

## MINING, BUSINESS AND STOCKS

### MARKET DULL, SALES WERE FEW

May Day Continued Weak Notwithstanding Statement Regarding an Assessment.

### SACRAMENTO CAME OUT.

This Stock Was Bought at Nine Cents -- Sales of New York, Butler-Liberal and Daly.

This has been a quiet day along Brokers' Row on Second South street. The total forenoon sales on the mining exchange footed up to \$1,194.50, representing the transfer of 7,200 shares.

May Day continued as weak as ever and sold down to 8 cents a share. Notwithstanding the statement of Manager Darmer that there is no immediate need of an assessment, the public seems to be of the opinion that one is inevitable in July, unless something unexpected turns up. One gossip has it that Manager Darmer has some good ore bodies opened up and that he is not rushing to market with it for the purpose of allowing the stock to suffer a heavy movement. Few believe this story, but are of the opinion that the manager would keep the market pretty well supplied if he had the ore.

Lower Mammoth sold at 23 cents this morning. A few shares of Sacramento ventured out, being taken at 9 cents. Star Con. found favor at 8%, while Butler-Liberal, Daly and New York were among the other active stocks.

The closing quotations and sales were:

### DID NOT CONSULT THEM.

Advertising Methods of Gibraltor Syndicate Meets With Some Disapproval.

Former Senator Thomas Kearns and David Keith object to the use of their names in the advertisement of the Silver King Mining company in the publication of the Gibraltor mines, the location of which is in the Bullfrog, Nevada district. In the east the Gibraltor is being extensively advertised and in one New York publication W. V. Rice and James Parcell, the promoters, are mentioned as being the principal owners of the Silver King. "The advertisement is over the name of Irving K. Farrington & Company, a brokerage firm, acting as fiscal agents."

"The use of our names and the use of the name of Silver King Mining company in connection with the enterprise of the Gibraltor syndicate," say Kearns, Keith and Parcell, "are both unauthorized and we desire to notify the public that we know nothing concerning the venture. If the purpose of the circular in making use of our names or that of the Silver King Mining company was to induce people to purchase stock in the Gibraltor Mines Syndicate, we do not desire any to announce that we do not desire any one to be misled by the fact, as we did not know of this use of our names or that of the Silver King Mining company until we received a copy of the printed circular. We do not desire to have our names used without our consent or the board of directors of that company. Just why it was necessary to use these names in connection with exploiting a Nevada proposition, unless it was to induce the

public to purchase stock by said use, we cannot understand."

### SMELTER FOR LIDA:

California and Honolulu Capitalists Backing Enterprise.

Plans have been laid and will be carried into execution immediately for the construction of a smelter. A company which will have a capitalization of \$10,000,000 is now in course of organization, says the Goldfield Sun.

A party of capitalists who will carry the project into effect has been headed by Judge George D. Gear and Mr. McKeon, of Honolulu, and Mr. Lackman, of San Francisco, visited Lida yesterday and made arrangements for the plant and machinery to be used.

It is learned that they found conditions more favorable for their plans than they expected, and as a result have decided to proceed at once with the organization of the smelter company.

It is proposed to construct a smelter with a capacity of 250 tons of ore a day. The initial cost of the plant of the Lida district has assured the capitalists this amount of ore for treatment daily and have entered into contracts.

There is every possibility that the plant will increase its facilities as demand requires, and that this will be necessary almost immediately.

It is intended to begin the construction of the smelter within the next two weeks.

### ALBION'S BIG VEIN.

Manager Hatfield Says It Is Twenty-six Feet Between Walls.

William Hatfield, manager of the Albion mine at Alta, also the Snowflake mine in Tintic, has returned from an inspection trip to both properties. At the former, which has recorded one of the big strikes of the year, the cross-cutting of the vein disclosed that the width between walls is 26 feet.

A drift on the vein, as well as the shaft, has been started. At the Snowflake the task of retimbering the shaft has been undertaken, preparatory to a vigorous development campaign, repairs will have to be made on about 200 feet of the shaft.

### STOCKTON DEVELOPMENTS.

Cross-cutting Each Way From 880 Station of Working Shift.

Important developments are being made in the Stockton mine of Stockton. According to late advices from that camp Supt. Galiger has a force of men crosscutting two ways from the 880 level of the shaft, east and west, both of which are due to encounter one very soon. The company will probably provide the mine soon with a larger hoisting plant.

The mill has been closed down pending completion of the arrangement for the impounding of the tailings.

### Likes Nevada Camps.

Special Correspondence.

Provo, June 22.—Hon. L. Holbrook, who returned several days ago from a trip to Bodie, Cal., where he went in company with Senator Smart and others, some two weeks ago, is enthusiastic over the prospects of the new mine at the mouth of the Bullion creek in the state. He believes the mine will be a success.

Frank Wilson has secured a bond on the foundation for the new Edwards

mine at the mouth of the Bullion creek, which he visited. He has a very high opinion of these districts as potential producers of rich ores, and considers they have great advantage over other camps in being able to carry on work all the year around.

### VOGLER MAKES A HIT.

Automobiles in Big Demand on the Deserts of Nevada.

Fred W. Vogler, the well known Montana-Idaho stage owner who is operating a line of automobiles between Tonopah, Goldfield and other active camps in southwestern Nevada, has sold his first car, a 1904 model, to a customer in the state.

Vogler, president of the Lida Harris Bull Frog Mining company, called at the office of the Daily Sun yesterday afternoon and announced a strike on the property of the company.

He is one of the biggest discoverers in southern Nevada and stated that no assays have been made, but that the ore encountered would run

100,000 a ton, Goldfield Sun.
