THIRTY YEARS' ORE IN SIGHT.

Interesting Description of the Great Homestake Mine of the Black Hills.

For an equal area the Black Hills possesses a greater number of mineral, in commercial quantities than any oth er district in the West, says a writer in an article in the Mining Reporter of Dakota's great gold district, Gold, silver, copper, lead, tin, marble, building stone, mineral paint, tungsten, mica, antimony, lithia ore and lithographi-stone, are all found and mined. For mining these products the Black Hills is well endowed with all natural ad, vantages-plenty of wood and water. close to inexhaustible coal fields. an

equable climate, good railroad facilities. close proximity to great markets for ores and supplies.

ores and supplies. The Homestake at Lead, is the largest mine in the district, and is one of the biggest in the world. The controlling interest in the Home-stake is owned by the Hearst estate and J. B. Haggin. The present prop-erty is a consolidation of the old Home-stake the Highland Dendwood Terre-American grangers due to reports there stake, the Highland, Deadwood-Terra, Calcdonia and De Smet mines. Since 1877 these consolidated mines have gaid \$14,000,000 in dividends. The Home stake has 900 stamps at work, treating from 3,000 to 3,500 tons per twenty-four irs, and yielding about \$14,000. total working charges are about \$10,000 per day, the mining and milling cost ing about \$3 per ton. Extensive cyanide works have recently been erected to work the mill tailings from 540 stamps. The vats hold 650 tons each and two ing and the gains in the leaders were practically wiped out in a few minutes, St. Paul saving only a fraction. Mis-souri Pacific, Louisville and New York Content for are emptied daily, giving a mill capacity of 1.200 tons per twenty-four hours. This is the largest cyanide mill in ex istence and it has been so successful that another mill is to be erected in a short time. Mr. C. W. Merrill designed and built this mill. No mine in the world has such ore reserves as the Homestake, there being not less than thirty years' supply of ore in sight, or about 30,000,000 tons,

Rich Samples from Beaver County.

Gill Peyton has returned from Beaver county with some fine samples of ore from the Milford Mining company's property near Frisco, recently organ-ized in this city. The ore was taken from the bottom of an 80-foot incline which has been lying idle for some time. The shaft has been cleaned out and the company intends sinking on the showing now found in the bottom of the shaft. The streak is not large, but it is said the ore will assay as high as 1,000 ounces silver. The company was organized with six claims, but ace its organization some eight or no more claims have been secured, a hich gives the company a very nice group. Assays were expected this af-

ternoon from samples brought to town. Location Notices Recorded.

Special Correspondence.

Provo, July 23 .- The following notices of location of petroleum claims have been filed for record by J. Sloan Johnson et al: Pyne Nos. I to 4: Johnson, Nos. 1 to 4; Forbes, Nos. 1 to 4; John-son, Nos. 1 to 4; Forbes, Nos. 1 to 4; Gales, Nos. 1 to 4; Maitland, Nos. 1 to 4, all situated in the left fork of White river, about six miles north of Soldier Summit, near the line between Utah and Wasatch counties,

MINING NOTES.

The May Day of Tintic reached the market today with 2 cars of ore.

The Grand Central of Tintle had 5 cars of one on the market today.

The Cabin Mining company of Alta had a car of ore on the market today.

The directors of the Sacramento will take action on the dividend on Thurs-

The Taylor-Brunton sampler reported 13 cars of ore from Tintic and 1 from Alta today.

R. J. Evans of this city has bonded

kets as nervous as were today's, and the close showed the bull position weakili be fully realized. In giving the news, whether as to mining or other and other showed the ball position weak-ened.
