Supervisors of the State Fair-No 4.

TODAY AND TOMORROW BEST PIANO BARGAINS

WILL BE CLOSED OUT

5

At Clayton-Daynes Music Co.'s Great Record-Breaking Sale of Highest grade makes. Nothing like it will ever Happen Again in Salt Lake.

ANOTHER CUT IN PRICES

Cost or Former Prices Will Not Deter Us in Closing Out Every Remaining Piano by 9:30 T omorrow Night. The sale Tags Plainly Tells t he Tale of the Awful Sacrifice in Prices.

This is the Last Call, Your Last Chance. Act Quickly if You Would Secure One of These Great Bargains. The Saving to You Will be \$150 to \$250. Open Until 9 p. m.

Tomorrow night this wonderful sale comes to an end. That is the advertised closing date. We feel sure every one of these great bargains will be taken before that time. To make doubly sure that not one would remain tomorrow night, we made another big cut in prices.

We said at the beginning of this sale that neither cost or former prices would deter us in closing out the entire stock. We predicted every instrument would be sold, and our prediction will come true.

The pianos remaining are of the very highest grade. They must be sold. We made sure of that when we made this last great cut in the prices, The question for you to decide, if you need a piano, is, will you be one of the lucky few to secure these last and best bargains of the whole stock

If you need a plano, now is the time for quick action. Secure one of these, save \$150 to \$250, and pay for it on any reasonable terms. Here they are:

\$475 Mahogany and English oak uprights, best makes, best styles, medium and large size, plain and fancy cases; your choice at only Terms cash or payments to suit.

\$500 highest grade, elegant designs, one richly carved: Terms cash or payments to suit.

Uprights, only three left, all different makes, high-\$600 stat and the others richly carved. Your choice at only \$357 Terms cash or payments to suit.

Remember, you have only until tomorrow night to secure one of these great bargains. Better not take any more chances but get here at once.

(INCORFORATED.)

beet culture also is the growth of bet-

ter products noted. From a beet yield-

ing 16 per cent sugar, the college ex-

periments have now produced one that

fakir and a joker.

raising product.

Only a few years ago Kofod wheat

An interesting sidelight of field culture is furnished by the bugs that have been collected from the fields. Queer tricks are some of those shown by weaponless bugs to ape the looks and manners of those able to protect themselves. For almost every stinging insect the college authorities have found bugs, looking like them in color and shape, but belonging to vastly dif-ferent families. Then there is the bug with two big hideous eyes in the top of its head, jack-o'lantern style, which on close inspection prove to be fake eyes, two real ones being in another part of his structure. All insects which harm crops are shown in all stages of their his structure. All insects which harm crops are shown in all stages of their life history, and the college staff is now at work, it explained, in devising ways and means to rid the fields of these pests. What success may be hoped for is illustrated by the apples which have been almost totally freed from worms by study of the habits of the vermin, and application of erad-icating polson at the right time and place. place.

For the people who pay taxes, op-portunity is offered to see where their money goes, so much of it as is appro-priated for experiment farms. From

priated for experiment farms. From the Lehi farm and the St. George farm samples of many products are shown. And the value is not in the lucious grape or inviting peach, but in the manner in which it was found the tree would grow, and in the manner the tree bearing that particular variety thrived in that particular soil and cli-mate while dozens of other varieties dwindled away in death, or survived in sickly thvalidism.

Train Reservations Have Been Made In Many Nearby States-Whitaker The Man in Charge.

John M. Whitaker, of the real estate firm of Taylor Bros., leaves tonight for King Hill to take charge of the big Carey act land drawing which commences at that place on Monday, Oct. 12. Mr. Whitaker will go over the ground and make selections separating the good land from the poorer quality, the idea being that if any person is dissatisfied with the land drawn after the known good sections are all out, he may have his money back, less, of ourse, the small filing fee. Mr. Whitaker carries with him a number of letters containing power of attorney and authorizing him to make

drawings for individuals who cannot attend the drawing personally. Although Mr. Whitaker would prefer all who can to attend the drawing in person, yet to accommodate those who carnot be present he will undertake to make the drawing for them. A great leal of interest has been aroused in the King Hill project, and it is reported that Fullman coaches are already booked with full quota of passengers for the drawing from Palisade and Grand Junction, Colorado, Hood River, Orc-gon, and two from the east.

THE DRAWING.

THE DRAWING. The drawing of lands is to be con-ducted under the direction of the Idaho state land board. Registration for those desiring to draw for the lands will be-gin from five days to a week prior to the day of drawing. The prospective entryman will be re-quired to furnish the receipt clerks with details such as will be necessary to complete the contract and application for entry. The receipts will then be enclosed in an entryman's envelope, which will contain detailed information and instructions for the entryman.

which will contain detailed information and instructions for the entryman. From the receipt window the entry-man will pass to the cashler's window, where a deposit will be made covering the first payment on the amount of land that the entryman desires to draw for, and this deposit, together with necessary information, will be placed in a cashier's envelope and filed in nu-merical order, so that those desiring to have their deposit returned, may do so, by presenting their receipt to the rebate department after the drawing is over. s over.

WILL USE A BARREL.

On the day of the drawing, cubes numbered to correspond with the re-ceipts issued will be checked over by some member of the state land board and placed in the barrel to be used at the time of drawing, the barrel being scaled as soon as all registrations are

closed When the drawing takes place, this barrel will be churned to the entire sat-isfaction of the people present; then some disinterested person selectd by

THOMAS H. SMITH. Department A. Horses,

Department A. Horses. Logan has many good things, but it has only one Thomas H. Smith. For six years he has presided over this sphere of equine activity, and the chances are that he will continue to thus officiate until arrived at a green and gay old age. Mr. Smith is at the balancing point of life, the age of 50 years, though, as far as the eye can note. Is just as good in every way as he was 15 years ago. Mr. Smith says he was 15 years ago. Mr. Smith says he has was born of poor but honest paronts—subjects of Queen Victoria. Smith senior drove an ox-team across the plains of Nebraska, while the wife looked after the handcart, both holding dinary individual, perhaps, dairy prod-ucts would be about all thank you. The maragement, however, concluded that he could take care of triffes like agri-cultural products, bees and other classi-fications of bugology. That the man-agement was well informed is instanced in this case. The name of Winder has been associated in Salt Lake county for a number of ways with a hord of reg-Sinch senior of Nebraska, while the wife looked after the handcart, both holding their own up at the head of the class. Thomas H. saw the light of life and day, in Salt Lake City, Jan. 10, 1858. At the somewhat immature age of 1 he chaperoned his parents to Logan, which was then being settled and opened up. Two years latter the stork express de-livered brother Ralph, and the entire family have remained in Logan ever since. Mr. Smith and his brother own a finc farm of 400 acress near Logan where they have perhaps 1,000 cattle on a hill. He is well broken, has a gen-tle disposition and travels well in dou-ble harness. ble harness.

BUILT HOME IN ONE DAY.

Complete, Five Room Cottage Erected in Record Breaking Time.

A dispatch to the New York Evening Post from East St. Louis, Ill., says:

The building of a five-room cottage The building of a five-room cottage with a basement, painted, plastered, and ready for occupancy, in less than 12 hours, was accomplished by an East St. Louis contractor. Before 7 o'clock yesterday morning the site of the house was a vacant lot with no hint of a house in evidence. In an hour and a half the foundations wave completed; stone and brick the

In an hour and a hair the foundations were completed; stone and brick, the latter for chimneys, were unloaded quickly while a basement excavation was being shoveled out: Meanwhile the corpenters were getting their floor timbers and joists cut up. The flooring took up an hour, and three hours' work trought the house to the ground floor level. Three masons during this time evel. Three masons during this time had run up the chimneys. By noon the roof was well under way, the frame work for wall and cellings completed,

work for wall and cernings completed, and ready for lathers, plasterers, plumbers, gas-fitters and electricians. Women in the neighborhood served lunch for the workers, who quit for the regular noon hour. The cottage has in addition to its five rooms a modern bath room. The house cost \$2,000.

FOR NERVOUSNESS

Take Horsford's Acid Phosphates. Its use is especially valuable in the reatment of weak nerves, disordered di-

"It is well known that Utah contains a great deal of good building brick clay, and paving brick clay, and the manu-facturers can and do furnish an excel-lent product, but a careful examination of these results and a comparison with other results ought to inspire a still closer scrutiny of methods of manufac-ture and burning, so that a still better product will b offered. "The traverse strength is one of the best physical tests for brick, as the brick breaks due to tension and the comparative loads, or tensile stresses show the comparative toughness of the brick. In many places as in the high chmneys the crushing strength is one of the main determining tests. A wide variation is seen in the crushing tensile and shearing strengths of the various brick, the wire cut brick being always stronger than the pressed brick. The crushing strength of good brick should not be below 3000 pounds per

NIGHT FEATURES.

FAIRGROUND NOTES.

anza

Indians to Execute the Famous "Sun," "War" and Snake Dances.

"War" and Snåke Dances. "War" and Snåke Dances. War dances, snake dances, sun dances and all the other weird dances forming a portion of Indian religious ceremonies will be seen at the Fair grounds the rest of the week begin-ing tonight. H. H. Westen of the Strawberry Reservation with head-quarters at Heber city arrived in town yesterday and has been leading a grand rehersal of ear splitting runs and cadenzas all day. The Indians "shumbani" (understand) readily and the show is bound to be one of the biggest features of the entertainment card. It will have opposition how-ever. Night shows have made such a hit that President McDonald and his corps put a big gang of electricians to work early today installing 40 hydra-carbon lamps with reflectors, around the track. These with the searchlight will make night bright as day and running races will be ar-ranged in which the fastest horses on the track will participate. The horse owners are delighted at the arrange-ment as it means more money to them The night races will be as fast as they are novel. This innovation was introduced last night.

the state land board will draw these cubes one by one from the barrel, when the number on the cube, which will correspond with the number of some filing receipt issued, will be called. The entryman holding the receipt of this number (following the instructions

The entryman holding the receipt of this number (following the instructions contained on his envelope) should pre-sent his receipt to the clerk in charge of the drawing, who will place the drawing number thereon. No filing or selection of land can be made unless the receipt contains both the registry and the drawing numbers. After securing drawing numbers. After securing drawing number on his receipt, the entryman is entitled to make his selection of land from the filing plat, which will be in charge of an engineer and description of the land desired will be entered upon re-ceipt, which will then be handed to the contract clerks, who will prepare con-tract in accordance with receipt, and present the same to the entryman for signature, together with the stock cer-tilicate for endorsement. The papers will then be passed to the state land board, where an application

state land board, where an application for entry covering the desired land will be attached, and then signed by the entryman.

Finally, the cashier will detach the stub of receipt showing that the entry-man has filed on land as per his appli-cation to the state land board of Idano. A plat, in charge of a competent en-gineer, will be so placed that all intend-ing purchasers will be able to ascer-tain at all times the amount and location of the land that is still open for entry, this plat being checked as rap-idly as filings are made in the filing office. WHERE KING HILL IS.

The King Hill project is located about 100 miles southeast of Boise, 150 miles west of Pocatello, on the main line of the Oregon Short Line, and has an alti-tude of a little over 2,500 feet above sea level. The minimum of acress which can be filed on is 40, and the first Another immense cake, of the petite dimensions of a cartwheel, was brought to the fair this morning by Supervisor Hewlett, to be served at the display counter of his manufacturing establish-ment. The cake was as sweet as it was large, covered all over with sugar frosting. It went quickly into appre-ciative stomachs. cost of securing a 40-acre tract is about \$276. The land is paid for in 10 equal instalments, one each year. It is neces-

instalments, one each year. It is neces-sary to deposit the amount of the first payment with the company on the day of opening, or when application for se-lection is made. The land is said to be perfect for the cultivation of fruit, as well as all other crops known to the temperate zone. The water is supplied from unfailing springs, supplying the Malad river with water which varies in temperature not more than two degrees during the entire year. The Seeing Sait Lake company is doing a great business at the fair grounds. It has two 25-passenger au-tomobiles which are kept going, tear-ing around all over the fair, with pas-sengers "rubbernecking" particularly at everything in the Midway, and es-genza. ntire year. For the drawing special homeseekers'

excursions are being run from eastern points and special rates will be in effect from all western points to King Hill, Music? Its everywhere around the fair. Held's band renders real music during the races. Two clever orches-tras, the Lafoyette school organization and another, play during the afternoons and evenings in Manufacturers' hall.

Simple and sure== The Reiss band, electric planos and banjos and countless phonographs whang out "toons" about the grounds. All this, with the babel of tongues, "honk honk" of automobiles, contribu-tions from the dog and the livestock shows, and the whistles and screeches of agricultural machinery in operation, constitute a general medley of sounds which is simply indescribable. gestion and constipation.

Engineering Students at University Complete First Work in This Line.

The state school of mines has published a bulletin on "Tests of Brick." in which the results of a series of tests on Utah bricks are given. The bulletin s the first of a series to be issued by the school of mines, covering different subjects of interest to local manufac-turers and consumers. The experi-ments were performed in the mechanitupers and consumers. The experi-ments were performed in the mechani-cal laboratory of the university by E. H. Beckstrand, professor in mechanical engineering, and C. F. French, assist-ant professor in civil engineering. They were assisted by Kenneth Williams, in-structor in chemistry, and Joseph C. Hunter and O. A. Peterson, seniors in the civil engineering course. A number of interesting experiments were made. Ten bricks were selected at random from a lot of 50 that were sent by each manufacturerer in the state. The crushing tests were made on the half bricks, and it was determined that the average Utah wire cut brick supported 7,210 pounds to the square inch, the mottled red pressed brick 4,310 pounds and the straw-colored pressed brick 3,170 pounds. In summing up the report on the tests

In summing up the report on the tests of Utah bricks, the report says:

Minerva Jones, whice of William E., died at that place Wednesday night. The death was a sad one for the húsband, as Mrs. Jones had expected shortly to become a mother. The first intimation that Mrs. Jones was sick was received Wednesday night by Mrs. William Morris of 558 Second East street, moth-er of the dead woman stating that her Morris of 558 Second East street, moth-er of the dead woman, stating that her daughter was very ill. Mrs. Morris left at once for Sparks, but did not arrive in time to see her daughter alive. Mrs. Jones was 24 years old, and was well known in this city, where she resided during most of her life. She is survived by a husband, mother and two sis-ters. The body is expected to arrive in this city either Saturday or Sunday.

LANDS A PICKPOCKET.

A man giving the name of Hugh Rooney was arrested last evening by the police on the charges of attempting to pick pockets and with assault with a deadly weapon. The follow's arrest was the result of complaint made by John McCocey, a local automobile driver

McCooey says that he was at the fair grounds with some friends and while visiting one of the booths he felt while visiting one of the booths he felt a hand in his pocket. Turning around he saw Rooney and told the latter to stop the game. At this Rooney cursed McCooey and then draw a knife and threatened to stab him. McCooey ran for the police and Rooney was soon lo-cated and taken to the city jall.

GOLD DUST will do your household cleaning in half the time, with half the labor

Count the cracks in your kitchen floor. There's no end to them. There's no end to the dirt either if you clean with greasy soap. Soap and water are all right in their place, but they won't do the work of GOLD DUST.

GOLD DUST pries out dirt-dissolves it. Hot water rinses it away-leaves your woodwork clean and fresh.

Aside from doing better work, GOLD DUST saves about half your time and labor. It is a cleans-

ing powder of magic power, which starts to clean the moment it dissolves.

GOLD DUST is soap with its working clothes on.

Made by THE N. K. FAIRBANK COMPANY Makers of FAIRY SOAP, the oval cake.
