

SECY. TAFT WILL BE DISAPPOINTED

If the Panama Canal is Not Completed Within Eight Years.

TRIBUTE TO FRENCH PEOPLE.

Americans Have Never Appreciated What They Did on the Isthmus—A Danger in the Work.

Chicagoh, April 28.—"If the Panama canal is not completed within eight years, I shall be greatly disappointed. If it is completed in less time than I shall not be greatly surprised."

This statement, made tonight by Secy. of War Taft before the Business Men's club of this city, was loudly cheered by the 1,500 members of the club gathered inside the banquet hall.

The banquet tendered the secretary by the Business Men's club came as the climax to the last of three days of his western trip, and it was a fitting culmination to the flattering reception that has been extended to him on every side by his Ohio friends. The hall was packed to its utmost capacity, and more than 400 applications for tickets of admission to the banquet were declined because there was no room for the late applicants.

The last day of the secretary's trip was full of work for him and crowded with receptions flustering to him both as an orator and as a man. In the morning he delivered an address to the students of the law school of Cincinnati university, where he still holds his position as dean of the law school. Later he appeared on the floor of the chamber of commerce and made a brief address.

This afternoon Mr. Taft conferred with N. C. Wright of Cleveland regarding the Ohio political situation. Mr. Wright told him of the position of leading Republicans in the northern part of the state.

Tonight's banquet was one of the most pretentious affairs of the kind ever seen in the city.

The appearance of the secretary was the signal for an outburst of applause that continued for several minutes.

Judge Horner H. Linton of Nashville, former colleague of the secretary upon the federal bench, introduced him.

Secy. Taft announced that he would speak on the "Panama Canal" and particularly upon the improvements and rapid progress in the work.

"It is only by a comparison of this condition existing at the time of my visits," said the secretary, "that I am able to give an adequate idea of the work that has been accomplished and of the present condition of the work. I would like in passing to pay a tribute of justice to the French people, for what they did down there has never been properly appreciated by the American people. The great danger of the work of this character under the auspices of the American people is that the work of construction will be undertaken before the work of preparation is completed. I do not think that the preparatory work of the last two

ACID IN THE BLOOD.

A well-known authority on Rheumatism gives the following valuable yet simple and harmless prescription, which any one can easily prepare at home:

Fluid Extract Dandelion, one-half ounce; Compound Sarsaparilla, three ounces.

Mix by shaking well in a bottle, and take a teaspoonful after each meal and at bedtime.

He states that the ingredients can be obtained from any good prescription pharmacy at small cost.

This mixture is said to relieve almost any case of Rheumatism, which is nothing more or less than sour blood—too much acid in the system, which in damp, cool weather forms into minute crystals about the joints and muscles, causing the awful pain and misery of Rheumatism.

The above mixture is said to force the kidneys to purify and sweeten the blood, causing the Rheumatism pain and swelling to diminish with each dose, until permanent results are obtained, and without injuring the stomach.

It is worth while giving this a trial, anyhow.

years has been productive of anything but the most beneficial results.

"My visit this year was to settle the question of the location of the locks, the completion of which will, in my opinion, mark the completion of the canal. It is possible, however, that the finish of the work in the Culebra cut will be the end of our labors. In this case there are yet to be excavated 52,000,000 cubic yards of earth, exclusive of the digging to be done on the approaches to the cut proper. In the nine miles of the cut there are now 35 steam shovels at work, and they will take out on the average of 1,000,000 cubic yards per month. This rate may be increased until they have 50 shovels at work, and then it will gradually decline until it will probably be somewhat below the 1,000,000 cubic yards per month. We will not be able to work as many shovels as we get lower down in the cut, where the space is more narrow.

"We advertised for bids on the canal work and then declined them for the reason that we found that it would be necessary for the contractors to have the help of capitalists and we would be compelled to allow to the contractors 7 per cent interest on the money they would be compelled to borrow from the capitalists. As we could borrow money at 2 per cent this 7 per cent proposition did not appeal greatly to us.

"To us in responsibility it is a great comfort to be able to introduce the army engineers upon the work. We have three of them there and if one falls out, the continuity of the work will be undisturbed. It is only fair to say of the army engineers that there will be no graft that they can suppress and there will be no bad work accepted that they can supervise. No doubt engineers from civil life would act in a similar manner. But if any of you gentlemen have ever managed a work of magnitude where everybody had the right to poke in his nose and insist upon this and that, you would know how great is the relief to have that done away with. The record of the army is a guarantee that the work

will be capably and honestly performed."

As to Cuba, he declared that the Taft resolution had established our policy there. "Change by insurrection was about to be adopted when we intervened," he continued. "Our means of settlement, and with conferences with Moderates and Liberals, the matter was brought to an end. But when we took charge we promised to stay only 'till tranquility had been restored and a firm government established.' It may be all right to talk about annexation and a protectorate, but we made a solemn promise and we cannot afford not to carry it out."

He estimated that it would require until September, 1905, for again allowing the Cubans to show whether they can carry on a stable government. It was then necessary to give them time to show that the conditions are complied with.

Of Porto Rico he spoke in conclusion, telling of its natural advantages and the improvements and ambitions. The people of that island want statehood and citizenship. They have had the protection of citizens, but he suggested that care and consideration should be exercised before statehood was extended beyond the states.

THE MUTUAL ELECTION.

Investigation of Charges of Forgery of Ballots Continues.

New York, April 29.—Asst. Dist. Atty. Smyth today resumed the investigation of the charges of forgery which have been made in connection with the recent election in New York and Mutual Life insurance companies.

Mr. Smyth, with Asst. Deputy Howe, went to the offices of the New York Life, where they examined about 500 of the alleged forged ballots.

Jacob Frank, an agent of the New York Life, whose name appears as a witness on many of the ballots, appeared at the office of the attorney's office tomorrow, according to Mr. Smyth.

ADMIRAL KAUTZ'S ASHES.

Washington, April 29.—The ashes of Rear-Admiral Albert Kautz, retired, who died in Florence, Italy, Feb. 6 last, and whose body was cremated in Italy, were quietly deposited in the national cemetery at Arlington today.

KILLED BY EXPLOSION.

Cettinje, April 29.—One person was killed and 30 persons seriously injured Sunday night by an explosion of dynamite at the harbor works at Antivari.

The buildings surrounding the harbor works were badly damaged and the telegraph lines were wrecked.

A CHANGE FOR PANAMA.

Panama, April 29.—Henry Liverneth, manager of the canal commission, department of commerce, and John Burke, assistant chief of the department of material and supplies, has been appointed to succeed him.

STAY IN BURNHAM CASE.

New York, April 29.—William Rand, Jr., counsel for the Burnham case, president of the Mutual Reserve Fund Life association, today gave notice to the supreme court that he will apply for an order directing the district attorney to stay a change of venue in the trial of Burnham on a charge of larceny should not be granted. Upon Mr. Rand's application, Justice Elsworth granted a stay of proceedings in the Burnham trial until a decision is given on the matter.

ENEMY SHOTS GENERAL.

Cettinje, April 29.—Gen. Martinevitch, governor of Podgoritz, and Chief of Police Masceveda were shot today by an enemy, and were seriously wounded. The assassin was killed.

DIAMONDS GO HIGHER.

New York, April 29.—Diamond importers who have returned from Europe within a few days agree in saying that they have been higher than ever before, and that all American buyers are eagerly taking all the diamonds they can get. The output of South African diamonds has been increasing in quantity as well as in price, according to dealers here. Most of the time the South African diamond trust has declared 32-33 per cent net profit on its output, and the price of diamonds has been steadily increasing. One of the independent companies, it is stated, is paying 60 per cent profit this year, and in the last few years has returned \$2,000,000 in dividends on \$50,000 capital.

BURNED TO DEATH.

La Crosse, Wis., April 29.—Mrs. A. J. Elliott, aged 70, of Everett, Wash., was burned to death today at the home of her daughter, Mrs. R. J. Russell, wife of a local manufacturer. The accident was caused by the overturning of an alcohol lamp, which the aged woman was using to heat a curling iron.

DAVID J. COOK DEAD.

Denver, April 29.—David J. Cook, the well known pioneer, pathfinder and detective, died suddenly today of heart disease. He was born in La Porte county, Ind., in 1840, and came west in 1863. He was employed for a time as a government detective and has been connected with the Denver police department almost continuously since 1897, serving two terms as city marshal. His book "Famous Indians" is a reliable work on the early criminal history of the state. "General Cook," as he was generally known, was absolutely fearless and was a terror to wrongdoers throughout the west.

BOLD, SUCCESSFUL BURGLARY.

New York, April 29.—A burglar entered the bedroom of Mrs. John Frazier of Wakefield borough, early today and took a pocketbook containing \$1,000 from under her pillow. Mrs. Frazier awoke just in time to see the man climb through a window to a ladder which he had placed against the side of the house to gain an entrance. Mrs. Frazier lives alone in a little farm house far from any neighbors and by the time the alarm had been spread the thief had disappeared. The money was to have been placed in a bank today.

BIDDING FOR GOLD.

New York, April 29.—There was keen competition today for gold in the market, amounting to six million. The Bank of England, however, sold its French gold holdings and secured \$3,500,000 at a half-penny advance. India took \$1,000,000 and Paris obtained the balance, \$1,500,000.

WIFE SHOT IN A QUARREL.

San Francisco, April 29.—Mrs. Thomas, wife of Bradford Thomas of San Jose, was fatally shot last night by a carpenter named Adams. The shooting took place on Stephen M. Adams, at 224 Twenty-second street. Mr. and Mrs. Thomas came up from San Jose on the morning train and were alone in the room. Adams, who was employed on Adams when a dispute arose between him and Thomas. Adams drew a revolver and fired, hitting Mrs. Thomas in the head with it and his wife, interfering to help him, was shot. He wound, the physicians say, will prove fatal.

PAID THE HEAD TAX.

Victoria, B. C., April 29.—The first Chinaman to enter Canada, paying the head tax of \$500 since it was first imposed three years ago, arrived today when he paid the tax. Heretofore there was but one payment by a steamship company for a Chinaman who had escaped from a steamer from Hongkong.

THE RICHEST MAN IN THE WORLD.

The richest man in the world can not have his kidneys replaced nor live without them, so it is imperative that he keep these organs. If Foley's Kidney Cure is taken at the first sign of danger, the symptoms will disappear and health will be restored. As it strengthens and builds up these organs as nothing else will, it is a most valuable remedy. Dr. J. C. Foley writes: "I have used 'Foley's Kidney Cure' and take great pleasure in stating it cures all urinary diseases, which certainly would have cost me my life." Sold by F. J. Hill Drug Co.

SKIN SPECIALISTS SIMPLIFY THEIR WORK

Finding of Eczema Germ Leads to an Easy and Certain Treatment for All Skin Diseases.

In studying skin diseases, medical men have found the only real way to cure the skin is through the skin. Specialists have found that internal medicines are useful only as an aid in the treatment of special and obstinate cases, and that these stomach medicines alone can never effect a cure.

After finding the germ of skin disease the work of the specialists was simplified. All they needed was a prescription that would kill the germ without injuring the skin. Various experiments developed that oil of wintergreen, properly prepared with other necessary agents, made a soothing wash that instantly attacks the germs yet left the healthy skin intact. It made an ideal lotion, for it did not irritate the skin, but it was clearly and hygienic in every way.

Any physician can get the D. D. D. Prescription referred to above, direct, by communicating with the laboratory of the D. D. D. Company in Chicago. This healing, soothing liquid when applied to the skin has been so successful in giving relief that specialists recommend it freely, and credit is certainly due them when they could make so much larger fees by writing out their own prescriptions. Here is a grateful son's simple statement regarding the wonderful cure D. D. D. accomplished for his aged mother:

"On account of my mother's advanced age (she being eighty-eight), it was the opinion of all the doctors who saw her that she had eczema so badly she never could be cured, and they all failed to give her any, or little, temporary relief.

"After using seven bottles of your remedy she is almost cured, and by the use of a little once in a while, never suffers a particle, can sleep good all night and is perfectly happy."

S. J. PEABODY, President and Treasurer of S. J. Peabody Lumber Company, Columbia City, Ind.

We recommend washing with D. D. D. Soap in connection with the use of D. D. D. Prescription. D. D. D. Soap, for that matter, is the BEST cleanser for all persons who want to take perfect care of the skin.

"Ask your physician or call on F. J. Hill & Co., druggists, in your town. One of these will keep a stock both of D. D. D. Prescription and D. D. D. Soap for sufferers from skin disease."

A RUNNING FIGHT.

Unknown Man Fires on Officer, Sees Capture is Inevitable, Kills Himself.

Willows, Cal., April 29.—A man unknown here killed himself last night after a running fight with Officer Kugler several hours. When told to move on he responded with four shots. He was followed by a posse and when capture was inevitable committed suicide by shooting. It is suspected that he may have been the crook now being sought by John Marovich, an Oakland restaurant man, on April 12.

The body now in the morgue bears marks given in the description of Marovich. The man was about 35 years of age, an officer is coming from Oakland to identify the remains, when an inquest will be held.

CONTAGIOUS BLOOD POISON NO LIMIT TO ITS POWERS FOR EVIL

Contagious Blood Poison has brought more suffering, misery and humiliation into the world than all other diseases combined; there is hardly any limit to its powers for evil. It is the blackest and vilest of all disorders, wrecking the lives of those unfortunate enough to contract it and often being transmitted to innocent offspring, a blighting legacy of suffering and shame. So highly contagious is the trouble that innocent persons may contract it by using the same table ware, toilet articles or clothing of one in whose blood the treacherous virus has taken root. Not only is it a powerful poison but a very deceptive one. Only those who have learned by bitter experience know by the little sore or ulcer, which usually makes its appearance first, of the suffering which is to follow. It comes in the form of ulcerated mouth and throat, unsightly copper colored spots, swollen glands in the groin, falling hair, offensive sores and ulcers on the body, and in severe cases the finger nails drop off, the bones become diseased, the nervous system is shattered and the sufferer becomes an object of pity to his fellow man. Especially is the treacherous nature of Contagious Blood Poison, shown when the infected person endeavors to combat the poison with mercury and potash. These minerals will drive away all outward symptoms of the troubles for a while, and the victim is deceived into the belief that he is cured. When, however, the treatment is left off he finds that the poison has only been driven deeper into the blood and the disease reappears, and usually in worse form because these strong minerals have not only failed to remove the virus from the blood, but have weakened the entire system because of their destructive action. S. S. S. is the only real and certain cure for Contagious Blood Poison. It is made of a combination of healing blood-purifying roots, herbs and barks, the best in Nature's great laboratory of forest and field. We offer a reward of \$1,000 for proof that S. S. S. contains a particle of mineral in any form. S. S. S. goes down to the very bottom of the trouble and by cleansing the blood of every particle of the virus and adding rich, healthful qualities to this vital fluid, forever cures this powerful disorder. So thoroughly does S. S. S. cleanse the circulation that no signs of the disease are ever seen again, and offspring is protected. Write for our special book on Contagious Blood Poison, which fully explains the different stages of the trouble, and outlines a complete home treatment for all sufferers of this trouble. No charge is made for this book, and if you wish special medical advice about case or any of its symptoms, our physicians will be glad to furnish that, too, without charge.

CREW GOT WHISKY, MUTINY FOLLOWED

Officers Got Inking of Intent to Murder Them and Then 'Seize the Ship.'

MADE FULL PREPARATIONS.

Held Mutineers at Bay All Night—Ring Leaders Seized, Put in Irons and Imprisoned.

Portland, Or., April 29.—An Oregonian special from Astoria says the overdue British bark Zineta arrived this evening 137 days from Antwerp with a general cargo including 2,400 tons of cement, consigned to Fuller & Co. of Portland. She brings an interesting tale of a mutinous crew, fierce gales, baffling colors and obstinate winds. In speaking of the trip this evening, Capt. Swan, master of the Zineta, said:

"We sailed from Antwerp Oct. 12 and looked for a good passage. We struck fair winds almost immediately after leaving the channel and slipped into the northeast trades into the southeast trades in excellent time. When about 10 days out the crew broached the mutiny and took quite a quantity of whisky, which they drank. They created no trouble, however, and after sobering up came aft, apologized for what they had done. All went well until about 10 days later, when they broached the cargo again and then the trouble commenced. All the crew was loyal, however, excepting four men. One of these was a full blooded Indian from Seattle, one a Frenchman, one an Italian and the other a French Canadian. We had an inking that they intended to murder the officers and seize the ship, so at nightfall we prepared for them. I called the other men aft and we all remained on the poop deck and with a revolver in my hand I stood at the head of the steps and held the mutineers at bay until daylight. When day came and it was safe to go down on deck we seized the four ringleaders, placed them in irons and imprisoned them in the deckhouse. We kept them there for five days, when we reached Bahia, where I put into complete my crew. At Bahia I called for a naval court and the four sailors were sentenced to four weeks in prison."

"From Bahia to the Horn we had fair weather, but off Staten Island we ran into a terrific gale. The main top gallant mast again was carried away and we lost nearly all our canvas. Gale after gale followed each other in rapid succession, and during one of them about 10 o'clock at night Gustave Ryberg, one of the men I shipped at Bahia was washed overboard from the boom and was lost. After leaving the Horn we again met rather weather until 8 degrees south, a hurricane struck up that was one of the worst I ever saw, but we suffered no damage of note."
