

comp. condag Mr. Garrett sold his strike, Monday Mr. Garrett sold his strike, consisting of four claims, for \$16,000 cash and a large number of shares of stock in a company to be organized on the property. The purchasers are S. H. Barbee, formorely of Seattle, but who now has large interests in Builfrog and lee districts, and Messars. Woods and stone, wealtly mining men of Satt Lake Tity. A strong company will be organized at once, and extensive devel-opment work will be done on the prop-cety, and later a mill will be ergeted. A number of claims have been taken up adjoining the stirke by Robert At-kinson, J. L. Coryell, Fred Bowler and Jack Fairchild, all of Johnale, who will thoroughly prospect their ground, and no doubt other rich finds will be repor-ted in the near future.

6

TO OPERATE IN TENABO.

Local Men Plan Extensive Develop-

ment in Bullion District, Nev. Standard claim of the Gold Quartz property. A crew was put to work at once on this lease. The new property consists of three claims with six solendid ledges mak-ing through them. Development has already been started on one or two of these ledges and the bottom of a shaft being sunk on one is in ore going 7.7 ounces gold per ton. The S andard lease is developing a copper ledge go-ing 6 per cent couper; 40 ounces in sil-ver and with 2 to 14 ounces gold per ton. The company's new property is next to the Gola Quartz, the general holdings being about a mile from the camp of Tenabet. Alex. Colbath has been selected as manager of the com-pany's property and C. S. Varian, Jr., has been manaed as superintendent. pany's property and C. S. Varian, has been named as superintendent.

Stable from Mr. Addicks' article fol-low: The property at Chronic, N. J., form-erly known as the DeLamar refinery, is now owned by the United States Metals Refining company, which is a subsidiary company controlled by the United States Smelting, Refining and Mining company. It forms the cop-per-refining link in the metallurgical chain operated by the parent company. Since the change of control two years ago the refinery has been brought up to 200 tons a day capacity, and a com-plete copper-smelting plant with blast furnaces and converters has been ad-ded, arranged for rapid expansion into a still larger unit, if found desirable. The entire plant as it stands today represents the most, modern practike. Shipments can be received by rail, by lighter or directly by steamer, a large steamship dock having been erected in connection with the smelter. Cuprifer-ous material of every nature from leau ore to buillon is received. A three-track trestle with an or-bin capacity of about \$,000 tons affords ample stor-age for properly distributing the dif-ferent ores to as nearly as possible a self-fuxing mixture, it being the in-tention to bed the ores as is commonly done in lead practise.

lone in lead practise.

OUTLOOK IS BRIGHT.

Mining Situation is in Good Shape and Grows Better Steadily.

(Special to "the "News.")

Denver, Colo. May 30.—The relations existing between the mining industry and the other great branches of in-dustrial activity are receiving consid-erable attention here among mining ment in Bullion District, Nev. After serveral weekst preparations the Grand Victor of Nevnda Mining comparation and is now ready to oper-ate on an extensive scale at Tensho. Bullion district, Lander county, Ne-vada. The company is composed of local men. Joint T. Hodson is presi-are directors and constitute the board with the following men: Solon Spiro. W. J. Craig, W. H. Dickson and T. R. Jones. The company is capitalized at the observe state of the mething companies with the new company had then attention called to one of two propositions in the Bullion district and trips were made to camp to look over these. About two weeks ago a lease was taken on the Standard claim of the Gold Quarts property. A crew was put to work at one on this lease. The new property consists of three data states date and the statention at ence on this lease. The new property consists of three standard claim of the Gold Quarts property. A crew was put to work at heady been statted on one or two propositions in the standard claim of the Gold Quarts property. ers, who have seized the present oppor-tunity to advance their interests as against the big packers. The Lockhart steers sold at \$5.65 today, highest price they have yet reached, and bulk of fed steers are selling at \$5.00 to \$5.65; year-lings up to \$5.70 heifers \$4.00 to \$5.25, cows \$3.50 to \$4.65; bulk \$3.40 to \$4.65, calves \$4 to \$6, stockers, \$3.60 to \$4.75, feders \$4.25 to \$5.

feeders \$4.25 to \$5. Mutton supply is small, 23,000 last week and only 6,000 here today. The market advanced 10 to 20 cents last week, and is strong today. Mosi of the supply is ellipped lambs today, selling at \$7.25 to \$7.60, with a small number of goats at \$4.25. Wooled lambs are worth up to \$8.65 and ewes \$6.85, but supplies of these classes will be limited from up to \$3.55 and eves \$5.55, but supplies of these classes will be limited from now on. Clipped yearlings and wethers are worth around \$6.25, ewes \$5.75 for fed stock. Clipped Arizona yearlings sold at \$7.10, and sheep at \$5.75 late last week, clipped Texas wethers \$5.45 to \$5.75, goats \$4 to \$4.25.

LOCAL MARKET REPORT.

This is not a very lively day in the local markets which elosed up towards moon, on account of its being Decoratiou day. However, there were a number of early morning receipts of conse-quence, including three cars of oranges, two of bananas, one of lemons, one of Idako spuds, one of Winningstead cab-bages from southern California, with miscellaneous shipments of vegetables from out in the state, and from the south. Hood river, strawberries are ar-riving in good shope, also Utah berries, the latter bringing 30 cents. Cherries are not so plentiful, but in a few days, other varieties will be ripening, and

other varieties will be ripening, and then there will be more. Texas is send-ing in more cucumbers, tomatoes and beans; Cuba is sending pine apples. Poulity is getting more and more scarce. There is a fair supply of shad at present, also of shad roc; but the rapidly increasing demand for this

rapidly increasing demand for this toothsome fish has so includ the activ-ity of fishermen that the shad is threat-ened with eventual extermination. The spawn or roe of the shad spoils if the eggs are laid in sea water, so the fish

IRON KING.

C. E. Loose is President and Reed Smoot, Vice President.

(Special to the "News.")

(Special to the "News.") Provo, May 30.—The Iron King Con-solidated Mining company has filed ar-ticles of incorporation with the country clerk. The company will conduct a general mining business with head-quarters in Provo. The capital stock is \$1,000,000, in shares of the par value of \$1 each. Three hundred and seven-ty thousand shares are set aside as treasury stock. The property of the company is located in East Tintic and consists of Nos. I and Iron Placer mining claims of 160 acres each—the Noon iron mines –and of the Golden Charlot group of four claims. The directors and offi-cers of the company are: C. E. Loose, president: Reed Smoot, vice president; O, J. Salisbury, A. A. Noon and Frank Knox, C. E. Loose, is the manager and J. T. Farrer, secretary and treasurer.

Knox, C. E. Loose is the manager and J. T. Farrer, secretary and treasurer. A vigorous campaign of development will be inaugurated. It is accepted by mining men generally as a fact that the great bodies of iron ore cover large deposits of precious minerals, which the big company will go after.

OGDEN BUCKHORN MINING CO.

High grade supplied copper ore is now being encountered in the tunnel on the property of the Ogden Buckhern Mining company, which is operating its mines in Cold Water canyon, just east of Ogden.

Ogden. The tunnel was opened 260 feet. At a depth of 225 feet from the surface, the rich ore was struck. A cross cut on the vein was made showing it to be 17 feet wide from foot wall to hanging wall, with more or less good values all the way and part of the vein is very rich, assaying as high as 34 per cent copper and carrying \$2 gold and nine ounces of silver.

sliver. A stope was made toward the surface and good ore taken out, also a winze trans sunk on the ore and the high grade followed all the way. The tunnel has also been run along the hanging wall side of the yein for 50 feet farther into the hill and unother cross cut run at this place shows the ore churs to con-tinue, for the same clars of ore is be-ing extracted from this cross cut. Very negatic development work has been prosecuted for the past two months and several thousand rons of fine concentrating ore is blocked out and high grade ore sacked up. The mangare, Mr. F. L. Woods, assists ed by Mr. Paul C. Burlinck in charge of the work and a min of ability and experience in mining, has just complet-thought to have left the city.

ed a careful sampling of the ore faces | thought to have left the city.

REPORTS ON JUPITER.

Idaho City Territory Regarded as Promising Field for Quartz Mining.

Promising Field for Quartz Mining. Idaho City, Idaho, May 30.—Mili-ing Eugineer W. C. Austin of Boise has issued a report of his recent ex-amination of the Jupiter mountain gold claims a short distance from this place; and some interesting facts are brought out. The report notes a sys-tom of eruptive dikes extending along the mountain for a nolle and a haft, and heavily mineralized, as indicated by the quartz deposits. The quartz yoins comprise a mineralized zone of some 1,200 feet in width, and pros-tect work has proven up one of the vents to a vertical depth of 175 feet. One samples taken through five feet in width across the vein showed values of \$5.67 per ton. The significance of the source statements lies in the fact that the Jupiter mountain quartz ledges are now recognized by the most com-potent authorities as the source of the placer gold which has enriched the Bajac basin to the extent of over \$100,000,000. These quartz ledges have yielded some very high assays, running all the way from \$4 to \$2,000 to the ton in gold, and are regarded as a promising field for quartz mining operations. merations.
