

SECOND EDITION.

DESERET EVENING NEWS.

Wednesday, December 23, 1891.

FRAGMENTS.

THICKERS are plentiful in the city. The Collision Club had a pleasant party at Mr. Mac's last night.

COURT—CLERK.—An act was passed by the Legislature of Mr. H. D. Howe and Mary Louise.

A Law's led over last Moan since last night which the owner was slightly disengaged.

THEIR are numerous at the Western Union Telegraph Office. The telegraph office, Arthur Clark, J. C. Jackson and Morris Major.

The local committee of the City Council and Chamber of Commerce on chartered the new Mayor's office—yesterday evening about 4 o'clock.

J. T. Durbin was presented with an elegant and valuable gold watch last night by T. C. Thompson, with the compliment of the Chamber of Commerce.

The Chamber of Commerce was distributing, both far and near, records of the Irrigation Congress held in the city.

The register of the Land offices in the city has been suspended at the suggestion of Mr. Thompson to allow time for publication on mining operations until all preliminary work is finished.

YESTERDAY the Capital Commission presented a signed report for presentation to the Legislature. The expense of the work of the irrigation project will be paid for the construction of the work and the cost of the building.

J. F. WENGER, principal keeper of the State Reference Library, New York, has written to say he may stop with which he could not be interested in the audience in the matter under consideration. Mr. Wagner professed his respects by announcing that he knew nothing as to how natural gas was made, but he did know of many instances and benefits resulting to towns that had been fortunate enough to secure gas wells.

In Marion, Indiana, every residence was supplied with natural gas, which could be used for all heating and lighting purposes, and the expense annually did not exceed \$15. The wells at Lake Shore, with a force of 55 pounds to the square inch, last at a depth of 200 feet, and capable of lifting cold water is heating heat in a few minutes, could very easily be increased by driving the pipe further into the earth. The railway companies traversing this mountain region supplied the smaller works at the various mines with thousands of tons of coal, yet if natural gas could be found in sufficient quantity, the amount of coal required to supply energy, by reason of a necessary auxiliary furnace, would be reduced to a minimum. This would be an enormous saving to those who were willing to sacrifice and formulate schemes of improvement and construction to begin their work at once and to put them in operation as soon as possible.

Some time ago, the state legislature of Indiana passed a bill to prohibit the use of gas in lamps, but it was rejected.

Last night the New England Society of Salt Lake celebrated "Forefathers' Day," in their hall, with a service of thanksgiving and a meeting. The guests numbered about 100. The president gave the first reading, "The Day We Came." The service was conducted by Mr. Ulrich, entitled "Consecration Day," was then read and a short speech was delivered by Mr. Ulrich, "New England's Home and Her Sons," a homily read on "Frigidity and Puritanism."

The president gave the first reading, "The Day We Came." The service was conducted by Mr. Ulrich, entitled "Consecration Day," was then read and a short speech was delivered by Mr. Ulrich, "New England's Home and Her Sons," a homily read on "Frigidity and Puritanism."

Last evening the members of the team which were being organized to carry the salt from the mine to the market at the Pacific Exchange January 1st, selected a teamster, and a number of men were chosen to help work in the mine hall. No less than 100 men, Mr. Parks, the secretary, and the men engaged in labor until Saturday evening next, the last team went to town.

High Priests' Meeting.

The next regular monthly meeting of the High Priests' quorum of the Salt Lake Stake of Zion will be held at the Fourteenth ward assembly room, University, on Saturday, December 26, at 11 a.m. All members will be present. Full attendance is desired, and a general invitation extended to all the priesthood to be present. J. D. STEPHENS, Clerk of quorum.

Amusements.

The sale of seats for "Patentis" commenced this morning. The sale opens open Sunday night. The name is working diligently to make the performance successful, and the great result for seats that have been sold indicates the success with which the publican is to control the interests of the enjoyment in store.

THE YOUNG CONCORD.

The old folks, wives and orphans and deaf mutes are reminded that they are cordially invited to this entertainment, which begins in the Eastern Christmas evening. Secure tickets wherever.

General Concourse.

At a meeting of George R. Maxwell, Post No. 5, G. A. R., held on Monday evening December 24, 1891, the following resolutions were unanimously adopted:

Resolved, that on Thursday, the 27th day of December, last, our local and beloved friend General Patrick Edward Connor, received his final discharge from the service of his country, and that we mourn the loss of our comrade in the grand encampment beyond the grave.

Resolved, that we join with loyal Americans everywhere in mourning his loss and deplored him among us.

Resolved, that we extend our sympathies to his widow, Mrs. Connor, and tender her in her sorrows our sincere condolence and sympathy.

Resolved, that we hold a short halting of mourning to honor the past and the dead, to express our sympathy to our family and all associated with the deceased.

Expressions of Condolence.

The following message of condolence was received by Superintendent Bailey of the local division of the Utah Pacific today:

OSAKA.

To D. H. Miller, Salt Lake.

Concerning the health of Bishop James Sharp great rejoice to me. Had not heard of his illness. He always acted my respect and admiration as an honest man and true. H. H. Clark, Vice President and General Manager Union Pacific.

JAMES RICHARDSON.

The following was received by Hon. James Sharp, son of the deceased:

OSAKA, Dec. 23, 1891.

Hon. James Sharp, son of the family of your late father, the conditions of mind and body. We wished him for his health qualities, and heart, courage and strength. His wife, Mrs. Mary Louise, is better to all his people. May the Lord bless and comfort his bereaved family.

F. D. Linnemann.

NATURAL GAS MEETING.

Enthusiastic Speeches Made in the Federal Court Room.

THE PROSPECTS ARE PROMISING.

Future Action Briefly Outlined.—A Large Amount of Capital to be Raised.

The Natural Gas meeting held in the Federal court room last night was a success. The Collision Club had a pleasant party at Mr. Mac's last night.

THEIR are numerous at the Western Union Telegraph Office. The telegraph office, Arthur Clark, J. C. Jackson and Morris Major.

The local committee of the City Council and Chamber of Commerce on chartered the new Mayor's office—yesterday evening about 4 o'clock.

J. T. Durbin was presented with an elegant and valuable gold watch last night by T. C. Thompson, with the compliment of the Chamber of Commerce.

The Chamber of Commerce was distributing, both far and near, records of the Irrigation Congress held in the city.

The register of the Land offices in the city has been suspended at the suggestion of Mr. Thompson to allow time for publication on mining operations until all preliminary work is finished.

YESTERDAY the Capital Commission presented a signed report for presentation to the Legislature. The expense of the work of the irrigation project will be paid for the construction of the work and the cost of the building.

J. F. WENGER, principal keeper of the State Reference Library, New York, has written to say he may stop with which he could not be interested in the audience in the matter under consideration. Mr. Wagner professed his respects by announcing that he knew nothing as to how natural gas was made, but he did know of many instances and benefits resulting to towns that had been fortunate enough to secure gas wells.

In Marion, Indiana, every residence was supplied with natural gas, which could be used for all heating and lighting purposes, and the expense annually did not exceed \$15.
