ANGUS M. CANNON.
- PROSECUTING ATTORNEY.
Z. SNOW.
- COMMISSIONER.
GEO. J. TAYLOR.
- SURVEYOR.
CHAS. W. HARDY.

HOW ARE THEY GOING TO DO IT?

The Cincinnati Times-Star is very much concerned over the "presence of Mormons in Colorado," calls on the Government to "eradicate the great evil," and says "the duty of the Government is plain. The deadly Utes tree should be destroyed root and branch. This result can be accomplished by adopting an aggressive policy and sticking to it."

There are quite a number of persons and papers which are very forward to demand or advise an "aggressive policy against the Mormons." But they are not very clear in defining what they mean. "An aggressive policy" may be interpreted in various ways. We do not believe they can give a definite explanation of it themselves. They want the "Mormon stock broken up" to use the very liberal and American sentiment of the Times-Star, but for the life of them they cannot suggest a lawful and feasible method of doing the work.

To destroy "Mormonism" root and branch they will have to dig deeper than they or any of their tools will reach. The roots are in the human heart and conscience. They cannot get down to these points with anything but truth and reason. Misrepresentation and sophistry do not touch either, force is equally powerless, and these are the weapons with which they hack at the branches and think to get down to the root of the matter. But the tree grows on, root and branch, not like the fabled thing to which the Times-Star likens it, but like the mustard tree of the sacred parable, and like the tree of life with leaves that will be for the healing of the nations.

But our double-headed contemporary has gone off wrong as usual in regard to the facts. It is a mistake to base on the statement that the "Mormons are moving from Utah to Colorado." This is incorrect. Our colony in Colorado is mainly composed of Latter-day Saints who have embraced the faith in the States, and have moved to Colorado where they can get land and make homes. A very few experienced men from Utah have selected the site for them and directed their labors.

We would ask the Times-Star whether people who believe in the tenets of our Church have not just as much right to settle in any part of the United States that suits them, as the same number of Catholics, Protestants, Jews or infidels. And should they break the laws of the State—which is very improbable, as the "Mormons" are noted for their obedience to the laws of the localities where they sojourn or reside—cannot the authorities of the State proceed against them as against any other law-breakers? And further, what that paper please to tell us what business the Government of the United States has to do with a company of settlers of any creed or party, in a free and independent State of the Union? If the Times-Star will reflect a little on these simple questions it will surely see its lack of sense in punching up the Government to "adopt an aggressive policy and stick to it." We would advise the Government, the Times-Star and everyone anxious to "destroy the Mormon seed," to adopt the policy of minding its own business, and then "stick to it."

A SINGULAR MISSIONARY INCIDENT.

THERE is no country on earth in which the Elders of this Church have been protected by the legal authorities more faithfully and fairly than Great Britain. True there has been some persecution of the Saints and mobbing of the brethren while preaching the gospel. But the disturbances have been of a local character, and with but few exceptions the police and the magistracy have been willing to deal out evenhanded justice, to shield the peaceful and punish the disturbers of the peace.

AMERICAN.

President Geo. H. Taylor.

Dear Bro.—On Sunday last we held an out-door meeting at this place to a fair-sized and attentive congregation, have distributed about 150 tracts, and had many opportunities to speak to the people on the principles of the Gospel. Yesterday we visited Newport Pagnell, anxious for a chance to engage anyone's attention with our message, which desire was soon granted in the following manner:—A number of persons coming on, we took shelter underneath an awning, and a conversation was opened by a young man, several persons were in the vicinity, and Inspector John Moore and Joseph Jones came up and informed us we were wanted, but would not state for what. In their company and that of four policemen, we marched to the station-house, where the chief inspector read from a printed gazette a description of us as follows: One about 35 or 40 years of age, 5 feet 3 inches in height, dark, full, curly beard, dress hat and black suit, and the inevitable tin snuff box. The other about 30 or 35 years of age, 5 feet 10 inches in height, thin, sandy beard, dress hat, grey top coat, dark suit, umbrella, etc.

After the reading of this excellent description of ourselves and from such a source, we were then interrogated as to being at Stoney and Old Stratford the previous day. Our answer in the affirmative seemed acceptable, so we enquired what these proceedings meant, to which Inspector Moore replied that we answered the descriptions read—that we had been seen sitting by the wayside, reading the Testament, walking about, etc., and he asked, "Where did you stay last night?" We informed him that it was at Brother Charles Smith's, Stantonbury. At this two of the force took a trap for a three mile ride to Stantonbury. The inspector continued his examination by asking us a question, which we answered by informing him that we were ministers of the Gospel. We passed him and others some of our tracts, and gave them an exposition of the first principles of the apostolic Gospel.

Inspector Moore brought out his Bible, fearing ours was incorrect, and we had an exceedingly interesting time for over an hour, when he furnished us an excellent "tea." In the meantime the officers sent to Brother Smith's returned verifying our statement. The patriarchal order of marriage being introduced, we offered Scriptural proof, but received opinion and tradition in reply. A description of Salt Lake City was given by us, and in the evening of 10 hours and half most agreeably, we bade them good bye.

Inspector Moore's conduct was quite courteous, and on parting, he offered us our railway tickets to Stantonbury, which we declined. He also expressed himself as entertaining a very different idea of our principles, from our conversation, to that which he had formerly conceived. We left feeling grateful to our Heavenly Father for the opportunity thus opened of again hearing our testimony to the truth, and if it were his will we would not object to being taken into custody every day.

On arriving at Brother Charles Smith's, we found that he and his wife had had a New York Herald, to render us aid, if necessary. On their return we enjoyed the relation of the several parts of this little episode, feeling extremely grateful to Brother Charles Smith for their solicitude for our welfare.

"We remain, yours truly in the Gospel,
WM. WALLACE WILLEY,
T. C. GRIGGS."

There is no law in England against reading the New Testament, the Old Testament any other book by the wayside, but it is possible that the Inspector may have heard something of "Evarts" circular, and supposed that some sort of "Mormon emissaries" were in the "Mormon emissaries." However, no harm was done, but as it will generally occur, the result was an opportunity of preaching the Gospel, which otherwise would perhaps have never been obtained.

WHAT TANNER LIVES ON.
DR. TANNER'S fast has had the effect of demonstrating one fact not generally known, and that is that water contains nutritive qualities in a very large degree. During the first sixteen days of his abstinence he drank no water, but merely rinsed his mouth frequently, the water being measured and weighed before and after use. During the latter part of that time he suffered severely, and in all probability would have succumbed from fever and exhaustion, if it had not been for the outward applications of water to which he continually resorted. Wet cloths were placed upon his head, he bathed his face and neck repeatedly, and kept a wet sponge in his hand. By these means he absorbed considerable moisture, and this no doubt kept him alive.

But his burning thirst increased to such a degree that on the sixteenth day the physician waiting upon him feared his speedy collapse, strongly persuaded him to drink. He complied and from that time commenced to improve. He actually gained in weight a pound and a quarter in one day. His nervousness and irritation decreased, his vital energies were revived, and he became cheerful and able to ride or walk in the open air with pleasure.

Water, according to Smiler Colfax, accomplished all the wonders of the change on the climate, soil and improvements of Utah, from the barrenness and sterility of '47 to the plenty, beauty and comfort which he beheld in the midst of the desert when he took a trip to the West. Water has evidently kept Dr. Tanner from fading out of this world into another—perhaps to a place where there is no water. The human body is so largely made up of this fluid that it is an essential to its continuance, and it is reasonable to believe that taken into the system in its purest condition, unaltered by any of the ingredients which enter into the most commonly used beverages, it will best supply the natural corporeal demands.

The sparkling, rippling streams that flow down from our mountain heights, being as they are, so pure and clean, and of such a nature as to be taken into the system without any of the ingredients which enter into the most commonly used beverages, it will best supply the natural corporeal demands.

AMERICAN.

Hancock's Letter.

New York, 30.—The Herald says: Hancock's letter of acceptance is finished, and with the English will be given to the public to-day or to-morrow. The Herald further says Hancock wrote the letter without consulting anybody.

The Tammany Disfranchisement.
The Herald says: The great democratic demonstration of Wednesday among politicians yesterday. It was thought among Irving Hall adherents that Tammany's failure to take part in the meeting would greatly injure the wing among prominent democrats who were in attendance. It had shown these gentlemen that Tammany was not really sympathetic with the democratic party of the State or country, and would go a great way to show that the wing was becoming more and more an association of men bent only on securing the spoils of local patronage. It is proposed by Tammanyites to hold a monster meeting in September, probably in the first or second week of the month, to which all prominent democratic leaders in the country will be invited.

Pennsylvania Republicans Sanguine.
The Herald's Philadelphia special says: The republican committee held an important meeting at the Union republican club rooms to-day. It was the first general convocation since last winter, when the same committee assembled in the Continental Hotel, and started the great boom. It was characterized by great buoyancy of spirit and large attendance. The meeting was held with closed doors. James E. Smith, chairman of the committee in his address said: "In the whole range of my experience I never knew so thorough an organization. Leaders of assurance are crowding in on us from all sources, every one bespeaking a glorious and successful fight during the coming campaign." Loud cheering greeted the introduction of ex-Governor Smith as chairman of the National republican committee. He said: "It is with great pleasure I see the wonderful unanimity that marks the republican ranks at this moment. I want to say to you that we shall have a victory that will equal our most sanguine expectations." He informed the committee that he was distributing cash through the State and that it was his intention to visit three of the Southern States to make an aggressive campaign. "There is a republican down there who is going to run for Congress and I have informed him that if he has the courage to try I will supply him with the cash."

Ex-Sheriff Leidy of Philadelphia said there is an impression prevailing among some people in the State that Cameron and McManes are having a fight there. There is no fight between them and in more, McManes can make one. The two men are working hard together and are personally as close friends as two men can be. This brief address was received with an uproar of applause and seemed to leave the committee in a more sanguine frame of mind than ever.

Doctor Tanner has greatly improved to-day. At 3.15 this morning he vomited a quantity of mucus. He then drank one and a half ounces of carbonic acid gas and water. He sat up most of the morning and walked 25 minutes in the enclosure of the hall, about two-thirds of a mile in 18 minutes. His gait was free and steady.

The Policy With the Indians.
SAN ANTONIO, Texas, 30.—Grierson telegraphed Ord confirming a battle fought on Sunday, July 26, at Victoria, Ord says: The present policy of the forces of the Mexicans is to whip the Indians or submit to the American troops invading Mexico to punish marauders.

Indianaapolis, 30.—Franklin Lander has been elected by the Democratic State Central Committee \$3,500.

Chicago, 30.—The Inter-Ocean's special says: Yesterday was the most exciting that has passed. Some of the physicians who have been confident of his recovery, and the advisability of supplying him with nourishment was discussed. He protested and declared his ability to accomplish the task. Those who have watched him from day to day, however, could see that his face was more pinched and haggard and his step feeble. Brandy and a preparation of meat had been provided in case of emergency, and a supply of hot water ordered constantly on hand. Before taking the carbonic acid water in the afternoon, the Dr. sat in his rocking chair and looked at the crowd around him. Then his head gradually sank forward as though he was overpowered. He seemed to relax for a moment and resting his elbows on his knees, sat holding his head between his hands. One of the regular physicians at the hall said, usually the brain gives way in the exhaustion of such long starvation, and when the stomach seems going first. If Dr. Tanner becomes unable to keep water, as seems likely, death must ensue.

Grant on the Candidates.
Gov. Smith of Wisconsin, has just returned from an extended tour to California, Oregon, Nevada and Utah, during which he spent several days with General Grant. He says in an interview, that he found Grant earnest in his republicanism, and absolutely confident of the success of Garfield. All talk about his being "sore" or lukewarm is false. He regards Garfield as one of the foremost statesmen of the country, and is convinced that the business interests of the country demand the election of the republican ticket. Of Hancock, he says, he believed he was and always was, loyal, and said as much could not be said of all the Generals who were later important commands under him in the Army of the Potomac. In Hancock, however, he never discovered the least trace of disloyalty, either to the commander or the country.

Brazilian News.
Rio Janeiro, June 30.—At Victoria, in Pernambuco, a riot occurred on the 27th, in which, according to the telegrams received, the soldiers and police fired on the people, and 25 persons, including Baron De Esch, were killed, and many wounded.

BY TELEGRAPH.

AMERICAN.

THE TANNERS.

It is reported that the town of Yates, in the State of Nevada, was burned on the night of the 27th. Probably incendiary, as several attempts have previously been made to burn the town.

Various special dispatches from Vienna, Paris and Berlin state that the journals of those capitals express the opinion that the Afghan disaster is causing less activity in Turkish affairs on the part of England. A Constantinople dispatch announces that official notice to the press of that city threatens suspension or suppression if they reproduce articles containing the slightest allusion to the Turkish situation.

Gooschen has informed Abdur Pasha that military preparation on the part of Turkey would precipitate a naval demonstration. Baron Colcie, the new Austrian ambassador to Turkey, has arrived. Various special dispatches state that Serbia has ordered the mobilization of her army. The conservative leaders held a conference yesterday on compensation for disturbance bill. Lord Balfour and Lord Cairns were present. Heavy rains have done much damage to crops in Midland, Lincolnshire and Nottingham districts. It is stated that arrangements are made for the dispatch of 4,000 or 5,000 troops to Afghanistan from England within a few days, and the military authorities are prepared to supply from England and within the next fortnight 12,000 troops of all arms. Admiral Tythas has signified to the war department his readiness to undertake transportation for 20,000 within three weeks. Gen. Sir Garnet Wolseley came to London yesterday from the Isle of Wight, after hearing the news of the disaster at Kandahar. A telegram was received at the India office from the Viceroy of India last night, dated the 29th inst., which refers to the dispatch of reinforcements from England and India. It says a battery of horse artillery at Kurachu has been ordered up. One battery of the first Madras cavalry are prepared to supply from England and within the next fortnight 12,000 troops of all arms. General Phayre will receive a battery and a European regiment from Punjab. His Lordship will muster three batteries, nine squadrons and three British and four native battalions. He expects to be ready in fifteen days. (Continued.)

The St. Petersburg Globe says: With the accession of Abdurrahman Khan to the throne of Persia, the Afghan events terminate. Two powerful neighbors of Afghanistan have stretched out to each other the hand of reconciliation on grounds which became matters of dispute in consequence of the policy of Lord Beaconsfield. Now the Emperor owes his present position quite as much to Russia as to England. (Continued.)

Richardson's Pain Annihilator.
GIVES INSTANT RELIEF TO THE AFFLICTED.
It is an External and Internal Medicine.

SALT LAKE CARRIAGE & WAGON SHOP!
1115 S. W. 2nd ST. WEST OF THE MITCHELL WAGON DEPOT.
