

CAMP

MINING, BUSINESS AND STOCKS.

IMPRESSED WITH GREATNESS OF ELY

Mr. Bernheimer Favors Railroad Connection With Salt Lake City.

The enthusiasm of the Bernheimer party in favor of the Ely mining district as the result of their recent visit to some of the properties, has led to more railroad talk, which may materialize in the near future in a new road that will connect Salt Lake with Ely and Goldfield. Mr. Bernheimer has declared himself in favor of the project, and engineers are now said to be in the field investigating the feasibility of the proposed road. Data is also being gathered relative to the resources of the country through which the line would pass. Mr. Bernheimer has visited a great deal of the country and a number of the camps, and he expresses himself very hopefully regarding their permanency.

"I have received very favorable impressions of conditions throughout the state, and I have the greatest faith in the future of most of the camps," he has visited," said Mr. Bernheimer. "There is a great country lying between your city and Goldfield, that will be tributary to Ely when a railroad is completed between the two points. The Nevada Smelting & Mining corporation owns the Tybo mine, which promises to be one of the big mines of the state and furnish a large tonnage for a railroad. At Goldfield, the Southwest mine is a good property, owned by the same corporation. Under present conditions these properties cannot be operated advantageously. Along the proposed line of the railroad are many good prospects that will become mines when facilities are provided for transporting the ores to market. What Nevada needs is not more mines, but the means of opening up the local market for the ore already has and, to accomplish this, railroads must be built.

"While I do not say the road will be built, I believe that such a road would be of incalculable value to the state and, if everything is favorable, we may build the road from Goldfield, or a point near there on the Tonopah and Tidewater, to Salt Lake, by way of the route we have been over, and through the Deep Creek district."

GRAND CENTRAL THE FEATURE

Price Remains Firm in Spite of Heavy Offering—Iron Blossom Weaker. Grand Central was the star performer on the mining exchange this morning. The stock was not the sensational advance recorded on Saturday, when the news of the strike on the 2,100 level reached town. The sales were very heavy this morning, over 12,000 shares changing hands during the session, representing a selling value of approximately \$35,000. In spite of the large offering the market was strong, and the stock advanced from \$2.75 at the opening to \$2.90 buyer 60. At the close the stock was firm at \$2.85, 200 shares selling at that price on the open board. Noting further change was learned regarding the value of the strike, and while it is assumed by many that the Centennial Bunka vein has been intercepted, it will take time to demonstrate this. In the meantime it is not expected that the stock will weaken very much.

Iron Blossom was also conspicuous on the board this morning though the price weakened to \$1.35, at which price 4,800 shares were sold. At the close it stood around that figure. Ohio sold at \$4.50 and Colorado let go 100 at \$1.37 1/2, though it sold at \$2 on the open board. Tintic Central was in good demand at 13. Prince Con. sold at \$1.25, and a few hundred shares of the International Petroleum and Oil company's stock sold at 56 and 57. Following are the closing quotations:

CONTACT STRUCK AT BLACK ROCK

Samples Brought to Town Today Show High Values in Copper.

Walter James came up from Beaver county this morning with the looking samples of ore taken from the strike just made in the property of the Black Rock Mining company, in that county. The strike was made in a drift from the shaft at a depth of 140 feet, and the rock shows a heavy percentage of iron in addition to good values in copper, with some silver and gold. Some of the samples show as high as 40 per cent copper, with 32.40 gold and 18 ounces silver per ton. Mr. James is much pleased with the conditions at the property, and he regards the strike as being indicative of still better things ahead. Indications are that the vein which is about 4 feet wide, will be a contact vein, and as it shows for over half a mile on the surface, Mr. James is very sanguine about the development of a mine at the Black Rock in the course of time.

THIRTY-FIVE PER CENT COPPER

Reports from Beaver county are to the effect that the change encountered recently in the 350 foot shaft now being sunk on the property of the Cupric Mining company, formerly the Vein of the Washington mine, is improving with depth. Bunches of ore carrying as high as 35 per cent copper are now being encountered, and the management would not be surprised to hear that the shaft has intercepted the vein. Conditions during the last 40 feet seem to indicate that the vein is not far away.

A. I. Harrison of New York, is president of the company. A number of Salt Lake people are also interested with him and other New Yorkers in the property, which is located about a mile south of Newhouse in Beaver county.

ORE STRUCK IN THE NEBO MINE

(Special Correspondence.) PROVO, Aug. 8.—Some fine ore has been brought to Provo from the Nebo mine, situated a few miles southeast of Santaquin. The property is owned by the Big Nebo Mining company, and some of the heavy stockholders are W. E. Giles, Harry Cliff and A. L. Booth. Extensive development work is being done and the prospects are good for opening up a big mine. Ore has been struck in three tunnels in the property.
