

TWO KILLED IN LAYTON WRECK

"Dead Man's" Bend Responsible For Deaths of Mrs. Frandson and Infant.

FIVE ARE SLIGHTLY INJURED.

Rear End Collision Between Two Freight Trains Creates a Bad Wreck on O. S. L.

THE DEAD.
Mrs. Peter Frandson, aged 22, Brigham City.
Harold Frandson, aged 4 months and 22 days, son of Mrs. Frandson.

THE INJURED.
Oscar A. Burg, aged 34, 275 Center street, engineer No. 56; hurt about head and shoulders; will recover.
Mrs. W. M. Young, aged 25, Havensville, Kan.; injured, and left side and arm burned; will recover.

Rita Young, aged 6, daughter of Mrs. Young; burned and internal injuries; will recover.
Beth Young, aged 18 months, daughter of Mrs. Young; slightly scratched.

A. F. Meyers, fireman, No. 56, aged 30; slightly bruised in jumping.

THE DAMAGE.
Four work train cars, a freight car, caboose, gas tank car and cattle car demolished. Eighteen head of cattle killed. Freight locomotive badly damaged.

CROSSING'S RECORD.
June 26—Schiffel Kershaw, wife and two daughters, killed by limited while crossing track in car.

Oct. 10—Ray Sessions of Clearfield, struck by passenger and killed.
Total deaths since June 23, seven.

A rear collision between two freight lines on the main line of the Oregon Short Line Sunday morning cost two lives and much suffering, and from heavy damage to freight and equipment. The scene was the deadly Layton crossing, which has cost seven lives since last spring. Sunday's accident was due, of course, to the bend which the track makes at the Layton crossing, but is believed to have been partly due to the negligence of Engineer Oscar Burg and Conductor Quinn. Burg was the engineer on the second train and Quinn, conductor on the first. Quinn's train was standing at Layton while the crew was examining a hot box. He went back to flag the second train, but too late, and it came thundering around the bend. It crashed into the motionless train and the scene which followed is beyond description.

The engine plowed through the five rear cars. A woman and her baby were thrown from one of the outfit cars attached to the standing train. It was Mrs. Frandson and her infant. Both died of fractured skulls 10 minutes after striking the ground. Mrs. Frandson's husband was in the car and saw the danger. He shouted to his wife to jump and had she done so, would have escaped injury. But mother-like, she turned to clasp her child, and before she could turn to jump the approaching freight was crashing towards them. Mrs. Young and children were in another car and were thrown from the debris but were not injured as badly as was first thought. Burg, Mrs. Young and children are all at the Dr. Groves L. D. S. hospital and all getting along splendidly.

Mrs. Peter Frandson was 22 years of age and a member of the Twenty-sixth ward of this city, and a sister to Bishop Christensen of that ward. She was a daughter of Axel Christensen of Brigham City. The first intimation that Bishop Christensen had of the accident was when he read of his sister's death in the papers this morning. He will accompany the bodies to Brigham City this afternoon.

HOT BOX THE CAUSE.

The first freight had no orders to stop at Layton but a hot box was working the crew. The train was stopped but it was said Conductor Quinn did not think to go back to the end of the bend with a flag until he heard the second train thundering towards him. Engineer Burg is blamed for running at too high a rate of speed, considering the big bend as the track approached the station. At any rate, Burg failed to see Quinn signaling, tearing past him and running right into the rear of the train ahead. A gasoline car was reduced to scrap and a cattle car smashed. Cattle, steel and crashing wood were thrown into a pile and so painful were the belongings of the cattle that haste was made to shoot those most badly pinioned. Added to the

DAVIS SHOE CO.

You don't really know what's good until you use Ghirardelli's Ground Chocolate

As the bad effects of coffee and wishy-washy coffee substitutes are more generally recognized and understood, the use of Ghirardelli's Ground Chocolate as a beverage becomes more general. It is the experience of thousands who have substituted chocolate for coffee that not only they find it a more delicious beverage, but that their general health is greatly improved. This is due to the fact that this chocolate is not a mere stimulant, but is a perfect food, which is readily digested and assimilated by the most sensitive stomachs. Chocolate, used regularly, is a remedy for chronic dyspepsia. Undoubtedly the purest, most delicious and most convenient chocolate on the market is Ghirardelli's Ground Chocolate. It is the original genuine ground chocolate and is made by a special process which blends the chocolate and sugar in such a way as to render it easily digestible and at the same time produces an exquisite flavor. Ghirardelli's Ground Chocolate for cooking purposes will be found vastly superior to the out-of-date cake chocolates—it is more convenient to use, and imparts to everything in which it is used a delightful flavor.

shouts of crews; the hissing of escaping steam and general confusion; the sounds of pistol shots and animals' cries made the scene most horrible.

RELIEF TRAIN.

At 1 o'clock a relief train was made up and sent out. Company physicians and nurses with complete outfits were sent to render aid as possible. Mrs. Frandson and child were dead long before word of the accident had reached town even but the other victims were made comfortable, brought into town and hurried to the hospital. While the tracks were cleared of debris during the day, it will be a week before reminders of the wreck can be removed from the sides. Luckily the gasoline car did not explode.

The Kershaws and Sessions were killed by riding upon the tracks just as some train whirled around the bend. At both times Layton held mass meetings and voiced their indignation against the company for doing nothing to protect such a dangerous bit of track.

OLD UTAH DIES.

Thomas J. Connor Passes Away at Park City.

Thomas J. Connor, proprietor of the Salt Lake House, at Park City, died last evening at Holy Cross hospital, from general debility. Deceased was 76 years of age, and had resided for many years in Utah. He was a cousin of the late Gen. P. Edward Connor. At times the deceased had engaged in mining in Utah, but for many years had engaged in the hotel business at Stockton and Park City. His wife died about a year ago, and a few months ago he lost a son by death. His only child is believed to have hastened his own death. He is survived by one son, John J. Connor, of Stockton, and three daughters, namely, Mrs. Ellen Leary and Mrs. Marie Baxter of this city, and Mrs. Jane Lehey of Wallingford. The funeral will be held tomorrow, commencing at 2 o'clock, from O'Donnell's undertaking parlors, with interment in Calvary cemetery.

"Had dyspepsia or indigestion for years. No appetite, and what I did eat distressed me terribly. Burdock Blood Bitters cured me."—J. H. Walker, Sunbury, Ohio.

DID HOG SEE SHADOW?

Question Now is, at What Time Did The Little Rodent Come Out Of The Ground?

Yesterday was Feb. 2, and that means it was "ground hog day." The little animal as a result has a possible cause for a quarrel with the weather prophet.

If deep down in his hole he received a weather bulletin for yesterday he found that he was to emerge for a visit above ground into the midst of a blinding snowstorm, and that nowhere would there be the shadow of a possibility for him to see the precious reflection of himself that would send him scurrying back into the earth for another six weeks.

However, the day and the prophet had the usual relationship to each other. A warm sky soon let a flood of sunshine through after the sun came up, and a batch of warm sunshine was all that awaited the little eyes and ears of the ground hog until he became really cloudy about 4 o'clock.

GOT AWAY WITH PURSE.

Mrs. Anna J. Nelson, 727 east Ninth South street, had an exciting experience with a negro robber on Saturday night on Fifth South and Seventh East streets. Mrs. Nelson was on her way home when the negro passed her and "then turned and followed her. At the point mentioned he made a grab for her purse. He succeeded in getting it but the plucky woman beat the thief over the head with a heavy umbrella. She struck him several times but the robber finally made his escape with the purse which contained \$2. The affair was at once reported to the police and a search for the negro was made but no trace of him could be found.

HAD LOT OF TOBACCO.

Saturday night Officer Curran arrested a man giving the name of James Conroy, a stonecutter, aged 21 years, on suspicion of having burglarized the store of James Byrdson, at Eighth West and Fifth South streets. Conroy had six packages of tobacco in his pockets, and it is claimed the tobacco was stolen from the store. Conroy is being held pending an investigation into his movements on the night of the burglary.

FELLOW-CONVICTS HELPING SULLIVAN

Prisoners Subscribe \$181 to Aid Alleged Slayer of Policeman Ford.

WITNESS FURNISHES BAIL.

McGivern Gets Out of Jail by Furnishing Cash Bond—Mrs. Belcher Still in Custody.

Joe Sullivan is not without friends, even when he was arrested penniless in Portland, Oregon, and brought to this city to face a charge of murder. His fellow-convicts in the state prison have subscribed \$181 to aid him in fighting for his liberty in court, some of the prisoners giving as high as \$25 and others giving twenty-five cents. The money in the hands of Warden Pratt. Other contributions were from prisoners who went to the prison well supplied with money, which was taken from them and held by the warden until they should leave the prison. Sullivan is well liked by his fellow-convicts. He is waiting trial in the state prison for the murder of Policeman Ford, but this is not the first time he has been there. He served time for highway robbery committed in Ogden and left the prison only a few days before Policeman Ford was murdered.

HAS SOME FREEDOM.

Sullivan was kept in solitary confinement during the first few days of his incarceration, but now is permitted some freedom. Every day he is permitted to walk about the prison yard under the eyes of the guards. During this time he rolls cigarettes and smokes continually about the yard. He is permitted to smile on his face without a word of greeting for anyone. In this he is peculiar. Most of the prisoners they become acquainted with, and the guards and fellow-prisoners talk pleasantly with them, ask concerning their health and families and talk with their associates much in the manner of ordinary persons. But Sullivan is different. He has no word for anyone. His trial comes up in the district court March 9.

WITNESSES UNDER BOND.

Bartender McGivern, who has been held under bond to answer as a witness in the trial, was released Saturday upon furnishing a cash bond for \$200. His bond was fixed at \$1,000. The lesser amount was agreed upon by the district attorney, and McGivern is now permitted his freedom. Mrs. T. Belcher, who is also under \$1,000 bond to appear as a witness, has been unable to furnish this amount and is still confined in the county jail. Both these witnesses gave damaging testimony against Sullivan in his preliminary hearing.

Tip Belcher, who is also a valuable witness for the state, is in the city still awaiting trial on the charge of receiving stolen property.

THEY WANT TO BE THERE

Council Holds No Meeting Tonight Because of Tom Show.

There will be no meeting of the city council this evening. That body has declared today a holiday so it can attend the Press club's Tom show at the Salt Lake theater tonight.

SOCIAL AND PERSONAL.

At the annual breakfast of the Ladies' Literary club to be given Feb. 14 at the Cullen, Mrs. C. H. Blanchard will be toastmistress, and responses will be given by Mrs. Joel Priest, Mrs. W. R. Tyndale, Mrs. W. C. Druell, Mrs. C. E. Allen, Mrs. John Reed and Mrs. Don Coray. The affair is under the management of Mrs. Thomas Marion-
eaux.

Mrs. Helen S. Gue left last night with her brother W. H. Silber and sister Alma Katz.

Miss Delphia Seren and John O'Connor were married on Saturday at Farmington, the event being a complete surprise to their families and friends.

Gov. and Mrs. C. E. Allen will lead the march at the hall to be given at Odeon hall on Feb. 12 by the Utah Association of Life Underwriters.

The Woman's Republican club meets today with Mrs. J. U. Eldredge.

Mrs. William Igleheart is expected to return today from her six months' stay abroad.

Mr. and Mrs. Fred A. Hale who have been spending the most of the winter in California return today to Salt Lake.

Mrs. C. E. Allen will be toastmistress at the annual breakfast of the Daughters of the American Revolution to be given at the Knutsford on Washington's birthday.

Mrs. George Keyser entertained this afternoon at a luncheon in honor of Mrs. David Taylor.

Mrs. James T. Dick was hostess at a tea this afternoon at the home of her parents, Mr. and Mrs. John Dern.

The Governor's club is preparing an elaborate program for its Friday evening dance in the Odeon, a feature of which will be an "electrical display in gold and green, the club colors.

Mr. and Mrs. H. M. Dineen have returned from a trip to Chicago.

Mrs. Karl Schels is expected home today from Chicago.

"Headache and habitual coffee drinking are closely related."

A clear brain and

POSTUM

go together.

"There's a Reason."

WINTER WISDOM

AS APPLIED TO CHAMBERLAIN'S COUGH REMEDY

HOW COLDS ARE CONTRACTED AND PROPER TREATMENT

A cold is always the result of undue exposure to low temperatures. The rapid cooling of the surface, when not balanced by proper reaction, produces congestion and inflammation of the nasal and bronchial membranes. Obviously, such an ailment is not communicable, in the ordinary sense, from one individual to another. As the slightest "cold" predisposes the individual to attacks of the most severe and dangerous catarrhal affections, the necessity for its quick cure need not be enforced. These facts emphasize the necessity of extra precautionary measures against the ordinary cold. Everyone cannot change his climate at will, but may make the most of what he has at home—viz., take Chamberlain's Cough Remedy as soon as the first indication of the cold appears. It not only cures a cold quickly, but counteracts any tendency of the cold to result in pneumonia. This fact has been fully proven during the epidemics of colds and influenza of the past few years. No case of either of these diseases having resulted in pneumonia when this remedy was used has ever been reported to the manufacturers, and thousands of bottles of it are sold every day. This shows conclusively that it is not only the best and quickest cure for colds, but a certain preventive of that dangerous disease, pneumonia.

HACKING COUGHS

CAN BE PROMPTLY CHECKED.

It is not unusual for a cold or an attack of the grip to be followed by a persistent cough. This is owing to the roughness and irritation of the membrane lining the throat. Chamberlain's Cough Remedy has proven very successful in checking coughs of this character. It soothes and heals the irritated membrane, thereby curing the disease that causes coughing. "For several winters past my wife has been troubled with a most persistent and disagreeable cough, which invariably extended over a period of several weeks and caused her many sleepless nights," writes Will J. Harty, editor of the Burley, Colo., Bulletin. "Various remedies were tried each year, with no beneficial results. In November last the cough again put in an appearance, and my wife, acting on the suggestion of a friend, purchased a bottle of Chamberlain's Cough Remedy. The result was indeed marvelous. After three doses the cough entirely disappeared and has not manifested itself since."

BILL FOR ASSAY OFFICE

Senate Committee Approves Sutherland's Measure Providing for Establishment of One in Salt Lake.

(Special to the "News.") Washington, D. C., Feb. 2.—That there exists necessity for a government assay office in Salt Lake City, is the opinion of the committee on mines and mining of the United States senate. The committee reported as follows, on the bill of Senator Sutherland for the establishment of such an office in Utah:

"There are at present assay offices or mints in each of the important mining states with the exception of Utah, namely, Colorado, California, Nevada, Idaho, Montana, Arizona, New Mexico, and Wyoming. The two latter being at present conducted as assay offices, assay offices at Boise, Idaho, Helena, Montana, Deadwood, S. D., and Seattle, Wash.

"As shown by the report of the treasury department on the production of precious metals, the state of Utah in the year 1904 produced gold and silver of the value of \$1,455,894, and the report of the production of the precious metals in Utah for the year 1905 shows that the production of these metals has increased to the value of \$1,925,550, these amounts being exceeded only in three states, namely, Colorado, California and Montana.

"The production of gold in the state of Utah for the calendar year 1904 was \$4,215,000; in 1905 it had increased to \$5,130,000. The production of the precious metals in Utah for the year 1907 will undoubtedly exceed \$13,000,000. Everything indicates that there will be a steady increase in gold and silver in the state year by year hereafter.

"In addition to this, during the last few years the valley of Salt Lake, where it is proposed to establish this office, has become the most important smelting section of the entire country. The American Smelting and Refining company, the Utah Copper company have each completed a vast smelting plant adjacent to Salt Lake, the output of which will probably not be exceeded by any smelting plant in the country. Other extensive smelting plants have been recently constructed in Tintic, Bingham and other nearby points in which a great amount of precious metal ores are reduced. Not only are the ores of Utah marketed at this point, but very large proportions of the ores produced in Nevada and other nearby states are also brought there for reduction. The result is that the amount of gold and silver actually reduced to bullion in Salt Lake valley vastly exceeds the amount of production in the state itself.

"The need of an assay office at Salt Lake City is probably greater than in many of the states where such offices now exist. If such offices are of practical benefit in each of the other mining states, and their establishment and continuance would indicate that they are of benefit, no good reason is perceived why such an office should not be established in the state of Utah."

SHOOTS UP AVENUE.

Drunken Negro Terrorizes Colored Residents but Soon Behind Bars.

Early yesterday morning Nelson Buckley, a negro, loaded up on bad whisky, armed himself with a revolver

THE CHILD'S LIFE AND DANGERS THAT THREATEN

The worst danger to which the children of America are exposed is the neglected cold. If your baby has a cold, don't say, "It will wear off," and let it go at that. If your children have the sniffles, or sore throat, or watery eyes, don't hesitate to take them from school for a day or two so that you may break up the colds they have. Every parent can add to the healthy condition of the family and to his or her own peace of mind by guarding against any and every kind of cold. Generally, the child does not know how it caught cold. It may be impossible to prevent it exposing its sensitive body to those dangers which older persons shun. But the chances of contracting colds can be easily diminished by a little care and forethought. If the children get colds, don't waste any time. Don't trifle with a cold. This warning should be heeded by all. The lives of many children are sacrificed each year by neglecting the colds which they take; others contract chronic catarrh, from which they never fully recover. Of all the cough mixtures sold, Chamberlain's Cough Remedy certainly heads the list as the most efficacious for colds, croup, and whooping cough in children, and the one remedy that can always be depended upon to effect a speedy cure, and that is pleasant and safe to take. This remedy contains no opium or other harmful drug, and may be given as confidently to a baby as to an adult. Its great worth and merit in the treatment of these diseases has been attested by many thousands of mothers.

COMMON COLDS

We claim that if catching cold could be avoided, a long list of dangerous ailments would never be heard of. Everyone knows that pneumonia and consumption originate from a cold; that chronic catarrh, chronic bronchitis, and all throat and lung troubles are aggravated and rendered more serious by each fresh attack. Do not risk your life or take chances when you have a cold, even though you do call it a common cold. If taken in time, Chamberlain's Cough Remedy will cure it before these diseases can develop. This remedy contains no opium, morphine, or other harmful drugs, and has thirty-five years of reputation back of it, gained by its cures under every condition.

CHILD'S NEGLECTED COLD AND THE RESULT

Colds are the special bane of childhood, and often lay the foundation for the more serious diseases of after-life. One child catches cold, and scares its mother into hysterics by having croup in the dead of night. Another child catches cold, and before it has fully recovered from it, takes another cold, and perhaps before that is over contracts a fresh one. This succession of colds, or even the neglect of a common cold, causes the inflammation of the mucous membrane, which was at first acute, to become chronic, and the doctor will tell you that the child has chronic catarrh, from which it will never fully recover. Another child catches cold. Little attention is paid to it, as the child has often had colds, and always recovered from them; but in this instance a stubborn cough is developed. The parents are filled with forebodings. Still another child catches cold, and could easily have been cured by proper treatment, but, being neglected, develops the most fatal malady of childhood, pneumonia. The doctor is called, and pronounces it lung fever, and if the child is lucky enough to live, it has developed weak lungs, making it susceptible to all lung diseases. Every one of these children could have been cured by the prompt use of Chamberlain's Cough Remedy. A few doses of it, and the child's cold is gone. It counteracts any tendency of a cold to result in pneumonia, quickly dispelling all fear of that dangerous disease. It is also a certain cure for croup, and has never been known to fail. When given as soon as the croupy cough appears it will prevent the attack. A medicine of such great worth and merit as Chamberlain's Cough Remedy should be kept in every house where there are young children. Don't wait till the child is sick, and then have to send for it, but keep it on hand, ready for instant use when needed.

EVERY BOTTLE GUARANTEED

If you fail to get beneficial results after using two-thirds of a bottle of

CHAMBERLAIN'S COUGH REMEDY

according to directions, return it to your dealer and get your money back. It is well known for its prompt cures of coughs, colds, and croup.

TEACHERS GET CERTIFICATES.

The state board of education awarded the following certificates to teachers at a meeting of the board held Saturday:

State certificates: Marion Reid, Edna Cole, Lou E. Mitchell, Orson Ryan, Anna K. Brunton.

Grammar grade diplomas: Alfred L.

BABY'S COLD CURED BY CHAMBERLAIN'S COUGH REMEDY

Mrs. David Maltby of Aberfoyle, Ont., says, "My baby was sick for four or five weeks with a severe cold on the chest and I thought he would die. I tried different remedies but with no beneficial results, until I bought a bottle of Chamberlain's Cough Remedy. The baby is now well and we have since tried this remedy at different times in the family, and can recommend it highly for both young and old." You are pretty safe when you place your dependence upon Chamberlain's Cough Remedy in any case of a cold, croup or whooping cough. It is intended especially for these diseases and has a world-wide reputation for its cures.

This remedy contains no opium or other narcotic and may be given to a baby as confidently as to an adult.

HOW TO PREVENT COLDS

Habitual colds are due to an ill-kept skin on the outside, and by dyspeptic mucous membrane on the inside, the result of indigestion, coupled with carelessness. Cold water, proper food, and common sense are the foundations upon which a preventive must rest. A cold sponge bath, one to three minutes long, before breakfast, with a brisk, dry rub, is excellent—usually all that is necessary to keep the cutaneous circulation alive, and the skin reactive to sudden changes of temperature. For those unaccustomed to cold water, tolerance can be gained in three weeks' time by the use of water at any comfortable temperature, making it one degree colder each day, until it can be employed, without dread, as cold as it will run. Sea salt may be added to the water for its stimulating effect. Cold water, intelligently used, does not steal vitality, but fosters it. It stimulates the nerves that control the expansion and contraction of the blood vessels, and regulates the cutaneous circulation. One should "keep moving" when wet or chilly, and not stand on a street corner or elsewhere without taking deep breaths. The lungs used in this way act as a pump, and drive the blood along. This practice, with the others named, will reduce to a shadow the liability of taking cold every little while. If you should contract a cold, get rid of it as quickly as possible, for every cold weakens the lungs, lowers the vitality, and paves the way for more serious diseases. This is best accomplished by the use of Chamberlain's Cough Remedy, a preparation that can always be depended upon, and that not only cures the cold, but counteracts any tendency toward pneumonia.

KEITH-O'BRIEN'S EMBROIDERY SALE

ANNUAL EMBROIDERY SALE
Values from 50c to \$2.50 at 25c.

The large reserve fund has been drawn upon and the same attractive bargains will be offered again tomorrow. Again we urge forenoon shopping for choice selection.
