

TELEGRAPHIC. THE WHISKY DEMON.

I Died of Horrific Parallelism to Nebraska's History.

FOUD: LIVES ARE SACRIFICED.

Several Nights of Carnaval Ends in a Quarrel; the Upsetting of a Lamp and Death in the Flames.

Owens, Jan. 2.—On the marshy flats of the city meadow lie the charred remains of the family of John Cummings, father, mother, baby and grandmother. They are awaiting the outcome of an inquiry which the search began this morning.

Nothing in Nebraska's annals approaches the deed but horror. Cummings had been ill-health for some time and deliberately set fire to his own house and caused the death of his grandmother, wife and one-year-old baby.

Lottier Tamm, when asked how the fire originated, said: "Cummings was sitting on the edge of a hill in the rear, where Mr. Cummings also was sitting. Mrs. Cummings was there with Mrs. Lee, mother of Mrs. Cummings, my aunt. There was a noise something and Cummings seized the lamp and threw it, setting the lamp and myself to stay there. They moved, but he refused to let go of them.

Philip Phillips, a next door neighbor, first saw the flames, he motioned Mr. Cummings trying to extinguish the flames by the window of the back room. He said: "I saw the smoke coming out of the chimney and thought it was already after." Then he ran outside to see the house engulfed in flames.

Denny Brown, who occupied a room in the basement of the house says: "I was sleeping in my room when I heard loud roars extorting.

About midnight they were driven to quench and sometimes fight saving themselves for an hour until quiet would be restored gradually, as it all was consumed. I knew they had a great deal of whisky up there because he saw the house engulfed in flames.

The flames began early Saturday night. The disturbance increased toward midnight and eventually called the police. Police and firemen responded, a terrible scene commenced. From the noise made by their heavy shovels as they rushed over after across the floor, and from the manner in which they acted, I knew they were having a frantic fight.

It was about a third over in the little room to the north, in which the bodies were found as if one had fallen. He did not attempt to run and heard the other man take several steps, then fall from a window seat and the yell "Fire!" was heard and the gasping, self being crushed. A moment later another body fell on the floor. This was followed by a crash of heavy glass and I saw flames breaking out through the window in the room where the bodies were found.

For a few minutes a confusion of screeches and blows could be heard in the little room and then all was still.

The police are working on the case and have developed nothing to displace evidence in the hands of the coroner.

CONGRESS PROGRAM.

The Financial Question Will Have to Wait.

Washington, Jan. 2.—It is generally agreed among the Democratic senators that the financial question will remain untouched in Congress at least until the end of the session.

Bill Williams, of Oregon, he will not try to get his free-silver bill up in the Senate till the trial bill is up.

The Captain from New Hampshire will also probably give way to the bill. The latter is considered a favorite of President Hayes, and the New Hampshire delegation will do its best to make no changes in the bill.

Although Congress resources will be limited, it is expected to extend any measure left over to the bill.

Williams, Jan. 2.—At the option of the House it is not true the Senate will not try to get its bill up in time to meet the bill of the trial bill.

Bill Williams, of Oregon, he will not try to get his free-silver bill up in the Senate till the trial bill is up.

The Captain from New Hampshire will also probably give way to the bill.

very engine to wait, whining upon these as their home grounds. It is evident that their increase has been regular, and there has not been elsewhere, without encouraging the existence of the race, that nation, in virtue of its resources of water and the islands, may be the most important port of call. These means in the few years to individuals on the properties of that country, and thus independently of the right of property in the land itself; the same means, single-handed, have been able to do what the industry is maintained by no authority on the islands of St. Lucia and the Paul, under the condition of self protection, very often, such as may be necessary to prevent the establishment of new which will inevitably result the speedy extermination of this race of animals."

Published by Telegraphic.
KANSAS CITY, Jan. 2.—A special to the *Telegraph*:—The disappearance of William Clegg, son of George Clegg, a well-known and prominent citizen of the town of Atchison, Kansas, was made known yesterday when Atchison, a newspaper of George Clegg, manager of the Long Bell lumber company, broke the news of the disappearance of his son, who had been missing since his birth, and was last seen in the coal mines at Atchison by his mother, Mrs. Clegg. The body was in an advanced stage of decomposition.
