This New Family Machine is now capable of a ringe and variety of work such as was only recently thought impossible to perform by machinery. We claim and can show that it is the cheapest, most beautiful, delicately arressed, and amouthly running of all the Family Sewing Machines, it is remarkable not only for the range and variety of its sewing, but also for the variety and different kinds of texture which it will sew with equal facility and perfection, using silk twist, lines or cotten thread, fine or course, making the interlocked-elastic-stitch, alike on both sides of the fabric sewn: the only stitch which is universativ approved, or is at all adapted to first-class work. Thus, beaver cloth, or leather may be sewn with great strength and uniformity of stitch, and, in a moment this willing and never-wearying instrument may be adjusted for fine work on gauge or goestmer tissue, or the tucking of tariatan, or ruffling, or almost any other work—even by a claid—which delicate fingers have been known to perform. I suppose men have their weak points and I know women have theirs. This is an age of jewelry. Take the first women you meet. If rich, they are loaded with expensive exponents of the artificer's skill. Diamonds in their ears, lockets on their breasts chains about their necks, watches in their waistbands, rings on their fingers, filligree what d'ye-call'ems on their heads, and gold bands on their arms. There isn't a point of a woman's entire physique on which an ornament can be placed which is not utilized by our friends in the jewelry line. If poor, they go the same length, the only difference being in the cost. It's a wonder to me where the money comes from. STEVENSON & REID Glass, Etc., Eic.
