

require his ministrations in the fulfillment of the divinely ordained purpose of her creation.

Another and a truly lamentable point we must notice. Mrs. F. also rests her hopes of the extinguishment of this development upon the fact that "this is not a marrying century," that "every year statistics show a decrease in the number of marriages." She says the "Mormon" doctrine "must be purged of it, mainly because the tendencies of the age are opposed to marriages." This is a sad confession. But we will reason, upon the same fact, in a direction exactly opposite to that in which Mrs. F. does, and we, though perhaps rather ungallantly, think in the direction of more beneficent results. Now if the tendencies of the age are opposed to marriage, the more abundant reason why the "Mormons," or some other philanthropic people, should be greatly given to marriage, in order to maintain a healthy equilibrium in social matters, otherwise lust and debauchery will undoubtedly run riot, the earth will groan under the infamous humiliations inflicted upon the daughters of the land, and the whole earth will be smitten with a curse. That is how we should reason upon the non-conubial tendencies of the times, and we should be sure to have all the women on our side when they properly understood us. Professed celibacy, such as it is, extravagance, Grecian bends, chignons, point-lace, and diamonds are poor, yes, worthless things to put in the scale against the heaven-ordained institution of marriage, and the generation that does this is about ready for the burning. If these are the best arguments against marriage, even plural marriage, why let it go on, and continue to go on till doomsday.

Now in all that we have said, we have entertained not an iota of bitterness. We have given some of our views upon important matters, freely, frankly, and with good intent. Mrs. F., manifestly, has done the same in her article, and she will accept our thanks for the temperate strain in which she has written, for although we may not see eye to eye, at present, upon these interesting particulars, that is no reason why we should not recognize the good we may be enabled to discover in our respective presentations of our individual reflections. The topic of these articles is one which is of infinite importance to all men and women, and cannot be ignored with impunity when it comes fairly before them.

[SPECIAL TO THE DESERET NEWS.]

By Telegraph.

GENERAL.

NEW YORK.—Foreign advices report the Pope as having recently spoken as follows, concerning the course of the Prussian government toward the German Catholics: "I had expected that the German Catholics would be treated with greater justice. I do not conceal from you that I hoped so able a diplomatist as Prince Bismarck would not have provoked discord in the new empire. All the wars that are undertaken against the church are always converted to her ultimate gain. They have always re-inforced her, and have made her members more compact, having fortified them in their faith."

A special dispatch, from St. John's, N. F., announces the return there, from Greenland, of the U. S. ship *Congress*, she having made a voyage of 2,500 miles, to Disco, latitude seventy degrees in less than thirteen running days. The *Congress* left St. John's August 3d, and anchored at Disco on the 10th. On the trip she passed hundreds of immense icebergs, but encountered no packed ice. The season is very open, not unlike May in New York. In the advance trip daybreak was perpetual. The sun sunk below the horizon but for a short time, and twilight was sufficient to read by all night. The displays of aurora borealis were extremely grand, meteoric lights assuming magnificent arches, columns, scrolls and spiral stairways. The *Polaris*, with Captain Hall's party, was found at Disco, in good spirits, and hopeful of their enterprise. A regular summer was found at Greenland. Flowers were blooming, brooklets flowing, birds singing and babies rolling on the grass. In going to a big glacier the perspiration rolled off like rain drops. A most cheerful reception to the party was accorded by the Danish authorities.

LOS ANGELES, 28.—The following has just been received from Los Flores: 8:20 p.m. The rebel chief Alegario has persuaded the Coguilas to join him in an

attack upon the settlement of San Luis Rey. The settlers are responding to the call of Col. C. J. Coutts, and will join the command of Col. Brown to-night. Father Ubach, of San Diego, has returned and reports that all attempts, on his part, to bring about a peace, have been frustrated by Alegario. There is great excitement in the vicinity of San Luis Rey, there being fears of a general uprising, and a general Indian war.

NEVADA, Cal., 28.—Albert McCauley, while descending a well to sink it deeper, was overcome with foul air, and when taken out life was extinct.

EMIGRANT GAP, 28.—A fire has been raging in the woods since Saturday, and has burned a mile and a half on each side of railroad. The houses at the station were saved by the arrival of a fire train. The fire is still raging.

PORTLAND, 28.—Last night two men, named Daley and Carter, had been indulging quite freely at East Portland, when a man, named Schortan, endeavored to induce the latter to go home. Daley objected and, shortly after, Schortan went to a hotel and died in a few seconds. He was found stabbed in several places. Daley claims he knows nothing of the murder.

NEW YORK, 29.—The Russian *Official Journal* publishes the report of Prince Gortschakoff to the Czar, with reference to his interview with the delegates of the evangelical alliance, in which he says he informed the deputation that the question of freedom of conscience was one pertaining to the government of Russia, and one which that government desired to maintain. He declared that compliance with some of their requests involved an abrogation of some of the laws of the empire, and in that matter no foreign intervention whatever was permitted. Although he observed no sign of irritation among the members, it was evident a recognition of their complete want of success was visible.

The steamer *Wilmington*, from Galveston, picked up on the 26th, in latitude 26.24, longitude 79.51, a boat containing Francis Munte, 1st mate, Minard Simmons, 2nd mate, and Lewis Schlader, seaman, belonging to the bark *Linda*, of Philadelphia, from New York, bound for New Orleans, which foundered in a hurricane on the 25th. A boat containing Capt. Smith, the steward and four seamen, left the bark and was in company with the boat containing the mate until dark in the night of the 25th, when they got separated. Both boats were to steer north west for the Florida coast. After taking on board the mates, the *Wilmington* searched in different directions for the boat containing Captain Smith and crew, but without success.

The movement among the Democrats to cut loose from the leaders of Tammany Hall, seems to be steadily gaining strength, and there is a prospect that at the coming fall election many members of the "ring" will be thrown overboard. The time for holding the Democratic State Convention is not yet announced, nor is it definitely known whether two Democratic delegations will be made up from this city. The movement among the German Democrats is serious, and seems to have the sympathy and will perhaps secure the support of the Manhattan club faction of this city. But the *Tribune* thinks that the ties which bind the party to the "ring" are too strong to be easily broken; and further that even the sacrifice of Hall, Tweed and Connolly would not purify the New York Democracy or give an honest government.

A newspaper reporter has been informed by Oswald Ottendorfer, editor of the German *Staats Zeitung*, that the Germans will take legal measures in the premises if frauds on the city treasury are established. Ottendorfer said he had an interview with Governor Hoffman at Albany, on the 1st of August, and Hoffman told him he had had no communication with the Tammany leaders since the 12th of July.

Chief of police McWilliams, last evening, received a dispatch from West Troy, announcing the discovery of McGhee, one of the partners, as believed, in firing the buildings on Washington street, Jersey City, whose body was supposed to have been found in the ruins.

The body of a young woman, found in a trunk at the Hudson river depot, has been recognized as that of a girl who boarded in a house on the corner of Wooster and Bleeker streets. A little search has resulted in the discovery that a sister of the deceased lived in Brooklyn, and had visited the dead girl. From the description given by the carman it was established that she was the woman who hired a coupe and took the fatal trunk to the depot. Off-

icers were immediately dispatched to Brooklyn, but the woman had flown.

MOBILE, 29.—A submarine diver of Mobile has explored the sunken wreck of the *Ocean Wave*, but failed to discover any bodies. He reports the boat terribly shattered by the explosion. The casualties are fifty-five killed and thirty-nine wounded. Many persons believed to have been on the boat at the time are still missing. Three more of the wounded died this afternoon.

BOSTON, 29.—Several persons wounded in the late R. R. disaster exhibit unfavorable symptoms to-day. Edward Williams, of Lynn, aged 23, was badly scalded and it is thought cannot survive. Frederick Browning and J. B. Bettis, both of Lynn, are in a critical condition. Jefferson Rowe, baggage master of the Pullman train, who remained at his post, lies at the City Hospital in a precarious condition. His right arm was amputated yesterday, and to-day his left leg will be taken off. He is injured internally and received severe bruises about the face, and his recovery is extremely doubtful. The number of deaths has reached thirty-two.

SAN FRANCISCO, 29.—B. C. Whiting, Indian agent for California, leaves for the locality of the Indian troubles in Southern California, by the steamer on Thursday.

The total proceeds of the sales of the Yerba Buena Plaza lots, is \$952,500.

It is now pretty generally conceded that George Critcher, the missing curbstone broker, has gone to the springs. Various stock brokers are done through him to the aggregate of over \$50,000. It is supposed that the money was lost on the street in stock operations.

Geo. McClackey, alias "Carlisle," the Barbary coast ranger, who stabbed and killed a soldier and nearly killed a saloon-keeper two weeks since, was to-day arrested for murder, and assault to murder, and will be examined on Friday.

Wm. Eagan was brought up from this city front by the harbor police for shooting a man, not fatally, this morning.

Fourteen star actors from China are expected here on the steamer *Alaska* this week, and the "Celestial" theatre goers are excited over the expected treat.

Every purchaser of lots of the sale yesterday, made his first payment of twenty-five per cent. to-day, so that the commissioners will have none to resell. This shows that the confidence of the public in San Francisco real estate is unabated.

There is likely to be trouble about the new city hall. The act creating the commission, under which the lots were sold, provides that the funds for the new hall must come from the sale of the lots, and interest, no other source of supply being provided; and the lowest estimate for the hall is \$1,500,000, while no one believes it can be finished for less than \$2,000,000, if for that. The amount received for the sale of lots will not half build it, after paying salaries and other expenses; and some parties threaten to adjourn the commission should they go on with the building running the city in debt.

The increase of names on the poll lists this year, over last, is 3,010. The larger portion of these is believed to be owing to the fact that the names of deceased parties and those who have moved away have never been stricken off. The actual voting population of San Francisco is probably not larger than a year ago.

The driver of the Russ House carriage climbed on board the steamer *Constantine*, from Portland, to-day, the moment she landed at the wharf. He was ordered off by a sailor, under the direction of the captain. An altercation ensuing, the sailor seized a hand-spike and struck him a blow on the head, laying open his scalp to the skull and dangerously injuring him. The affair created much excitement at the wharf.

Stocks, with the exception of Chol-lar, are strong. McDonald & Whitney have not yet returned to the board.

NEW YORK, 30.—In the estimate furnished by the morning papers of the cost of carpet for the new Court House throughout, by one of the first houses of the city, the sum of \$13,357,015 is set down as the amount which would be necessary to cover that expense. The amount actually charged to the city is \$35,018,46.

The *Times*, this morning, thinks that it is Governor Hoffman's duty to institute proceedings against the men who have stolen money out of the city treasury. It fears that the present dis-

trict attorneys are too intimately connected with the "ring" to act in the premises, except upon compulsion. This is the only way Governor Hoffman can disprove the insinuations that he has aided in the schemes of the "ring," and, at the same time vindicate his reputation.

The body of a victim of Dr. Rosin-sewin, the abortionist, was recognized last evening, as the doctor's own niece. It is declared that the doctor effected her ruin on her arrival here, about one year ago, and has since caused her to live an abandoned life.

CHARLESTON, 29.—A few new cases of fever are reported, and three of the cases previously reported have terminated fatally since yesterday. A large number of unacclimated persons have left the city. Opinions are still divided as to the probability of the disease assuming the proportions of an epidemic.

SHELL CREEK, 29.—Murths and McEvery, two of the pursuers of Robert Hamilton, who robbed a man of \$4,000 at Eureka, and for whom a reward of \$1,000 was offered, came upon him below here. When within a few feet Murtha leveled a shot gun and commanded him to throw up his hands, when he drew a six shooter and Murtha snapped his gun, but the cap failed to explode. Hamilton shot at him, wounding his horse, and Hamilton then escaped. A number of deputies are in pursuit and it seems impossible for him to escape.

PELATUMA, 29.—Jas. Garrity, a laborer, was run over by the morning train for Santa Rosa and died soon after. He was horribly mangled.

PORTLAND, Oregon, 29.—Woods on the hill at the back of the city last evening presented a brilliant spectacle, being almost a solid mass of flames. A large amount of cord wood is consumed, and several wood choppers, residing on the hills, barely escaped the fire, losing everything.

VIRGINIA, Nev., 29.—Geo. Boyle, charged with committing a rape on an old German woman, had an examination, and was held to answer in the sum of \$10,000. In default of bail he was sent to the county jail to await the action of the grand jury.

LOS ANGELES, 29.—The following is the latest from San Flores Pala Mission, with regard to Indian matters: The citizens in and about San Luis Rey met and organized with a body of militia and made all preparation to defend their homes against an attack of Ollagerio and Nisallies, having received authentic information that Ollagerio, assisted by Coquillos, had planned the destruction of that place that evening. There was no attack, however, and no intelligence has been received from the Pala Mission or the headquarters of Capt. Brown respecting the movements of either party.

CHARLESTON, 30.—Three new cases of yellow fever are announced to-day. The official mortuary report of last week shows six deaths from yellow fever.

BOSTON, 30.—The coroner's inquest on the victims of the Eastern railroad disaster was continued to-day. C. J. Converse, engineer of the accommodation train which was run into, was the main witness. His evidence went to show that he used all ordinary precautions. Brown, the engineer of the Pullman train, which ran into the accommodation, will be examined to-morrow.

A German advertiser once handed in the following "want" written in German characters: "Wandert, a kind wumun to tak here of a littel Schield for Reinbul Wirtscheb (compensation) or else gut pibel (good people) wat want to take de bebi for der own Schield."

France has been dismembered in defiance of scores of treaties, and will make an effort to resume her own in spite of all engagements to the contrary. Germany and Russia are no better off. Diplomacy among despotic nations is the essence of falsehood. The faith is always punie, and cannot be trusted a moment longer than it is for the interest of the parties not to violate their contracts.—*Chicago Post*.

DEATHS.

Of typhoid fever, at a quarter past 3 o'clock this morning, GEORGE W. SNYDER, son of George G. Snyder, aged 20 years, 8 months and 14 days.

In Sugar House Ward, Aug. 28, aged 22 years, 3 months and 7 days, SARINA HELENA NEILSON, wife of Professor G. A. F. Sichel.

At Levan, Juab Co., August 23, 1871, of teething, LIZZY CLARA, daughter of John W. and Elizabeth J. Shepherd, aged 1 year, 3 months and 9 days.

At Farmington, of diphtheria and diarrhoea, Aug. 17, 1871, WILLIAM E., son of Thomas and Anrella Rogers, aged 2 months, 12 weeks and 3 days.
