WALKER BR

There is a great hue and cry made over the great influx of immig:ants to this State. Why, it is just what the whole State has been praying

JOHN READING.

for,and now they are coming everybody appears to get frightened over it. If immigrants can manage to live in the Western States, and get through the terrible winters occupations and conditions from there, we are inclined to believe different settlements and bring they will not suffer to any great them together on terms of equality extent in this State, where they

give none too much time to society sume these who are coming to this State are coming prepared to start humbly and economically, and have no idea that two-story houses and lands fenced and tilled are lying around loose waiting for

them to move in. They can live the first year here much easier and cheaper than can the immigrants to Iowa or Minnesota, or any other Western State to which each year caravans of this same class of immigrants flock. The most of the immigration to this State are men cess lies in the active concurrence who have had experience in new countries, and know just what to do, and have the energy to do it;

and probably the most of them have some means to do with. We see no cause of becoming alarmed. with a State nine hundred miles long and from two to four hundred of land waiting to be settled upon, which is far better than the lands they left at the East, and with the same tillage and intelligent farming will produce all that man can desire. Let them come, and send for more-there is room.-Oakland.

hollow Of Of Of something between a howl and a wall, which makes one think of a melodious coster-monger crying his cabtages." J. R. Thomas went to Wilkes-barre, Pa., a short time ago and presided over a genuine Welsh "Elsteddfod," in which a few hun-dred rough miners astonished him by ainging oratorio choruses in a style superior to many of the boast-fed metropolitan vocal societies. The weather in Australia this winter has been excessively hot. In Melbourne on January 22, the ther-mometer stoed at 111 in the shade. A gentleman on Soldier's Hill near

Contempt of Court.

The importance of industrial ex-hibitions has also within the past two decades become especially well established; and they now receive the free and assiduous support of the most eminent in all civilized nations. Prince Albert declared, unwards of twenty wears are that The Nation observes that "the nations. Prince Albert declared, upwards of twenty years ago, that the times demanded not only local and national exhibitions, but a grand exhibition in its scope and benefits "comprehensive of the whole world." This masterly de-sign was consummated in the opening of the first World's Exhi-bition at the Crystal Palace, Lon-don, on the first of May and conbition at the Crystal Palace, Lon-dop, on the first of May and con-tinuing till the middle of October, 1851. The total number of visitors was 6.170,000, an average of 43,500 each day.

London are fixed for each year from 1874 to 1880. Au internation-ion has been each year al exhibition of female industry, to ion has been so stirred by the appaal exhibition of female industry, to be held at Florence, is in contem-plation. The celebration of the centennial or handredth year of American independence by an in-ternational exhibition of the arts, manufactures, and natural resour-NEARLY A PIOUS FRAUD.—This is the way the Christian Register talks of Newman's trip round the world— "If it is true, as the papers say,

The progress in horticulture made in the United States during the past twenty years—which is truly

a in the United States during the past twenty years—which is truly astonishing—is primarily due to the influence of the various horticul-tural societies. The public taste, no it less than the interest of the horti-is should be a yeary exhibition of the progress made in this most delight-ful art. Neglect of the exhibition, from whatever cause, is nsually marked by decline in progress; and this may be traced to either lack of public spirit on the part of the offi-cors of societies. Horticulture, it may be truly said, is the acme of agriculture; and those only familiar with ordinary farm tillage have no real conception of the productiveness of land under a high state of cultivation. It is not an unusual occurrence that a single acre in or near a city yields it a greater profit than many entire forms.

a greater profit than many entire our engagement is at an end ; I

farms. Although in this country there are comparatively but few magnificent gardens, yet, in the diffusion among the people of a knowledge and love nost gratifying advance; and even a literature specially pertaining to the science and practice of horticul-ture has sprung up.

ture has sprung up.

The Prince Imperial is to be at-tached to the Fifth or Royal Irish Lancers in the British army.

At the coming exhibition of the Deseret Horiceultural Society it is desirable that each article or class exhibited should, so far as possible, be in itself an epitome of some valuable facts for cultivators, and accompanied with such written notes that the whole story could be readily gathered by the observers. To work up show snecimens is
