next year: It would be of little use for me to tell you when it was that the Wizard of the Wasatch first made his home in the heart of those great mountains, for the time is so remote that the brightest human mind is incapable of comprehending the innumerable num-ber of years that have passed since then. Certainly it, must have been when the earth was without form and void, and darkness dwelt upon the face of the deep. From his home in the inaccessible recesses of the everlasting hills, the great Wizard has watched the world grow from chaos; he has seen nations of men arise, grow great in wealth and accomplishments, and he has seen them decay and vanish into that great grave where the nations are burled— passing away like a dream of the night.

But during the passing of the in-conceivably numerous years, he has wrought unceasingly for the benefit of humanity. He has called to help nim the spir-its of earth, air, sunshine, snow, ice, water, clouds, thunder, lightning and hail, and through their gentle minis-trations, he has made the valleys fruitful, until they blush in beauty and plenty like opening roses.
