REPAIRING A WATCH.

WHY THE TIMEKEEPER WOULDN'T

"Here is your watch," said the laweler, as he tore off a small white ing from the ring of a well-worn allver watch and handed the timeplece to a reparter one day last week. "If it breaks inside of a year you can bring it back and I will fix his back was almost broken, and a gregated the c. Nobody then had or in any other similar situation, talked 8, 9, 10, 11, 12 by the whole town, to for nothing. I don't think it will felt as if he had been dropping potrouble you, though, for it was very tatoes all day.

And then acquainted with P. T. Barnum of a circular bandage, in a length of the cutoff the stille of one of Shakespeare's theroughly repaired by one of our best workmen." "I hope not," re-plied the reporter, as he raid the loweler \$3 and left the store with

the watch ticking loudly in his pocket. For nearly a week the watch was a model or regularity, recording the time even to the miante with the great yellow faced eleck in the city hall tower. One morning, however, when it was drawn from under his pillow, the reporter discoyered to his diemay that the hands were pointing to the hour of two clock. A few feeble ticks responded to a lar. The stubby second hand moved slowly about one-quarter around its short circuit and then

After breakfast the unfortunate owner stepped into the nearest watch-maker's, a seven-by-nine shop in upper Broadway, and asked the proprietor what was the matter with the watch. The Jeweler took the time-piece, pried open the inside cover with a small can opener and paered into the works. After a cursory examination he handed it back to the owner. "It needs cleaning,"

"Cleaning," ejaculated the repor-

"I can't help that," replied the jeweler; "you were very foolish to take such a watch to a second class workman. The reason it don't run is because it is dirty. The pinions are all covered with dust and the oll is all gum. Leave it here and I will fix it for you in good shape. Call again on Saturday and it will be ready. It will only cost you \$2.50, and you will then have a watch you can be proud of."

Thoroughly disgusted with the watch and the man who had war ranted it, the reporter declined the offer, pocketed his time piece and left the shop. A few doors below, on the same thoroughfare, a brazen watch with a pair of black hands pointing fixedly to 12 20 swings of the leg that was gone. From a rusty iron bar. The reporter Before he could count how many person who was seated at a work bench facing the window reached for the watch and proceeded to over for the watch and proceeded to over the watch and the wa another lewelry store. A fleshy

and watches in the front windows attested its claim as a fashionable emporium. The reporter went in there. A languid young man, with a drooping mustache the color of barley straw, took the watch, and, after working his way into the movement, placed a small lorgnette to his eve and glanced over the assortment of wheels and pinions and springs which were numerously and diversely disordered. He remarked: "Your watch is very badly out of repair. The escapement does not seem to be doing its work. The hair spring is too long. It has too much play. I will cut it off and shorten it." Here he reached for a emall instrument to sever the spring, but the walter interposed. "No," he exclaimed, as he rescued the time-piece, "don't cut the spring I guess that is not what alls the thing, for I paid 13 for having it repaired and cleaned only last week, and it ran very nicely until this morning, when it stopped."
"On, yes," interrupted the young

man, "I see; you dropped it and the apring was spread out by the jar. I will undertake to repair it thoroughly for \$4, so that you can rely on it. I will give you a guarantee, and if it

naving had sufficient experience in Broadway, the owner of the watch now visited the Bowery. A large gilt sign over a wide doorway, and several suspended clocks and watches, also in gilt, betokened a "jewelry palace," and into it the reporter walked.

along at all if it were not for their wives. Anybody would think from the noise you just made that you were trying to reach under the bureau to get a collar-button out of a distant crack with your finger nail."

And before Mr. Brown could re-

The proprietor, an elderly man, took the time-piece, shock it, listened, opened it, gazed into it and shock his head. "Mose: !" called the washstand as his wife did.
