout the courtroom, and it seemed unnecessary to hand the bottle to each juror, as requested by Judge Maginnis.

Another witness examined during the forenoon was Dr. Calderwood who had performed an autopsy on the body of Mrs. Vance the day she died, Dec. 8, 1908.

## MRS. WARD RECALLED.

Mrs. Amanda E. Ward was recalled to the stand upon the re-convening of the court at 10 o'clock. In answers to questions by County Attorney Hanson, witness said she noticed no strong odor from the substance vomited by her sister on Nov. 27, 1908. Late in the day the gums of her sister were swollen and blood-colored. Mrs. Ward identified a waist and a sweater worn by her sister on the forenoon of Nov. 28, and the prosecution offered them in evidence, as bearing the stains of the coffee thrown by Vance at his wife, immediately preceding the beating complained of by Judge Maginnis, counsel for defendant, questioned Mrs. Vance sharply in relation to what she had done with the tablets that she had found in her sister's trunk. Witness replied that Dr. Kerr had not returned them to her. Further, witness said the tablets or pills were recommended to Mrs. Mary Vance by one sister-in-law, Mrs. A. B. Vance of Ogden.

In answer to Mr. Hanson, Mrs. Ward said her sister had admitted using the drugs, but had declared her intention of doing so no more.

The state also recalled Mrs. Wunderlich, who was a witness on Monday. A number of bottles of drugs had been brought into the court by Chemist Harms, and among these Mrs. Wunderlich recognized an odor similar to that which was present in the sick room of Mrs. Vance, emitted from the stomach of the patient.

A few minutes before Mrs. Wunderlich had testified that she had noticed no odor whatsoever. The witness was not cross-examined by the defense.

The questions purely technical in character, and the answers of Dr. Calderwood in no way changed the testimony previously given. The evident purpose of counsel was to elicit replies that would indicate that some of the so-called "cure-all" headache remedies contained irritant poison, such as acetanilide and anti-pyridine. The difference between corrosive poison and mild poison was explained, the first being a tissue destroyer, while the latter shocks the nervous system.

## DR. W. R. CALDERWOOD.

Dr. W. R. Calderwood, county physician, testified to having performed an autopsy upon the body of Mrs. Mary Vance, Dec. 8, 1908, assisted by Drs. Raley and Kerr. On the body were found two bruises, purplish and bluish in color, ulcerations were present on the lips and gums. Internally, there were found evidences of hemorrhage. The right lung was somewhat congested. In the interior of the abdomen were seen abnormal conditions, corresponding to the bruises on the exterior.

No other odor indicating poison was found, but there were erosions of the lining of the stomach, covering a place, five or six inches in extent. The liver was found normal, but the kidneys were abnormally large.

Dr. Calderwood said that in his opinion the slightest condition of the stomach was caused by mercurial, or irritant poison.

## YESTERDAY'S PROCEEDINGS.

The only witness called yesterday afternoon after the reading of the transcript of the testimony of Mrs. Cora Reppening, admitted by Judge Armstrong at 2:30 o'clock, was Dr. A. Kerr, who had attended Mrs. Vance during her last illness. The physician gave a detailed account of the illness

We haven't said much about Prescription's lately but we've been filling a great many. They are filled just as your doctor prescribes, ask him about it. Moreover they are filled promptly and delivered quickly at your residence. Charges always reasonable.

**DRUG STORE.**  
The Pure Drug Dispensary  
115-114 So. Main Street

and treatment of Mrs. Vance, and expressed the opinion that death resulted from mercurial poisoning, the patient being weakened from the effects of the beating she received from her husband. The swollen gums and other symptoms were suggestive of poison. He was present at the autopsy.

On cross-examination Dr. Kerr admitted that the same condition of mouth might have been caused by a number of poisons, such as arsenic, or ergot, oil of sassafras and tansy, the defense endeavoring to show that Mrs. Vance might have caused her own death by taking an overdose of drugs.

## WOTEN MEETS WEAVER MUCH TO HIS SORROW

Alleged Lawyer Is Subjected to Severe Cane Beating by Journalist—No Complaints Are Filed.

The bitter enmity which has existed for some time between J. W. Woten, a man who was denied admission to the bar of Utah, and John G. Weaver, a local journalist, broke out afresh yesterday afternoon in front of the hotel where the two men were meeting. Weaver made an assault upon Woten and gave him a severe beating with a heavy cane.

Some time ago Weaver made an attack upon Woten through the columns of a paper published in this city. He charged Woten with a number of serious offenses and Woten came back by filing a complaint against Weaver charging him with criminal libel. Weaver retaliated by having Woten arrested on a complaint alleging a serious and beastly crime.

About 15 minutes before 5 o'clock yesterday afternoon Weaver and Woten met in front of the bank on Second South street. It is said by eye witnesses that Weaver struck Woten over the head with a heavy cane and that Woten rushed up the steps leading into the building and fought back with an umbrella, trying to keep Weaver away, but the latter followed the man into the hall, seized him by the throat and beat him unmercifully with the cane. The weapon used by Weaver was made of bone with a steel rod running through it and a heavy knob on the end. Weaver struck Woten several times on the face and head inflicting many wounds. So fierce were the blows that the cane was bent and Woten's head was cut and bruised in several places.

That Weaver intended to inflict severe punishment was made manifest by the attack and the statement he made to the effect that if others had not interfered Woten would never again commit a crime against another man's wife and child.

When the trouble started Detective Frank Vining was near by. Attracted by the commotion he rushed in and prevented Weaver from doing more harm to Woten. The latter seized the cane and ran up stairs. He was about 37 at the fourth floor in a dazed way, blood streaming from the many cuts. A friend went to his assistance and the wounds were dressed. Detective Woten ordered the man to leave the building and the latter left the scene of conflict. It was with difficulty that Woten was induced to leave the building, declaring he would be killed by Weaver.

The libel case against Weaver is still pending as is the case against Woten. So far no complaint has been filed against Weaver for the assault.

## GRANITE SCHOOL ELECTION.

Where Primaries Are to Be Held Tonight—List of Polling Places.

An election of one board member from each of the five representative precincts of Granite school district, Salt Lake county, Utah, will be held on Wednesday, Dec. 2, 1908. Polling places as follows:

First Precinct—Sherman school, East Mill Creek, for election district 55. Judges: Samuel Oliver, Adam Spencer and John Carson. For districts 64, 87, and 89, at the Forest school; judges, Nephi Timpon, L. John Larson and Christopher Aiston.

Second Precinct—For districts 86 and 91, at Brighton ward meeting-house; judges, F. W. Schoenfeld, Rudolph East and Herbert Gedge. For district 97, at Burton school; judges, Henry Quayle, Martin Christopher and Thomas H. Woodbury.

Third Precinct—District 86, at Wilford school; judges, M. M. Miller, J. R. Carlisle and Charles Bell. Districts 87, 88, 89, 90, 91, 92, 93, 94, 95, 96, 97, 98, 99, 100, at the Forest school; judges, Mahonri White, John Bolton and R. J. Bailey.

Fourth Precinct—District 58, at the Woodstock school; judges, John G. Labrum, Joseph C. Williams and Richard Howe. District 62, at the Irving school; judges, G. F. Smith, James Nielsen and W. J. Sutherland.

Fifth Precinct—District 79, at the Plymouth school; judges, Archibald Frame, Samuel Brinkhurst and William H. Hatten. Districts 83 and 96, at the Hawthorne school; judges, John A. Webb, Levi Wolstenholme and J. T. Jacobs. Districts 84 and 85, at the Hawthorne school; judges, Joseph Hill, S. T. Tanner and John Nielsen.

## WHERE PRIMARIES ARE TO BE.

First Precinct—At forest school, Twelfth South and Ninth East, Wednesday, Nov. 25.

Second Precinct—At Burton school, 1090 South State street, Wednesday, Nov. 25.

Fourth Precinct—At Oakwood school, (Thirty-seventh district), Wednesday evening, Nov. 25.

Fifth Precinct—At Monroe school (District 59), West Granger, Wednesday evening, Nov. 25.

Primaries are called to meet at 8 o'clock.

## PATENTS FOR IDAHOANS.

(Special to the "News.") Washington, D. C., Nov. 25.—Idaho patents issued: G. A. Carlson, Mowcow, corner fastening for bedsteads; W. C. Richardson, Potlatch, wire-stretcher; J. Ross, Weiser, trap gun; W. S. Ebel, Sunfield, animal trap; H. W. Vance, Inkomo, ironing board.

# SAYS THE STORM IS MOVING EAST

(Continued from page one.)

than three inches of snow on the ground this morning.

## BINGHAM SNOWBOUND.

(Special to the "News.") Bingham, Nov. 25.—Bingham is more completely snowbound today than ever before in the camp's history. The snow lies ten feet deep at the Last Chance mine, of the Boston Company, on New England hill, and it is still snowing with warmer weather and no wind.

Snowslides are momentarily expected and the fear of them is general as the town itself could be in the path of several possible slides. Once started the great mass of earth would become a formidable moving body, and the hope is general that it will clear immediately. At present however a steady persistent fall continues.

## EUREKA NOT IN DANGER.

(Special to the "News.") Eureka, Nov. 25.—The snowfall here is not serious enough to be alarming. Only four inches have fallen so far. Today a light fall with warmer weather continued through the morning. There are no slides, nor any special danger of them. The Tintic region is not in danger unless heavier fall is recorded.

## LIGHT SNOW AT PARK CITY.

No Danger of Snowslides—Fall Amounts to Six Inches.

(Special to the "News.") Park City, Nov. 25.—So far the snowfall has been very light and there is no immediate prospect of slides. There is only six inches of snow on the level, though it has drifted to an extent in the hills. Mines have not interrupted, and there is little fear of slides.

## NO SLIDES AT ALTA.

Three Feet of Snow on the Level in This Mining Camp.

(Special to the "News.") Alta, Nov. 25.—Three feet of snow have fallen on the level in this camp, with drifting accumulation in the hills. It is quite cold, and there is no danger at the present time from snowslides. It is still snowing at 1 o'clock today, but the fall is quite light.

## SHEEP NOT HURT BY STORM.

At the office of the Austin brothers in the Sharon block today it was learned that sheep firm, in common with shepherds in general, expected no trouble from this storm.

"The storm is local," it was announced at the office, "the sheep in the desert and the good fanges, it has only tottered three inches, and in this depth is a decided advantage. It keeps the vegetation coming and provides water. Unless weather conditions get much worse, the sheep will benefit to wool men worth \$1,000,000. A hard crust of snow through which the sheep cannot paw for food is what does the damage, and the snows most often come late in winter."

## WEATHER REPORT

According to the local weather bureau, the barometer is steadily falling, with the exception of three high barometric areas from the west, northwest and southwest, so the official prediction is that the weather tomorrow will be fair and colder generally, but cloudy with rain in this immediate locality. The total snowfall for the storm, is officially given at 18 inches up to 12 o'clock noon.

The two storm centers have united over Kansas, causing rain or snow over portions of Utah, Idaho, Colorado, Oregon, Washington, California, Montana, New Mexico, Nebraska, Kansas, the Dakotas, Minnesota, Iowa, Ohio, Tennessee, Georgia and north Atlantic states. Heavy snowfall is reported over central and north Utah, North Dakota, Nevada, British Columbia and the north Atlantic states the barometric pressure is high. The lowest temperature at time of report was over south Utah and Nevada, 15 to 18 degrees.

The bureau officials say the continuance of the snow through the morning, was occasioned by the slow passage of the low area whose center this noon was in Kansas.

Record at the local office, United States weather bureau, for 24 hours ending at 8 a. m. today:

Temperature at 8 a. m.: 36; maximum, 41; minimum, 29; mean, 32 which is 24 degrees below normal. Total excess since the first of month, 57 degrees; total deficiency since Jan. 1, 484 degrees.

Precipitation at 8 a. m.: 25 inch; total precipitation since the first of the month, 1.4 inch, which is 47 inch above normal. Total excess since Jan. 1, 539 inches. Relative humidity, 109 per cent. The thermometer today registered:
