AGRICULTURE, ETC.

Washington, 12.—The Department of Agriculture reports for November that the return of the rate of the yield of corn indicates a product somewhat in excess of eighteen hundred million bushels, or an average rate of a small fraction above 26 bushels per acre. The best yields are, as in 1883, in what has been designated as the great American desert. The "arid regions" in the vicinity of the hundredth meridian have produced heavy crops of maize of high quality. That line of longitude has ceased to be an absolute barrier to corn production or general farming, the rate of yield in Nebraska being 38.5, in Kansas 38, in Iowa 35, in Missouri 34, in Minnesota 33.5, in Ohio 31, in Illinois 30, in Indiana 29, in Michigan 27, in Wisconsin 24, in Kentucky 23. Pacific Coast returns yield 35 bushels in Washington, in California 30, and in Oregon 28. The Southern States report a yield of 22 bushels in Maryland, 20 in Tennessee, 19 in Arkansas, 16 in Visconsin 15 in Tevase, 13 in Mississipport Oregon 28. The Southern States report a yield of 22 bushels in Maryland, 20 in Tennessee, 19 in Arkansas, 18 in Virginia, 15 in Texas, 13 in Mississippi and Alabama, 12.3 in Louisiana, 11 in Georgia, and less in other States. The New England average is nearly 32 bushels. The commission goes to Mexicot be the commission and present their views. From San Francisco to meet the commission and present their views. Washington, 12.—Dr. D. E. Salmon, chief of the Bureau of animal industry, has submitted to the commisioner of agriculture a roluminous report upon the contagious diseases of animals; the report being the result of experiments and investigation made by the veterinary division. Considerable space is given to a detailed history of the recent outbreak among cattle in Kansas and to a description of its symptoms. Dr. Salmon reaches the conclusion that the disease was ergotism, due to eating the fungus known as ergot. Upon the treatment and prevention of this disease he says: "When the first signs of the disorder uppear, the most important point to be attended to is to make a complete change of food, and to see that it is of good quality, nutritous and free from any of the contained in the digestive organs, and to follow this with soft food, such in mashes and oats. In the most Cattle Poisoned by Eating Evgot

ness is first noticed they will be greatly benefitted by removing the cause and placing the animals under conditions is vorable for resisting the poison.

A very important condition is warmth. Even when animals are fed large quantities of ergot they seldom suffer except in cold weather, and consequently in attempting to check

Bob, his dresser is not with him. He said to-day that he intended leaving for Yew York to-night, and would then go to Pittsburg to play an engagement next week. His friends have closely watched him since his arrival here, and are giving him proper care. He wanders around aimlessly and has no apparent object but to resume his engagement. He professed to be shocked when he learned his company was not here, as he said he intended resuring acting this week at the Olympic. On many subjects, however, his mind is apparently unclouded.

John McCullough did not start East to-night but is spending his time quietly at the Southern Hotel under the watchful care of friends. He seems to be quite rational on all subjects except acting, and insists that he intends to meet his engagements for the season.

CHICAGO, 12.—The commission appointed at the recent session of Congress to ascertain and report on the best methods of promoting trade between the United States and Central and South America, having completed their work in the Eastern States, will leave Chicago to-morrow for San Francisco, where they will hold a series of conferences with the business men of that city with the view of ascerof conferences with the business men of that city, with the view of ascertaining their opinions as to what this government can do towards securing a market for our sarphus products in Central and South America. The commission consists of Gen. George H. Sharpe of New York, Ex-Gen. Thos. C. Reynolds of Missouri, and Judge Iden P. Thatcher of Kansas. Wm. Curtis of the Chicago Inter-Ocean, secretary of the commission, expects to reach San Francisco by the 21st inst., and to commence their sessions on Saturday the 22d. Invitations will be issued to the business men of San Francisco to meet the commission and present their views. From San Francisco to be present at the inauguration of President-elect Diaz.

Detroit, 12.—Forty-three of the 80 counties in Michigan report on official count Blaine pluralities of 13,353 and Fusion piuralities of 5,370. The remaining counties are evenly divided between Fusionists and Republicans. The piurality given in the figures so far reported will be cut down to between 4,000 and 5,000. The Congressional delegation stands seven Fusion to one Republican.

The following is the official vote of Mississippl: Cleveland, 78,457; Blaine, 42,774; St. John, 500: Butler, 69.

Concord, N. H., 12.—Official returns received by the Secretary of State give the following as the result of the vote in this State: Blaine 43,166, Cleveland 39,168, St. John 1,573, Butler 552; aggregate vote, 84,457: Blaine's plurality, 4,000; Blaine's majority, 1,875. Currier, republican, for governor, had a majority over all of 498.

ALEXANDRIA, Va., 11.—The all-day celebration of democrats in this city, in honor of the election of Cleveland and Hendricks, was the grandest affair of the kind ever seen here. The procession was immense. After the procession 5,000 people were fed at a barbecue. To-night the city is illuminated and a very large torchlight procession is parading the streets. Speeches were made by Gens. Rosecrans and Fitz Lee, J. J. Barbour, R. T. Merrick and others.

as largely as the United States and would also enable Canada to compete with America in sugar refining and other manufactures by obtaining a cheap and plentiful supply of raw material. There is nothing to prevent a mutually advantageous trade with the West Indies. It rests with the Canadians themselves whether to allow America a monopoly of the West India

trade or not. Army and Navy Estimates. LONDON, 12.—The government has issued the deficiency estimates with reference to the cost of the Nile expedition. The army will require £1,000,000 more than previously estimated, and the navy £324,000. For the Bechuana expedition the government estimates that £675,000 will be required by the army and £50,000 by the navy.

Khartoum Safe.

The Daily News stales that Messrs. Monoulides, Greek merchants, have received advices from their partner, the Greek consul at Khartoum, that the city is safe, though there have been plenty of deserters from Gordon's regular force.

Alexandria, 12. — The government clerk from Khartoum says that Gordon frequently attacked the Mahdi's forces, causing fearful havoc among them. The Mahdi ordered his troops not to kill Gen. Gordon, but to take him prisoner and hold him as hostage for the surrender of Arabi Bey.

certificates will be opened in the presence of the Senate and House of Representatives and counted on the second Wednesday in Februa y Tree total number of electoral votes is 401. The caudidate for President receiving the majority of these—that is, 201—will be declared President. If no person has such majority, then the election goes into the House of Representatives, which is required to choose a President from the persons—not exceeding three—who have received the most electoral votes for President. In the House the vote is by States, each State having one vote.—Ex.

A Remarkable Mirage.

Just before the rain on Sunday, Oct. 12th, when the clouds hung low on the Sierra Madre, and the air was heavily charged with vapor, there was a rare sight in Crescent, Canada. The Sierras were hidden from view and the upper side of La Canada, by the refraction of light, seemed lifted up about 6,000 feet, occupying the topmost height of the mountains. The ranch of Col. T.S. Hall was most conspicuously exalted. His eucalyptus trees appeared to he in the very skies, while his neighbors along the upper mesa were also elevatthe very skies, while his neighbors along the upper mesa were also elevated to a strange, weird, and fantastic height. The spectacle continued for nearly two hours, when it slowly faded away, and the landscape settled down again apparently about 6,000 feet to its normal condition. The sight was rare and of absorbing interest to all who beheld it. It was not often that the refraction of light is so intense in its manifestation as in this case, and the occasion is deserving of more than a passing notice. In a horizontal distance of two and one-half miles there was a munifested elevation of more than a mile. To one familiar with the features of the country the sight was especially interesting. — Los Angeles (Cal.) Herald.

The Alcohol Question. Why do doctors ever prescribe alcoholic stimulants? They say there is
strength in them. This is all a mistake. Such things may bolster patients
up for a little while, but leave them
worse when the temporary stimulus
subsides. If people keep on taking
alcoholic stimulants, it means drunkenness and ruin. Remember that
