

UTAH AND PACIFIC AND SHORT LINE.

The Latter is Not Backing the Former in Any Way.

ONLY TRAFFIC AGREEMENT.

Citizen Pacific Set Known in the Transaction at All-Bait by Home Money.

Now seems to be a fact, settled beyond the point of cast or conjecture, that neither the Union Pacific nor Oregon Short Line has anything to do with the building of the Utah and Pacific which is being built right off much daylight by the people of the Southern part of the State notwithstanding the apparent directness of the information recently published in that effect.

Mr. McNamee, in substantiation of his claim that only home money is going into the enterprise, produced the agreement with the local people which apparently stipulated that all the money between the two roads, it simply provides for traffic arrangements for a period of ninety-nine years. The Citizen Pacific is not known in the transaction at all.

WILL BUILD TO OPHIR.

Little Doubt that the Mercur Road Will Reach There.

Was semi-officially announced this morning that the Salt Lake and Mercur will, without fail, extend its road to Ophir, and that a large amount of money was advanced at present making a preliminary survey from the Mercur terminus of the road over to the West Diamond. From the West Die is the intention to go on to Ophir. The distance that will be covered by the extension will be about twenty-five miles, or about eight miles. The distance from Mercur to Ophir is not so great, but the road will be made up of circuit of the mountains before the completion of the project in the district, the building of this extension will increase the value of the existing properties, and cause a great deal of interest.

The little railroad is doing a very heavy business, and for its length is one of the most valuable in Utah. At who are interested in Mercur, West Die and Ophir will watch its development with interest.

RAILROAD NOTES.

Mr. Schaefer has gone to San Francisco. Mrs. J. H. Scarbs left this morning for San Francisco.

General Agent Warren of the Santa Fe is in Ogden today.

Judge Miner took the Rio Grande Western this morning for Ogden.

C. J. Bain, chief clerk of Dr. J. P. Marion, is down from Provo.

W. A. Smith of the Short Line, who has been sick for some weeks, is again at work.

The Swaner River Co. left for the West over the Rio Grande Western this morning.

Mr. Worthy of the Rio Grande Western came home on Sat. last night from a trip to the East.

Mrs. Purson and family left this morning for a vacation over the Rio Grande Western.

A. Germany is again at his desk in the Short Line building, after two weeks' illness.

On Saturday the old fellows will go to the meeting of the Short Line. Tickets used to return Saturday evening.

The managers of the National Life meet association will have a very fine lithographic poster.

F. E. Armstrong, of the accounting department of the Short Line, is back again after a two weeks vacation.

D. E. Nelson, of the Short Line general office, who had been absent for two weeks in the East, came home yesterday.

Miss Josephine Lewis has been engaged as stenographer in the accounting department of the Oregon Short Line.

George Wilson of the auditors office, Oregon Short Line, is in Pocatello taking the inventory of the M. P. & M. stores and money department.

The offices of the Midland are beginning to move to their new extra fine notebook. It is a work of art and one of the finest sets ever.

The stockholders of the Union Pacific railroad will hold their meeting to adopt the new constitution and increase the capital stock next. President Clark will attend and President Corinth will also be present to be present.

President and General Manager, Bankers of the Short Line, Mr. and Mrs. George Lewis today to be present at the meeting of the stockholders of the executive officers and likewise to conduct with the officials of the system.

The boys of the Twentieth United States Infantry, who were exposed to the effects of the cold weather the first of this month at the Rio Grande Western, are still at Fort Leavenworth. The cause of the illness is the lack of transports to carry the men to the nearest medical station.

On Sunday next the Rio Grande Western will put on an extra train between Salt Lake and Ogden. The new train will leave Salt Lake at 12:30 p.m. and will carry the three cars which reaches this city at 8:45 a.m., returning, the train leaves Ogden at 2:15 p.m. and arrives at Salt Lake at 2:45 p.m.

General Augustus D. Pease of the Short Line has just returned from a trip where he attended the annual reunion of the passengers and freight agents of the Short Line. The reunions are got up by the company and are a great success. Mr. Pease reports the best kind of a time as the Short Line does nothing but have.

ANOTHER NEW LAW FIRM.

The new year has already witnessed the launching out of a number of excellent law firms. The latest move in that direction is a partnership to be formed between ex-justice Justice Eddie and George C. White. The well known attorney of Ogden, who has been so well known as to make comment entirely unnecessary.

ADJOURNED THE MONDAY.

The board of county commissioners, after conferring the opinions of the various county officials and finding their

ministry for the next two years, yesterday afternoon took an adjournment until Monday, when standing committees will be named and other steps adopted and confirmed.

The members of the ministry will be invited as well as road superintendents and porters for the joint bidding. Messrs. C. C. Whipple, G. L. Johnson, will be representative superintendent of the ministry.

PRESS ASSOCIATION MEETING.

Secretary L. E. Dashiell of the Utah Press association is busy getting out notices to the members inviting them to be present at the annual meeting to be held on the 1st. The election of officers is one of the objects of the gathering. The place of meeting will be announced later.

ODD MARRIAGES IN INDIANA.

All previous Indiana marriage records were released this week when William Orman made application for a license to wed a woman who had already undergone twelve matrimonial experiences, and who is still constipated and attractive. In spite of her fifty years, Mrs. Orman was not intimidated in the least by her remarkable record as "a saving woman," and firmly requested the marriage license. She was appointed by the First State Legislature, 1882, by the second State Legislature, and most recently by the present Legislature. Improvements in buildings and for several renovations.

She has called attention to the fact that "not only the general public, but also several of our State judges, who have been instrumental in the compilation of the Indiana marriage records, have taken idea of the aspects and purpose of this institution." The object of the marriage record is to furnish a record not to punish any child for any past act, but on the contrary, when the cold, technical law has found such a record, it has been held that the law demands punishment for that crime. The Industrial School is permitted to sign between the names of the parents, and the record is to be made to the reason of the youth of the offender. It might not be punished, but that would not suffice, let alone the Industrial School have to care for the child round it with different attractions, give it a different line of life than it was accustomed to, and for each child, the Industrial School is responsible for each child.

It is the opinion of the press that, unless the child is confined in crime, or otherwise is morally depraved, the child should be allowed to remain in the school as long as a young man. He started out as a boy, five years old, with his wife, Mrs. Harry Elmer, became the next bride, was put off, and is a grand mother. All of Jersey's son and daughter, and the other children, have come to her, together with their children, these would be about 200 of them. Most of them have come to her, and she has given them the advantages of living a moral life.

The record also says that during the year 1885 the bride engaged the services of a carpenter to purchase a complete set of carpenter tools for the manual training of the inmates, who took great interest in the carpentry work, and the carpenter was soon unengaged.

Among others in Indiana possessed of remarkable marriage records is Col. Perry Carter of Indianapolis, who married his first wife, Mrs. Mary Carter, in 1861, having thirty-four children to his own credit and twenty-six children, the result of his numerous marriages.

The Little railroad is doing a very heavy business, and for its length is one of the most valuable in Utah. At who are interested in Mercur, West Die and Ophir will watch its development with interest.

THE PIONEER MONUMENT.

Contributions in aid of the monument to the pioneer fathers and mothers should be sent to the editor along with the duly certified copy of the application.

Mr. W. W. Steiner performed a double wedding, uniting in marriage a father, a daughter and a son.

James Wells of Hintonville has been married five times, according to some minor remarks inserted in family affairs. Some to which the compiler has no record, resulting in James' fifth marriage, he has now married his fifth wife, Mrs. Wells, being his daughter, and his wife, of course, Wells, being his daughter's brother, most interestingly, he has been married four times.

It is the opinion of the compiler that he is his own father, because every state is easily solved out to be his mother-in-law, and his wife, Mrs. Wells is stepmother and also sister-in-law to his brother's wife, Mrs. Stevens, being his daughter's brother, most interestingly, he has been married four times.

He is the son of one Mrs. Stevens, a child easily by his own grand-father, and still more wonderfully, he is the son of his brother's wife, Mrs. Stevens, being his daughter's brother, most interestingly, he has been married four times.

STATE INDUSTRIAL SCHOOL.

First Biennial Report Submitted to Governor and Wells.

Objects of the Institution Not Understood by the Judges Making the Commitments.

The first biennial report, ending December 31, 1898, of the State Industrial School of Utah and accompanying documents, were submitted to Governor and Wells for his information, preparatory to their being transmitted to the Legislature. The report gives to detail the important official acts of the board and shows the condition and progress of the institution since its organization in 1886.

Though its offensive features are sometimes almost unbearable, few people are aware of the danger of which Catarrh is the forerunner. Catarrh invariably leads to Consumption. Growing worse and worse each winter, those who rely upon the usual treatment of sprays, washes and inhaling mixtures find that it is impossible to check the disease with these local applications which only reach the surface. The offensive discharge increases all the while, causing a feeling of personal delification, and gets deeper and deeper until it is only a question of a short time until the lungs are affected.

The importance of the proper treatment can therefore be readily appreciated. But no good whatever can be expected from local applications, as such treatment never did cure Catarrh, and never will.

Catarrh Leads to Consumption.

A Forerunner of the Most Fatal Disease.

"I had such a severe case of Catarrh that I lost my hearing in one ear, and part of the bone in my nose singed off. I was constantly treated with sprays and washes, but each winter the disease would break out again, and though I had been declared incurable when I saw Dr. S. S. Young, he said to me, 'Don't give up.'
