First Ward Sunday School—Resignation—Appointment.

SALT LAKE CITY, August 8th, 1881.

Editor Deseret News:

Yesterday morning in our Sunday School was a time long to be remembered. Our late Superintendent Richard Provis having been out of health for some time past wished to resign his office. The Bishop had previously invited as many of the parents of the children to be present as could come and the invitation was accepted. After the opening of school and the administering of the Sacrament, the Bishop presented the business. Bro. Provis being present tendered his resignation, which was accepted. Bro. Geo. Hilton, in behalf of the teachers and scholars, presented to Bro. Provis a beautiful picture of the First Presidency and Twelve, Joseph, Hyrum, Brigham, George A. and Daniel H. as a token of respect, which was accepted with much feeling. Several of the teachers expressed their feelings, made some very encouraging remarks on Sunday Schools, and regretted much that Bro. Provis had to resign.

Alexander Steel was nominated as superintendent, and the nomination was carried unanimously. Bro. Steel then chose for his counselors the brethren that had acted with the late superintendent—Bros. Geo. Hilton and Joseph Stay.

The First Ward martial band, led by Bro. Braby, discoursed some excellent music.

A good feeling prevails in our Sunday School, and every one seems alive to his or her duty. After the benediction, the children and the band escorted Brother Provis to his home. The whole proceedings were under the direction of Bishop Joseph Warburton.

Ever praying for the welfare of the Sunday School cause,

I remain, yours in the gospel,
JOHN SIDDOWAY.

What Shall we do with Our Daughters.

Mrs. Livermore has made this query the text of one of her fine lectures. It is certainly an important problem, but the Davenport *Democrat* thus sums up some sensible lessons which should early be impressed upon them:

Teach them self-reliance.
Teach them to make bread.
Teach them to make shirts.
Teach them to foot up store bills.
Teach them not to wear false hair.
Teach them to wear thick, warm shoes.
Bring them up the way they should go.
Teach them how to make their own dresses.
Teach them how to wash and iron clothes.
Teach them how to cook a good meal of victuals.
Teach them that a dollar is only a hundred cents.
Teach them how to darn stockings and sew on buttons.
Teach them every day, dry, hard, practical common sense.
Teach them to say No, and mean it; or Yes, and stick to it.
Teach them to wear calico dresses and do it like queens.
Teach them a good education, substantial, common school education.
Teach them that a good, rosy romp is worth fifty consumptives.
Teach them to regard the morals and not the money of their beaus.
Teach them all the mysteries of the kitchen, the dining-room, and the parlor.
Teach them that the more they live within their income the more they will save.
Teach them to have nothing to do with intemperate and dissolute young men.
Teach them that the farther one lives beyond his income the nearer he gets to the poor-house.
Rely upon it that upon your teachings depends in a great measure the weal or woe of their after life.
Teach them the accomplishments, music, painting, drawing, if you have time and money, to do it with.
Teach them that a good steady mechanic, without a cent, is worth a dozen oil-patent loafers in broadcloth.
Teach them that God made them in His own image, and no amount of tight lacing will improve the model.

A Remarkable Spider Story.

We have listened to and have read snake stories and bear stories, and editorials in republican papers, but we never read a more improbable and at the same time prettier story than Seth Green's spider story. He says that if you anchor a pole in a body of water and put a spider upon it, he will exhibit marvellous intelligence by his plans to escape. At first he will spin a web several inches long and hang to one end while he allows the other to float off in the wind, in the hope that it will strike some object. Of course his plan proves a failure, but the spider is not discouraged. He waits until the wind changes and then send another silken bridge floating off in another direction. Another failure is followed by several other similar attempts, until all the points of the compass have been tried. But neither the resources nor the reasoning powers of the spider are exhausted. He climbs to the top of the pole and energetically goes to work to construct a silken balloon. He has no hot air with which to inflate it, but he has the power of making it buoyant. When he gets his balloon finished he does not go off on the mere supposition that it will carry him, as men often do, but he fastens it to a guy rope, the other end of which he attaches to the island pole upon which he is a prisoner. He then gets into his aerial vehicle, while it is made fast, and tests it to see whether its dimensions are capable of the work of bearing him away. He often finds that he has made it too small, in which case he hauls it down, takes it all apart, and constructs it on a larger and better plan. A spider has been seen to make three different balloons before he became satisfied with his experiment. Then he will get in, snap the guy rope, and sail away to land as gracefully and as supremely independent of his surroundings as could well be imagined.—*Bloomington Bulletin.*

PERFECTION BAKING POWDER.

We respectfully call the attention of the Public to the following analysis:

Laboratory of the Health Department, Chicago, Aug. 5, 1880.

OSCAR DE WOLF, Commissioner of Health.

Dear Sir:—I have made a very careful and elaborate chemical analysis of twenty-seven samples of baking powders received from the hands of Mr. Merkl, your clerk, and have the honor to report the following table of figures:

	Soluble Ash.	Insoluble Ash.	Total Ash.
PERFECTION,	29.06	0.06	29.06
DR. PRICE'S CREAM,	36.18	0.12	36.30
ROYAL,	36.10	0.12	36.22

A known and weighed quantity of baking powder was incinerated in a silver crucible until only a grey residue was left. This is the *total ash*. It was carefully removed to a glass vessel and acted upon by hydrochloric acid and distilled water at the boiling point; what dissolved in that menstruum has been called *soluble ash*, and that which did not, *insoluble ash*.

I have the honor to be, sir, yours very respectfully, R. S. G. PATON, Chemist of the Health Department.

We have always claimed that the Perfection is the highest grade of baking powder that can be produced from cream tarter and soda. Respectfully,

SPRAGUES, WARNER & GRISWOLD, CHICAGO.
