DISTRICT SCHOOLS.

They Will Commence Another Year's Work on Monday Next.

MEETING OF TEACHERS TODAY.

Instructions Received From Superintendent Milleneagh.—A Corrected List of Teachers.

There was a large and interesting meeting of district school teachers held in the Clayton High School building on South Temple street today commencing at 10 a.m. The meeting was in response to a call from Dr. Milleneagh, who was present and gave instructions as to the method of teaching for the coming year.

A good many new teachers have been employed and the most efficient ones retained from last year. The prospects were never more promising for good work in the district schools of the city than at the present. They open on Monday next at 9 a.m.

The corrected list of teachers is as follows:

MINES AND BUSINESS.

The Ontario Company Doing Good Work Because of Little Water.

ANOTHER CIGAR MANUFACTORY.

Buildings to Logan.—Prospecting West of Lehi.—Mining and Other News.

Ben. Hampton, manager for the Ontario Gold Mining company, whose properties are located just over the Utah line, in White Pine county, Nevada, expresses the opinion that the company will have to make an extra expenditure of a considerable sum of money before the results of the working will so fully to labor. The meeting to the late at work in this region. At present there are nearly men employed at the mines, but the small quantity of water gives them a discouragement. If the company was so fortunate as having a supply of the expense dull as are the prices for which the Hampton operates in California. It would cost a man $3 a shift in California the greatest prices $2 to $3 per pick, while at Ontario it costs $1 a pick. At the latter place a good average miner ought to record eight on the coarse gravel, washing out the gold, and with the proper appliances place a great profit. It would be effected in present conditions for company now has two miles, one in miles and the other 10 miles long, costs reported at a total cost of about $100,000. The season for operations is short, as the water supply fails early in the fall, the most costly of the two miners being the first to be exhausted. Last year the season became dry in August, but this season a small quantity of water will come down the creek.

A source of supply that might be made available is Lake Creek, ten or twelve miles distant from the workings. This is a good sized stream easy to the mines. To bring it to the workings, however, would require an outlay of a large amount of money, which the shareholders would have to go down to their pockets for. The construction of a ditch would much reduce running of mining along the entire route, which in the part of the country, being on the highest mountain range in Nevada, would mean the expenditure of a vast sum. Whether the company feels able to engage in such an undertaking remains for the future to determine.

WILL COME TO SALT LAKE.

A gentleman who has been residing in Portland, Oregon, for some years has written to a local real estate man, requesting him to look up a nice residence in Salt Lake, as the writer proposes to make his home in this city. He has $5,000 ready cash which he is desirous to put into a dwelling, and the real estate man is rustling around for a choice piece of property which he has no doubt of being able to secure.

NEW CIGAR FACTORY.

A new cigar factory has been started and is now in process of operation in this city. The proprietors are D. White, Wm. W. Turner and H. Gramyer, and the factory is located on Second North street, between Fourth and Fifth West.

NO MINERS CHARGED.

Colorado papers are advertising a special rate from points in that state on the line of the Denver & Rio Grande railways to attend the National mining congress to be held in Salt Lake City, Monday, Sept. 11, 1893. The tickets are sold on Sept. 9 and 10, and good returning to Sept. 25. As there will be no mining congress here this year, the decision to postpone it having been reached last June, it looks as though the railway officials cooperation for the advertising were considerably off color on the present occasion.

LAND OFFICE.

In the land office this afternoon a contest involving desert entry No. 2020, made April 20, 1893, for lot 1, section 12, township 1 north, range 3 west, was in progress. George Brunton made the entry referred to, and on August 5, 1893, an affidavit filed by George Green, and corroborated by Charles Smith and J. W. Loring, alleged failure to reclaim the land within the statutory period and the non-desert character of the land. The case will not be closed today.

Byron Winters, of Hayesville, Summit county, filed a homestead entry today upon the s e quarter of section 8, township 1 north, range 5 east.

Today Otto E. Youngs filed in the land office an application for a homestead entry to the northeast quarter of section 22, township 2 south, range 1 east.

Robert G. Thornton, of Wallsburg, Wasatch county, filed in the land office today an application for homestead entry to the north west quarter of the southeast quarter, the south half of the southwest quarter, and the southwest quarter of the southwest quarter of section 11, township 5 south, range 4 east.

ZOTES.

The Logan Journal states that five new schoolhouses are now in course of erection in the capital of Cache, at a total cost of $25,000. It also says that $65,000 will be spent in school buildings in Logan this year.

Beaver Canyon: Work has been temporarily suspended on the Bay Horse, owned by Bryant George H. Pennebaker and others, and development work done on the Mount Vernon, another of the mines in the group, and several tons of ore taken out. Active work will be resumed on the Bay Horse, as soon as the Mt. Vernon ore is disposed of, which will be in a few days.
