

ian college, said: The public security would be guaranteed. Batteries have arrived at Alexandria on night train the past few days.

LONDON, 18.—The cabinet to-day considers the state of affairs in Egypt.

Thomas Walsh, an Irishman, tenant of the house in Clerkenwell where the ammunition and firearms were seized, has been arrested. From the fact that he has assisted emigrants to America, it is inferred that he is in connection with parties in the United States. Since Walsh's arrest another 5,000 rounds of ammunition have been seized at his residence at Hatton Garden.

St. PETERSBURG, 18.—A resolution has been passed by a holy synod and received the sanction of the Emperor, which prohibits persons not Christians from publicly trading in holy pictures, crosses or vessels used in Christian worship.

The *Petersburg Skala Vidomoski* states that owing to the disturbed condition of Afghanistan, consequent upon Ayob Khan's intrigues, an exchange of views has taken place between the Russian minister of foreign affairs and the British ambassador, with reference to the future policy of England and Russia in Central Asia.

ALEXANDRIA, 19.—Arabi Pasha has given orders for torpedoes to the value of £20,000 sterling. The Katatbe irrigation works are stopped. An Italian man-of-war, with two companies of troops has arrived at Port Said.

### THE BREEDING OF FINE STOCK.

A NUMBER of committees were appointed by Zion's Central Board of Trade at one of the recent meetings to collect information on various subjects and report with such recommendations as their experience would suggest. We shall publish the reports as they are made and shall reach us, and to day present the following on the subject of the breeding of fine stock:

To the Honorable the President and Members of Zion's Central Board of Trade:

Gentlemen.—Your committee to whom was referred the subject of breeding and raising fine stock, beg leave to report the following:

#### HORSES.

Recommend horses ranging in weight from 950 to 1,300 lbs., and would suggest the use of Morgan, Messenger and Hambletonian horses as worthy of the people's patronage, and as calculated to produce horses most suitable for all work in our mountain country, except for heavy draft. For this purpose we recommend the Norman.

#### CATTLE.

Recommend the Short-horned Burham Cattle, as affording the best cross that can be made with our native stock, where the object is to produce beef. Devon cattle are said to be the best foragers and to thrive equally with anything, where they have to seek their feed, and to excel most breeds as oxen and milch cows, where pasturage is not the best and where ample provision cannot be made to supply them with provision during the winter. Where the object is rich milk and butter, we recommend the Jersey and Ayrshire for family use, but in order to be successful they must be well sheltered and cared for.

#### SHEEP.

Recommend the cross of Merino with Cotswold and our native sheep as affording the most profitable return in mutton and wool.

#### SWINE.

The Berkshire and Poland China are extensively bred and are found profitable, both pure bred and crossed, in our Territory and throughout the Western States. The Chester White crossed with Suffolk is also found to be admirably adapted to our necessities.

While we recommend the crossing of the pure breeds of horses, horned stock and sheep with our native animals, we urge upon the attention of our breeders the necessity of preserving purity of blood in their respective kinds.

Your committee would suggest that there is a sufficient supply in the Territory of Norman horses, Shorthorn and Devon cattle, and Merino and Cotswold sheep for crossing purposes with our native animals, without further importation.

Respectfully,  
W. WOODRUFF,  
Chairman.

### To Take Out Milk and Coffee Stains.

These stains are very difficult to remove, especially from light colored and finely finished goods. From woolen and mixed fabrics they are taken out by moistening them with a mixture of one part glycerine, nine parts water, and one-half part aqua ammonia. This mixture is applied to the goods by means of a brush, and allowed to remain for 12 hours (occasionally renewing the moistening). After this time, the stained pieces are pressed between cloth, and then rubbed with a clean rag. Drying, and if possible a little steaming, is generally sufficient to thoroughly remove the stains. Stains on silk garments which are dyed with delicate colors, or finely finished, are more difficult to remove. In this case five parts glycerine are mixed with five parts water, and one quarter part of ammonia added. Before using this mixture it should be tried on some part of the garments where it cannot be noticed, in order to see if the mixture will change color. If such is the case no ammonia should be added; if, on the contrary, no change takes place, or if, after drying, the original color is restored, the above mixture is applied with a soft brush, allowing it to remain on the stains for six or eight hours, and is then rubbed with a clean cloth. The remaining dry substance is then carefully taken off by means of a knife. The injured places are now brushed over with clean water, pressed between cloths and dried. If the stain is not then removed, a rubbing with dry bread will easily take it off. To restore the finish, a thin solution of gum arabic, or in many cases beer is preferred, is brushed on, then dried and carefully ironed. By careful manipulation these stains will be successfully removed.

### The Doctor and the Lawyer.

A smart young sprig of a lawyer had a grave old doctor on the witness stand in a case of assault and battery and he questioned him unmercifully.

"Ah, doctor," inquired the lawyer, "did I under you to say the cut in the man's head was dangerous?"

"Yes, sir," replied the doctor.

"Well, doctor, doesn't it sometimes happen that even a less cut than this one is dangerous?"

"Yes, sir."

"And, doctor, is it not true that even a scratch is dangerous?"

"Yes, sir, and I have known of cases resulting fatally when not even a scratch was visible. Only recently a man died under such circumstances."

"Ah, indeed," quickly put in the attorney in a pleased and satisfied way, "will you be kind enough to tell the jury the facts?"

"Certainly, if you desire it."

"You say there was not a scratch on him?"

"Not one that I could find."

"And he died?"

"Yes."

"Now, doctor, just tell the jury how it was."

"Well, you see, he had the colic, and he was dead before I could get him untangled."

The young attorney called another witness. —*St. Louis (O.) Herald.*

### Pruning in June.

We have tried pruning in almost all months of the year, and on the whole prefer June. This being about the busiest month of the year, there is unusually little time for pruning, and so the favorite time is early in spring, and many of our old orchards, in their rotting limbs and decayed trunks, bear testimony to the mischief wrought by the ill-timed use of the saw and axe. Small limbs, an inch in diameter or less, can be taken off at any time with comparative safety. But the thorough pruning called for in a long-neglected orchard, is best done in the early summer. The sap is absorbed by the rapid formation of wood and leaves; the wood laid bare in pruning large limbs, soon becomes sealed, the healing process around the edges of the wound begins immediately, and in a few years the wound will be completely covered with new wood and bark. There is no chance for decay as when large limbs are removed in the early spring. There is far too little pruning done in the farm orchard. A dead limb should not be suffered upon the fruit tree. Good pruning leaves no stubs, but cuts

close to the trunk or branch bearing the excised limb. —*American Agriculturist for June.*

### A Whitewash That Will Stick and Wash.

We find in a German paper a formula for a wash which can be applied to lime walls and afterwards wards become waterproof so as to bear washing. Resenschek, of Munich, mixes together the powder from 3 parts silicious rock (quartz), three parts broken marble and sandstone, also 2 parts of burned porcelain clay, with 2 parts freshly slacked lime, still warm. In this way a wash is made which forms a silicate if often wetted, and becomes after a time almost like stone. The four constituents mixed together give the ground color to which any pigment that can be used with lime is added. It is applied quite thickly to the wall or other surface, let dry one day, and the next day frequently covered with water, which makes it waterproof.

This wash can be cleansed with water without losing any of its color; on the contrary, each time it gets harder, so that it can even be brushed, while its porosity makes it look soft. The wash or calcimine can be used for ordinary purposes as well as for the finest painting. A so-called fresco surface can be prepared with it in the dry way.

### A GOOD THRESHER AND ENGINE.

In this issue the Sweepstakes Threshing Machine and Canton Monitor Engine are advertised. There is no mistake about both being most excellent pieces of machinery, being noted for effectiveness of work and ease of management. Mr. Geo. A. Lowe of this City and Ogden is Agent.

JNO. A. BAILEY AND M. K. PARSON, Land Agents and Attorneys, Salt Lake City—Write to them enclosing stamp and they will give information FREE about Land Matters.

### GALE HAY RAKES.

Farmers who want the best Hay Rake in the market, are requested to examine the Gale Wood Hub; less pieces and traps in this Rake than any other in the market, an examination of the same satisfies the farmer. L. B. MATTISON.

### THE FARMER'S FAVORITE

Is a term frequently and justly applied to the celebrated Coates Lock Lever Sulky Rake, sold by H. B. Clawson. It combines all the advantages of Hand and Self Dump Rakes with none of the disadvantages of either, simple, durable and so easily handled, a boy or girl can work it. No Rake had so large a sale here last season as the Coates. Try One. s&w

Send to the "Deseret News Office" for Warrantee, Quit Claim and Mining Deeds, Mortgages and all kinds of Legal Blanks.

### DIPHTHERIA.

The latest and most successful treatment for this dreaded disease has lately come to our knowledge, and having interviewed the man who says his life was saved by the new treatment we feel confident it is our duty to give the facts to our readers, that they may investigate for themselves. The circumstances are as follows: Amede Chartier, of West Farnham, P. Q., recently had diphtheria; he became so bad off after a relapse that all hopes of his recovery was abandoned by his physicians and friends, and as a last resort a brother of the patient said that he had a bottle of Kendall's Spavin Cure and wished to try it. He applied it to the neck, and then reduced a little, and the patient after some difficulty succeeded in gargling it in the throat. He soon noticed some improvement, and by continuing its use a complete cure was effected, and now he says he knows it saved his life. The above remarkable experience led us to investigate and we found that Kendall's Spavin Cure has the most remarkable effect on human flesh of any remedy of which we have ever heard, and we have become soundly converted to the opinion that no remedy has ever been discovered which possesses such remarkable qualities for the diseases of man as well as beast. Every one should cut this out and paste into a scrap-book. —*Times.* d s & w

### "BUCHUPAIBA."

Quickly, complete cure, all annoying Kidney, Bladder and Urinary Diseases. \$1. Godbe Pitts, & Co. Salt Lake City.

### BENEFACTORS.

When a board of eminent physicians and chemists announced the discovery that by combining some well known valuable remedies, the most wonderful medicine was produced, which would cure such a wide range of diseases that most all other remedies could be dispensed with, many were sceptical; but proof of its merits by actual trial has dispelled all doubt, and to-day the discoverers of that great medicine, Hop Bitters, are honored and blessed by all as benefactors.

### "MATRIMONIAL TROUBLE."

It is all very fine where young people are courting, having the pleasant *tete-a-tete*, attending balls, parties, places of amusement, and at last popping the question with a slight pressure of the hand, meeting of the lips, and the day appointed to be made one. Solid comforts and pleasure continue until a family of children are brought into the world, then there is constant anxiety for their health and comfort, and at any time when one of those bright-eyed, rosy-cheeked children is troubled with Coughs, Colds, Hoarseness, difficult breathing, or any croupy symptoms, a bottle of

### HALE'S HONEY OF HOREHOUND AND TAR,

is immediately procured, a few doses administered, the disease annihilated, and then everything again moves along smoothly. The article is now used by almost every family, and gives universal satisfaction. Sold by all druggists at 50 cents and \$1 per bottle. Great saving to buy large size. Depot Crittenton's, New York City.

PIKE'S TOOTHACHE DROPS cure in one minute. deod&w.

### \$500 REWARD.

They cure all diseases of the Stomach, Bowels, Blood, Liver, Nerves, Kidneys and Urinary Organs, and \$500 will be paid for case they will not cure or help, or for anything impure or injurious found in *Hop Bitters*. Test it. See "Truth" or "Proverbs" in another column s&w

### HORSFORD'S ACID PHOSPHATE, VALUABLE MEDICINE.

Dr. W. H. Parmelee, Toledo, O., says: "I have prescribed the 'acid' in a large variety of diseases, and have been amply satisfied that it is a valuable addition to our list of medicinal agents." deod&w

### MITCHELL FARM WAGONS.

The large number of Mitchell Farm Wagons being called for, is the best evidence of their great popularity.

### HARNESS.

I carry a full line of Heavy and Light Harness, all of which is fully warranted. L. B. MATTISON.

### PROGRESS.

Remember this is an age of progress and advancement, and the RICHMOND MOWER with its fast speed, improved cutter and strong drivers is now the leading Mower.

A. J. JOHNSON, Gen'l Ag't., Salt Lake City, Utah.

County Licenses, Applications and Bonds, for Sale at the "Deseret News Office."

### A VISIT TO VAN AUKEN'S.

A visit to Dr. Van Auker's pleasant place on Tenth East Street, and a glance at his facilities and skilful style explains at once the reason of his popularity. He does more business than any other dentist in the Territory, because he is thorough and reliable, and charges not more than one half the usual prices. He performs all kinds of dental work with a rapidity and care that are truly remarkable. Dental parlors only one block south of 11th Ward street car track. d s & w l.

### WOOD'S BINDERS.

A full car load of the Wood's celebrated Twine Binders, just received. Call at Mitchell Wagon Yard and see one in operation.

L. B. MATTISON, Agent.

If you want a Self-Rake Reaper or Dropper buy the Royce. It is the simplest, lightest and strongest, and will not annoy you by breakage. It is a better machine for less money than anything in the market. Sold by

A. J. JOHNSON, Gen'l Ag't., Salt Lake City, Utah.
